In this challenging role, you will assist the Head of Unit appraise, commission, monitor and evaluate projects and provide independent scientific advice. You will undertake a secretariat role for Research and Development customers and science groups and maintain project and programme details. You will also support the Head of Unit who is the Co-ordinator for a Commission funded project (ERA-NET) ‘Co-ordination of European Marine Fisheries Research’ which involves 17 European Partners.

You must have a good degree or equivalent in a Marine related field, supported by a higher degree, together with an interest in the management and administration of science. You will have the ability to work efficiently under pressure to tight timescales with good team working skills. You will also have excellent communication and interpersonal skills, with the ability to communicate with scientific and non-scientific people. This role will involve some UK and European travel.

If you wish to discuss any aspect of the position, please contact Dr John Lock, Head of Fisheries Science Unit, Area 6C, 3-8 Whitehall Place, London SW1A 2HH, email: john.lock@defra.gsi.gov.uk

To find out more, please visit our website www.defra.gov.uk

If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WR5 2LQ. Tel: 01905 768837 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting reference RCRE303.

Closing date: 2 December 2005.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion, or sexual orientation. We operate a family-friendly policy including flexible working patterns. The posts are open to British, Commonwealth and EU Nationals.

Be part of the future of FORENSIC SCIENCE

LGC and Forensic Alliance are now one and the same, and will continue to shape the future of forensic science, putting scientists first while delivering a first-class service to customers.

TEDDINGTON OXFORD LEEDS TAMWORTH RUNCORN RISLEY

High-quality science - Great development opportunities - Excellent rewards

Owing to increasing demands from customers, we continue to grow and now need additional forensic scientists in a number of areas.

**Forensic chemists** Tamworth - Risley - Culham
Experienced court reporting forensic chemists with experience in one or more of the following science types: fire investigation, glass or shoe marks.

**Forensic toxicologists** Culham - Teddington - Runcorn
Court reporting toxicologists with experience of GCMS, HPLC and LCMS.

**Electron microscopist** Tamworth/Oxford
A scientist (not necessarily from a forensic background) to provide a scanning electron microscopy service, analysing gunshot residues using instruments, both at Tamworth and in the University of Oxford. Previous experience of using an electron microprobe is desirable but not essential. The successful applicant will work permanently at Tamworth but may be required to work at Oxford on a regular basis.

To discuss your future with LGC Forensic Alliance and to be appreciated for your science, contact John Cameron, Head of Human Resources, at any time on +44 7968 707735 or send your CV to john.cameron@forensicalliance.com

RDL SCIENTIFIC
Regulatory Executives, Clinical Data Managers, Safety Scientists, Laboratory Scientists and Others

For quick and personal service, call us first

RDL offers a comprehensive range of benefits including a highly competitive salary.

Please email your CV to Pauline Rouart at pauline@rdlscientific.com

These positions and others can be seen on our website.
www.rdlscientific.com

RDL

There are several positions in each discipline to be filled, mainly for blue chip pharmaceutical companies in London and the Home Counties. Basic requirements are a relevant degree and in some cases a period of experience in the healthcare or related industries.

REGULATORY EXECUTIVES
You will be involved in the writing of regulatory documents for submission to marketing authorities. You will need excellent writing and organisational skills and preferably an MSc or PhD in Life Sciences.

CLINICAL DATA MANAGERS
Life science graduate with 12 months clinical data management experience. Must have competency in Oracle Clinical or similar with the ability to adapt to and work with other systems.

CLINICAL SAFETY SCIENTISTS
Some relevant experience in Safety, Clinical Research or Data Management is preferred.

LABORATORY SCIENTISTS
We have openings for various skill sets including Analytical Chemists, Bioanalysts, Formulation Scientists, Biologists, and Lab Technicians amongst others. All of these opportunities are based in and around London and the Home Counties.

If you have registered with us previously, your details will already be on our Database.

Develop your talents with SembCorp on Teesside

ENVIRONMENTAL LABORATORY MANAGER
COMPETITIVE SALARY AND ATTRACTIVE PACKAGE

SembCorp Utilities UK is a company, which is expanding and believes its employees are key to its success. We seek to employ the best and are committed to the development of all our employees.

A vacancy exists for an Environmental Laboratory Manager within the Environmental Services Group at SembCorp Utilities UK. The purpose of the role is to head the laboratory, formulate the strategy and deliver the additional sales for the analytical business by increasing the customer base and to technically support the range of services offered by SembCorp.

The role holder will be expected to:
• Formulate the strategy for developing the laboratory
• Work with the technical team to introduce new techniques to meet customer needs

You will be a self-starter, keen to react, with the ability to lead and motivate others. You will have an in depth knowledge of a range of analytical and environmental techniques and essentially you will hold a degree level qualification in a relevant science.

If you feel you meet the requirements and want to find out more about the outstanding prospects and attractive package on offer, please send a full CV with current salary details to the address below, or email us at: jobs@sembutilities.co.uk and we will issue an application form.

Joy Walker, SembCorp Utilities HQ, PO Box 1985, Wilton International, Middlesbrough, TS90 8WS.

Closing Date: 18th November 2005

[2524-026 (2005) : 61]
UNESCO GLOBAL GEOPARKS NETWORK
NORTH PENNINES
Area of Outstanding Natural Beauty

**Peatscapes Project Manager** Grade P03 £26,703 - £29,004 pa
**Peatscapes Field Officer** Grade P01 £25,437 - £27,411 pa
(Initial Contracts to January 2009 with potential for extension thereafter)

The North Pennines Area of Outstanding Natural Beauty (AONB), Britain's first UNESCO European Geopark, has a nationally significant peatland resource. The North Pennines AONB Partnership, the joint advisory body for the AONB, is seeking to appoint two enthusiastic people to lead our major new Peatscapes project, aimed at conserving and celebrating our peatland heritage.

We need a Project Manager to oversee the work and lead on aspects relating to the further development and implementation of the project actions. We also need a Field Officer, who will be responsible for contact with peatland owners and managers, developing best practice in conservation and management, organising training events and helping to deliver and monitor new restoration projects. You will be supported in this work by colleagues in the AONB Partnership Staff Unit and an Advisory Group of organisations including the funding partners the Environment Agency, English Nature, Countryside Agency and Northumbrian Water. You will be based in the AONB Partnership office in Stanhope, Weardale, and employed by the AONB Partnership's host authority, Durham County Council.

Applicants should preferably be qualified to degree level in a relevant subject, such as geography, land management or environmental science. Applicants without a degree may be considered if they have considerable relevant experience. You must be able to demonstrate excellent communication, negotiating and influencing skills. A track record of successful work in partnership with landowners and a wide variety of public, private and voluntary sector organisations is essential, as is experience of peatland conservation and project management.

Anyone wishing to discuss the posts informally may do so by contacting Chris Woodley-Stewart, or Dr Katharine Birdsall on (01388) 528801. Application forms and further details are available from the Deputy Chief Executive (Environment and Change Management), County Hall, Durham, DH1 5UQ. Telephone: (0191) 383 3806, or e-mail maria.littledyke@durham.gov.uk. Please state clearly if you wish to be considered for both posts, for which a separate application form will be required. Closing date: Friday, 11th November 2005.

Interviews will be held in Stanhope on 22nd November (Project Manager) and 23rd (Field Officer).

Further details about the AONB Partnership and the area can be found at [www.northpennines.org.uk](http://www.northpennines.org.uk)

We are seeking a life-science graduate with some experience in commissioning medical information to join our special projects team. In this challenging role, you will liaise with international opinion leaders to develop a strong programme of reviews and supplements for the clinical community. We are seeking a resourceful team player with a good eye for detail and an organised approach.

Please send or e-mail your CV and a letter describing your reasons for applying to: Dr David Hughes, Publisher, Future Medicine Ltd Unitec House, 3rd Floor, 2 Albert Place, Finchley Central, London N3 1QB E-mail: d.hughes@futuremedicine.com

Molecular / Cell Biologist
based at Addlestone, Surrey

Molecular/Cell Biologist - ADP3537
You will be working to develop novel tissue culture models for the propagation and characterisation of TSE’s. You will be a key player in the long-term development plans for establishing links with University partners in Europe. A relevant scientific degree is required and a PhD in Cell Biology, Molecular Biology or similar area would be an advantage. A broad experience in the maintenance and manipulation of mammalian tissue cultures is required. Experience in protein extraction, Western Blot and ELISPOT methodologies would be an advantage. The post is in Pay Band D £22,300 - £32,100 per annum.

Molecular Biologist - ADP3536
You will be assisting with the research and development of improved diagnostics; application of novel approaches to improve microbial typing; research into host microbial interactions; the development of Brucella DNA vaccines, particularly on Molecular Biology; overseeing the development of an integrated database of all typing data, presenting work at national and international meetings and producing publications in scientific journals. A relevant scientific degree is required preferably with a substantial element of Molecular Biology. The ability to demonstrate good practical skills in a broad range of molecular biology techniques including PCR, real time PCR, gene cloning, Southern blotting, gel electrophoresis, DNA sequencing and familiarity with bioinformatics would be an advantage. The post in Pay Band E £17,850 - £27,350 per annum.

Both posts are full-time for 3 year Fixed Term (with the possibility of extension or permanency). The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs

Veterinary Laboratories Agency
Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (JAJ), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP 3537 for the Molecular/Cell Biologist position or reference ADP 3536 for the Molecular Biologist position. The closing date for receiving completed application forms is 18 November 2005.

SEPA
Scottish Environment Protection Agency

SEPA is responsible for regulating and improving Scotland's natural environment. Our Chemistry Department provides chemical information, advice and expertise to support our statutory duties and its state-of-the-art laboratories offer a comprehensive chemical monitoring programme.

**Assistant Chemists (Inorganics/Trace Metals Team)**
From £14,927 (fixed term post pro-rata)
1 permanent post Ref: OPEA3379
1 fixed term post to 30/9/2006 Ref: OPEA3385

Both based at SEPA's Edinburgh Laboratory

You will carry out automated chemical analysis for trace metals, pH, BOD, nutrients etc. in water and other environmental samples. You will also assist in maintaining and troubleshooting instruments, as well as developing new analytical techniques and reporting on environmental data.

Ideally you will have a background in an analytical laboratory and experience of QA systems. Qualified to HNC standard, or ideally degree level, in Chemistry or a related subject, you will be a team player with a flexible attitude and first class communication skills.

The closing date is 17th November 2005.

For specific details on this post, to download an application form or to find further information about SEPA please visit [http://www.sepa.org.uk/vacancies](http://www.sepa.org.uk/vacancies)

Alternatively you can call 01786 452555 or email recruitment@sepa.org.uk to receive these in printed format. Please quote the relevant reference number(s) in any correspondence.

CVs will not be accepted as part of the selection process.

[2524-033 (2005) : 63]
A rewarding career, a better future.

The SNH Maritime Group provides support and advice, internally and externally, on a range of issues as diverse as the habitats and species we map and monitor. In one of these key posts, you'll join a team of biologists and ecologists working to raise awareness and understanding of our maritime natural heritage, while undertaking our programme of surveys.

**Marine Advisory Officer**  
Battleby, Perth, permanent.  
Ref: AC119  
While providing advice to colleagues throughout southern Scotland on activities and developments affecting the marine environment, you'll also coordinate the maritime input to the Scottish Biodiversity Strategy and UK Biodiversity Action Plan.

**Marine Advisory Officer**  
Inverness, 1 year FTA with possibility of extension or permanency.  
Ref: AC88NI  
You'll support colleagues across northeast Scotland on issues affecting the marine environment, as well as providing advice across the organisation on Marine Renewables and implementing the Water Framework Directive within coastal and transitional bodies of water across the country.

**Inshore Fisheries Advisory Officer**  
Battleby, Perth, 2 year FTA.  
Ref: AC94  
Helping us deliver sustainable inshore fisheries management, you'll prepare and deliver technical guidance, review survey data from recent management schemes, manage research contracts and represent SNH's interests on relevant partnership projects.

For any of these posts, you'll need a first or second-class honours degree in a relevant subject coupled with two years relevant postgraduate experience, giving you a good understanding of Scotland's maritime natural heritage and a commitment to its conservation. It's also important that you share our passion and enthusiasm, while you'll need strong communication and project management skills.

In return we are offering a starting salary of £21,911 with guaranteed pay progression for satisfactory performance, plus a choice of final salary and stakeholder pension.

To find out more about the roles, and to apply, please visit [www.snhjobs.co.uk](http://www.snhjobs.co.uk)

Alternatively, call Anna Powell on 0131 446 2261 or e-mail snh@e-penna.com quoting the appropriate reference and your address details.

Closing date for completed applications is Friday 25th of November 2005.

[2524-036 (2005) : 64]
MRC National Institute for Medical Research

RESEARCH TECHNICIAN

We wish to appoint a Research Technician to a permanent position in the Division of Mycobacterial Research (http://www.nimr.mrc.ac.uk/mycobact/) to work in a team studying the pathogenesis of Mycobacterium tuberculosis using a molecular genetic approach. The types of studies being undertaken include investigating the control of gene expression in mycobacteria as well as creating mutant strains and analysing their phenotypes in vitro and in infection models. In addition, the postholder will have shared responsibility for the maintenance of Category 3 containment facilities.

Applicants should possess a degree in Microbiology/Molecular Biology, and have experience in the application of relevant molecular techniques to the study of bacterial systems. Excellent technical and organisational abilities are essential. Experience with containment techniques, expression analysis or protein purification would be an advantage. Good communication skills and the ability to work well as a member of a team are also required.

The starting salary range for this permanent MRC Band 5 post will be from £20,432 to £23,325, per annum inclusive of Location Allowance.

An application form and full job description can be downloaded from the Institute web site at: www.nimr.mrc.ac.uk/jobs. Alternatively, call 020 8816 2530, or write to the Personnel Office, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA, quoting reference IMR/0229.

The closing date for completed applications is 25th November 2005.

The MRC is an Equal Opportunities Employer

[2524-037 (2005) : 64]
INFORMATION RESEARCHER

We are seeking a researcher in the area of pharmacogenomics and personalized medicine to join our publishing team. The ideal candidate is likely to be a recent graduate in molecular biology, human genetics or a related field. Responsibilities include web-based desk research and liaison with contributors and opinion leaders. Previous experience is not required, but you should be a well-organised, computer-literate team worker. The role demands a good eye for detail and an ability to work to deadlines.

Please send or e-mail your CV and a letter explaining your reasons for applying to: Tracy Davis, Product Development Manager, Future Medicine Ltd Unitec House, 2 Albert Place, Finchley Central, London N3 1QB
E-mail: t.davis@futuremedicine.com

Grow your career within a growing Company

**RESEARCH CHEMIST**
- Cambridge, UK • Competitive salary to reflect ability • Final Salary Pension • Bonus

We are looking for a commercially focused Research Scientist with potential to progress into a senior management role.

Ideally, you will be recently educated to degree level in Chemistry. You will have some knowledge of composites and their various applications. You will have at least 1-2 years’ research or product development experience (preferably gained in the aerospace or automotive sectors). You will also be expected to manage your own projects, from product conception to scale up, whilst working closely with sales and marketing, customers and production.

On a personal level, you will have a very practical approach and be target focused. You will be assertive and self-motivated, and you will have a well-structured approach to work. You will be capable of working under pressure and handling competing demands. You will have the communication skills to be able to work effectively with customers and people at all levels within our organisation.

If you think that you meet our requirements and you would like a challenge within your career, please send your career and salary details to Jill Hanby, HR Officer; e-mail: recruitment@hexcel.com

Closing date 20th November 2005.

For over half a century, Hexcel has pioneered the development of advanced composite materials for the commercial aerospace, space & defence, electronics, wind energy and the automotive industry. With facilities and customers around the world and annual sales in excess of $1 billion, we are truly a global business.

HEXCEL

[2524-041 (2005) : 65]
CHEMISTRY GRADUATE
A full-time position is available for an enthusiastic and adaptable team member with a strong chemical background. Job duties involve the evaluation of chemical and crystallographic information from published papers and research scientists worldwide for input to the Cambridge Structural Database (CSD) - the world’s repository of small-molecule crystal structures. Applicants should hold a first degree or equivalent qualification in chemistry and have basic IT skills. Job-specific training will be given.

The CCDC is an independent non-profit institution founded in 1965 that compiles the Cambridge Structural Database (CSD) and develops software applications in structural chemistry and molecular modelling. We have 50 employees, and offer a lively and varied working environment, competitive salaries, a final-salary pension scheme and other benefits.

A letter of application, together with full details of education and employment history and the names of two referees, should be addressed to Dr Stephen Salisbury, Business Director, CCDC, 12 Union Road, Cambridge CB2 1EZ, to arrive by Monday 14 November 2005. We expect to interview during the week of 21 November 2005.

Science and Engineering roles at the heart of defence
POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
[dstl]
Dstl is part of the Ministry of Defence

Opportunities in Energetics
Fort Halstead, Nr. Sevenoaks

Within Dstl - the Defence Science and Technology Laboratory - the Energetics Department carries out research into explosives and pyrotechnics on behalf of the Ministry of Defence (MOD) and allied governments. We look at both present and future capabilities, providing advice on the detection, safe disposal and forensic evidence of explosives, ordnance, munitions and weapons and their related vehicles. Key to this is developing our scientific and engineering expertise in these fields as well as maintaining a Forensic Explosives Laboratory. We now have the following opportunities for highly motivated, flexible team players:

**Forensic Explosives Laboratory (FEL)**
Forensic Case Officers
up to £34,000 & benefits
You will provide expert advice and testimony to the police, Courts and other security agencies on the explosives aspects of incidents involving the criminal misuse of explosives. You will take responsibility for forensic explosives cases, from submission of items at the laboratory, to giving expert testimony, at sometimes high profile cases in Court and attending crime scenes. Specialist training will be provided. A practising forensic scientist, you should have a good relevant honours degree, at least two years' postgraduate experience in a forensic laboratory, sound communication skills and be willing to work rostered on-call duties, requiring occasional unsocial hours. Membership of a professional body, such as RSC, CRFP registration, experience of giving expert evidence in Court and a willingness to undertake occasional travel overseas are desirable. Closing date: 2nd December. Ref: 020844NS.

Explosives Ordnance Disposal (EOD) Group

**Electronics and Instrumentation Engineer**
up to £26,500 & benefits
You will support both the EOD Group project teams in their explosives trials and experimental programmes, and the FEL with its investigation of incidents involving criminal misuse of explosives. The work includes the design and use of electronics for the measurement of explosive output (e.g. pressure, temperature, acceleration), development and evaluation of transducers for the EOD teams, and assessment of electronic circuitry and communications equipment (RF) for evidential purposes for the FEL. You will work closely with scientists and engineers, installing and operating specialist equipment at both UK and overseas trials. You will also assist in the processing and analysis of the raw experimental data. A degree or equivalent in electronics or physics is essential. Good communication skills and a willingness to travel are important. Practical experience in explosives handling, an understanding of initiation circuitry and instrumentation and trials work are desirable. Closing date: 25th November. Ref: 020845NS.

**Instrumentation Specialist**
up to £22,000 & benefits
An electronics engineer or physicist is required to support EOD project teams with explosives trials and experimental programmes. The work includes the design and use of electronics for the measurement of explosive output (e.g. pressure, temperature, acceleration), development and evaluation of transducers and repair and maintenance of equipment holdings. You will work closely with scientists and engineers, installing and operating specialist equipment at both UK and overseas trials. You will also assist in the processing and analysis of the raw experimental data. A degree or equivalent in electronics or physics is essential.
A proven track record in trials instrumentation is desirable. Closing date: 25th November. Ref: 020846NS.

**Instrumentation Engineer**  
up to £17,000 & benefits  
You will support EOD project teams with explosives trials and experimental programmes. The work includes the use of electronics for the measurement of explosive output (e.g. pressure, temperature, acceleration) and the repair, calibration and maintenance of equipment holdings. You will work closely with scientists and engineers, installing and operating specialist equipment at both UK and overseas trials. An HNC or equivalent in electronics is essential. Some experience of trials work or explosives is desirable. Closing date: 25th November. Ref: 020847NS.

**Project Manager, Conventional Munitions Disposal (CMD)**  
up to £34,000 & benefits  
You will be required to undertake all project management for CMD, working to the Team Leader, Capability Adviser and Group Leader as appropriate within the EOD Group. The work includes compilation of bids, managing project(s) progress to time, budget and delivery ensuring key performance criteria are met in accordance with Dstl's Management System. You will also assist the Team Leader in translation of customer requirements into detailed programmes of work, including placement of external research contracts and international research collaboration arrangements. You will be expected to have the opportunity to input significantly into programmes within the CMD Team and across the Group. A good scientific or engineering degree or extensive, formal project management experience with a firm commitment to safety and quality are essential. Good communication and team working skills are also important. Closing date: 2nd December. Ref: 020848NS.

**Team Leader, Target Analysis & Mitigation**  
up to £42,000 & benefits  
You will be required to guide, mentor, line manage and technically lead a team of approximately eight scientists and engineers. You will also be responsible for the technical management of assigned projects providing significant contribution to their delivery whilst working closely with the Capability Adviser, Group Leader and management. The work involves international collaboration and research, dealing with customers, military users, scientists, engineers and colleagues internal and external to Dstl. A good scientific degree in a relevant discipline or extensive equivalent experience with a firm commitment to safety and quality are essential. A good understanding of blast detonics and shock physics is important as are strong leadership, effective written and oral communication and team working skills. Closing date: 25th November. Ref. 020849NS.

**Explosives Systems Group**  
**Mechanical Design Engineer**  
Supporting the Vehicle Assessment project teams, you will need an HNC or equivalent in an engineering discipline, together with experience in mechanical computer aided design. Experience of CATIA, ProEngineer, trials work and military vehicles would be an advantage. Additional security clearance will be required. Closing date: 25th November. Ref: 020850NS.

**Explosives Scientists or Engineers**  
up to £22,000 & benefits  
We are looking for qualified Scientists or Engineers with a sound technical background to join our Ammunition Consultancy team. You will need experience in explosives engineering and technology, although relevant experience in weapons technology, electronics or mechanical engineering will be considered. Experience of supporting military operations and trials work would be beneficial. Additional security clearance will be required. Closing date: 6th January. Ref: 020851NS.
In addition to a stimulating and rewarding career, as a civil servant you'll enjoy a competitive benefits package. This includes a choice of pension schemes, generous holiday allowance, childcare vouchers, relocation assistance where appropriate and good sports and leisure facilities.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies. Dstl is a committed equal opportunities employer and recruits on the basis of specified competencies and skills. These permanent posts are only open to UK Nationals. Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made.

For an application pack, please contact, quoting the relevant reference, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk Tel: 020 7553 9120 (9.30am - 5.30pm).

If you have a hearing impairment we are happy to accept Typetalk calls.

*aia is a recruitment advertising agency and is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

GAS CHROMATOGRAPHY (GC) ANALYST

Alcontrol Laboratories Specialists in land analysis, providing contract chemical analysis services specific to the environmental arena. Require an experienced GC-FID/GC-MS Analyst to offer technical support to both sections. You will be required to work within a team, in a busy laboratory offering a broad range of environmental analysis of soil and water samples for DRO/PRO/PAH/SVOC/PCB/Phenols and VOC. Qualified to a minimum of BSc with 2+ years' experience in this area, you will have good interpersonal skills and basic IT knowledge. Alcontrol offers an excellent package of benefits, with a salary commensurate with experience. For more information or alternative vacancies, please visit our website www.alcontrol.ie

ALcontrol welcomes applications from anybody who considers they match the requirements of the post, irrespective of race, age, gender or disability to: ALcontrol Laboratories, 18a Rosemount Business Park, Ballycoolin, Blanchardstown, Dublin 15. Tel: 00 353 1 8829893. Closing Date - 30/11/05
[2524-046 (2005) : 68]
Senior Director: Research Alliances
Organon is a major business unit of the Akzo Nobel Pharma group, which develops, produces and sells ethical human medicines across the world.

At our modern drug discovery facility, situated midway between Edinburgh and Glasgow, we carry out innovative research in the fields of Psychiatry, Cardiovascular disease and Analgesia.

£competitive salary + benefits Central Scotland
We have a unique and exciting opportunity for a high pedigree scientist to develop the role of Senior Director, Research Alliances at our research facility in the UK. Based in Central Scotland, you will form part of a global research alliances team whose aim is to promote Organon and form strategic alliances with third parties in academia, biotechnology and drug discovery across the globe.

You will be a PhD level scientist with a track record in drug discovery research. Drive, entrepreneurship and excellent communication skills will have contributed to your career success to date. An understanding of the trends and forces within the pharmaceutical industry is essential, and ideally you should also have experience of business development within a global pharmaceuticals environment.

High level negotiation skills are essential for this role, as is the ability to influence and energise people at all levels, regardless of position and status. In return, we offer a generous salary and benefits package which includes considerable assistance with relocation where appropriate.

To apply, please e-mail your CV to 05705@thersagroup.com
Alternatively, call Dr Kay Wardle on +44 (0)1707 259333 for an initial confidential discussion.

[2524-048 (2005) : 68]
Applications are invited for a three year position as project manager/genetic epidemiologist/bioinformaticist on an international collaborative research project, investigating the genetic basis of susceptibility and severity of meningococcal disease. The successful applicant will coordinate the study of four unique cohorts of affected patients and their families from the UK, Holland, Austria, and The Gambia. The study is funded by a grant from the European Society for Paediatric Infectious Diseases. The project manager will be responsible for establishing a common clinical and laboratory database linking the four different national genetic collections, and will work closely with the Genome Institute of Singapore where genotyping will be undertaken using high throughput methodologies, on the analysis and interpretation of the data. The project will be based at the new medical research building at Brighton and Sussex Medical School (BSMS), and supervised by Prof Michael Levin.

Application details are available from and should be returned to Human Resources, Sussex House, University of Sussex, Falmer, Brighton BN1 9RH. Tel: (01273) 678706, fax: (01273) 877401, email: recruitment@sussex.ac.uk Details of all posts can also be found via the websites below.

Based within the Tumour Microcirculation Group, these posts are part of an ongoing Cancer Research UK programme of research to target the established tumour vasculature for cancer therapy. Both posts are available on a fixed-term basis until September 2008 in the first instance.

The Postdoctoral Research Associate/Fellow will investigate molecular control of vascular maturation in tumours, utilizing intravital imaging of genetically modified tumour lines, relevant to tumour vascular targeting agents under development. Applicants should have a PhD and a proven track record of research and publications in a relevant field.

The Research Assistant/Associate will support in vivo research into the therapeutic targeting of tumour vasculature. Duties will include carrying out laboratory-based experiments and operating imaging equipment. A relevant BTEC or BSc or equivalent experience will be required for appointment as Research Assistant. A PhD will be required for appointment as Research Associate.

Applicants for both posts should have excellent organisational, communication and team-working skills. Salaries are dependent on previous experience.

Committed to equality through diversity. For full details and application pack visit: [www.sheffield.ac.uk/jobs](http://www.sheffield.ac.uk/jobs) or e-mail: jobs@sheffield.ac.uk Tel: 0114 2221631 (24 hrs) Please quote Ref. in all enquiries.

The University of Reading
School of Mathematics, Meteorology and Physics
Environmental Systems Science Centre

Postdoctoral Research Fellow - Marine Carbon Cycle: Modelling and Assimilation - Ref. R0566
Grade RA1 A - £20,044 to £30,002 p.a.
Full-time, Fixed-term for up to 3 years

The Environmental Systems Science Centre, ESSC (www.nerc-essc.ac.uk), is one of the RAE 5* Environmental Science groups at the University of Reading, focusing on remote sensing, modelling and assimilation in the Earth System.

We are now inviting applications for a Postdoctoral position to carry out research aimed at quantifying marine carbon exchanges on a global scale. This will involve modelling of the carbon cycle embedded within an ocean general circulation model (GCM) controlled by data assimilation. The post forms part of a new multi-institution project funded under the Natural Environment Research Council's QUEST programme (http://quest.bris.ac.uk).

You will have a Ph.D. in the physical or mathematical sciences and good IT skills, especially Unix and programming in Fortran, IDL or similar. Experience in ocean or atmosphere modelling is highly desirable, but not essential. You will be working in close collaboration with the Hadley Centre running their carbon cycle GCMs and combining them with data assimilation techniques. Experience of data analysis and visualisation is also desirable.

School of Systems Engineering

Research Assistant: EU Project - SAFEE - Ref. R0567
Grade RA1 A - £20,044 to £22,289 p.a.
Full-time, Fixed-term up to 31 January 2008

As a result of funding under the European Commission's Framework 6 Space and Aeronautics Call, we are seeking a Researcher to work on a high profile research and development project. The project will employ computational vision techniques for multi-camera detection, tracking and behavioural analysis. The project is strongly driven by end-user involvement.

You will have a strong scientific background with either a Ph.D. degree in Computer Science/Systems Engineering or an M.Sc. with similar research experience in a relevant area. You will have experience with programming in C/C++ and ideally in Linux, and knowledgeable of techniques in image processing, and ideally, in behavioural understanding.

Research Assistant: EPSRC Project REASON - Ref. R0568
Grade RA1A - £20,044 - £26,470 p.a.
Full-time, Fixed-term for 30 months

As a result of funding under the 3rd EPSRC Crime Prevention and Detection Technologies call, we are seeking a Researcher to work on a high profile research and development project. The project will employ computational vision techniques for robust monitoring of people in public spaces. The project aims to research, develop and evaluate a multi-camera vision system in both an indoor and outdoor setting. The project is strongly driven by end-user involvement.

You will have a strong scientific background, ideally in Computer Science, and experience with programming in C/C++ and ideally in Linux, and knowledgeable of techniques in image processing. You will have either a Ph.D. degree in Computer Science/Systems Engineering or an M.Sc. with similar research experience in a relevant area.
For both Systems Engineering posts you will be able to demonstrate a keen interest in state-of-the-art research and development, working alongside academic partners and end users to achieve goals within tight time constraints.

For more information on the Systems Engineering posts only, please contact Dr James Ferryman (email: j.m.ferryman@reading.ac.uk). Please do not use this email address for applications (see below on how to apply.)

Application forms and further particulars are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH, telephone 0118 378 6771 (voicemail). Application forms and further particulars are also available from www.reading.ac.uk/Jobs Closing date for applications: 25 November 2005. Please quote relevant reference.

BIOMEDICAL DIAGNOSTICS INSTITUTE

BIOMEDICAL DIAGNOSTICS INSTITUTE
The Biomedical Diagnostics Institute (BDI) was established in October 2005 at Dublin City University, through an award of €16.5M from Science Foundation Ireland (SFI) under its Centres for Science, Engineering and Technology (CSET) programme, in addition to a €6M contribution from industry partners. The BDI will carry out cutting-edge research programmes focused on the development of next-generation biomedical diagnostic devices measuring indicators of chronic disease (e.g. cancer, cardiovascular disease).

DCU

We are currently assembling a team of world-class research scientists to partner with cutting-edge research teams from our industry partners (Analog Devices, Amic, Enfer, Hospira, Becton Dickinson & Inverness Medical Innovations) and collaborating institutions (The Royal College of Surgeons Ireland (RCSI) in Dublin, the National Centre for Biomedical Engineering Science (NCBES) at NUI, Galway, and the Tyndall National Institute (TNI) in Cork). The BDI team will be based primarily in DCU, with some researchers located in our collaborating institutions. Some applicants for the Postdoctoral positions may be offered employment by our industrial partners.

Applications are invited for the following contract positions:

RESEARCH PROGRAMMES

RESEARCH FELLOWS, POSTDOCTORAL RESEARCHERS & POSTGRADUATE STUDENTS are invited to apply for various positions in the following programmes:

Biomolecular Recognition (REF: BDI-RP1)
Prof Richard O’Kennedy (richard.okennedy@dcu.ie)
Goal: To develop novel antibody and nucleic acid-based assays and to incorporate them into biochip platforms.
Expertise: Antibody production/engineering and immunoassay development / Nucleic acid-based analysis / Immobilisation and surface chemistry of biomolecules.

Functional Diagnostics in Platelet Biology (REF: BDI-RP2)
Prof Dermot Kenny (dkenny@rcsi.ie)
Goal: To develop novel physiologically relevant assays of platelet function.
Expertise: Cell biology of platelet function & thrombosis / Molecular Protein chemistry / Rheology.

Transduction Science (REF: BDI-RP3)
Prof Robert Forster (robert.forster@dcu.ie)
Goal: To develop sensitive and selective detection strategies for proteins and DNA through combinations of current and light detection.
Expertise: Electrochemiluminescent materials especially luminescent polymers/ Interfacial characterisation techniques - Raman and scanning probe microscopy / Electrochemical / luminescent bioassay development.

Signal Amplification science (REF: BDI-RP4)
Prof Brian MacCraith (brian.maccraith@dcu.ie)
Goal: To develop substantial sensitivity enhancements in a range of optical biochip systems, with the emphasis on fluorescence-based platforms.
Expertise: Metal-enhanced fluorescence - Plasmonics / Optoelectronic readout instrumentation for biochips / High-brightness nanoparticle labels.

Microfluidic Platforms (REF: BDI-RP5)
Prof Luke Lee (luke.lee@dcu.ie) & Prof Tony Ricco (tony.ricco@dcu.ie)
Goal: To develop advanced microfluidic platforms for diagnostic applications.
Expertise: Microfluidics and microfabrication / Integrated detection techniques/ cell biology.

Coagulation Monitoring (REF: BDI-IP1)
Dr Tony Killard (tony.killard@dcu.ie)
Goal: To develop advanced coagulation monitoring devices for chronic and critical care applications (including wearable closed-loop anticoagulant therapy systems).
Expertise: Rheological, viscoelastic and haemostatic properties of blood / Polymer MEMS & microfluidics / Biodevice interfacial modification / Integration of sensors and wireless technology.

Biochip for Cardiac Wellness (REF: BDI-IP2)
Prof Brian MacCraith (brian.mac craith@dcu.ie)
Goal: To develop a multianalyte, capillary-fill biochip for monitoring markers of cardiac wellness.
Expertise: Microfluidics / Optical biosensors based on fluorescence / Immobilisation of biomolecules.

Bovine Mastitis Diagnostics Chip (REF: BDI-IP3)
Prof Richard O’Kennedy (richard.okennedy@dcu.ie)
Goal: To develop a multi-analyte miniaturised assay platform for the detection of mastitis.
Expertise: Immuno / Nucleic Acid-based assay development and validation / Analyte extraction & sample preparation / Microbiological and Biochemical analysis.

TECHNICIANS (REF: BDI-TN)
Technicians are also required to support the above research programmes. Applicants must hold a minimum qualification in a relevant discipline at National Certificate and preferably at National Diploma level, or equivalent.

Salary: €30,626- €50,137

MANAGEMENT & ADMINISTRATION
INSTITUTE MANAGER (REF: BDI-MN-MNG)
The Manager will support the Director in the establishment and ongoing development of the Institute and will facilitate the achievement of the Institute’s objectives by the effective management of its resources and operations, including financial and administrative issues. In addition, the Institute Manager will be responsible for all aspects of the Institute’s business relations and commercialisation. Applicants must have an honours degree with at least three years postgraduate experience of team management.

Salary: €72,864 - €96,039
Queries to: Prof Brian MacCraith (brian.maccraith@dcu.ie)

EDUCATION & OUTREACH (E&O) PROGRAMME
The BDI has designed an ambitious E&O programme with initiatives targeting the general public and all levels of education from primary through to post-graduate level. Applications are invited for the following positions:

EDUCATION & OUTREACH MANAGER (REF: BDI-EO-MNG)
Reporting directly to the E&O Leader, the E&O Manager will have responsibility for the development and implementation of the Institute’s E&O programme. He/she will also manage the overall science communication function of the BDI. Applicants must have a minimum of an honours science / engineering degree with three years relevant postgraduate experience.
Salary: €46,334 - €67,607

POSTDOCTORAL RESEARCHERS, RESEARCH ASSISTANTS & POSTGRADUATE STUDENTS (REF: BDI-EO-RES)
Postdoctoral Researchers, Research Assistants and Postgraduate Students are required for the development and delivery of the E&O programme. We are seeking candidates with expertise in one or more of the following areas:

- Science Education or Science Communication
- Lecturing experience in Biomedical Diagnostics
- Development & coordination of Masters Degree programmes

Queries To: Prof Richard O’Kennedy (richard.okennedy@dcu.ie)

APPLICATION PROCEDURES:
Applicants are encouraged to contact the appropriate principal investigator for informal discussions. Applications (complete Application Form & Curriculum Vitae) should be marked with the appropriate reference code and submitted to: Human Resources Department, Dublin City University, Dublin 9, Ireland.

Application forms are available from: Human Resources Department, Dublin City University, Dublin 9, Ireland. Tel: +353 (0) 1700 5149 Fax: +353 (0) 1700 5500 Email: hr.applications@dcu.ie

Full job descriptions are available at: http://www.dcu.ie/vacancies/current.shtml
Closing date for receipt of applications: Friday 15th November, 2005

NDP
NATIONAL DEVELOPMENT PLAN
[2524-053 (2005) : 71]
Do you wish to influence future European climate policy development? Are you concerned about the way knowledge and values inform the development of public policy? Are you able to contribute to a research team comprising leading European climate change research groups? The Tyndall Centre for Climate Change Research in the School of Environmental Sciences at the University of East Anglia is seeking up to six experienced and outstanding individuals to take leading roles in the ADAM Project (2006-2009), newly funded by the European Commission.

Senior Research Co-ordinator applicants will have substantial experience in managing large European research projects, with formal training in environmental or social sciences, or in policy studies. You will have formal academic training, ideally to PhD level, in an appropriate environmental or social science, or in policy analysis, together with substantial experience in either research, research management, preferably with policy development in academic, government or policy institutions. It is desirable that you have management qualifications. You will be responsible for the overall management and delivery of the ADAM Project, including interacting with the key European policy stakeholders in Brussels and beyond.

Senior Researchers will have at least a Master's qualification or preferably a PhD in a relevant subject, plus at least three years of academic research which may include experience of policy development. An understanding of current debates in climate change policy and first-hand experience of the interaction between science and policy are essential for all five research posts.

All posts are based in the Zuckerman Institute in the School of Environmental Sciences at the University of East Anglia, which houses the Tyndall Centre HQ and CSERGE. The positions will be working alongside Professor Mike Hulme, Dr Neil Adger, Dr Alex Haxeltine and Dr Andrew Jordan.

The positions are all available from 1 February 2006 for three years. The appointment for Senior Research Co-ordinator will be made on the Research and Analogous Grade III scale (in the range £35,254 to £43,850 per annum), while the five Senior Researcher positions will be made on the Research and Analogous Grade II scale (in the range £27,929 to £36,959 per annum).

Further particulars are available at [http://www.uea.ac.uk/env/vacancies.html](http://www.uea.ac.uk/env/vacancies.html) and more details are also provided on the Tyndall Centre website at [www.tyndall.ac.uk](http://www.tyndall.ac.uk).

Informal enquiries can be addressed to Professor Mike Hulme, e-mail: m.hulme@uea.ac.uk or Dr Alex Haxeltine, e-mail: alex.haxeltine@uea.ac.uk.

Further particulars and an application form can be obtained from the University's web page at: [http://www.uea.ac.uk/personnel/jobs/](http://www.uea.ac.uk/personnel/jobs/) or by e-mail at: personnel@uea.ac.uk or by calling the answerphone on 01603 593493 or by mail to the Personnel Office, University of East Anglia, Norwich NR4 7TJ, to be returned by 25 November 2005. Please quote the appropriate reference number.

HARTPURY COLLEGE
GLOUCESTERSHIRE
University of the West of England

Hartpury College is an Associate Faculty of the University of the West of England and has an outstanding reputation for the delivery of high quality Higher Education, both at Undergraduate and Postgraduate levels. Programmes include Foundation, Honours and Masters degrees in the areas or Agriculture, Animal Science, Equine, Sports Sciences and Management.

LECTURERS IN ANIMAL SCIENCE
3 x full time posts; 1 x 0.6 FTE, salary dependant upon qualifications and experience
Areas of specialism include: Animal production (livestock/poultry), behavioural scientist (general behaviour/companion animal), avian science, aquatic science and wildlife management.

We are seeking to appoint a number or highly enthusiastic lecturers, primarily due to increasing student recruitment. Ideally, you will have a postgraduate qualification, industry experience or research interests in related disciplines and previous teaching experience would be an advantage. Applications will be considered from all interested candidates as the College operates an extensive staff development programme, with teaching qualifications available through the UWE Continuing Professional Development programme. The successful candidates will have strong communication and administrative capabilities.

Visit our website www.hartpury.ac.uk/about to see full details and download an application form, or telephone (01452) 702135 to request documents by post. A Criminal Record Bureau check will be required for the successful candidate.

The closing date for receipt of applications is 18th November 2005.
Hartpury College is an equal opportunities employer.

Max-Planck-Gesellschaft
Max Planck Society
Selbstständige Nachwuchsgruppen
Independent Junior Research Groups

The Max Planck Society invites applications from outstanding young scientists in all fields of research pursued by the Max Planck Society (Biology and Medicine; Chemistry, Physics and Technology; Human Sciences).

Successful applicants will have demonstrated the ability to perform excellent research. They will be offered an Independent Junior Research Group Leader position (W2; equivalent to associate professor level without tenure) including a five-year grant (research positions, budget, investments) at a Max Planck Institute of their choice.

In addition, Independent Junior Research Group Leader positions are available at the Max Planck Institute for Medical Research, Heidelberg (2 positions) and the Max Planck Institute for Biological Cybernetics, Tübingen (1 position)

Applications should include a CV, a list of publications, copies of three publications, a one-page summary of scientific achievements, and a two-page research plan. For further information and detailed application instructions see http://www.snwg.mpg.de

The Max Planck Society is committed to equal opportunities and to employing disabled persons.

The deadline for application is December 20, 2005.
[2524-059 (2005) : 73]
The Molecular Pharmacology Unit, directed by Professor Roland Wolf, forms part of the Biomedical Research Centre and is located in the University of Dundee Medical School at Ninewells Hospital. The main focus of the Unit is to study genes involved in cellular responses to drugs and chemical agents and how their expression is regulated. These processes are of fundamental importance in carcinogenesis, chemoprevention, drug resistance and in the development and use of drugs. A new initiative within the Unit is the establishment of the Drug Discovery Group headed by Dr Steven Everett which aims to design and synthesise selective cancer chemotherapeutic agents and to pursue proof of concept studies in collaboration with the Unit's Transgenic Group.

The following position is available within the Drug Discovery Group for up to three years in the first instance.

**TECHNICIAN** (Medicinal Chemistry)
Grade D (£16,553 - £17,454)

This position within the Medicinal Chemistry team will provide core support to the Drug Discovery Group as a whole. Applicants should hold a BSc or equivalent qualification in chemistry. The position requires some practical organic chemistry experience together with strong team working and basic IT skills. Experience in anti-cancer drug discovery would be very useful, although job specific training will be provided.

For informal enquiries, applicants should in the first instance contact Janis Sweeney on 01382 425583 or janis.sweeney@cancer.org.uk We regret that we are unable to accept applications by e-mail.

For details of the research activities in the Cancer Research UK Molecular Pharmacology Unit and in the Biomedical Research Centre, please visit http://www.dundee.ac.uk/biomedres

Further details and an application pack are available from our website: www.jobs.dundee.ac.uk Alternatively, contact:
Personnel Services, University of Dundee, Dundee, DD1 4HN, tel: (01382) 344817 (answering machine). Please quote Reference Number: MD/1054/NS.

Applicants will only be contacted if invited for interview. Closing date: 17 November 2005.

The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community.

Department of Chemical Engineering - Centre for Regenerative Medicine

Research Officer in Tissue Engineering/ Stem Cell Technology - two year appointment

Applications are invited for an enthusiastic and experienced postdoctoral research officer, with expertise in tissue engineering, biochemical engineering or polymer processing to join the Tissue Engineering Group in the Department of Chemical Engineering to develop innovative expansion, differentiation and bioreactor technologies to, exploit the potential of mesenchymal stem cells in skeletal formation. The project will be undertaken in collaboration with the University of Southampton (Prof Richard Oreffo). The project is funded by the BBSRC for up to two years.

Informal enquiries may be made to Prof Julian Chaudhuri on 01225 386349 (cesjbc@bath.ac.uk). Further information may be found on our website www.bath.ac.uk/chem-eng/

Starting salary in the range of £22,289 - £26,470 per annum depending on qualifications and experience.

Closing date for completed applications is 17 November 2005.

Application forms may be obtained from the Human Resources Department, University of Bath, Claverton Down, Bath BA2 7AY (email: S.Kennedy@bath.ac.uk). Alternatively, please phone the 24 hour answer-phone service on 01225 386924, textphone 01225 386039 or apply online at www.bath.ac.uk/jobs quoting Ref no 05/405.

An Equal Opportunities Employer

[2524-062 (2005) : 74]
Applications are invited for a University Lecturership in Materials tenable from 1 April 2006 or as soon as possible thereafter. The Department and the College are seeking outstanding candidates with a proven record of scholarship and research in the general area of either [A] Microanalysis of Materials or [B] Polymers. Applicants should quote DJO5/022 and note the closing date of 2nd December 2005, and an expected interview date in the week starting 16th January 2006. The Department and the college will make special provision to assist the successful candidate to move to Oxford and establish their research base (see further particulars for details). The salary will be according to age on a scale up to £47,078.

Preference will be given to applicants with experience and research vision in one of the highlighted areas. The appointee will be required to engage in research which will contribute to the Department's reputation; to teach, supervise and examine undergraduate and graduate students; and to contribute to administration in both the college and the Department.

Further particulars and details of the application procedure and of the duties and full range of benefits and allowances attached to both the University and College appointments, may be obtained from the departmental website: http://www.materials.ox.ac.uk or from Professor C R M Grovenor, Head of Department, University of Oxford, Department of Materials, Parks Road, Oxford OX1 3PH, UK (e-mail: head.department@materials.ox.ac.uk).

The University is an Equal Opportunities Employer.
UNIVERSITY OF BATH
Pharmacy & Pharmacology

Lecturer/Senior Lecturer in Medicinal Chemistry

Candidates should have strong research interests in the application of synthetic organic chemistry to biological problems and ideally an established record of independent research achievement and external funding. For appointment at Senior Lecturer level a good sized active and well-funded research group is essential. Applications are welcomed from candidates in any area of Medicinal Chemistry/Drug Design/Chemical Biology/Biological Chemistry, or those with chemistry or pharmacy training, an appropriate PhD and a strong background in synthetic organic/medicinal chemistry.

The Medicinal Chemistry Group currently has particular strengths in the design of anticancer therapeutics, the chemistry of cellular signalling, nucleotide and carbohydrate chemistry, natural products and opioid drug design. Applications from candidates who would strengthen or complement these areas are especially welcome.

Salary in the range of £28,829 -£36,959 per annum (Lecturer Grade B). £38,685 -£43,850 per annum (Senior Lecturer).

Informal contact can be made with Professor BVL Potter on 01225 386639, email: b.v.l.potter@bath.ac.uk

Closing date for completed applications: 25 November 2005.

Application forms and further particulars may be obtained from the Personnel Department, University of Bath, Claverton Down, Bath BA2 7AY, (tel: 01225 386873; fax: 01225 386559; email: h.m.keogh@bath.ac.uk) or phone the 24 hour answer-phone service on 01225 386924, textphone 01225 396039 quoting Ref: 05/410.

An Equal Opportunities Employer

[2524-064 (2005) : 75]
Biomedical Scientist 2

An experienced and motivated Biomedical Scientist is sought to work in the HPA Malaria Reference Laboratory at the LSHTM.

The successful candidate should have state registration with the Health Professions Council (HPC) and have an MSc, Fellowship of the Institute of Biomedical Sciences or equivalent in a relevant subject. S/he will have at least four years' post-registration experience in a routine diagnostic/clinical laboratory, broad experience in a wide range of molecular biology techniques and microscopic and serological techniques and be able to comply with CPD requirements of HPC.

Salary will be in the range £24,567 to £30,369 and the successful candidate will be appointed on the scale according to experience and qualifications.

An application form and further particulars are available from the Personnel Office, London School of Hygiene & Tropical Medicine, Keppel Street, London WC 7E 7HT (phone: 020 7927 2203; e-mail personnel@lshtm.ac.uk).

Closing date for applications is 24 November 2005.

LONDON SCHOOL OF HYGIENE & TROPICAL MEDICINE

The London School of Hygiene & Tropical Medicine is committed to being an equal opportunities employer.
The University of Manchester  
www.manchester.ac.uk/vacancies  
MANCHESTER 1824  
Wolfson Molecular Imaging Centre (WMIC)

2 x Senior PET Methodologists Ref: MHS/448/05  
Salary within the range £33,646 - £41,294 p.a.

Two high calibre and experienced individuals are required to act as senior PET methodologists to develop and apply quantitative data analysis techniques at this new state-of-the-art medical imaging research facility on the Christie Hospital NHS Trust campus. The facility is dedicated to investigating regional tissue function and to supporting the development of new treatments in cancer and brain disorder patients using Positron Emission Tomography (PET).

You will provide a sound methodological infrastructure for the manipulation, analysis and visualisation of PET and other related medical image data. In particular, you will be expected to provide expert advice on the design, conduct and analysis of PET and associated data. You will also be expected to develop, implement and evaluate novel methods of data acquisition and quantitative analysis.

You will have a PhD or equivalent in an analytical discipline and a minimum of three years' experience in the analysis of positron emission tomography (PET) data. You will be expected to demonstrate a track record in the development of PET data analysis methodology and an understanding of the biological models that underlie the analytical models. An ability to communicate and interact with a variety of technical and non-technical scientific staff is essential.

In addition you will have a flexible and adaptable attitude to working in a constantly evolving environment, a proactive and innovative approach to problem solving, and you will be a strong team player.

For further information about this post, please contact: Dr Julian Matthews on +44 (0) 161 275 0024; e-mail: julian.matthews@manchester.ac.uk

Application forms and further particulars are available from our website. If necessary, you can obtain a hard copy from +44 (0) 161 275 8835; e-mail: Mhs-hr@manchester.ac.uk

Closing date: 18 November 2005.

Faculty of Life Sciences  
Research Technician Ref: LS/128/05  
salary circa £14,000 p.a.

The Faculty of Life Sciences is a 5* research facility located across the University campus comprising of over 800 research and teaching staff. We are looking to appoint a technician to join the research section of Tissues to Organisms. The post is for two years in the first instance.

You will have general responsibility for maintaining technical aspects of demanding research laboratories and assist in research activities as directed. The Section has requirements for technical support in cell culture, cell and molecular biology, microscopy and imaging, ELISA, and electrophysiology. Experience in any of these areas will be required.

You will preferably have at least two years' working knowledge within a laboratory environment and should be qualified to a minimum ONC, NVO Level 2 or A-level standard in a Biological Science or related subject.
Application forms and further particulars are available from our website or alternatively contact Ms Louise Hewitt at louise.hewitt@manchester.ac.uk Closing date: 18 November 2005.

For both posts, please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.
Combining the strengths of UMIST and The Victoria University of Manchester [2524-066 (2005) : 75]
THE UNIVERSITY OF WARWICK

Warwick is one of Britain's leading universities with an enviable reputation for educational opportunities, first rate research and its commitment to the local community.

The University Values Diversity

Lecturer/ Senior Lecturer - 2 posts
Lecturer £28,829 - £36,959 pa Senior Lecturer £38,685 - £43,850 pa

Warwick HRI is a newly formed University Department with emphasis on plant and microbial sciences and their application to horticulture, crop systems and the environment. We are seeking outstanding candidates to develop our research and teaching in two areas. Both positions are research focussed although you will provide up to 20% of your time to the development and delivery of the Department's evolving teaching provision.

Lecturer/Senior Lecturer in Population Biology  Ref: 34445-105
There is flexibility in the area of specialism of this position. You will interact with and strengthen the research capability in one or more of the Department's established groups in plant science, crop and weed biology, plant-microbe interactions, fungal biocontrol or pest insect biology.
Interview date: 16 December 2005

Lecturer/Senior Lecturer in Plant Science  Ref: 34446-105
There is flexibility in the area of specialism of this position. The Department has research groups in the conservation and exploitation of genetic diversity and the application of genomic tools and resources to crop improvement as well as the understanding of fundamental plant processes. You will interact with and strengthen the research capability in one or more of these areas.
Interview date: 8 December 2005

Informal enquiries may be made to the Head of the Department, Professor Simon Bright, telephone 024 7657 5004 or email simon.bright@warwick.ac.uk

Application packs are available from the Human Resources Group on 024 7657 5231 (24 hour answerphone), by e-mail: julie.carder@warwick.ac.uk, or our website www.warwickhri.ac.uk. An application form must be completed if you wish to be considered for these posts.

Closing date for both posts: 25 November 2005

[2524-067 (2005) : 76]
HIGHGATE SCHOOL

SENIOR SCIENCE TECHNICIAN
£24,000-£28,000 depending on experience
To work term time plus four weeks

Highgate School is a leading independent school founded in 1565 with some 1,200 pupils (3-18 years).

The Senior School seeks a Senior Science Technician. Duties include management and coordination of the science technicians, liaison with Heads of Department, organisation of professional development programmes, keeping abreast of current health and safety requirements, risk assessments and record keeping as well as the provision of normal technician support.

Suitable candidates will be science graduates with relevant experience. In addition to providing first class references, successful candidates will be required to obtain an enhanced disclosure from the Criminal Records Bureau.

Please send a full curriculum vitae and a covering letter with the names of two professional referees to: The Bursar, Highgate School, North Road, London N6 4AY
[2524-068 (2005) : 76]
UCL
UCL Department of Electronic and Electrical Engineering

Research Assistant in Surveillance Systems

We wish to recruit a Research Assistant (for 12 months from 1st December 2005 or as soon as possible thereafter) to work on Tracking and Detection using the 802.11 Wireless Network, a project supported by EPSRC. A first degree in engineering or a physical sciences subject, and a research track record of publications in the area of surveillance or communications technologies are required. A PhD in a relevant subject area would be desirable.

The post is graded RA1A (starting salary £25,582 per annum including London Allowance).

Questions about the post should be directed to Dr Karl Woodbridge, Department of Electronic and Electrical Engineering, University College London, Torrington Place, London WC1E 7JE, tel: 020 7679 3969, email: k.woodbridge@ee.ucl.ac.uk, web site: www.ee.ucl.ac.uk

Further details and how to apply are available at www.ee.ucl.ac.uk/vacancies or from Sara Collins, 020 7679 5760.

Closing date: 11th November 2005.

UCL Taking Action for Equality

[2524-069 (2005) : 76]
Technician
Salary £17,910 - £23,178 per annum

A Technician (Band 1) is required in the Science Technical Support Unit to provide laboratory support for practical work in the science laboratories. The person will work in a team of technicians providing a service in the areas of Chemistry and Biology. A previous knowledge of laboratory work in addition to appropriate qualifications will be required. Prior experience of spectrometry, both UV-visible and infrared, would also be an advantage. Work is well underway for the completion of purpose-built brand-new science laboratories for the summer of 2006.

In the first instance further details and an application form can be downloaded at www.londonmet.ac.uk/vacancies or e-mail recruitment@londonmet.ac.uk or write to London Metropolitan University, London City campus, Human Resources, 31 Jewry Street, London EC3N 2EY.

Please quote the reference number 619PN

Closing date for applications is 17 November 2005.
Please note we do not accept CVs.

Health & Safety Services

University Biological Safety Officer

salary circa £33,000 p.a. (pay award pending) Ref: ACS/331/05

Providing advice, support and information to the University on all aspects of biological safety, you will ensure the implementation of biological/GM safety codes and good practice. You will ensure that monitoring, auditing and reporting is carried out on such activities. With colleagues, you will also review and identify training needs in the area of biological and GM safety and support the provision of the training.

With a science degree in a relevant subject and a postgraduate qualification in a biological or safety subject, you will have at least five years' experience working in a biological/GM laboratory or equivalent, or two years' experience as a biological safety advisor or equivalent. You will have excellent interpersonal and communication skills and ideally have experience of teaching or carrying out training.

Any informal enquiries can be made to Melanie Taylor on 0161 306 4004.

Application forms and further particulars are available from our website. If you are unable to go online you can request a hard copy of the details from 0161 275 2028 or e-mail: centralservices-hr@manchester.ac.uk

Closing date: 11 November 2005.

Division of Imaging Science and Biomedical Engineering

Research Associate Ref: MHS/432/05

Development of Physical and Physiological Model-driven Registration Methods for Quantitative MRI

Salary within the range £20,044 - £24,352 p.a. (pay award pending)

Your role will be working in the development of methods for the registration of quantitative medical imaging data using model-driven registration in the Division of Imaging Science and Biomedical Engineering (ISBE) at the University of Manchester. The post provides an opportunity for a talented individual to join an expanding group working on novel developments in quantitative imaging, with particular application in the understanding and monitoring of cancer. The work will be carried out within ISBE, which received a 5* rating in RAE 2001, and has departmental expertise in imaging physics, image analysis, computer science, and radiology. We have access to state-of-the-art University imaging facilities, including research-dedicated 1.5T and 3T MRI scanners, and close collaboration with the School of Computer Science and clinical research groups.

You should possess a good honours degree in a numerate discipline together with a PhD or equivalent research experience in a relevant discipline. Good computational skills and mathematical skills are essential requirements as are the abilities to work effectively as part of a research team and demonstrate good communication skills. Appointments will be made on the Research Associate scale at a level dependent upon your background, and will be tenable for a period of two years in the first instance.

Informal enquiries should be made to Dr Geoff Parker; e-mail: geoffparker@manchester.ac.uk

Application forms and further particulars are available from our website. If necessary, a hard copy can be obtained from +44 (0) 161 275 8835; e-mail: Mhs-hr@manchester.ac.uk

Closing date: 10 November 2005.
For both posts, please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

[2524-072 (2005) : 77]
UCL
UCL Department of Biochemical Engineering
The Advanced Centre for Biochemical Engineering

**Analytical Technical Manager**
£27,929 to £29,480 per annum (plus £2,400 London Allowance per annum) depending on experience

You will be responsible for overseeing the successful operation of state-of-the-art analytical equipment, which underpins the biopharmaceutical and biotechnology area.

The Centre has established a £25m generation leading bioprocessing facility, which underpins the study of how new medicines may be made more widely available. These facilities range from those dealing with robotic, microwell devices through to large scale operation and from complex small molecule therapies to biological macromolecules and regenerative medicines. Over 200 students/researchers benefit from the use of these facilities.

A key feature is the use of advanced analytical equipment to deal with increasingly complex materials and the Centre has invested heavily in this aspect. A skilled Technical Manager is required to oversee the use and maintenance of such facilities. You will have experience in the use of such equipment as well as demonstrating good managerial skills. As valued colleagues, we encourage your involvement in research planning and the resulting publications.

An application pack can be obtained from Miss Paula Thomas, UCL Biochemical Engineering, University College London, Torrington Place, WC1E 7JE (Tel: 020 7679 3003 or email: paula.thomas@ucl.ac.uk). Applications quoting Analytical Technical Manager should be sent to the above address.

We particularly welcome applicants from an ethnic minority as they are under-represented within UCL at this level.

This is in line with section 38 of the Race Relations Act 1976.
Closing date: 14th November 2005.

[2524-073 (2005) : 77]
Optoelectronics Research Centre (ORC)

Chair
Highly competitive salary and benefits

The University of Southampton ORC is the largest Photonics Centre in the UK and provides a stimulating interdisciplinary research environment spanning diverse fields including: optics, lasers, chemistry and biology.

A leading international scientist in Optoelectronics and Laser Science, you will be keen to join a world leading photonics research centre, supported by one of the best laboratory and fabrication facilities in a European University. At the forefront of your field, you will provide academic and scientific leadership in areas of research that complement the current ORC portfolio (see www.orc.soton.ac.uk). Biophotonics, nanophotonics, femtosecond optics or optical materials are of particular interest.

As a University of Southampton employee, you will enjoy the unique benefits of a traditional Russell-Group organisation combined with a modern and outward-looking ambitious University, one of the first to introduce new competitive pay structures. Our excellent benefits package includes a subsidised health care scheme, final salary pension scheme, and access to a University day care nursery. In addition, the University is set in one of the most beautiful areas of southern Britain, yet is close to London and Europe.

General enquiries about the post may be discussed with the Director, Professor David Payne on 023 8059 3583 or email: hos@orc.soton.ac.uk

Application forms and further particulars may be obtained from Sue Cox, George Thomas Building, University of Southampton, Highfield, Southampton SO17 1BJ, tel: 023 8059 4046, email: recruit@soton.ac.uk or minicom: 023 8059 5595 to whom applicants should send a full curriculum vitae, including the names and addresses of three referees. Alternatively, visit our website www.jobs.soton.ac.uk Closing date for applications: 9 December 2005.

SERIOUS ABOUT JOBS
[2528-001 (2005) : 16]
Imitation may be the sincerest form of flattery, but when it comes to luring the best science talent, it is also prudent.

In the 90s, Ireland chose to copy the American way of doing science in an effort to build its economy and catch up with its European neighbours. The move is paying off. Not only are Irish researchers heading back home, but more and more American researchers are choosing to relocate there - a rare reverse brain drain. The Irish government is now working on an ambitious plan that will further increase science spending. It has set high targets for itself to encourage industry R&D, and is building an army of scientists in its strongest areas such as biotechnology and regenerative medicine, aiming to be among the best in the world. Can it stay the course, asks Laura Nelson

Biotech Bonanza
In Ireland's growing biotech industry, there is plenty of room for home-grown firms

University College Cork draws researchers home

There’s no place like home
FERGUS SHANAHAN gave up a tenured position in the US to return to Ireland. Now he heads a centre of excellence at University College Cork and has no regrets. He was attracted back because he saw what the Irish government was doing to give science a boost. "All the buzz - it's real," he says.

In the past five years, there has been a wave of Irish researchers returning from the US to their homeland. And now other researchers are following - including those from the US. One-fifth of Shanahan's research group is foreign, which was unheard of when he left in the 80s, he says.

The Irish government has invested heavily to reverse the brain drain. Enterprise Ireland, a state agency, pays for research projects and R&D collaborations, and provides mentoring and advice for technology...
"Great strides have been made in terms of developing indigenous industry," says Peter Daly, CEO and founder of NeuroCure, a small biotech company in Dublin that looks at alternative uses for existing drugs.

Getting the balance right
THE DIVISION between the sexes in Irish science is now a real concern for government. Earlier this year, the country's leaders formally recognised that the lack of women scientists could hamper the country's success, and they are trying to tackle the problem.

For example, women returning from maternity leave can now resume their research with only minimal teaching and admin duties for up to four years via a government grant scheme that was introduced in April.

Tackling the root of the imbalance of the sexes in academia could prove more difficult, however. "There's a long way to go in terms of cultural change," says Jane Grimson, viceprovost at Trinity College Dublin. "The science and engineering working environment has long hours, which makes achieving a work-life balance more difficult."

Nevertheless, the government has recognised this and is pushing for institutional change in higher education. In June, 11 Irish universities were given grants to develop ways of redressing the balance, and the government announced a scholarship scheme to encourage female students into engineering degrees.

Moving ahead in stem-cell therapy
A STEM-CELL therapy for chronic osteoarthritis, the most commonly occurring form of the joint disease, will be tested first in Ireland.

So says Frank Barry, scientific director at the Regenerative Medicine Institute (REMEDI) at the National University of Ireland Galway, which focuses on the use of stem-cell and gene therapy to enhance the repair and regeneration of tissues such as blood vessels, heart, bone and cartilage. REMEDI opened this year and the stem-cell therapy work is already forging ahead, says Barry.

The ambition to lead globally is typical of the optimism running through Irish science. REMEDI is one of the Irish government's Centres for Science, Engineering and Technology. Eight CSETs have been established in the past two years to concentrate efforts in the country's strengths such as proteomics and nanotechnology (see Map, opposite).

Learning how to be tech savvy
A PLAN has been hatched to be big in things that are very small. Having watched other technology-savvy nations including China and Japan plough cash into nanotechnology, the Irish government wants to do the same.

This June, it showed its intent by asking a group of scientists to spend a year mapping the key trends in the sector in order to find the niches worth backing. Next summer the group will make its recommendations to the government on nano-biotech, nano-materials and nanoelectronics. The report will guide government spending in nanotechnology over the next 10 years, says Brian MacCraith, director of the National Centre for Sensor Research at Dublin City University, who is leading the nano-biotech panel.

Meanwhile, Ireland's first dedicated nanotechnology research institute is under construction. The Centre for Research on Adaptive Nanostructures and NanoDevices will open in late 2006. A €26 million building at Trinity College Dublin will house four floors of purpose-built nanoscience labs.

Bigger and better
ONE of the biggest biotech manufacturing plants in the world has just been given its finishing touches near Dublin. Global pharmaceutical company Wyeth has built a €1.8 billion plant at Grange Castle in South County Dublin to make biopharmaceuticals.

The company says the facility has created over 1000 new jobs so far. This summer, the European Union approved the site for manufacturing Enbrel, a drug first licensed in 1998 and approved in many markets worldwide for rheumatoid arthritis.

Laura Nelson is a freelance writer
ROUND UP

Full speed ahead
Science just got faster in Ireland. This September, a €2.6 million supercomputing centre opened in Dublin, the first of its kind in the country. Irish researchers now have access to 1000 IBM processors, and will be able to use the facility for everything from molecular modelling to astrophysics.

The fabric of life
What links Irish cotton and traditional Chinese herbal medicine? The answer is Alltracel, a small Irish biotech company based in Dublin with a wound-healing treatment based on cotton. In August the firm teamed up with Chinese company Yunnan Baiyao, which has made traditional medicines for 100 years, to distribute its treatment in China. The cellulose particles used in Alltracel's anti-bleeding treatment have also been shown to reduce cholesterol in animal studies and the company hopes to add the particles to foods.

Elan bounces back
The Irish drug company Elan is about to trigger an international debate on the balance between the risk and efficacy of pharmaceuticals. Elan and its marketing partner company Biogen withdrew controversial multiple sclerosis drug Tysabri from the US earlier this year after three people developed a brain disease and two of them died. However, patient pressure and Elan's confidence in the drug's efficacy have prompted the company to submit extra safety information to the Food and Drug Administration in the hope of returning Tysabri to the market, perhaps as early as April 2006.

Irish coral damaged
Scientists are calling for the protection of deep-water coral reefs off the southwest coast of Ireland. Jason Hall Spencer from the University of Plymouth, UK, says Irish fishing boats are damaging these delicate organisms. The findings were discussed at the annual festival of the British Association for the Advancement of Science, held in Dublin in September.

IRELAND’S SCIENCE SPENDING
- €250 billion was set aside for science in Ireland’s National Development Plan 2002-2006.
- From 2000 to 2003, spending on R&D as a percentage of GDP rose from 1.32 to 1.4 per cent.
- The R&D spending target for 2010 is 2.5 per cent of GDP.
- The science budget is expected to be increased significantly in the 2007-2013 National Development Plan, which is now being prepared.

Applications are invited for the following full-time permanent post:

**SENIOR LECTURESHIP IN BIOMEDICAL ENGINEERING**

**Salary:**
€62,477 x 7 = €88,536 p.a.
€59,353 x 7 = €84,111 p.a. (pre 1995 entrants)

Closing date for receipt of applications is 5.00 p.m., Friday, 10th February, 2006.

Berkley Pharmaceutical
[2528-005 (2005) : 61]
Lecturer in Food Toxicology  Ref: 002120

UCD wishes to expand its current research portfolio into the area of toxicology as applied to food safety, quality and human health. Applications are welcome from individuals with research expertise in food chemistry/residue analysis/food toxicology. Candidates should have a PhD degree and should ideally have postdoctoral research experience in the area.

The successful candidate will be expected to initiate and conduct a research programme in the area of food toxicology and form collaborative links with national and international research teams. They will also be expected to contribute to teaching within the School largely through the Food Science programme.

Closing Date: 6th January 2006

Further particulars and application procedures for these posts are available at www.ucd.ie/vacancies or from UCD Personnel.
UCD Personnel, University College Dublin, Belfield, Dublin 4, Ireland. Tel: 00-353-1-716 1412; Fax: 00-353-1-2692472

UCD is a vibrant, modern university with over 20,000 students. Its campus is located in Belfield, 4km south of Dublin city centre. The University is committed to creating and maintaining a centre of international educational excellence in Ireland - and to contributing to the social, cultural and economic life of the country in the wider world.

UCD is an equal opportunities employer.

TRINITY COLLEGE
The University of Dublin
Research at Trinity College Dublin

Founded in 1592, the University of Dublin, Trinity College is the oldest university in Ireland. Unique, historic city centre campus and university teaching hospitals
Ireland's leading research university, ranked 75th in science in the 2005 Times Higher Education Supplement World University Rankings
Strategic focus on its strengths in cancer, genetics, immunology, nanoscience, neuroscience, software methodologies, e-health, and materials, devices and manufacturing
TCD has over 60 publications in the Nature family of journals in the last 10 years
New major neuroscience and molecular medicine institutes opened in last 12 months
Ireland's first protein X-ray crystallography unit
Europe's largest infiniband high performance computing cluster
Host to Ireland's first two four year PhD programmes in neuroscience and molecular medicine
Planning for new 40,000m2 Biosciences Building to consolidate bio, nano - and translational strengths
€70 million research income projected 2006

Innovation and Partnership
World class nanoscience research institute will open 2007, in partnership with Intel and other industrial partners
Lead partner in €69 million joint industry-academic venture in telecommunications with Lucent, IDA and Science foundation Ireland
Ireland’s first research-only imaging programme in Institute of Neuroscience and St James's Hospital - two 3T and one 7T MRI scanners
One of Europe's largest oncology centres in development in St James's Hospital - closely linked with world class molecular medicine and imaging research programmes
One of Europe's largest ever university biotechnology spinouts - Opsona Therapeutics, building on TCD's world class immunology research
Re-development of major Trinity Technology and Enterprise Campus on 18,000m2 Landmark site in Dublin's Docklands, building on new bio-incubator facilities and strong entrepreneurship programme
Dedicated IP-capture and commercialization unit with exponential expansion of patents and spin-outs

Companies spun out of TCD include:
- Iona Technologies
- MVT
- Magnetic Solutions
- Eblana Technologies
- Eneclann
- Identigen
- Opsona
- Cellix
- Deerac Fluidics

[2528-007 (2005) : 62]
Applications are invited for the above contract post in the Department of Psychiatry at NUI, Galway (http://www.nuigalway.ie/faculties_departments/psychiatry). The postholder will take a lead role in the development of a new neuroimaging analysis laboratory and in the support and supervision of junior research staff. Candidates should have, or be close to obtaining, a PhD or equivalent research degree and have substantial experience in neuroimaging research, including structural or functional MRI analysis. Familiarity with statistical and computational methods for neuroimaging (eg. UNIX, Matlab, SPM) is desirable.

The specific duties of the post will include assisting the development of a new neuroimaging analysis laboratory within the Department of Psychiatry, supervising junior research colleagues with the application of both region of interest and computational morphometry techniques to structural MRI datasets, developing new research projects using structural and functional MRI, teaching and departmental administration as necessary. The appointment is for a 5-year contract term in the first instance, which will commence in February 2006 and may be extended.

Salary: €35,336 x 10 = €50,112 p.a.

For informal enquiries contact: Professor Colin McDonald, Department of Psychiatry, University College Hospital, Galway; Tel. +353 (0)91-750486; Fax: +353 (0)91-494563; E-mail: colm.mcdonald@nuigalway.ie

Closing date: 5.00 p.m., Friday, 16th December, 2005.

Further information is available from the HR Office: http://www.nuigalway.ie/news; Email: hr@nuigalway.ie; Tel. +353-(0)91-493683; Fax +353-(0)91-494523

Candidates should submit six hard copies of their application (i.e. cv, summary cv application form, covering letter), with the names and addresses of at least three and not more than five referees to: The Human Resources Office, National University of Ireland, Galway, Galway. Please note that applications by email or fax will be rejected.

National University of Ireland, Galway is an equal opportunities employer.
Applications are invited for the position of Centre Director of the NCSR - one of the world's leading multidisciplinary research centres in Sensor technology - at Dublin City University (DCU). The appointment may be offered at Full or Associate Professor level on the following basis:

a) A five year contract which may be extended at the University's discretion or
b) A permanent contract, in which case the successful applicant may hold a permanent position within one of the Academic Schools in the Faculty of Science and Health. The appointee will be seconded for a period of five years, in the first instance, to drive the continued development of the NCSR. This secondment may be extended for an additional period at the University's discretion.

Applicants should have previous experience in managing and directing multidisciplinary research teams and should have research interests that lie within the primary focus areas of the NCSR (www.ncsr.ie).

The successful candidate will have demonstrable skills in the following areas:

• Leadership in Research - A deep understanding and experience of contemporary sensor research with a view and a vision of its potential. Ability to identify and drive/lead strategic research initiatives involving multidisciplinary teams targeting national, EU and international funding agencies;

• Research Excellence - A proven ability to direct internationally competitive research programmes;

• Communication - The ability to promote the NCSR to national/international collaborating groups/companies as well as to national and international funding agencies;

• Management and Organisational - The capacity to create a highly effective management organisation to enable the Centre to respond to members' needs and international trends in research funding;

• Strategic Vision - Flair for formulating, managing and delivering a Strategic Plan for the Centre;

• Commercialisation - The ability to leverage support from public and private sources.

The successful candidate will be responsible for the achievement of the Centre's strategic objectives by the effective management of its resources and operations. He/she will direct independent research programmes and contribute to the teaching mission of the Centre and Faculty. He/she will chair the NCSR's Management Committee meetings and attend other DCU meetings as necessary. He/she will lead and manage the NCSR's Administrative Team and oversee research, development and support activities related to NCSR's resources and technologies.

Candidates will be selected on the basis of proven excellence in management, research and education, their international impact, their competencies in the criteria outlined above and their ability to compete for external funding. An International Search Committee will review applications.

An attractive salary, commensurate with experience, will be offered for this post. Candidates may discuss the position informally with Prof. Malcolm Smyth (Email: malcolm.smyth@dcu.ie). Closing Date for receipt of applications: 23 December 2005

Application forms are available from: Human Resources Department, Dublin City University, Dublin 9. Tel: +353-1-700 5149 Fax: +353-1-700 5500 Email: hr.applications@dcu.ie

ABP mer
marine environmental research

Team Leader/Project Manager
Coastal/Estuarine Processes and Geomorphology

ABPmer has developed a specialist capability over the past 50 years in studying coastal and estuary systems and advising on their management. The company plays a leading role in marine environmental research in the UK and has established a reputation for high-quality scientific research and technical consultancy. The core services provided include capabilities in geomorphology and natural processes, modelling and data collection, analysis and interpretation.

ABPmer is looking to recruit a Team Leader/Project Manager for its Processes Team. The successful candidate will have at least 10 years’ post-graduate experience and must be able to demonstrate a proven track record of having project managed studies for a range of public and private sector clients. Ideally, the post holder will have some specialist capability in coastal/estuarine processes or geomorphology. The successful applicant should have a degree in a relevant discipline and be a member of a professional body or possess appropriate post-graduate qualification.

Responsibilities include the organisation and management of the Processes Team, technical preparation of proposals and tenders, managing research and consultancy projects for clients, providing specialist technical contributions to project work and marketing the skills of the company to potential clients.

Salaries will be commensurate with experience and qualifications. Additional benefits include company pension scheme, private medical insurance and employee share schemes. Applications should be made by sending your CV together with a covering letter to:
Linda Boxall, ABP Marine Environment Research Ltd, Suite B, Waterside House, Town Quay, Southampton SO14 2AQ or email mail to: lboxall@abpmer.co.uk
Further information about the company can be found on our website http://www.abpmer.co.uk/

Senior Scientific Officer
£26,762 - £33,305 pa inc
London Research Institute; Central London
Crystallography and Computing Support
Structural Biology Group
For details on all our current jobs please go to https://jobs.cancerresearchuk.org

The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer.

Applications are invited for the position of Senior Scientific Officer to provide crystallography and computing support to the Structural Biology Groups at the London Research Institute.

The post will involve: software and hardware support for computing equipment relating to the five groups; maintenance of X-ray equipment; installation and maintenance of crystallisation robotics; co-ordinating application and allocation of synchrotron beam time. The successful candidate would also be expected to contribute to ongoing research projects.

The successful candidate should have a PhD degree in a relevant area or a good BSc degree and significant relevant experience. Good knowledge and understanding of structural biology, protein biochemistry and computing is essential. They should also be able to demonstrate effective multidisciplinary teamworking and communication skills.

Applications should include contact details of two professional referees. Informal enquiries can be directed to Dr Neil McDonald (e-mail: neil.mcdonald@cancer.org.uk).

For further details and to apply online, please visit https://jobs.cancerresearchuk.org/
Alternatively please send in two copies of both your covering letter and CV to: Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX or email: recruitment@cancer.org.uk quoting the reference number NS3753 on all correspondence.

crave innovation?

**Product Engineers, Process Engineers & Packaging Engineers**

UK, France, Denmark, Egypt and South Africa based roles

Excellent Salaries + Benefits

As the world's number one confectionery company, Cadbury Schweppes has a world class reputation for innovation and creating brands people love. Proud of our history and excited by our future, our highly gifted Science & Technology team is a crucial part of our global success and their sizzling talent keeps the world wowed with the creation of new products. These are some of the confectionery world's foremost experts, and this is your chance to work alongside them and be part of a winning team.

We have a number of exciting opportunities within our Product Development, Process Development and Packaging Development Teams, and the responsibilities range from creating successful innovative initiatives and new platform technologies, through to commercialisation of new products and packaging.

Whether you've recently graduated or are looking for your next career move, if you want to be at the heart of a global business and develop your career, we'd love to hear from you. All we ask is that you have a strong scientific or technical background, a track record of delivering world class innovation, and the tenacity to drive us further, faster. A background in food/FMCG companies would be beneficial but is not essential.

To find out more about what's on offer, and to apply, just jump online at [www.cadburyschweppes.com/innovation](http://www.cadburyschweppes.com/innovation)

The Cadbury Schweppes Group is committed to equal opportunities.

Cadbury Schweppes

[2528-016 (2005) : 65]
BioFocus Discovery Ltd is a leading company working with international pharmaceutical, agrochemical and biotech companies in the discovery area. BioFocus offers a full suite of hit to lead discovery products and services.

Vacancies currently exist for high calibre candidates in two of our divisions

**DISCOVERY PRODUCTS**

The Discovery Products Division within BioFocus is responsible for the design, synthesis & purification of the world's leading brand of compound libraries, the SoftFocus® collection, as well as exclusive compound libraries for major, worldwide pharmaceutical, agrochemical and biotech clients. Due to an expansion of the department there currently exist a number of vacancies for synthetic and analytical chemists.

**SYNTHETIC CHEMISTS - Focused Library Design & Synthesis (BIO097)**

Your primary role will be the synthesis of novel, biologically targeted compound libraries as part of a multidisciplinary team of synthetic, analytical and computational chemists. We are looking for people with a range of relevant experience with knowledge of solution phase parallel chemistry, modern synthetic techniques and excellent practical skills. An innovative approach to problem solving is highly desirable. The positions available are primarily lab-based and offer the opportunity to work on varied chemistries across multiple protein families thus providing an environment to learn and develop rapidly. Candidates with project-management experience and a track record of delivering to tight deadlines are also encouraged to apply.

**ANALYTICAL/HIGH THROUGHPUT PURIFICATION CHEMISTS (BIO099)**

As part of the growth of the Discovery Products Division, new opportunities for analytical and purification scientists also exist. The positions are predominantly practical and involve the purification, analysis and QC of our focused libraries. Teamwork is the key to our success and you would be expected to work closely with our chemistry and logistics departments. Candidates should have either recently completed their first degree in analytical chemistry or have at least 2 years' hands-on experience of preparative-HPLC or LC-MS. Knowledge of FractionLynx and/or Unipoint would also be an advantage.

**MEDICINAL CHEMISTRY**

In the Medicinal Chemistry Division we work with a number of major pharmaceutical and biotech companies on a range of biological targets across multiple therapeutic areas. As such, this provides a great environment for talented scientists to develop and demonstrate their skills by delivering successful projects. The projects range from Hit Discovery through to late stage Lead Optimisation and require innovative compound design and problem solving skills. BioFocus is a company that provides a friendly and supportive environment and an opportunity to learn and develop. Due to an expansion of the department there exist a number of vacancies for medicinal chemists.

**MEDICINAL CHEMISTS - Senior Scientists and Project Leaders (BIO060)**

Currently we have positions for experienced Medicinal Chemists who can demonstrate their excellence in synthetic chemistry and have experience of managing projects. As the role involves multidisciplinary teams and interaction with client companies, the role would be suited to candidates with several years' relevant industrial experience. Experience of project management is preferred but is not essential. We offer a stimulating, varied and open working environment and levels of responsibility few others can match. We believe in our people and reward them accordingly with a competitive benefits package as well as the opportunity to continuously develop themselves and their careers.

Candidates must have the right to work in the UK. The closing date is 15 December 2005 and we would prefer to receive applications by email. Therefore please send your CV and covering letter stating the appropriate reference number and outlining your suitability for the position to recruitment@biofocus.com.

More information about BioFocus can be found on the internet at [www.biofocus.com](http://www.biofocus.com)
The Royal Surrey County Hospital  
NHS  
NHS Trust  
Partnership Pathology Services, Molecular Biology  
**Clinical Scientist** Grade B 11-13  
£25,709 - £27,808 pa pending Agenda for Change  
37.5 hours per week  
Fixed term contract for six months in the first instance

Partnership Pathology Services (PPS) is a joint venture between The Royal Surrey County and Frimley Park Hospitals, two large, community hospitals. It provides a comprehensive, high quality pathology service to the Trusts.

As part of the growth of the molecular biology laboratory applications are invited for a short, fixed term position to support the routine diagnostic service, as well as to contribute to the development and expansion of the molecular biology service within PPS. There is also scope for research and for personal development including study for MRCPath and state registration.

You will have wide experience in molecular biology techniques, be a team player but also be able to work autonomously. You should have good communication skills and plenty of enthusiasm.

For further information or an informal visit, please contact Simon Dowd, Operational Manager for Cellular Pathology on 01483 571122 ext. 4371 or Nadine Collins, Clinical Scientist on ext. 6839.

Please apply online at [www.jobs.nhs.uk](http://www.jobs.nhs.uk), job advertisement reference number 384-CP-1-090. Alternatively, please contact Emily Allaway, HR Officer on 01483 406744 for an application form and job description.

In order to streamline recruitment within our Trust some of our vacancies may expire prior to the advertised closing date. This is in line with the Department of Health's policy.

Closing date: 9 December 2005.

Interview date: w/c 19 December 2005.

For further information, please also visit our website at [www.royalsurrey.nhs.uk](http://www.royalsurrey.nhs.uk)

POSITIVE ABOUT DISABLED PEOPLE

[2528-018 (2005) : 66]
Institute for Animal Health
The future of animal health is in our hands. And yours.
The Institute for Animal Health operates at the forefront of innovative research into the full spectrum of
animal health issues.

Scientific Biosecurity Advisor
Pirbright, Surrey • £26,780 - £31,186 + Benefits • Ref: 05P/2053

Enjoying considerable autonomy, you will focus on both the day-to-day management of biocontainment
and conducting research into the biosecurity and viral diseases of animals. In particular, you will assist
the Head of Biosecurity in active risk management, control the movement of biological materials across
the containment barrier and develop and maintain the biosecurity website, whilst supervising the ISO
9000:2001 accredited disinfectant testing laboratory.

Qualified to degree level in microbiology, biotechnology, biochemistry or a related discipline, you will
be able to illustrate a proven track record working on infectious diseases. Practical experience of
Biocontainment would be a major asset, and you must be well versed in molecular biology, capable of
solving problems methodically and creatively, and able to manage complex ongoing projects. Subsidised accommodation may be available if required. Closing date: 16th December 2005.

Further details and an application form are available from: Shelley Fox, Human Resources, Institute for
Animal Health, Pirbright Laboratory, Ash Road, Pirbright, Surrey GU24 ONF (tel: 01483 232441; e-
mail: pirbright.hr@bbsrc.ac.uk) quoting reference 05P/2053. The IAH is an equal opportunities
employer. www.iah.bbsrc.ac.uk

Lhasa Limited

Opportunities for scientific software developers

Lhasa Limited is a not-for-profit company and educational charity with an enviable reputation for customer collaboration. Its world-leading Derek for Windows and Meteor software systems are becoming industry standards for toxicity and metabolism prediction. Lhasa Limited is also continuing to develop Vitic, a high-quality, structure-searchable toxicology database system that can be used to develop predictive toxicology models and so to help reduce animal testing.

Senior / Principal Programmers

We are looking to recruit up to 8 highly motivated computer programmers to design and implement a range of innovative features across all Lhasa applications for the prediction of toxicity, biodegradability and metabolism of chemicals. The roles, which include both permanent and fixed-term posts, involve program design and coding work to develop software that uses chemical structure and logic based reasoning to report outcomes to the user.

The successful candidates will work with a small group of developers to create the next generation of market-leading and internationally respected software products.

We are looking for applicants with a degree (or equivalent experience) in computer science or chemistry and experience of developing software with the following combinations of skills:

Post Reference 2005/04
Platform-independent C++ and experience of programming for both Windows and Unix-flavoured operating systems including interacting with databases and use of SQL.

Post Reference 2005/05
Either .Net languages (VB.Net, ASP.NET), ANSI C++ or Java with experience of inter-operability issues when working with components developed with different tools, running on different machines and environments.

Post Reference 2005/06
C++ with ATL/COM on Windows, experience of Java and Java/C++ inter-operability and experience of writing Web services and/or remote procedure calls in Java.

For posts 2005/04 and 2005/05, a good knowledge of chemistry is essential.

Salary for the above Senior/Principal Programmer posts will be in the range of £24,866 - £33,445 p.a. plus substantial benefits, depending on qualifications and relevant experience.

The closing date for applications is 19 December 2005. Interviews are expected to be held between 16 - 27 January 2006.

For further information on Lhasa Limited, please visit http://www.lhasalimited.org

An application pack may be obtained from Dr Jan Langowski (contact details below).

Lhasa Limited operates a no-smoking policy on its premises.

An application pack for all posts may be obtained from the Recruitment page at www.lhasalimited.org or contact Jan Langowski on the details below for more details.

Wessex Water
A YTL company

Scientist

Positive and enthusiastic, you will join our Environmental, Science & Sustainability department. An extremely varied role, you will be involved with all aspects of water supply quality and treatment. Undertaking water supply projects aimed at improving quality standards, you will generate, analyse and interpret data and prepare technical reports.

Qualified to degree level in a scientific discipline, you will have a technical understanding of water supply and treatment processes. With the ability to collate data and use it to improve efficiency, your proven investigative skills will enable you to carry out process projects. Experience with developing water safety plans an advantage. You will possess skills in reporting and troubleshooting and be competent with Microsoft Office. A full driving licence is essential.

To apply, please send your CV, quoting reference RMP/1281, detailing your relevant skills and experience to: Ros Powell, Human Resources Dept., Wessex Water, Claverton Down Road, Bath BA2 7WW, or alternatively by email to ros.powell@wessexwater.co.uk
Closing date: 15th December 2005.

RSPB
A SUMMER STUDYING BIRDS?
BEST WORKPLACES UK 2005

We are looking for experienced and enthusiastic bird surveyors for spring and summer fieldwork.

Research Assistants
£11,500 - £12,500 pa
Various contract positions of 2 to 6 months at locations throughout UK, commencing February/April 2006

If you want to be involved in key research and survey work that supports the conservation of birds, these posts are just what you have been looking for.

You will need to have experience of surveying or studying birds in the field and may have got a degree in a biological subject. Whether working on your own or with others, you will need to be self-motivated and enjoy working long hours in the field as and when weather permits. You will be working on other people's land and will need to be a good communicator to ensure good relations are maintained. You don't need to fill in an application form but we will need an up-to-date CV, the names and addresses of two referees and full details of all your field research, survey and other experience (e.g. ringing, insect sampling). Successful applicants will be contacted before 31 January 2006.

For further information please visit our website. CVs and further details should be sent (quoting RANS2006) to Mrs Anita McClune, Conservation Science Department, The RSPB, The Lodge, Sandy, Beds SG19 2DL. Closing date: Monday 9 January 2006.

IMS HEALTH  ims

IMS is the world's Leading provider of information solutions to the pharmaceutical and healthcare industries. With over 50 years' experience and more than 6,400 employees operating in over 300 countries, IMS Health offers leading-edge business intelligence products and services that are integral to clients' day-to-day operations and decision making.

Chemical/Patents Editors
We are seeking talented and committed individuals to join our highly skilled team of editors. You will have an excellent first degree in chemistry, with strength in organic chemistry and possibly a postgraduate qualification in medicinal chemistry or biochemistry. Patent searching experience and/or practical industrial medicinal chemistry experience would be desirable. Knowledge of drug delivery systems would also be valuable. A broad understanding of chemical nomenclature is essential. Scientific publishing or industry information experience would be advantageous, as would knowledge of a foreign language.

You will undergo extensive in-house training to equip you to deal with electronic publishing techniques. You will need to be computer literate and have an interest in developing on-line and Internet searching techniques.

You will be updating a commercial database of drugs in R & D so the ability to maintain high consistency and standards is important.

Excellent communication skills, both written and verbal are essential. You may need to conduct interviews with research scientists, understand and assimilate both scientific and commercial information. Flexibility, a keen eye for detail and calmness under pressure to maintain tight deadlines are a must. You will be highly motivated and a good team player. Travel to international scientific conferences may be required.

In addition to the full-time posts, we are also looking for in-house freelance patents editors to work on a number of projects.

We offer a competitive salary and excellent benefits package.

Applications including covering letter, full c.v., and current salary should be sent or e-mailed to Madeleine Siraj, Publications and Editorial Administrator, IMS Health, 7 Harewood Avenue, London, NW3 WB, UK.

Netherlands Institute for Metals Research

**PhD and Postdoctoral opportunities in the field of Materials Science**

NIMR is a world-class institute for applied research in the fields of structural and functional materials. NIMR works in close contact with both its academic and industrial partners, with the mission to transform knowledge into competitive and innovative business applications for the Dutch metals industry. The Research portfolio is divided into eight clusters.

Currently, we have vacancies in the following projects for PhD and/or Postdoctoral Researchers within the clusters below:

**Cluster: Modelling of Forming of Metal and Laminate Products**
- Tailor made blanks for aircraft industry
- Models for process planning and process mechanics in incremental sheet forming

**Cluster: Fundamentals of Forming**
- Forming the limits of damage predictions - from fundamentals to application
- Characterisation and prediction of interface delamination in integrated Microsystems

**Cluster: Micro/nano processing technologies of functional materials**
- Thin film micro-cavities for MEMS packaging
- Influence of humidity on the reliability of plastic encapsulated IC’s

**Cluster: Aluminium Production**
- Extrudability and peripheral recrystallisation of medium- and high-strength aluminium alloys
- Application of cavitation melt treatment in solidification processing
- Super plasticity in fine- and coarse-grained materials
- Improved the performance and increased productivity in aluminium extrusion
- Texture control in aluminium sheet for automotive applications by asymmetric rolling

**Cluster: Steel Production**
- Creation of novel TRIP steels by tempering martensite

**Cluster: Surface and Interface Engineering**
- Qualification methodology of coating-substrate systems

**Cluster: Welding**
- Design of hydroformed parts for laser welding
- Stake welding of zinc coated steel without a preset gap

NIMR PhD Researchers receive a 4-year contract and PD Researchers receive a contract for a maximum of 3 years and a competitive package of benefits.

For more information about NIMR, an overview of all our current vacancies and an online application form please visit our website www.nimr.nl.

MRC
Medical Research Council
Mary Lyon Centre, Harwell, Oxfordshire

**Investigator Scientist**
4 year fixed term
Starting salary from £24,746 pa

We are seeking a post-doctoral researcher with experience in mouse genetics and an interest in neurodegeneration to lead the research on a project supervised by Professor Elizabeth Fisher, to identify new genes involved in mammalian motor neuron degeneration, including those that modify the SOD1 phenotype that causes ALS in humans. You will be required to run the project on a day-to-day basis and to supervise a research assistant. You will take part in a medium-scale ENU mutagenesis programme and will apply standard phenotyping tests for locomotor deficits. If interesting mutants arise you will also undertake heritability testing and then positional cloning projects. An important part of the job is liaising with collaborating laboratories and sending them mutants. Downstream analysis will include molecular phenotyping and functional validation of any identified candidate genes. Good phenotyping and genotyping skills are required, as well as meticulous organisation. You will be expected to interact closely with other members of the group and with other groups with whom we collaborate. This position is available for up to 4 years.

Benefits include 30 days annual leave and pension scheme. Please note that final appointments will be subject to security screening clearance.

For an application form please contact the Personnel Office, Medical Research Council, Harwell, Didcot, Oxon. OX11 0RD. Tel: 01235 841069 or email: personnel@har.mrc.ac.uk

Closing date: 19th December 2005.

The Medical Research Council is an Equal Opportunities Employer.

Play your part to progress science
The Biotechnology and Biological Sciences Research Council (BBSRC) is the UK’s principal public funder of innovative non-medical biological research, supporting a huge range of cutting-edge projects. In these key roles, you’ll play your part in supporting the science of the future over a vast range of exciting areas.

**Programme Managers**
Up to £25,767 pa  Swindon
As a Programme Manager, you’ll manage the peer review of grant applications, evaluating their relevance and administering the process thereafter. Representing BBSRC externally, you’ll also advise the scientific community and users of research about the Council and its programmes by running workshops and building relationships with the scientific community.

With a relevant degree and, preferably, post-graduate experience, you’ll have a good analytical mind together with excellent communication, planning and IT skills. Teamwork and performance under pressure are vital; an understanding of peer review and current issues in the field would be an advantage. Ref: JRU 210105.

**Assistant Programme Managers**
Up to £19,939  Swindon
You’ll provide administrative support for peer review of grant applications and scientific assistance to working groups, workshops and other meetings.

As well as at least two A Levels (at least one scientific) and/or relevant experience, you’ll need good interpersonal, IT, teamwork and communication skills. Good performance under tight deadlines is essential and an understanding of peer review is desirable. Ref: JRU 211/05.

Both roles are available either permanently or on a temporary, maternity contract. BBSRC benefits include final salary pension, very generous annual leave and flexible hours as well as a first-class working environment.

For an application form and further details, please contact Sue Cahill at the Joint Recruitment Unit on 01793 444468 (24 hours), fax 01793 444016 or email: jru@epsrc.ac.uk quoting the relevant reference.

Alternatively all our documents are available on our website [http://jru.rcuk.ac.uk](http://jru.rcuk.ac.uk)

Closing date: 9.00 am, 23 December 2005.

The BBSRC welcomes applications from all sections of the community irrespective of race, ethnic origin, religion, sexual orientation, disability or gender.

**Analytical Chemist**  
LOCATION: PLYMOUTH, DEVON  
SALARY: £20,000 - £25,000  

DML is the largest marine facility in Western Europe, based on the bank of the Tamar River on the border of Devon and Cornwall.

Working in our Materials and Environmental Laboratory, you will be a key part of a small team in providing a comprehensive analytical support facility to both company operations and external customers. Qualified with a good degree in Chemistry or related, you will have relevant experience ideally in classical wet chemistry and instrumental techniques such as ICP, AAS, FTIR, XRF, IC and GC. Familiarity with environmental monitoring (welter, soils and air) would be an advantage.

For reasons of national security only exclusively British nationals can be considered for this role.

To apply, please send your CV to martin.bennell@matchtech.com or call him on 01489 898266.

where will…?

**Scientists & Technologists**

Where will the threats to our peace and security come from in the future? A vital question – and at Dstl, the Defence Science and Technology Laboratory, some 3,000 of the first minds in their fields, are actively finding the answer.

We are the prime provider of expertise to the Ministry of Defence. We’re addressing the burning issues of today (and tomorrow). And in our superbly equipped facilities we’re taking scientific thinking to new levels.

If you’re an intellectually curious scientist or technologist keen to develop your specialist knowledge in a world-class organisation, find out more about current openings at [www.dstl.gov.uk/careers](http://www.dstl.gov.uk/careers)

[2528-029 (2005) : 71]
Innovative Scientists and Engineers wanted
Challenging roles supporting UK chemistry-using industries

Three organisations at the centre of UK innovation, Crystal Faraday (green chemical technology), IMPACT Faraday (colloid and formulation technology) and Insight Faraday (high throughput technology) are joining together as founder members of the Chemistry Innovation Knowledge Transfer Network. We are looking for up to three exceptional individuals to join our public sector programmes, working with industry, academia and government to set and implement strategy for future technology developments in our core areas.

Ideally you will be a recent graduate/post graduate probably in a chemistry/chemical engineering/biotechnology discipline, preferably with two or more years’ industrial experience, and will have a thorough grounding in one of our core technology areas. You must demonstrate the ability to rapidly understand the key features, benefits and limitations of a wide range of technologies and have strong analytical skills and the ability to communicate complex technical ideas to a range of audiences.

A competitive salary will be offered and there is scope to broaden the role into new areas in the future. The posts are based in either Rugby or Runcorn with the possibility of some flexibility.

To apply send your CV with an accompanying letter to: Neville Hargreaves Crystal Faraday Partnership 165-189 Railway Terrace Rugby CV21 3HQ
Or e-mail: info@crystalfaraday.org

Avidex
Research Scientists

At Avidex, our focus is on the development of small molecule and protein therapeutics involving T cell receptors, either as drug targets or as the therapeutic molecule. We are currently working on novel treatments for cancer, inflammation and autoimmune disease. We are about to expand our research programmes with pharmaceutical partners, and are looking to employ scientists for several new positions. Suitable candidates will have a strong research background, with team working skills and the ability to work to deadlines. If you have experience in any area of molecular biology, cellular biology or immunology, and would like to work in an exciting and challenging environment, please send us your CV for consideration.

**Phage Display of T Cell Receptors**
Position 1
Scientist with MSc( PhD in molecular biology or microbiology. Some hands-on experience of Phage Display is desirable, but not essential.

Position 2
Senior Scientist with PhD and several years' post-doctoral experience. Expertise in Phage Display Technology is essential for this position.

Position 3
Molecular Biologist with PhD and 2-5 years' post-doctoral experience, including library construction.

**Cellular Biology**
Position 4
Scientist with several years' experience in Live Cell Fluorescence Microscopy.

Position 5
Scientist with MSc/PhD in Cellular or Molecular Biology, ideally familiar with ELISA and Elispot Assays, although training can be given.

Position 6
Immunologist with MSc or PhD, skilled in Primary Cell Culture, preferably T Cell Culture. Ability to work independently is essential.

**Autoimmunity and Allergy**
Position 7
Senior Immunologist, with expertise in Autoimmunity or Allergy A PhD in Immunology, several years' post-doctoral research experience and a strong publication record are essential.

Salaries are competitive. Benefits include pension scheme, life insurance and private health insurance.

Please reply with CV to Corin Canuto, Avidex Ltd, 57C Milton Park, Abingdon, Oxon OX 14 4RX, or email to corin.canuto@avidex.com Closing date 6\textsuperscript{th} Jan 06. Interviews from 16\textsuperscript{th} Jan 06.

GR
Micro Limited
Medical & Environmental Microbiological Services

**Senior Scientific Manager**

G.R. Micro Ltd is a highly regarded and successful contract research organisation offering a range of microbiological, molecular biological, data analysis and consultancy services to the pharmaceutical industry, particularly in the development of antimicrobials.

As a result of continuing development and diversification of services, the company is seeking to expand its senior management team.

A position is available for a scientist with proven research and management ability and the ambition to use these skills in the commercial arena.

The appropriate candidate will have relevant academic achievement (BSc., MSc., PhD, or equivalent) supported by a substantial peer-reviewed publication record in the field of clinical microbiology/molecular biology, and demonstrable familiarity with state-of-the-art, computer-based data analysis techniques. Experience of working in, or undertaking research funded by the pharmaceutical industry would be an added advantage.

The position is one of high seniority and carries an appropriate compensation package.

Applications should be made by emailing a CV and cover letter in the first instance to recruit@grmicro.co.uk

AWE
In the field of chemical analysis, what are you made of?

**Team Leader - Chemical Characterisation**
£30-35k (dependent on experience)  Nr Reading, Berkshire

Tasked with maintaining the UK's nuclear deterrent, the Atomic Weapons Establishment is renowned as a global centre of scientific and engineering excellence. Much of the work we do is supported by a small but dedicated team of chemical characterisation analysts. And right now we're looking for a talented individual to oversee and enhance the work they do.

Leading, developing and motivating this team, you'll ensure that every programme they're involved in is delivered on time to the highest possible standards. Day-to-day, this will involve routine sample testing and analysis. But at the same time, we'll expect you to keep up to speed with the latest industry developments, explore the potential of new methodologies and continually improve the way we work.

Together with a relevant degree and considerable industry experience, you'll need a broad understanding of chemical analysis and the techniques involved. Equally important, however, are team leadership experience, a forward-thinking approach and the ability to bring out the best in multi-disciplinary teams.

As well as the opportunity to continually develop your abilities, you'll enjoy a superb benefits package. One that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme.

To find out more about this role, visit [www.awe.co.uk](http://www.awe.co.uk). Alternatively, you can call us on 0118 982 9009 for an application form.

We also have a variety of other technical team leadership roles available, details of which are available on our website.

AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age or responsibility for dependants. Successful candidates will be selected solely on their ability to carry out the duties of the post.

Because of the nature of the work undertaken at AWE, this post is required to meet special nationality rules and therefore is only open to British Citizens. All selected candidates will be required to undergo security clearance.

THE RIGHT CHEMISTRY
WILEY-VCH is an international science publisher and part of the John Wiley & Sons Publishing Group.

STM Chemistry has a position available for an

**Assistant Editor (f/m)**

Applicants should be self-motivated, innovative and have the desire to contribute to the development of *Small* - an exciting new micro- and nanoscience journal. You will be involved in all aspects of the editorial procedures, such as the reviewing process, the development of journal content, editing and proof reading manuscripts, coordination of freelance work, and contact with authors from all over the world.

Excellent organizational and communication skills, diplomacy, and flexibility are needed. A broad education in biology, medicine, chemistry, materials science or physics with an emphasis on nanoscience or technology is essential. You should be fluent in English (native speaker preferred) and be familiar with text and graphics PC programs.

The editorial office is based at WILEY-VCH in Weinheim, a pleasant small town near Heidelberg in southwest Germany.

Applicants should send their full CV with a covering letter describing their suitability for the post to:
Wiley-VCH Verlag GmbH & Co. KGaA Human Resources
Christiane Rabe Boschstrasse 12 D-69469 Weinheim

[2528-037 (2005) : 73]
There is a remedy.
It's your challenge to find it.

**Graduate opportunities** – from c. £16.7k + benefits

There are so many different avenues open to ambitious science graduates. You're presented with an array of options that could have a dramatic effect on your future direction - and the kind of impact you can make on people's lives.

At HPA (Porton Down), our reputation for world-class research into pathogenic organisms provides an outstanding platform for you to progress your career. Based in a rural location near Salisbury, we handle many public health problems which are reflected in our current research projects, ranging from the fight against meningitis, Ebola and Anthrax to global challenges such as TB.

We have graduate vacancies where you'll get to work on a variety of these high profile projects within well defined programmes, with the support and mentoring of experienced scientists. There are unrivalled opportunities for unique research work.

Alternatively, as part of our graduate training scheme, you will receive 6 months' intensive training across all of our research areas and will then participate in any one of our projects.

We seek individuals with strong academic backgrounds and practical experience who have completed or expect to complete a first degree in microbiology, biochemistry, cell biology, virology or life sciences. You'll also need to be dedicated to pushing the boundaries of scientific possibility - and committed to developing a reputation for yourself that's as distinguished as ours.

For an application pack, please contact Human Resources on 01980 612600. Alternatively email: human.resources@hpa.org.uk quoting Ref: G06 for vacancies or GT51 for Graduate Training Scheme. Closing date: 17 March 2006

Health Protection Agency
[2528-038 (2005) : 74]
Among a range of rapidly developing technology projects, the Centre for Process Innovation anticipates rapid progress with its initiatives in the fields of Bio-technology and Bio-processing. This will be achieved through the work of two newly established functions -

CENTRE OF EXCELLENCE BIOCATALYSIS, BIOTRANSFORMATIONS AND BIOCATALYTIC MANUFACTURING (CoEBio3)

The Centre of Excellence (CoEBio3) is an association of academic and industrial affiliates. It is essential to the success of the project that members' interests are managed and that the Centre moves towards commercial viability within two years.

RESEARCH EXPLOITATION MANAGER
14158 CA £35,000
The post is tenable for an initial period of up to two years, responsible to the Director of Bio manufacturing for research and funding in the field of biocatalysis, for liaison with the Managing Director and industrial members of CoEBio3 and for maintaining professional relationships with project partners.
A first degree and PhD in a relevant subject and research experience in biocatalysis are essential, coupled with communication skills, technical writing ability, organizational management skills and the ability to work with academics.

CENTRE DIRECTOR
14089 CA £70,000
The primary role of the Centre Director is to develop CoEBio3, into a successful commercial operation, providing training, contract R&D and, in the longer term, intellectual property.
Candidates with experience in the establishment and growth of a bio-technology or similar business and essential interpersonal and leadership skills would be ideally suited to this post.

BUSINESS DIRECTOR
14092 CA £65,000
To ensure that a new National Industrial Biotechnology Facility created in partnership with the Centre of Excellence, CoEBio3, is a commercial success.
Reporting to and working closely with the Centre Director, you will have the experience and leadership skills to establish and grow a new technological business operation.

Both above posts require management experience at a senior level in the chemical and/or pharmaceutical sectors, together with commercial acumen in international markets and the ability to work closely with academics.
Previous P&L responsibility would be advantageous.

BUSINESS OPERATIONS MANAGER
12788 CA £50,000
Responsible for continuous operation of the NIBF, the management of production, product scale up and development, the production team and laboratory support.
Working closely with colleagues in technical operations at CPI and the COEBIO3, the person appointed will also lead business development for commercial efficiency and market growth.
You will have a degree in Chemistry/Biochemistry or Chemical/Biochemical engineering with at least three years' managerial experience at the industrial or pilot scale in fermentation processes and related commercial activities.

JOINT NATURE CONSERVATION COMMITTEE
The Joint Nature Conservation Committee (JNCC) was established by the Environmental Protection Act 1990 and advises on UK and international conservation issues.

Biodiversity Information Assistant
Permanent post, based in Peterborough, £18,252 pa

Within JNCC, the data management team contributes to projects covering the full range of biodiversity informatics, from data capture and management to analysis and dissemination of results. This is illustrated by our involvement in projects such as: the National Biodiversity Network Gateway ([www.searchNBN.net](http://www.searchNBN.net)), Recorder wildlife data capture software, marine habitat mapping ([www.searchMESH.net](http://www.searchMESH.net)) and the Global Biodiversity Information Facility ([www.gbif.org](http://www.gbif.org)). We also provide technical advice and support for all work within the organisation.

We are looking for a biodiversity information assistant to join our lively and committed team. The post holder will assist in the development of effective solutions within a range of conservation projects. This is an excellent opportunity to broaden your technical expertise and to contribute to the protection of our natural environment. We also offer a generous leave allowance and a choice of pension schemes.

The successful applicant should have a good understanding of ecology and a flair for computing. Some experience in project management database design, programming or GIS would be a distinct advantage although training will be provided where necessary. The ability to adapt to rapidly changing technologies is essential Ref No 2005/14

For further details visit our website at [www.jncc.gov.uk](http://www.jncc.gov.uk), email recruitment@jncc.gov.uk, or leave a message on 01733 866892. Postal applications should be made in good time to allow for seasonal delays. CV’s alone will not be considered. The closing date is 22 December 2005. The JNCC welcomes applications from all members of society.

[2528-040 (2005) : 75]
The Royal Society of Chemistry (RSC) is the largest organisation in Europe for advancing the chemical sciences. Supported by a network of 43,000 members worldwide and an internationally acclaimed publishing business, our activities span education and training, conferences, science policy and the promotion of the chemical sciences to the public.

**Opportunities in Publishing Cambridge**

The Royal Society of Chemistry (RSC) is a major publisher of books and journals such as ChemComm, the Analyst, PCCP, Chem Soc Reviews, Molecular BioSystems, Soft Matter and J Materials Chem.

If you have a good honours or masters degree or PhD in a chemical or related science and are interested in a career in scientific publishing, then we want to hear from you. We will provide the successful graduates with training in Editorial/Production Publishing and insight into Marketing, Sales and other RSC activities.

Your role will be working in a team with Editors where you will enjoy day to day challenges and responsibilities.

We seek excellent communicators and team-workers who are comfortable making decisions. You must be organised and able to work under pressure, handling high workloads whilst maintaining best standards. Other essential qualities include excellent English and a keen eye for detail.

Starting salary will be £19,731. Benefits include pension, life assurance, private health insurance and 26 days holiday.

Further information about the RSC and these posts is available on our website at [www.rsc.org](http://www.rsc.org), where you can download our application form. Alternatively, phone 01223 432238 (24 hours), or email [hr@rsc.org](mailto:hr@rsc.org). Please send applications only and quote vacancy ref. no.62.

Closing date: 15 December 2005; the positions are available immediately. The assessment centre will be on 5 January 2006.

RSC Advancing the Chemical Sciences
Registered charity Number 207890
[2528-041 (2005) : 75]
We've turned graduate career development into a science.

**Science Graduate opportunities** - Sandwich, Kent

Join our European R&D headquarters at Sandwich and you'll soon realise that we can provide all the support, resources and development opportunities you need for a rewarding and fulfilling career. So it's no wonder that we were voted most popular Graduate Recruiter for Engineering and Science in the 2005 Target Awards.

We're committed to getting our drugs to patients in the shortest possible time. And our R&D teams at Sandwich play a vital role in our global success, supporting and developing one of the healthiest product pipelines in the industry. Join us and you'll have access to resources that few can match, along with the scope to develop your career into a range of scientific areas.

We're looking for science graduates with the drive, ambition and dedication to help develop the next generation of medicines. If you have a particular interest in synthetic organic chemistry, analytical chemistry, chemical engineering, pharmaceutical formulation or biology (including pharmacology, biochemistry and related disciplines), all the better.

In return, you'll enjoy working in modern, purpose-built labs, where you'll receive all the support, training and development you need.

AWARDED TO PFIZER LIMITED
[2528-042 (2005) : 76]
OPEN TO EXPLORE

Innovation takes imagination and vision. It also takes an openness to explore new ideas and approaches. Help shape our Respiratory Disease Area for cystic fibrosis at our state of the art research facility in Horsham, Sussex and you'll have the freedom to do just that.

Join us as an Investigator, and you'll be part of a dedicated team that sets industry standards in discovering new and effective therapies for cystic fibrosis. As an experienced pharmacologist you'll be a key member of the drug discovery project team, designing, undertaking and interpreting studies using drug candidates within established in vivo and in vitro models. Your development of new in vivo models relevant to cystic fibrosis lung disease will also be key.

Along with a relevant PhD, you will need at least two years' post-doctoral experience as well as excellent knowledge of experimental design and have a genuine interest in respiratory diseases. In vivo modeling experience is necessary, while in vitro experience would be an advantage though is not essential.

The New Pathway to Drug Discovery
www.nibr.novartis.com
[2528-043 (2005) : 77]
The Medical Research Council, Clinical Sciences Centre (CSC) wishes to appoint a new Head of Research Infrastructure to replace Ruth Hunt, who retires in 2006.

This is a senior management position within the CSC and the successful candidate must be able to demonstrate significant recent experience of laboratory-based scientific research or research support (preferably in the biological sciences). He or she will be a confident, pragmatic problem-solver, a sound negotiator, and have strong skills in both people and project management.

The post holder has overall responsibility for the management of the research infrastructure (buildings and major equipment) of the CSC, together with responsibility for the provision of a range of technical services essential to underpin the Institute's research programmes. Applicants will also be responsible for the management of the CSC's health and safety team and must hold as a minimum the NEBOSH certificate.

The CSC is situated on the Hammersmith Hospital Campus of Imperial College Faculty of Medicine and there is a complex matrix of relationships between the CSC, Imperial College and the other site partners, Hammersmith Hospitals NHS Trust, Hammersmith Imanet Ltd and, shortly, GlaxoSmithKline. The post holder will be expected to maintain and develop these relationships in his or her areas of responsibility.

Closing date for all completed application forms is 2/1/06.
Interviews expected to be held on 17/1/06

For informal enquiries and a full job description and application form visit our website www.csc.mrc.ac.uk or contact the CSC Human Resources: recruit@csc.mrc.ac.uk or telephone +44 (0) 20 8383 3446 (answer machine out of hours), quoting reference TS/HRI.

The MRC is an equal opportunities employer.

All final appointments may be subject to security clearance.

[2528-044 (2005) : 77]
GILEAD
Advancing Therapeutics. Improving Lives

DRUG SAFETY ASSOCIATE
Don't just change your employer.
Help change the course of some of the world's most life-threatening diseases.

Gilead. The company at the forefront of the latest treatments in infectious disease. Enabling every day people to live every day lives, Gilead is an industry leader committed to advancing therapeutics for life-threatening diseases worldwide.

We have a fantastic opportunity to join our drug safety evaluation/risk management team based in our Cambridge office. You will have the opportunity to train in pharmacovigilance and risk management involving products in the early stages of pharmaceutical development right through to post-marketing. Ultimately you will be helping patients and prescribers by helping to define the safety profile of Gilead products. The work will involve detailed analysis of different forms of safety information, including clinical studies and post-marketing surveillance, liaison with experts across the company and the preparation of suitable documentation for internal and regulatory purposes.

To be successful in this role, you will need a BSc (ideally with an MSc or PhD) in a Biomedical discipline. A background in drug safety, although useful, is not essential: we are also interested in candidates with in-depth knowledge of drug development gained through other disciplines such as clinical research regulatory, or pharmacology. The role requires a self motivated individual with a systematic and logical approach to problem solving and strong attention to detail, without losing sight of the big picture. Good judgement with excellent written and oral communication skills are also essential along with the ability to work under tight deadlines.

Interested? Please send CV and salary requirements to cambridge.jobs@gilead.com

[2528-045 (2005) : 77]
Finding the world’s resources takes strategy. Solving problems is a series of systematic moves - part of a mental game you enjoy. As a Veritas geophysicist, you will have the opportunity to exercise your mind and achieve real results.

You are a graduate candidate from a technical discipline at any stage in your career. Join us in our goal to lead the industry with the brightest and best professionals.

Geophysicists

Veritas is a leading provider of integrated geophysical information and services to the petroleum industry worldwide. Our comprehensive suite of advanced geophysical technologies allows us to work alongside our clients to enhance drilling and production success and reduce exploration risk.

At Veritas you can see the big picture of where the company is going and contribute to its success. And, in turn, control your own success as well.

For further information and additional vacancies, see our web site and make that move.

BSI
Join the market leader

BSI is the world's leading certification body, and due to the continuing expansion of our medical devices business we are seeking additional specialists. BSI performs certification activity as a Notified Body under the European Medical Devices Directive and offers complete registration services for ISO 13485, including for the manufacture of terminally-sterilised devices.

Medical Device Specialists
We are seeking dynamic Engineers or Materials Scientists experienced in Orthopaedic medical devices to work within the Notified Body. Candidates with a strong background in general devices or implants will also be considered. As part of the overall client management responsibilities, successful candidates will be competent to review critical design data (including risk analyses, biocompatibility, clinical investigation data, and post-market surveillance information), to prepare recommendations for EC certifications. With at least five years' in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. The position is based at our Hemel Hempstead office however occasional UK and overseas travel will be required.
Whilst familiarity with the European medical devices approvals would be an advantage for these notes, full regulatory and auditing training will be provided.

Microbiologist
We are seeking an experienced, qualified microbiologist who can demonstrate experience in sterile medical device or pharmaceutical manufacturing to work within in the Notified Body. Qualified to degree or equivalent in Microbiology and trained and experienced in the routine control and validation of sterilization and microbiological testing you will have a minimum of three years' experience in the medical device or pharmaceutical field. As part of the overall client management responsibilities you will be responsible for the review of data (including sterilization validations) and the preparation of recommendations for EC certifications. You will also be responsible for planning, reporting and performing of audits of clients' management systems ensuring compliance with regulatory and voluntary requirements. The position is based at our Hemel Hempstead office, however UK and overseas travel will be required. The applicant must be able to demonstrate a mature, high standard of personal presentation and interpersonal skills, be computer literate with excellent written and verbal presentation skills.
Whilst familiarity with the European medical devices approvals would be an advantage for this role, full regulatory and auditing training will be provided.

All positions offer a competitive salary, pension and benefits. Interested and qualified candidates should submit a copy of their CV, together with their current remuneration package and the appropriate reference number for the vacancy.

Applications to Laura Baird, British Standards Institutions, Human Resources Dept, Maylands Avenue, Hemel Hempstead, Hertfordshire HP2 4SQ. Email: laura.baird@bsi-global.com Telephone: 01442 230442

[2528-047 (2005) : 79]
ACCOVION

Medical Writer
Based near Frankfurt am Main

Accovion GmbH is a leading European research organization comprising clinical development, medical writing, biostatistics, statistical programming, data management and pharmacovigilance departments. Numbering about 200 staff, Accovion provides comprehensive drug development services to the pharmaceutical and biotechnology industries. We employ some of the most skilled and experienced professionals to be found anywhere in the industry, and offer a creative scientific and international environment that will allow you to develop your own skills. Our headquarters are conveniently situated in Eschborn on the outskirts of Frankfurt, and we have additional locations elsewhere in Germany, as well as in France, Poland and the USA.

The Medical Writing department is a key function within Accovion, with highly experienced medical writers involved in all aspects of clinical and regulatory documentation, closely interacting with colleagues at all levels. We offer training and mentoring programmes to new staff, and are now further expanding the group to meet the increasing demand for quality medical writing services from our clients.

Projects include editing and writing (in English) of investigator brochures, clinical study protocols, reports, summaries, and manuscripts for publication. Senior writers also undertake co-ordination and planning of submission documentation, and other senior medical communication roles.

Applicants must be native English speakers and have the ability to express medical data accurately and concisely. They must have flawless English-language skills and will ideally have a background in life sciences including research experience and publications. Preference will be given to candidates with experience of medical writing within the pharmaceutical industry. A sound basis in German would be a considerable advantage, as would good word-processing skills. You will receive a competitive salary, bonus and benefits package to suit your qualifications.

To apply, please send your curriculum vitae including the names of two references, and two samples of your written work, to:
Gabriela Pawlak-Kuhlmann, Human Resources, Accovion GmbH, Helfmann-Park 2. 65760 Eschborn, Germany
Tel.: +49 61 96 77C19-466. Fax +49 61 96 7709-110 gabriela.pawlak-kuhlmann@accovion.com

Further information can be found on our website at http://www.accovion.com

Forest Laboratories UK Ltd

CLINICAL RESEARCH ASSOCIATE

Forest Laboratories UK Ltd is a subsidiary of Forest Laboratories Inc. USA, involved in the development and marketing of ethical and OTC medicines in a wide range of therapeutic areas.

A vacancy has arisen for a Clinical Research Associate reporting to, and working closely with, the company's Senior Medical Advisor on the company's clinical trial programme. We are looking for a flexible individual with a life sciences or nursing degree and who has prior practical relevant experience of contemporary clinical research and GCP. The ideal candidate will probably have been working in the pharmaceutical industry, or research based healthcare supplier, for about two or more years and looking for a position with a broader horizon and greater personal responsibility. You will need the ability to often work with minimal supervision and enjoy international travel. You will have the ability to communicate effectively in business and scientific English, both written and spoken and be familiar with MS Office applications.

We offer:
- The opportunity for hands-on experience
- The chance to visibly contribute
- Competitive salary
- Free life assurance
- Contributory pension scheme after three months
- Car allowance

If you feel you fit the bill, please apply in writing with your CV stating your current salary, to: Human Resources Officer, Forest Laboratories UK Ltd, Bourne Road, Bexley, Kent DA5 1NX Or send your application to: cra@forest-labs.co.uk Applications must be received before 13 December 2005 Only short listed candidates will be contacted

[2528-049 (2005) : 79]
Cool, calm and collected?

If you've got what it takes to thrive in the world's coldest, most challenging and most unique continent, think about joining the British Antarctic Survey - and beginning the adventure of a lifetime. As part of our team, you'll work in an environment that's like nothing else on earth, enabling us to perform world-class scientific research while sustaining an active and influential presence for the UK in Antarctic affairs.

We'll have opportunities in the following areas:

- Zoological Field Assistant
- Electronic Field Engineers
- Physicists/Antarctic Meteorologists

Ideally you'll have a relevant scientific degree and experience, while other useful skills - such as mountaineering, building or maintenance - would be an advantage.

To find out more about BAS and our graduate opportunities, please visit [www.antarctica.ac.uk/employment](http://www.antarctica.ac.uk/employment)

If the position involves Antarctic service, you must be physically capable and medically fit to work in Antarctic conditions. We welcome applications from all sections of the community. People from ethnic minorities are currently under-represented and their applications are particularly welcome.
2 POST DOCTORAL RESEARCH SCIENTIST POSTS IN PLANT AND INVERTEBRATE MODELLING

These positions are part of a BBSRC LINK funded project between Rothamsted Research, the Scottish Crop Research Institute and Syngenta. The aim of the project is to develop a generic, functional model to predict the effects of management on arable ecosystem function and diversity. The model will consist of plant and Invertebrate components which are trophically linked and regulated by traits that link organisms to field management and environment. The project will integrate existing data, generate new experimental data where appropriate, define and parameterize new functional group models of arable biodiversity and run simulations to predict the likely impacts of changes in management practice on arable ecosystem dynamics.

The post holders will work closely together and in collaboration with colleagues at Rothamsted Research, Scottish Crop Research Institute and Syngenta to explore the interactions between the plant and invertebrate model components and, with the assistance of two technical staff to be appointed in the second year of the project, conduct joint field experiments to test model predictions. The post holders will have a PhD in an ecological or related discipline and experience in modelling.

PLANT MODELLING POST (VACANCY REF PE1/2)
This post will be based at Scottish Crop Research Institute, within an active group working on existing Defra and SEERAD-funded projects on plant communities and gene flow. The post holder will concentrate on the fluxes and partitioning of energy and carbon through crops and arable plants, based on arable seedbank dynamics and the growth and interactions of emerged plants.

INVERTEBRATE MODELLING POST (VACANCY REF 886)
This post will be based at Rothamsted Research and will focus on modelling functional dynamics of arable invertebrate communities. Invertebrates will be modelled using behaviourally explicit individual-based models of trophic relations between primary and secondary consumers, and their relationships to plants.

Both appointments are full time and funding is available for up to 3 years. These positions are B6-PD with a salary range normally between £22,351 and £25,767 per annum (pay award pending) dependant upon qualifications and experience.

Applications for both or either of the posts are welcomed. Apply by application form only, available with further particulars from the Rothamsted Research website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ. Please quote reference PE1/2 or 886.

For informal discussion on the posts please contact Dave Bohan (david.bohan@bbsrc.ac.uk tel: 01582 763133 x2335) or Cathy Hawes (cathy.hawes@scri.ac.uk tel: 01382 562731).

Closing date for both positions is 31 December 2005

An equal opportunities employer

Placing People First
www.srg.co.uk [2528-053 (2005) : 81]
The Royal Society of Chemistry (RSC) is the largest organisation in Europe for advancing the chemical sciences. Supported by a network of 43,000 members worldwide and an internationally acclaimed publishing business, our activities span education and training, conferences, science policy and the promotion of the chemical sciences to the public.

**Production Systems Analyst**

Cambridge

Due to growth in its publishing business the RSC is now seeking a Production Systems Analyst to work at its offices on the Cambridge Science Park

Reporting to the Editorial Production Systems Manager, you will play a key role in investigating, developing and implementing delivery of RSC Publishing content by exploiting relevant technologies such as XML, CML, INChl, web services, directories and ontologies. You will also be responsible for carrying out feasibility studies for new developments, including the creation and demonstration of prototypes, supporting in-house production processes and developing appropriate procedures.

You should have a good honours degree in Chemistry or a related science, with a strong technical background. A good knowledge of XML and related electronic publishing languages and tools; or strong knowledge of computing as it is applied to the communication of chemical information is essential. You should also have good communication and interpersonal skills and be able to solve a range of technical problems.

Excellent benefits include a starting salary of £24,429 to £28,740 (dependent upon experience) per annum, plus 26 days holiday, pension scheme, life assurance and private health care.

Further information about the RSC and this post is available on our website at [www.rsc.org](http://www.rsc.org), where you can download our application form. Alternatively, telephone 01223 432238 (24 hours), or e-mail hr@rsc.org for an application pack. Please quote vacancy number 63. Application forms only please, no CVs.

RSC Advancing the Chemical Sciences
Registered Charity Number 207890

[2528-054 (2005) : 81]
Faculty of Science
School of Life Sciences

The School of Life Sciences at Kingston University is recognised for its excellent teaching quality, with Biosciences achieving the maximum 24/24 points in the latest QAA subject review. New laboratory facilities have recently been built and all staff are actively engaged in research/consultancy.

**Lecturer/Senior Lecturer in Pharmacology/Physiology**
£26,193 - £39,362 pa inc.  Ref: 05/343

We are seeking to appoint a Pharmacologist/Physiologist to contribute to the delivery of our BSc (Hons) Pharmacology degree and other closely related bioscience courses. You will ideally have a PhD in Pharmacology/Physiology or a closely related subject and additional professional experience within these subject areas would be welcomed. Experience of teaching in higher education would be desirable and you will be expected to contribute to the research and consultancy activities of the School. The School is a major partner in the Biomedical and Pharmaceutical Sciences Research Group (BPSRG), which made a joint submission with staff from St George's Hospital Medical School for the last RAE, which resulted in a 3a rating. You would also be encouraged to join the BPSRG, which is aiming to achieve the equivalent of a 5 rating in the next RAE.

Closing date: 12 noon on 16th December 2005.
Interview date: 10th January 2006.

**Lecturers/Senior Lecturers in Forensic Science**
£26,193 - £39,362 pa inc.  Ref: 05/344
1 permanent post
1 fixed term post for 1 year in the first instance

We are seeking to appoint two Forensic Scientists who will complement our current teaching team and contribute to the teaching and administration of our rapidly expanding BSc (Hons) in Forensic Science and Investigative Analysis and BSc (Hons) in Forensic Biology courses. You would be expected to support developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations. The School has recently acquired a new "scenes of crime" facility on campus which will allow Forensic Science students to carry out detailed analysis of both indoor and outdoor crime scenes. We would welcome applications from individuals with professional experience or with an academic/research background in forensic science.

In particular we would welcome applications from individuals who had experience in one or more of the following areas:
1. Forensic archaeology, anatomy or physical anthropology.
2. Forensic palynology or forensic entomology and their relation to environmental profiling.
3. Drugs of abuse related to analytical chemistry or toxicology
4. Materials, particularly related to fibres, documents, arson and firearms.

You will be expected to contribute to teaching and to the development of research in your particular area of expertise.
Closing date: 12 noon on 16th December 2005.
Interview date: 9th January 2006.

For an informal discussion about any of the above posts please contact the Acting Head of School, Dr Alan Seddon, on 020 8547 7557 or A.Seddon@kingston.ac.uk
For further information or to apply online, visit our website www.kingston.ac.uk/jobs If you need to apply in an alternative format, please call the recruitment line on 020 8547 7153 quoting the relevant reference. If you are a minicom user, please phone 020 8547 7169.

embracing diversity - committed to equality
Kingston University London
www.kingston.ac.uk
[2528-055 (2005) : 82]
Cranfield University is a distinctive, postgraduate university committed to creating and transforming world-class technology, management and science into viable, practical, environmentally desirable solution Cranfield is a centre of excellence that enhances economic development and the quality of life.

Environment Partnership
The Environment Partnership includes the National Soil Resources Institute, the Institute of Water and Environment and the Institute of Environment and Health. It is a leading European centre for research and advanced postgraduate teaching in natural, physical and social sciences as applied to the sustainable management of natural resources and the environment. Currently, the Partnership has more than 100 staff including 10 Professors and is making good progress with ambitious plans for growth.

Chair in Soil Erosion and Conservation
Ref: V/17/05
This is a key appointment for a Professor to lead research, teaching and consultancy activities in soil erosion and conservation, following the retirement of Emeritus Professor Roy Morgan. You will provide academic leadership within the Soil Erosion and Sedimentation Research Group (SESRG), a centre of excellence with some 20 staff and one of the best-equipped soil erosion experimental facilities in Europe. In addition to soil erosion and conservation, there are a wide range of opportunities for related research on river sedimentation and diffuse pollution in agricultural and urban areas.
You should have an international reputation and an excellent publication record, with demonstrated ability in winning soil erosion-related research funding from research councils, government departments and agencies, the EU Commission and industrial sponsors. Cranfield University gains a high proportion of its income from contract research and you will need to demonstrate a talent for work with commercial companies.
You will contribute to postgraduate teaching in land management, including MSc programmes in Land Reclamation and Restoration, Natural Resource Management and Soil Management.
For an informal discussion please contact Professor Mark Kibblewhite, Operations Director, Environment Partnership on (01525) 863264 or email: m.kibblewhite@cranfield.ac.uk
Written applications explaining how you can contribute to this post, together with a full curriculum vitae should be sent to: Director, Human Resources & Development, Vice-Chancellor's Office, Cranfield University, Cranfield, Beds MK43 0AL. Telephone: +44 (0) 1234 754050/754195. Email: vchr@cranfield.ac.uk
Closing date for receipt of applications: 6th January 2006.

Lecturer/Senior Lecturer In Earth Observation
£29,315 - £44,455 per annum Ref: S/547
The Land Resources Monitoring group, within the Environment Partnership, specialises in monitoring and assessment, related to sustainable land resources management and the work of all three Institutes. With an excellent research profile and a proven record of winning funding from Research Councils, Government and industry, you will have both a strong background in physical principles and cutting-edge experience in the application of Remote Sensing to environmental management. Teaching experience at postgraduate level would be an advantage, although depending on experience, you may be required to complete and pass the Post Graduate Certificate in Learning, Teaching & Assessment in Higher Education, run internally by Cranfield University.
Informal enquiries regarding the position may be made to Professor Mark Kibblewhite on +44(0)1525 863264; email: m.kibblewhite@cranfield.ac.uk
Appointments will be made at the Lecturer or Senior Lecturer level.
Further information on the Institute can be found on www.silsoe.cranfield.ac.uk/iwe and at www.silsoe.cranfield.ac.uk/ccgim Closing date for receipt of applications: 22nd December 2005.

Teaching Associate
£9.65 per hour (£8,154 per annum)  Ref: S/548  Part time, 16.25 hours per week (total hours per individual 845 hours)

The Land Resources Monitoring Group is seeking to award a Research Scholarship. The part-time registration fees for a Higher Degree by Research will be covered by the Environment Partnership. In addition to undertaking research, you will support the MSc programmes in Geographical Information Management, Natural Resource Management and Water Management through the supervision of practical work and support during the thesis period. You will also be required to supervise student practicals without assistance. You should have a relevant postgraduate qualification, in addition to a good honours degree. This position is for a fixed term of six years.

Informal enquiries should be made to Tim Brewer via email: t.brewer@cranfield.ac.uk or by telephone on +44 (0)1525 863062.

Closing date for receipt of applications: 15th December 2005.

For above two posts only you may apply online via our website at www.cranfield.ac.uk/hr
Alternatively, contact Human Resources for an application pack on +44 (0)1525 863440 (24-hour recruitment line). Email: hrsilsoe@cranfield.ac.uk

Valuing Diversity
[2528-056 (2005) : 83]
Let us fulfil your potential

We are ambitious, enquiring, dedicated and committed to making the University of Ulster the best it can be. We are seeking to recruit high quality, high performing staff to achieve our goals. We invite applications for the following position:

Faculty of Life and Health Sciences
**Lecturer in Dietetics** Ref: C05/228/NS
Base: Coleraine
Salary: £24,352 - £36,959 Closing date: 6 January 2006
The postholder will contribute to the teaching and development of programmes at undergraduate and postgraduate levels in human nutrition and dietetics. Applicants must hold registration or be eligible for registration as a dietitian with the Health Professions Council and have post qualification experience of dietetics practice in the NHS or equivalent.

Our preferred method of issuing application packs is via our website at [www.ulster.ac.uk/jobs](http://www.ulster.ac.uk/jobs)  T: 08 700 400707
E: jobs@ulster.ac.uk

The University is an equal opportunities employer and welcomes applicants from all sections of the community. Appointment will be made on merit.

Recent reviews have indicated that the Protestant proportion of applicants to posts at Magee is lower than would be expected and for that reason we particularly welcome applicants from the Protestant community for posts at the Magee campus. These reviews have also indicated that the Catholic proportion of applicants to clerical, manual and technician posts at the Jordanstown campus is lower than would be expected and for that reason we particularly welcome applicants from the Catholic community for posts in these job groups.

HULL IVF UNIT

Trainee Clinical Embryologist

Working within a busy, independent and very successful unit, you will be part of an active team concerned with diagnosis, treatment and research into human infertility.

You should possess an appropriate degree in the biomedical or biological sciences. You must have enthusiasm and aptitude, and you will be expected to enrol for the Certificate in Clinical Embryology - the professional qualification leading to HPC registration as a Clinical Scientist - for which full experiential training and support will be given.

Starting salary on the Clinical Scientists Scale, Grade A pt 01 £ 17,371 pa.

For informal enquiries please contact Dr John Robinson, Scientific Director, Hull IVF Unit, tel: (01482) 382648, email: John.Robinson@hull.ac.uk

For further information and details of how to apply, tel: (01482) 465557 (textphone for applicants with a hearing/speech impairment: 01482 466851), fax: (01482) 466660, or email: science-recruitment@hull.ac.uk (quoting ref. EM384).

Closing date: 31 December 2005.

For online information see WWW http://www.hull.ac.uk/

The University of Manchester  
www.manchester.ac.uk/vacancies

MANCHESTER 1824  
Faculty of Medical and Human Sciences  
Postdoctoral Research Associate (BBSRC)  
Salary will be £20,043 p.a. Ref: MHS/473/05

This post is available immediately for a period of 12 months working on a project to develop a microfluidic system for culture of preimplantation human embryos and to analyse developmental gene expression profiles in single and small numbers of embryo cells.

You will be joining a group that has a well established interest in embryo development and implantation, particularly in genes which regulate cell fate decisions. This project will use cDNA microarray screening to generate novel gene expression data, in collaboration with a similar MRC-funded project already started.

You will have a BSc in Biological Sciences or similar subject and a PhD and have experience in developmental biology or a background in basic scientific research. It will be advantageous to have experience in mammalian preimplantation embryology or experience in gene expression profiling using cDNA microarrays.

The project is funded by BBSRC and will be based in the IVF unit at St Mary's Hospital, in collaboration with Faculty of Life Sciences, School of Chemical Engineering and Analytical Science, University of Manchester and the University of York.

For an informal discussion or further information, please contact Daniel Brison on +44 (0) 161 276 6612 or daniel.brison@manchester.ac.uk

Closing date: 8 December 2005.

Academic Division of Medicine and Surgery  
Research Assistant/Clinical Scientist Ref: MHS/475/05  
Salary will be £20,044 p.a.

Based within the Regional Mycology Laboratory at Wythenshawe Hospital, you will be an enthusiastic life science graduate who will join a small laboratory team with a strong, internationally recognised research portfolio. You will primarily assist with the routine diagnostic service. The key developmental role will be in the assessment of aspergillus antibody testing capabilities.

You will have experience in microbiology and mycology experience would be desirable.

The post is available for six months in the first instance.

For informal enquiries, please contact Professor David Denning on +44(0)161 291 5811.

Closing date: 16 December 2005.

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44 (0) 161 275 8835; e-mail: mhs-hr@manchester.ac.uk

For both posts, please quote the relevant reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.
Combining the strengths of UMIST and The Victoria University of Manchester
[2528-059 (2005) : 84]
UniS
University of Surrey
Chemistry Division, School of Biomedical and Molecular Sciences

The School of Biomedical and Molecular Sciences (SBMS) (www.surrey.ac.uk/sbms) has more than 1000 students, 220 staff, is highly active in biomedical research and received the highest possible rating, 5* in the 2001 Research Assessment Exercise.

As part of our planning for RAE 2008, the School's research portfolio now integrates its scientific and clinical disciplines into cross cutting multi-disciplinary programmes focussing on human health, disease and treatment. A core technology programme and the key disciplines of Chemical, Microbial, Nutrition & Food and Integrative Physiological Sciences underpin each theme.

The Chemistry Division of the School of Biomedical and Molecular Sciences (RAE 5*) wishes to enhance its research and teaching activities at the interface between the chemical and biomedical sciences, and in materials chemistry. To facilitate this, two new appointments will be made, one at Senior Lecturer level, the other a Lectureship.

**Senior Lectureship/Reader in Forensic/Physical Chemistry** £38,685 to £43,850 (Ref: 5197)
An enthusiastic chemist committed to both teaching and research is sought for this post, which is available immediately. You will contribute to the teaching of our popular degree programme in Chemistry with Forensic Investigation and also to analytical chemistry and/or physical chemistry modules. Research interests straddling the chemistry/biomedical interface are of particular interest, including bio-analytical chemistry. The appointment is a key step in enhancing our activities in forensic and biomedical sciences and also with the University's expanding medical interests.

**Lectureship in Materials Chemistry** £28,829 to £39,959 (Ref: 5198)
This appointment is initially a temporary lectureship for three years from 1 August 2006, with a strong possibility of leading to a permanent position. This position is ideally suited to someone seeking their first academic appointment following a successful postdoctoral career. Relevant research areas include synthetic polymer chemistry, polymer nanocomposites and organic-inorganic hybrids.

You will be expected to demonstrate a high degree of research independence in building your own research group, but will also work closely with the new Head of School (Prof. John N Hay) in co-supervising his researchers. You will be expected to teach polymer/materials chemistry modules at undergraduate and postgraduate level.

Informal discussions on these posts can be had with the incoming Head of School, Professor John Hay (j.hay@surrey.ac.uk) or the Head of Division, Dr Dave Povey (d.povey@surrey.ac.uk).

For an application pack and details of how to apply, please call 01483 686450 (24 hours), email sbmshr@surrey.ac.uk download application documents or apply online at www.surrey.ac.uk and click on ‘Working at UniS’. Please quote the relevant reference, supply your postal address and where you saw the advertisement.

Closing date: Friday 6th January 2006.

For further information about the University of Surrey, please visit www.surrey.ac.uk The University is committed to an Equal Opportunities Policy
LEcTUResHIPLE IN EQUINE AND ANIMAL SCIENCES
INSTITUTE OF RURAL SCIENCES
£24,352 - £36,959

The Institute is seeking a well-motivated and forward-thinking individual to join an established team at the forefront of Equine and Animal Sciences teaching and research. You will be expected to contribute to teaching of Equine and Animal Sciences and to further develop the research profile of the Institute in relation to the physiological, biochemical, nutritional or behavioural study of Animal Health and Welfare. You should have an established research record, preferably with a higher degree, a desire to further develop your research activities and an enthusiasm for contemporary approaches to learning and teaching.

The post will be tenable from 1 August 2006 at the latest. Informal enquiries may be made to Professor Jamie Newbold on 01970 622242 or email cjn@aber.ac.uk.

Ref: RS/05/08. Closing date: 13 January 2006.

For further particulars and an application form please go to www.aber.ac.uk. Tel: 01970 621591. Email: hrred@aber.ac.uk

Bilingual Institution which operates a Welsh Language scheme. Committed to Equal Opportunities.

POSITIVE ABOUT DISABLED PEOPLE

[2528-061 (2005) : 85]
THE UNIVERSITY OF WARWICK
Warwick is one of Britain's leading universities with an enviable reputation for educational opportunities, first rate research and its commitment to the local community.
The University Values Diversity

School of Engineering

Research Fellow
Electronic and Electrical Division
£20,044 - £30,002 pa  Ref: 53105-115

Fixed Term Contract until 30 September 2008

You will manage and carry out research on the DTI/Industry funded project (INTRINSIC). You will write reports, set up experiments and present at meetings throughout the UK.
You must be self motivated, have good communication skills and possess a strong background in semiconductor research and/or power electronics.
Application packs are available from Personnel Services on 024 7652 3685 (24 hour answerphone), by email recruit@warwick.ac.uk, our website below or www.jobs.ac.uk/warwick. An application form MUST be completed if you wish to apply for this post.

Closing date: 9 December 2005

The University of Reading
School of Construction Management and Engineering
Innovation in Design, Construction and Operation of Buildings for People

Research Fellow - (IDCOP) - Ref. R0582
Grade RA1 A £20,044 to £30,002 p.a. Full-time, Fixed term until 31 May 2008

The consortium entitled Innovative Design and Construction for People is part of the Engineering & Physical Sciences Research Programme on Sustainable Urban Environments. The consortium comprises of four Universities and several leading Companies. The focus of this research is to study the impact of innovative building facades on sustainability including their effects on people's well-being, the aim being to find new ways to improve the performance of building envelopes over the whole building life cycle. The successful candidate will have the opportunity to work in an eminent academic-industrial team.

You will have a PhD and an interest and relevant experience in sensor technology and its application in buildings. You will have excellent verbal and written communication skills and the ability to work as part of a team committed to sustainable design for the benefits of building occupants and society, at economic whole life cost. You will also have a keen interest in improving the value and quality of building facades.

Telephone enquiries can be made to Professor D.J.Clements-Croome, 0118 378 8200.

Application forms and further particulars are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH, telephone 0118 378 6771 (voicemail). Application forms and further particulars are also available from www.reading.ac.uk/Jobs Closing date for applications: 15 December 2005. Interviews will take place on 21 December 2005. Please quote the reference number.
[2528-063 (2005) : 86]
LONDON SCHOOL OF HYGIENE & TROPICAL MEDICINE
Department of Public Health and Policy

Lecturer/Research Fellow in Environmental Exposure Assessment for Epidemiology and Risk Assessment

We are seeking an enthusiastic researcher to join the Public and Environmental Health Research Unit to work on two large-scale studies, working with a large number of leading researchers on complex environmental health problems. You will work on exposure assessment in quantitative risk assessment and epidemiology of human health risks from environmental exposure to chemicals. The UK work will be in close collaboration with several teams developing models for assessments of options for a more sustainable management of urban pollution. The European work will contribute to a comprehensive multimedia risk assessment framework.

The work will include critical reviews and re-analyses of existing databases and contribution to the design of exposure assessment aspects in planned epidemiological studies. The appointment may be at lecturer or research fellow level depending on qualifications and experience. The appointment is for 18 months in the first instance with the possibility of significant extensions.

Further details of the post and how to apply are available from the Personnel Office, London School of Hygiene & Tropical Medicine, Keppel Street, London WC1E 7HT (tel: 020 7927 2203, fax: 020 7636 4771, e-mail: personnel@lshtm.ac.uk).

Please quote reference TF2.

Closing date for applications is 13 December 2005.

The London School of Hygiene & Tropical Medicine is committed to being an equal opportunities employer.

LONDON SCHOOL OF MEDICINE & TROPICAL MEDICINE
[2528-064 (2005) : 86]
Postdoctoral Research Associate
Salary from £19,645 - £22,111 per annum, with the potential to progress to £24,161

The post holder will undertake research on the derivation, characterisation and use of human cytotrophoblast stem cells to model implantation events \textit{in vitro}. A variety of cell and molecular biology techniques are utilised. The successful candidate will be enthusiastic, highly motivated and hold a PhD. Previous research experience in embryology or implantation is desirable, though not essential. This post is available from 1 January 2006 until 30 June 2007.

Closing Date: 8 December 2005 Ref. R3804

Committed to equality through diversity. For full details and application pack visit: www.sheffield.ac.uk/jobs or e-mail: jobs@sheffield.ac.uk Tel: 0114 2221631(24 hrs) Please quote Ref. in all enquiries.

[2528-065 (2005) : 86]
The University of Reading
Department of Physics
School of Mathematics, Meteorology and Physics

Research Assistant - Ref. R0580
Grade RA1 B or RA1 A £20,044 - £22,289 p.a (depending on qualifications)
Full-time, Fixed-term until 31 March 2010

The Department of Physics is seeking applications for the post of Research Assistant for the Physics Innovation Centre of Excellence in Teaching and Learning (CETL) at the University of Reading. The Centre is housed within the Department of Physics. The successful candidate should have a keen interest in research into teaching and learning physics in Higher Education and will join a small team developing online laboratory experiments and e-learning resources for use in distance and onsite learning of Physics and Mathematics. Applicants should have a higher degree in Physics with good computer skills and experience of e-learning and online control of experiments.

Application forms and further particulars are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH, telephone 0118 378 6771 (voicemail). Application forms and further particulars are also available from www.reading.ac.uk/Jobs Closing date for applications: 9 December 2005. Please quote reference number.

[2528-066 (2005) : 86]
Effective delivery of antiretroviral therapy is key to addressing the HIV/AIDS epidemic in resource-poor environments. Monitoring is an essential stop in successful treatment. The Bill and Melinda Gates Foundation has awarded $8.6 million (USD) to Imperial College London to support the development of novel monitoring tools for antiretroviral therapy in the developing world - The CD4 Initiative.

The principal objective of the Initiative is to develop and implement an award programme to investigators, on a worldwide basis, to support the development of novel CD4 monitoring tools from proof of concept through early phase clinical trials, to industrial scale up.

The CD4 Project Manager will be responsible for the effective and efficient management of the Initiative, developing and managing requests for funding proposals and decision-making processes for the granting of awards, preparation of award letters and contractual arrangements, negotiation of IP arrangements in line with the Initiative and close liaison between PIs (Principal Investigators) of each project, the Core Team Director and external experts. The Project Manager will also manage the Administrative Co-ordinator on a day-to-day basis and will take on responsibility for the financial management of the Initiative.

The successful applicant for the Project Manager post will have a research degree (PhD or equivalent) in a relevant biological discipline and at least 5 years' R&D experience. Previous experience of working in the pharmaceutical industry and/or of working in an academic or commercial research environment would be highly advantageous. Previous project management and budgetary and financial control are essential.

To obtain an application form and job description please go to:
Alternatively, write to the Recruitment Assistant, HR, Faculty of Medicine, Imperial College London, St Mary's Campus, Norfolk Place, London W2 1PG, quoting reference number MJ144/05.

Closing date: 4 January 2006.

Over 90% of professional scientists recommend New Scientist to find the top jobs in science.
New Scientist Jobs www.newscientistjobs.com
[2528-068 (2005) : 87]
Applications are invited for 7 posts funded by the UK Department of Health. Successful candidates will form a new research team within the Department of Neurodegenerative Disease (which incorporates the MRC Prion Unit) headed by Professor John Collinge which is a major centre for research into neurodegenerative disease (http://www.ion.ucl.ac.uk/about/report-intro.htm). This work is a unique academic-industrial collaboration with GlaxoSmithKline and will bring a combination of necessary expertise, facilities and resources to develop and characterise small molecule therapeutics to combat variant CJD and other forms of prion infection of humans (www.mrc.ac.uk/index/publicinterest/public-news_centre/public-press_office/public-press_releases_2005/public-press_12_april_2005.htm).

The following posts are available:

**Scientific Project Manager**
A postdoctoral scientist with at least 5 years' experience in ligand/drug discovery in pharmaceutical or biotechnology fields and with expert knowledge and practical experience of highthroughput screening and protein biochemistry. Salary on the RAIII scale from £35,254 - £43,850 plus £2,400 LA.

**Postdoctoral Research Fellow**
A postdoctoral scientist with experience in protein purification and handling, and the use of physical methods for detecting and characterising biological interactions. Salary on the RA1A scale from £26,470 - £30,002 plus £2,400 LA.

**Research Technicians**
5 Technical posts are available: 2 Senior Research Technicians and 3 Research Technicians

These are challenging posts of a wide and varied nature for qualified (degree or HNC) technicians. Senior Technicians should have at least 3 years' previous experience of working in a laboratory, while Research Technicians should have at least 6 months. Postholders will be required to provide research support for long-term projects investigating the molecular pathology of prion diseases. A major component of this work involves working with recombinant prion proteins. A substantial amount of the work will be carried out at containment level III and will require knowledge of, and adherence to, specialised procedures. The posts will also be responsible for general laboratory organisation. Salary for Senior Research Technicians on Grade 7 of UCL's new payscale, £24,886 - £30,606, and for Research Technicians on Grade 6, £19,645 - £23,457, plus £2,400 London Allowance for all posts.

All posts are for three years' duration and are superannuable. Closing date for applications is 3rd January 2006, but applicants should first obtain further information from Anne Wardrobe, a.wardrobe@ion.ucl.ac.uk, tel: 020 7676 2191 or Personnel, Institute of Neurology, 23 Queen Square, London WC1 N 3BG or go to http://www.ion.ucl.ac.uk/about/vacancies.htm
Faculty of Science
School of Life Sciences

**Post Doctoral Research Fellow**

£21,181 - £27,025 pa inc.
Fixed term for up to 3 years
Biomedical and Pharmaceutical Sciences Research Group (BPSRG)

Funds are available to support a high calibre Post Doctoral Research Fellow to conduct international quality research leading to publications and further grant funding in support of research in biosciences in the subject area "Allied Health Professions and Studies".

You will support and help drive research activities relating to one or more of our specialised equipment suites which include: i) Biomolecular characterisations (Nuclear magnetic resonance spectrometers, Mass spectrometers (LC-MS, ICP-MS, small molecule MS)), and ii) Cell and tissues analyses (confocal and electron microscopes).

Key research areas within the BPSRG include: Biomedical Sciences: haematology, oncology, immunology, nutrition, microbiology, parasitology and vector biology, medical physics and exercise physiology. Pharmaceutical Sciences/Pharmacy: organic synthesis of bioactive molecules, medicinal chemistry, drug action and drug delivery, and pharmacology.

The post will be based in the School of Life Sciences and is renewable for up to three years subject to satisfactory performance.

Informal enquiries can be made by email to Professor Declan Naughton on D.Naughton@kingston.ac.uk

For further information or to apply online, visit our website [www.kingston.ac.uk/jobs](http://www.kingston.ac.uk/jobs) If you need to apply in an alternative format, please call the recruitment line on 020 8547 7153 quoting reference 05/338. If you are a minicom user, please phone 020 8547 7169.

Closing date: 16th December 2005.
Interview date: 5th January 2006.

COMMITTED TO EQUAL OPPORTUNITIES

[2528-074 (2005) : 88]
NTU
NOTTINGHAM TRENT UNIVERSITY
School of Biomedical and Natural Sciences
Principal Lectureship in Clinical Microbiology
£35,256 - £44,328 pa

Nottingham Trent University is renowned for excellent teaching and leading-edge research, and our strong links with industry and the professions provide a genuine culture of innovation, firmly focused on success.

The School of Biomedical & Natural Sciences has been awarded "excellence" status across all subject areas for teaching quality, and in recognition of this has been awarded maximal funding by HEFCE to establish a national Centre for Excellence in Teaching and Learning in Science. We also continue to build on our research success that saw biomedical sciences awarded a Grade 5 in the 2001 RAE.

Now is an exciting time to join us in the School as we continue to expand our Biomedical Sciences course portfolio with flexible learning initiatives and introduction of an integrated degree pathway. Contributing to teaching, you will also be responsible for the organisation and development administration of our very popular BSc and MSc Biomedical Sciences courses.

With related research/consultancy interests which complement existing work on microbial pathogens of food, food safety and textile microbiology, you will need demonstrable expertise in the field of Clinical Microbiology, evidenced by a first degree in a relevant discipline and a PhD or equivalent professional and research experience. Membership of the Institute of Biomedical Science is highly desirable.

For informal enquiries, please contact Professor Bob Rees, Dean of School of Biomedical and Natural Sciences on (0115) 848 6342, email: robert.rees@ntu.ac.uk or Professor Neil Macfarlane, Associate Dean of School on (0115) 848 6660, email: neil.macfarlane@ntu.ac.uk Please also see our website www.ntu.ac.uk/science

Further details and electronic application forms are available from http://www.ntu.ac.uk/careers or by telephoning (0115) 848 6522 (24 hour answering service) quoting post reference 50246.

Closing date: 6 January 2005.

CVs will only be accepted in support of a fully completed application form.

We are actively implementing equality of opportunity policies and seek people who share our commitment.

Applications are invited for a PhD studentship funded by the Netherlands Government and Cocoa Research UK Ltd. (supervisors Drs. Gareth Griffith & Ian Scott). The project (in collaboration with scientists in Brazil) will investigate the process of pathogenesis in host plants infected by the basidio-mycete fungus Crinipellis perniciosa. Applicants must be EU citizens with a relevant BSc (grade 2i or higher). The application deadline is 15th December (start date Feb 2006). Further information can be found at [http://users.aber.ac.uk/gwg/wbd.htm](http://users.aber.ac.uk/gwg/wbd.htm) Applications (full CV) or other enquiries should be directed to Dr. Griffith (gwg@aber.ac.uk; 0044-1970-622325).

The School of Chemistry is a large centre of outstanding research, rated 5A in the RAE, with excellent links to industry and research groups world-wide. Research in the School has many strengths including Synthesis, Chemical Biology, X-ray Crystallography, Analytical Chemistry, Materials Chemistry, e-Science, Supramolecular Chemistry, Electrochemistry and Surface Science.

A range of fully funded awards are available for doctoral studies for UK and EU students, with approximately 50 students starting each year.

PhD students may enrol at any time during the year, although most studentships commence in either October or February.

Some places for 2005 entry are still available to UK students. These include studentships in Nanotube-assisted Interrogation of Internal Mesopore Structure and Activity, Modelling Lipid and Biosynthetic Networks, e-Science, and Electronic Structure Calculations in Support of Research in Atmospheric Chemistry and Spectroscopy.

Details of research programmes can be found by following the links from [http://www.chem.soton.ac.uk](http://www.chem.soton.ac.uk)

Please contact: Mrs. Jill Queen, School of Chemistry, University of Southampton, Highfield, Southampton SO17 1BJ. email: jcq@soton.ac.uk

UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Graduate Studentships in Chemistry at the University of Oxford
http://www.chem.ox.ac.uk

The Chemistry Department has the largest graduate school in the University of Oxford, with superb facilities that support an extremely wide range of research. We invite applications from outstanding students who wish to study for a doctorate, commencing October 2006, in any of the following areas -

• Asymmetric synthesis methodologies, both catalytic and stoichiometric
• Bio-organic and bio-inorganic chemistry • Biocatalysis and biotechnology • Biophysical chemistry • Carbohydrate science • Chemical biology • Chemical genetics and combinatorial chemistry • Coordination and supramolecular chemistry • Electrochemistry • Electronic liquids • Electronic structures of inorganic and organometallic molecules • Hydrogen storage • Molecular imaging • Nanotechnology • Natural product synthesis • Organic synthesis of new materials possessing new optical and conducting properties • Organic synthetic methodology • Organometallic chemistry and catalysis • Photochemistry and reaction dynamics • Protein structure, dynamics and engineering • Single molecule chemistry • Spectroscopy and molecular structure • Structure at interfaces • Surface chemistry • Synthetic and structural solid-state chemistry • Theoretical chemistry • Total synthesis.

Applicants are strongly recommended to contact potential research supervisors before submitting a formal application. As well as describing possible research projects, they will be able to offer advice on completing the application form and identifying possible sources of funding. Information on supervisors' research interests, the application process and admissions criteria can be found at: http://www.chem.ox.ac.uk/graduatestudies/ and http://www.admin.ox.ac.uk/gsp/apply/

You may submit an application at any time but please be aware that applications may be considered in one of six gathered fields (deadlines: 26th October 2005; 25th November 2005; 20th January 2006; 17th March 2006; 19th May 2006; 4th August 2006). Your applications will be considered in that gathered field whose deadline first follows the date by which all your application materials have been received by the Graduate Admissions Office. Overseas students who intend to apply for scholarships administered by the University must submit all of their application materials in time for consideration at the first, second or third gathered fields.
The University is an Equal Opportunities Employer.
[2528-085 (2005) : 91]
MSBP Enhancement Research Officer
£21,308 per annum

We have a 15 month post immediately available in the Seed Conservation Department. You will support the development of cross-country seed conservation science in the Americas, Africa and elsewhere, depending on regional initiatives, and offer supervisory guidance. You will work with the Head of Research on science input for partners and developing science networks. You will also provide skills development on sophisticated equipment to longer-term visitors, and plan, influence and conduct innovative research relevant to seed conservation.

With a PhD or at least three years' post-graduate experience in biochemistry/molecular biology, you will have experience of working in seed science and with scientists from different cultural backgrounds. An excellent communicator and confident speaker, you will have experience in supervising and tutoring, along with good leadership and organisational skills. An appreciation of the objectives/function of overseas seed science would be a distinct advantage. Ref: MCERO

PhD Studentship in Ecology
£12,150 per annum (three year maintenance grant)

We have a PhD Studentship immediately available in our Seed Conservation Department at Wakehurst Place. Your main responsibility will be to personally conduct and support innovative research in the field of seed germination physiology and ecology, which will include experimental work as well as data recording, evaluation and written and oral presentations. You will also contribute to the scientific publication output of the Department by writing scientific articles and producing a PhD thesis, as well as supporting visitors to the lab.

A dynamic and effective communicator, you will be highly organised and self-motivated, with good presentation and interpersonal skills. You will have an MSc or equivalent in biology or ecology and relevant laboratory experience. Some experience of working with plants would be an advantage and knowledge of plant ecology, seed biology and mathematical modelling is desirable. Ref: PhdEco

Excellent benefits are available for both positions including generous annual leave and a stunning work environment.

Application packs are available from our website www.kew.org (click on the link at the bottom of the homepage). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184/5150 (24 hour answerphone). Please quote the appropriate Ref in all correspondence.

Closing date: 5pm, Tuesday 17 January 2006.
Interview date: Wednesday 25 January 2006.

Committed to equality through diversity.
Selection is on merit alone.

Sherwood

Sherwood is a fast growing technology firm, providing patented, innovative laser marking solutions across a diverse range of sectors including product identification and anti-counterfeiting. The organisation is constantly evolving, and consequently is seeking to strengthen the team by making the following appointments.

**LASER PHYSICIST / PHOTONICS ENGINEER**
We are seeking to appoint an experienced and highly motivated laser physicist/photonics engineer to lead our hardware development programme. The ideal candidate should have proven expertise in Optical engineering / design, prototype laser system development, electronic and software control systems, CO\textsubscript{2} lasers, NIR diode lasers, systems integration. The role will also involve the provision of technical support to end-users, licensees, the sales team and the multidisciplinary R&D team.

**DEVELOPMENT SCIENTISTS**
Sherwood has pioneered a broad range of exciting new coatings and additives that react and change colour with laser light. To maintain our position at the cutting-edge we require talented individuals to join our multidisciplinary R&D team with relevant skills and qualifications in coatings, printing inks, photochemistry, organic, inorganic or polymer chemistry.

**TECHNICAL SERVICES**
Technical pre and post sales customer support for Sherwood's integrated laser imaging solutions is an essential part of our business. We require customer focused, technically knowledgeable individuals with a background in laser systems, coatings or printing. Excellent communication skills are essential for all positions. In return, you can expect an attractive remuneration package.

To apply please send CV to Andrew Whyte, Sherwood Technology, Unit 3, Wheldon Rd, Widnes, Cheshire, WAS SFW or email: info@sherwoodtech.com
Closing date: 31st January 2006.

BioVex

Quality Assurance Scientist

BioVex are seeking an experienced Quality Assurance Scientist working as part of the quality group to support development teams producing and testing herpes simplex Vectors for use in clinical trials for the treatment of cancers and infectious diseases in the EU and the US.

The position will involve monitoring Quality Standards in development projects both within BioVex and externally at contract organisations.

The successful candidate will have a minimum of a degree in a relevant science subject and at least two to three years QA experience. Experience of working in a cGMP environment is essential, ideally in the biotechnology industry. Experience in the manufacture of aseptically-prepared parenterals would be a particular advantage. Computer literacy, a knowledge of statistical analyses and an ability to work well in teams is desirable. The candidate should possess excellent communication skills and enjoy the challenge of working in a dynamic environment.

BioVex offers competitive salaries, pension scheme, medical insurance, and membership of the Company share option scheme. It is envisaged that the successful candidate would be prepared to undergo QP training.

Applications for this post, including CV and full remuneration details, should be sent to: Sue Wilcox, BioVex Ltd, 70 Milton Park, Abingdon, Oxon, OX74 4RX Tel: +44 (0)7235 441900 Fax: +44 (0)1235 441901

OPPORTUNITIES IN GENETICS
West Midlands Regional Genetics Laboratory

We are a large, integrated cytogenetics and molecular laboratory providing a comprehensive clinical service with an active research programme. The laboratory is highly automated with the latest developments in technology and image analysis.

We are seeking:

Pre-registration / Registered CLINICAL CYTOGENETICIST
AFC Pay Band 7 (Ref: 05/RG/07)
A bright, lively individual who is committed to a career in clinical cytogenetics, who has or will shortly have the ACC postgraduate certificate in Clinical Cytogenetics or registration as a clinical scientists with HPC. Full support will be given for continuing high specialist training.

TRAINEE CLINICAL SCIENTISTS IN CYTOGENETICS
Grade A (Ref: 05/RG/08)
Graduates with a first or upper second class honours degree in Genetics or a biological science to take up 4 year training posts. No experience necessary. This is a nationally recognised training position leading to registration with the Health Professional Council. Birmingham is one of the largest training laboratories in the UK.

New Post........ TRAINER / EDUCATIONAL RESOURCES MANAGER IN CYTOGENETICS
AFC Pay Band 7 / 8a (Ref: 05/RG/09)
This new post is one of 3 in the country and has been created specifically to facilitate the roll out and development of training in clinical cytogenetics for scientist and technical staff. The postholder will both co-ordinate and deliver, if appropriate, agreed training and assessment. Applicants will be either an experienced Registered Clinical Scientist with previous experience in training in cytogenetics, or someone with an educational background with an interest in genetics.

Informal enquiries are most welcome, please call Val Davison or Mike Griffiths on 0121 627 2710. Application packs are available from the HR Dept. Birmingham Women's Hospital, Edgbaston, Birmingham, B15 2TG, telephone 0121 607 4774 (24 hrs) or email: recruitment@bwhct.nhs.uk - please quote the appropriate reference number.

Closing date for completed applications, FOR ALL POSTS, 21st January 2006.

These posts are subject to the Rehabilitation of offenders act and as such it will be necessary for a submission for Disclosure to be made to the CRB to check for any previous criminal convictions. BWHCT is committed to Equal Opportunities in Employment and actively discourages smoking at work.

Where innovative ideas save lives

Chemical and Biological Protection Group, Physical Sciences Department
Porton Down, nr. Salisbury, Wiltshire

Dstl, the Defence Science and Technology Laboratory, is the principal source of scientific and technological expertise to the Ministry of Defence (MOD) and wider government. Our Chemical and Biological Protection Group seeks to ensure that the MOD has the capabilities to provide UK Armed Forces with effective physical protective measures against chemical, biological and radiological (CBR) hazards. Our aim is to provide affordable, effective, low burden physical protection against CBR materials for the range of operational and environmental conditions that will be encountered by UK Armed Forces. We are looking for enthusiastic and committed scientists to join us in this vital and challenging work.

**Senior Scientists** up to £30,000 & benefits
You will participate in and, where appropriate, direct the work of junior scientists with the design, test and evaluation of CBR protection systems to meet customer needs. You will design and conduct both laboratory and field-based tests on equipment such as clothing and respirators, assess results, produce detailed reports and present these to the military customer. With a minimum of seven years recent, relevant, laboratory-based experience, together with a good first degree and PhD in a relevant subject, you must be a proven strong team player with experience of supervising junior staff and the ability to develop research ideas to meet customer needs. You must also have excellent presentation skills, the ability to explain scientific ideas and concepts to non-scientific staff, an organised and methodical approach and a commitment to the highest standards of health and safety. Ref: 020871NS.

**Scientists** - up to £25,000 & benefits
You will be part of a team carrying out the design, testing and evaluation of CBR protection systems. You will design and conduct both laboratory and field-based tests on equipment such as clothing and respirators, assess results and produce detailed laboratory and customer reports. With a minimum of four years, recent, relevant, laboratory-based experience, a good degree or equivalent in Chemistry, Physical Sciences or other related subject, you must be a strong team player with a proven ability to develop research ideas to meet customer needs, have sound presentation skills, together with an organised and methodical approach. You will also need the ability to explain scientific ideas and concepts to non-scientific staff and have an awareness of relevant health and safety issues. Ref: 020872NS.

In addition to a stimulating and rewarding career, as a civil servant you'll enjoy a competitive benefits package. This includes a choice of pension schemes, generous holiday allowance, relocation assistance where appropriate and good sports and leisure facilities. Please note that only exceptional candidates will receive upper salary levels.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies. Dstl is a committed equal opportunities employer and recruits staff fully on the basis of specified competencies and skills. These permanent posts are only open to UK Nationals.

Applicants must be willing to satisfy Government/MOD Security Vetting procedures prior to a formal offer of employment being made.

For an application pack, please contact, quoting the relevant reference, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH, Email: response@aia.co.uk Tel: 020 7553 9120 (9.30am - 5.30pm). If you have a hearing impairment, we are happy to accept Typetalk calls.

Closing date: 20th January 2006. Interviews will be held between 30th January and 10th February 2006.
*aia is a recruitment advertising agency and is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

CENTRAL LABORATORIES
ABNA Technology and Services to Food and Agriculture

Microbiology - Section Head
Oxfordshire
Competitive Salary and Benefits Package

ABNA is the Agriculture Group of Associated British Foods, one of Europe's largest food companies with a turnover of £5.6 billion. ABNA is an international, UK-based business, delivering products, technology and services to the animal feed, food and drink industries. ABNA is one of the UK's largest and most successful agri-food businesses with a range of successful brands and divisions including Central Laboratories.

Central Laboratories is a contract laboratory employing over 40 staff. We operate 7 days per week, providing a range of specialist analytical services to the animal feed, grain, milling and food industries in all fields of microbiology, nutrition and chemistry. The laboratories are large, modern and well equipped, reflecting the pre-eminent position they have in their field.

The Microbiology Section Head will be responsible for overseeing day-to-day laboratory performance and quality assurance. A key aspect of the role will be to develop and expand the scope of tests offered by the laboratory, oversee research and to develop a high calibre team.

The ideal candidate will have a relevant scientific degree and experience of running and developing a microbiology laboratory service within the agricultural or food sector. Strong technical and people skills that can be applied to both the team and with customers are essential. ABNA is a business that encourages individuals to take responsibility and push for excellence so the successful candidate will have plenty of scope to develop themselves, the team and the laboratory's service offering.

Applicants should send their CV and covering letter including current salary details via our website, www.abagri.com, or to: L. Kendle, HR Department, ABNA Limited ABN House, Oundle Road, Peterborough, PE2 9PW
CHEMIST - DRUGS ANALYSIS
Forensic Science Laboratory - Aberdeen
£21,222 - £23,550

Grampian Police Laboratory provides a forensic science service for the North of Scotland.

This is an exciting opportunity for a bright and able graduate to develop rapidly in the drug analysis section of a small, busy laboratory. Our methods of close supervision and emphasis on training and opportunities for learning mean that you will quickly be dealing with a very wide variety of drug cases, often involving serious crime. In this challenging environment, you will soon gain reporting experience and should be aiming to achieve registration with the Council for the Registration of Forensic Practitioners within five years of appointment.

The post requires at least a 2nd Class honours degree, or equivalent, in chemistry or a related subject. We are looking for someone who has developed excellent observational and analytical skills and has good communication skills - especially in presentations to a lay audience. Able to cope with pressure, you should be self-motivated but also a good team player. Experience in a forensic laboratory in the area of drugs analysis or general chemistry, quality management, report writing and giving evidence in Court is particularly desirable.

Closing date for applications is 27th January 2006.

Application forms and further information can be downloaded at www.grampian.police.uk. Alternatively, call 0845 600 5 700.

UKAS QUALITY MANAGEMENT 005

Certificate no. 050577

THE QUEEN'S AWARDS FOR ENTERPRISE: INTERNATIONAL TRADE 2002
Domantis is one of the fastest growing biotechnology companies in the UK and is pioneering the development of the next generation of antibody molecules: Human Domain Antibodies (dAbs). Domantis was founded in December 2000 and has established more than a dozen proprietary dAb therapeutic programmes, primarily in the fields of inflammation and oncology.

Domantis is in a strong financial position having raised $29 million in a private equity financing this December. Following the signing of a major multi-target therapeutic alliance with Bristol-Myers Squibb, we are expanding our Cambridge UK R & D team and are seeking to recruit high calibre, motivated scientists for the following positions:

**Research Associate/Scientist - Lead Isolation (DM149)**
Several positions are available to work on the isolation of dAbs against therapeutic targets and the subsequent affinity maturation of lead clones. You will have a BSc, MSc or PhD in a biotechnology discipline with at least two years experience in molecular biology and protein engineering. Familiarity with phage display and antibody engineering would be an advantage.
Email to jobs149@domantis.com

**Research Associate/Scientist - Discovery (DM150)**
We are looking for a dynamic molecular and cell biologist to work with a Senior Scientist on the isolation and characterisation of dAbs as part of the BMS alliance. The position will also involve the expression and purification of dAbs for further analysis. You will have at least a BSc and two years experience working in a laboratory environment. Familiarity with the following techniques would be an advantage: antibody characterisation, ELISA, protein expression and purification.
Email to jobs150@domantis.com

**Research Associate/Scientist - Bioassays (DM151)**
The Bioassay Group has a position available for a scientist with a background in immunology and a BSc with a minimum of two years experience working in a laboratory environment. Your role will be to characterise dAb products to support our drug discovery programmes. Experience of functional cell assays, tissue culture, flow cytometry and ELISAs would be an advantage.
Email to jobs151@domantis.com

**Research Associate/Scientist - Protein Biosciences (DM152)**
A position is available for a graduate with at least a BSc and two years laboratory experience to join the Protein Bioscience group to provide protein reformatting, expression and purification support for the BMS alliance. Experience of recombinant expression in eukaryotic and prokaryotic hosts, protein purification and characterisation are essential. Additionally, some molecular biology experience would be an advantage.
Email to jobs152@domantis.com

For all positions a strong attention to detail and excellent record keeping will be essential. You will be able to work flexibly, both independently and as an important member of a team within a highly creative and rapidly expanding company. Domantis offers a scientifically stimulating environment, competitive salaries, private medical cover, a contributory pension scheme and a generous share option package.

To be considered, please send a covering letter and detailed CV, including a full publication record and names of three referees, to the email address that corresponds to the relevant position. No agency applications will be considered at this stage.

For general information about Domantis and information on future vacancies, visit our website at www.domantis.com
FOOD STANDARDS AGENCY

ADVISORY COMMITTEE ON THE MICROBIOLOGICAL SAFETY OF FOOD Recruitment of 3 specialist members

The Chair of the Food Standards Agency invites applications for the posts of 3 new specialist members, an enforcer with expertise in environmental health, a clinician with expertise in public health medicine, and an expert in clinical microbiology. These posts will become vacant from 1 April 2006. The ACMSF is the statutory expert committee which advises the Agency on the microbiological safety of food.

Vacancies for ACMSF specialist members
Three new members are to be appointed, with expertise in enforcement, clinical microbiology and public health. Candidates must be strong team players with common sense, good analytical skills, and impartiality. Putting consumers first and being able to recognise the impact of ACMSF advice on the public are extremely important requirements.

General
Appointments to the ACMSF are made strictly on merit, in accordance with the Code of Practice for Ministerial Appointments to Public Bodies issued by the Office of the Commissioner for Public Appointments. Selection will also reflect the Government's Equal Opportunities policy.

If you are interested in being considered for any of these posts, an information pack and application form may be obtained from: Ms Sarah Butler, ACMSF Secretariat, Room 808C Aviation House, 125 Kingsway, London WC2B 6NH
Tel: 0207 276 8947
Fax: 0207 276 8907
E-mail: sarah.butler@foodstandards.gsi.gov.uk

The closing date for receipt of completed applications is 3 February 2006.

Information about the ACMSF can also be found on the Food Standards Agency's website at:
http://www.food.gov.uk/science/ouradvisors/microbiogsafety

2006 LRI Innovative Science Award in conjunction with EUROTOX

This £100,000 award will be presented to a European-based scientist with less than ten years of post-doctoral experience for the proposal of a novel interdisciplinary research project in the field of toxicology. The award is funded by the European Chemical Industry Council (Cefic)'s Long-range Research Initiative (LRI), in conjunction with EUROTOX.

The competition covers the broad field of toxicology, including but not limited to:

Alternatives to animal testings
Susceptible populations
Toxicogenomics
Toxicology related to exposure

Applications will be judged on the basis of innovative approaches to interdisciplinary research and relevance to the LRI programme.

For more information about the award and application process, please contact Dr. Marrec-Fairley (mfa@cefic.be)

Applications are due by February 17, 2006

AWE
Made to measure?

**Radiation Measurement Scientist**

£20-25k (dependent on experience) Nr Reading, Berkshire

Tasked with maintaining the UK's nuclear deterrent, the Atomic Weapons Establishment (AWE) is a recognised centre of scientific and engineering excellence. The scale and scope of our work are what set us apart from other organisations and nowhere else offers such a diverse range of science, engineering and manufacturing operations. As you would expect, the non-destructive assay of radioactive materials is crucial to AWE and this role will help to ensure the highest possible standards.

Using a range of gamma-ray and neutron-based measurement techniques, you will work in a wide variety of environments where fissile and other radioactive materials are both stored and worked. You will also use your theoretical knowledge to analyse your results and produce reports, and will be expected to combine practical measurement skills with concise and in-depth analysis ability. As a proactive and enthusiastic scientist, you will of course maintain a thorough knowledge and understanding of the latest developments in appropriate assay technologies, analysis methodologies and data analysis tools.

The successful candidate will ideally be educated to degree level in a subject with significant physics content or may possess other academic qualifications supplemented with relevant work experience. Either way, you will have a passion for your work and a demonstrable interest in the field of radiation measurement.

As well as the opportunity to continually develop your abilities, you'll enjoy a superb benefits package. One that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme.

To find out more about this role, visit [www.awe.co.uk](http://www.awe.co.uk). Alternatively, you can call us on 0118 982 9009 for an application form.

AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age (up to 65) or responsibility for dependants. Successful candidates will be selected solely on their ability to carry out the duties of the post.

Because of the nature of the work undertaken at AWE, this post is required to meet special nationality rules and therefore is only open to British Citizens. All selected candidates will be required to undergo security clearance.

**POSITIVE ABOUT DISABLED PEOPLE**
**INVESTOR IN PEOPLE**

OPEN TO INNOVATION

Creativity, vision and the courage to challenge convention - these have made Novartis into one of the world's leading research environments. Our mission is simple. To meet the challenges of drug discovery by using new technologies to understand the science of human biology and disease. So join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. You'll help us define it.

We are looking for an Immunologist or Pharmacologist to join our multidisciplinary Immunopharmacology team as a Scientific Associate. Along with a relevant BSc or MSc, you will need at least two years' experience in the use of current immunological assays - particularly ELISA, flow cytometry and cellular immunological techniques such as cell purification, proliferation and intra-cell cytokine studies. Any exposure to in vivo inflammatory models would be an advantage, although full training will be provided.

To find out more, view descriptions of all open positions and to apply online, visit www.novartis.com quoting the reference number 10509BR. Closing date: 27th January 2006.

The New Pathway to Drug Discovery
Can you help us explain clinical trials?

CancerHelp UK **Trial Writer**

Salary £24,150 to £33,100 inclusive, dependent on qualifications, experience and current salary

The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on research into treating, preventing and curing cancer.

CancerHelp UK ([www.cancerhelp.org.uk](http://www.cancerhelp.org.uk)) is the award winning patient information website of Cancer Research UK. We specialise in providing easy to understand cancer information for people affected by cancer. We also provide the only UK database of clinical trials written specifically for patients.

We need a dedicated writer to produce summaries of early phase trials. You will be responsible for writing patient centred summaries of phase 1 and 2 cancer trials in plain English, in keeping with our writing style. You will also contribute to the team effort in ensuring the smooth running of the database.

You need to be an excellent plain English writer, with knowledge of cancer research and a feel for the patient's perspective. Your writing skills are of supreme importance, but you will also need to be computer literate, have a good eye for detail and good organisational skills. You should be either an experienced cancer nurse or have a first degree in science, with an additional qualification in science communication.

For further details and to apply online, please visit [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)
Alternatively please send in two copies of both your covering letter and CV to: Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX or email: recruitment@cancer.org.uk quoting reference number NS3840 on all correspondence.

Closing date: 19th January 2006.
Provisional interview date: w/c 6th February 2006.
For details on all our current jobs please go to [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)

Charity no: 1089464

CANCER RESEARCH UK

Pharmaceutical company based in the area of Porto, Portugal

QUALIFIED ORGANIC CHEMIST (m/f)

Working within the department of licensing and new projects, the successful candidate will be responsible for proactively developing, securing and protecting intellectual property with regard to R&D programs. This is a cross functional role which will involve close liaison with R&D, the business and external patent agents and thereby management of the IP strategy.

The successful candidate will:
• Be a qualified organic chemist who is looking to apply their analytical skills in a business setting.
• Be fluent in written and spoken English (knowledge of German would be an asset) and possess good IT skills.
• Have a working knowledge or even some experience in intellectual property.
• Be a team player with a desire to learn and become an expert in IP.

We offer:
• A career opportunity in a solid company with growth expectations.
• A competitive remuneration package.
• Training and professional development.

Please send your CV and cover letter to: Apartado 19, 4745-457 S. Mamede Coronado - Portugal or by email: srh@bial.com
Modelling Science and Statistics Workgroup Leader

Veterinary Laboratories Agency
based at Addlestone, Surrey Up to £52,865

An excellent opportunity has arisen to lead an expanding team of mathematical modellers, statisticians and other support staff. You will be providing scientific leadership and management to the team engaged in research into animal diseases and veterinary public health, plus national and international consultancy. You will also collaborate within other areas of the VLA, and first class research institutes to provide modelling and statistical inputs into projects on a wide range of pathogens, as well as leading and developing modelling projects from within the group.

You should have a demonstrated track record as an accepted expert in modelling science, statistics, or closely related discipline. It is likely that the successful candidate will have a PhD in a relevant quantitative science. A first degree in a quantitative subject (for example mathematics, statistics, modelling science, physics, engineering etc) is essential. You should also have experience in leading and managing a team of scientists, a successful record in obtaining substantial research funding, providing scientific advice and consultancy at national level, as well as experience of project leadership.

This is a full-time permanent post in Pay Band B £38,000 to £52,865 per annum. The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religions beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (JAJ), Veterinary Laboratories Agency, New Haw, Addlestone. Surrey KT15 3NB quoting reference ADP 3575.

The closing date for receiving completed application forms is 18th January 2006.

Closing date for applications: 20th January 2006. Interview date: w/c 30th January 2006.
We value diversity and welcome applications from all sections of the community.
Sanofi aventis
Because health matters

The sanofi-aventis Group is Europe's largest pharmaceutical company and the 3rd largest in the world. Backed by world-class research and development, sanofi-aventis is committed to developing both personnel and products through innovation and challenging the norm. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products and is helping us develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. So if you want your career to develop in a varied and stimulating environment that sets very high standards, here's your opportunity.

Senior Pharmacokineticist

An exciting opportunity has arisen to join a high performance team in the pharmacokinetics section of the Global Metabolism and Pharmacokinetics Department. This senior role involves working on preclinical and clinical studies, as well as representing the department in multi-disciplinary, international project teams. In the Project Team role, you will contribute to the drug development process and present data at the project team level, as well as to senior management. In addition, you will provide pharmacokinetic support to a wide range of clinical studies (Phase I to III) and the toxicokinetic component of non-clinical safety studies. This position affords some opportunity for travel to other sanofi-aventis sites, worldwide, as well as contributing to international strategic groups.

You will be educated to PhD level in a relevant area, with at least five years' experience of pharmacokinetics and drug development, gained within the pharmaceutical industry. Alternatively, individuals with a degree (or equivalent) and at least 10 years' relevant experience will be considered. It is essential that you have demonstrable experience of pharmacokinetics, an understanding of pharmacodynamics and population pharmacokinetics and significant experience of the drug development process. In this demanding role, you will need to have the ability to work well in a team and to plan in a rapidly changing environment.

In return, we offer an excellent remuneration package, including pension scheme, a range of health care initiatives including private medical insurance and dental care schemes, share incentive plan, annual performance incentive scheme and flexible working hours. We are located only 30 minutes from the vibrant city of Newcastle upon Tyne and yet close to the majestic Northumbrian coastline and countryside.

To request an application pack, please contact Human Resources Department, Alnwick Research Centre, Willowburn Avenue, Alnwick, Northumberland, NE66 2JH, telephone (01665) 608358, or email alnwick.recruit@sanofi-aventis.com quoting reference ALN05/041 on all correspondence. Closing date: Friday 21st January 2006.

YORK
from £37,766pa

SECRETARY TO THE NON-NATIVE SPECIES BOARD
BAND 6 REF: CSP 2966 THREE YEAR FIXED TERM APPOINTMENT with the possibility of extension or permanency

The Non-Native Species Board comprises a small team of key individuals tasked with developing a policy for addressing non-native species issues and a programme to implement them. The Board co-ordinates research programmes, ensures the free exchange of information and expertise and increases public awareness of key issues.

The Secretary will support the actions and decisions of the Programme Board and be responsible for organising quarterly meetings of the Board and with other stakeholders. The Secretary will also draft an annual report on the Board’s activities and will lead a small support and administrative team who together will provide the Secretariat.

A minimum of seven years policy related or academic experience in a suitable field is required. In addition suitable candidates will also have recent and demonstrable experience of working with and across a range of Government Departments and agencies to co-ordinate and promote unified activity. Experience in coordinating effective meetings and leading a small productive team is essential.

For an application pack call 01904 462302 or email jobs@csl.gov.uk. Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk.

CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.

Closing date for applications is 25 January 2006.

CSL R
Science Serving Agriculture, Food and the Environment

Sand Hutton, York

The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra). The Agency provides policy advice and technical support underpinned by high quality R&D to help Defra and other customers safeguard food supplies, protect consumers and the environment.

[2533-028 (2006) : 54]
sanofi aventis is one of the world's largest pharmaceutical companies and ranks number one in Europe. As a global industry leader, sanofi aventis seeks to conquer and prevent disease by bringing to market innovative pharmaceuticals, vaccines, therapeutic proteins and diagnostics. sanofi aventis maintains its commitment to creating innovative therapeutic treatments and has devoted over four billion euros to its current portfolio that includes over 48 compounds presently in advanced stages of development. Due to the success of the company at the Holmes Chapel site, we are looking to recruit the following:

**Senior Stability Scientist**
You will be responsible for the management of stability studies for activities that are performed internally and at external contract houses, following approved documentation, to determine the potency, purity, safety and stability of our products and ensure compliance with approved specifications. With supervision responsibility for scientists, you will also compile and analyse analytical data to support development programs and/or regulatory filings in compliance with GMP and HSE requirements.

**Scientist/Senior Scientist**
Working on phase I - phase III products, you will develop and implement analytical testing methods for all drug products in compliance with GMP. With responsibility for validating new analytical methods and specifications and participating in analytical investigations, you will also have supervision responsibility for scientists and compiling regulatory submissions.

**Automation Technologist**
You will have expertise in analytical automation for the development, maintenance, compliance and use of laboratory automation used in the testing of development products at Holmes Chapel. The role involves hands-on testing, installation and maintenance of new equipment, together with existing equipment and routine inhalation testing using non-automated techniques.

To succeed in any of these roles, it is essential that you have a strong analytical background with a good honours degree in a relevant discipline and experience in a GMP regulated industry.

In return, sanofi aventis offers you the opportunity to develop to your full potential in a thriving environment. These roles attract a competitive salary and benefits package.

To apply, please forward your CV as an attached Word document, to: jdsla1@uib.srg.co.uk or call Jennie Dempsey on 0161 868 2200 for a confidential discussion and further details.

Background
ANGLE is a growing international Ventures, Management and Consulting company focusing on the commercialisation of technology and the development of technology-based industry. The Ventures Division works to identify exciting viable technology and science opportunities with strong commercial prospects and develops these opportunities into successful businesses. The Consulting and Management division works with clients in the private and public sectors to design and develop ways to maximise the commercial potential presented by technology. We are looking for 2 research analysts to join our dynamic, innovative and supportive team.

Research Analyst – Ventures Division
To carry out research within bioscience areas to support all stages in the set up of a venture company from conception to point of sale.

Research Analyst – Consulting and Management Division
To carry out research within renewable energy and low carbon technology areas on an existing project in support of the Carbon Trust.

Research for both roles is undertaken using internet searches, information databases, telephone conversations, and consultations with field experts.

The Candidates
The successful candidates will have a science related first degree; you will be able to demonstrate a strong academic and analytical capability. You will also be able to provide evidence of strong organisational, time management and interpersonal skills. Salary will depend upon experience, within the range £25k - £35k. There is an attractive benefits package. For an application form and detailed job description please write to or email Hayley Arksey at the address below.

**Study Director** Biotechnology
Harrogate

Covance’s purpose is to lead advancements in drug development through science, service and shaping solutions for the top 50 global pharmaceutical and biotech companies. By joining a thriving US based pacesetter, you’ll work with progressive management, inventive technologies and alongside the talented scientists who have made us one of the world’s largest and most comprehensive drug development services companies.

The Biotechnology Division, situated within Covance UK’s early phase development services based in Harrogate, North Yorkshire, was established 16 years ago. The facilities are fully GLP/GMP compliant and are dedicated to the biological safety testing of vaccine, recombinant, gene therapy and blood products to comply with current international guidelines. We provide a comprehensive portfolio of services including GMP cell bank production and storage, cell bank and viral vector safety testing and viral clearance studies. The present position is primarily involved in the supervision of our extensive *in vitro* biopotency studies which form part of GMP batch release requirements for biopharmaceuticals. Recent major investments have been made in tissue culture facilities on the Harrogate site and the successful candidate will be part of our exciting and expanding future plans.

The Study Director will be responsible for all aspects of the design, conduct and reporting of studies as well as scientific problem solving and client liaison. The ideal candidate will hold a relevant PhD and have at least 5 years’ experience in cell culture. The position demands a high degree of self-confidence and scientific expertise and a detailed understanding of cell biology will be required while a knowledge of virology would be a distinct advantage. You should have excellent communication skills and the desire to make a difference using your experience.

In return? The opportunity to develop your career in a truly global organisation, pursue further training and to take advantage of our flexible conditions and an excellent remuneration package.

For your opportunity to work in this dynamic environment please visit covance.com/careers and complete a candidate record (quoting reference 315BR). Alternatively you may search and apply directly to any roles of interest.

For informal enquiries please contact the Recruitment and Talent Services Team on 01423 848718.

Consider a new challenge.

**Innovative Pharmacologists**
Sandwich, Kent

At our European R&D headquarters in Sandwich, we’re making safety pharmacology an intrinsic – and earlier – part of the drug discovery & development process. Which means that our new safety pharmacology team will play a hugely influential role in our continuing success in developing new drugs. Join this team and you’ll enjoy the chance to work with R&D scientists and clinicians alike, to shape new important drug developments from initial discovery through to launch, and benefit patients.

This year we’ve established a new global centre of emphasis to pioneer this work and to support our drug discovery & development activities worldwide with both classical and innovative *in vitro* and *in vivo* safety pharmacology methods needed for success.

Now we need you to lead the design and execution of *in vivo* safety pharmacology studies; and the development of novel safety models, primarily in the neurofunctional/behavioural, pulmonary and cardiovascular fields. You will work closely with colleagues in biology, drug metabolism & pharmacokinetics, toxicology and clinical, to identify new drug targets and understand the efficacy and safety of a potential new medicine in its progression from animals to humans.

You may be an experienced safety pharmacologist. On the other hand, you could be degree qualified in a relevant subject with at least two years’ pharmaceutical research experience including *in vivo* studies. Or as a recent graduate, you may be looking for the chance to make your mark in an emerging area of pharmacology. But, whatever your background, you’ll have the ability and desire to work to high standards, generate and analyse high quality data, to solve complex safety problems.

Career and publishing opportunities will be excellent, as will the rewards, so to apply now, visit [www.pfizer.co.uk](http://www.pfizer.co.uk) quoting requisition number 050822.

Animal Health Division

Aquaculture Vaccine Research and Development
An Exciting Opportunity

Schering-Plough Animal Health is a division of Schering-Plough Ltd., a wholly owned subsidiary of the Schering-Plough Corporation, USA, one of the world's largest pharmaceutical companies. Our UK division is based at Harefield in Middlesex, where a vacancy for a Research Scientist has arisen within the Aquaculture Vaccine R&D group.

In this key position, you will play an important role in the development of experimental vaccines and associated test procedures. As part of a successful team dedicated to the discovery of new aquaculture vaccines for the European and global markets you will also be involved in implementing and monitoring quality/efficacy testing procedures.

With postgraduate qualifications in aquaculture, possibly a PhD, and broad-based experience in microbiology, immunology or a related discipline, the ideal candidate should be keen to apply their research skills to the development of new vaccines. This challenging, hands-on position combines the best of laboratory work with the opportunity to lead and influence new projects throughout their development cycle. Excellent communication and team skills are essential.

An attractive salary and benefits package is available in order to secure the ideal candidate. If this person is you, then please apply in writing quoting reference number BRD1106 to David Strong at the address below, enclosing a current CV and salary details by 11th Jan 2006 to:

Faculty Position in Electron Microscopy and Director of the Interdisciplinary Centre of Electron Microscopy (CIME)

A full or associate professor is invited to apply to be named jointly between the School of Basic Sciences and the Institute of Material Science (School of Engineering). The field of research may be broadly defined as materials characterization by means of electron beams. The new professor is expected to manage and strengthen the Interdisciplinary Centre of Electron Microscopy (CIME), to develop strong interactions with the School of Life Sciences and to initiate research collaborations with industry.

We seek applicants with an interdisciplinary vision, a strong record of scientific accomplishments and a commitment to excellence in teaching at both the undergraduate and graduate levels. Substantial start-up resources will be available, in addition to the wide range of e-beam materials characterization instruments already present at CIME.

We offer internationally competitive salaries and benefits.

Applications with curriculum vitae, publication list, concise statement of research and teaching interests as well as the names and addresses (including e-mail) of at least five references should be submitted as PDF files by February 15th, 2006 to Prof. K. Scrivener in the School of Engineering (Admin: erika.menamkat@epfl.ch).

Clinical Trial Service Unit (CTSU) and Epidemiological Studies Unit

Senior Laboratory Scientist

CTSU is a major international research unit working on cancer and heart disease. These chronic conditions are investigated by means of epidemiological studies and clinical trials. Many projects are long-term and large-scale and, CTSU has the facilities to process and store very large numbers of blood samples. The laboratory uses extensive computer automation and has particular expertise in developing reliable high-throughput methods of analysis. Storage facilities include liquid nitrogen storage vessels and freezer cabinets at two remote sites, and a freezer room and cabinets in the Unit.

The successful candidate will research new biochemical markers of interest, investigate and validate new analytical methods and techniques, and assist in the overall expansion of the assay repertoire of the laboratories.

Applicants should have a degree in Biochemistry, Clinical Chemistry or equivalent, and a minimum of four years' relevant experience of technical/analytical work in a clinical laboratory. Experience of QC monitoring and interpretation is essential, as well as an understanding of Health and Safety issues, management experience, excellent strategic planning and organisational skills, and a flexible and enthusiastic approach. Broad experience of clinical chemistry techniques and equipment would be advantageous.

This appointment is tenured, and benefits include generous holidays and membership of the MRC's pension scheme.

Please see http://www.ctsu.ox.ac.uk/~jobs/ or contact Admin on tel. (01865) 743867 or recruit@ctsu.ox.ac.uk for further details. To apply, send a completed application form to Admin Section, Clinical Trial Service Unit, Richard Doll Building, Old Road Campus, Roosevelt Drive, Oxford OX3 7LF, quoting reference 06/01/KK. The closing date is 25th January 2006.

The University is an Equal Opportunities Employer.
Applications are invited for a postdoctoral research associate position within the laboratory of Dr Neil Young to investigate Leucocyte Ig-like Receptor (LILR) control of dendritic cell functions and the relevance of this system to tumour immunity.

The ideal candidate should have experience of cellular and molecular immunology techniques. The post is funded by the Association of International Cancer Research and will be available from the 1 April 2006 for two years in the first instance.

For more information contact Dr Neil Young e-mail: nty20@cam.ac.uk

The names and addresses of two academic referees and your CV should be sent to Miss Alexis Park, Department of Pathology Tennis Court Road, Cambridge CB2 1QP.

Closing date: 30 January 2006.

UNIVERSITY OF CAMBRIDGE

The University offers a range of benefits including attractive pension schemes, professional development, family friendly policies, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Engineering Science

**Research Assistant in Microelectronics**
Salary: RA1A scale £20,044 - £22,289 p.a.

We are looking to appoint a suitably qualified candidate to the above post on a new research project funded by the EPSRC starting April 2006.

The successful candidate will have a first or upper second class degree in engineering or a closely related discipline with experience of building and testing electronic circuits. You will be able to work as part of a team and be willing to work in collaborating institutions. Experience of designing electronics on printed circuit boards and designing and testing analogue microelectronics using MOSFETS is desirable. Experience of presenting and publishing research papers would be advantageous.

Please quote DF05077 in all correspondence.

The closing date for applications is 13th January 2006.

**Research Assistant**
Starting salary: RA1A scale £23,182 - £26,470 p.a.

Applications are invited from suitable candidates to work on an EPSRC-funded project with the goal of creating content for 3D displays from 2D video streams. The grant is held jointly by the University of Oxford and Oxford Brookes University and the teams enjoy close collaboration with Sharp Laboratories Europe, based in Oxford. This post is for 3 years and is available from February 2006.

The successful candidate will have a PhD or postdoctoral experience in computer vision, computer graphics or a closely related area together with a good first degree in engineering, computer science or related discipline. You will have a strong publication record commensurate with age and experience and the ability to work well independently as well as part of a team. Expertise and experience in computer programming, especially in C++ and Matlab, and excellent communication skills both written and oral are essential. Experience of both Windows XP and Linux expertise in discrete optimisation techniques and/or Bayesian methods are desirable.

Please quote DF05081 in all correspondence.

The closing date for applications is 25th January 2006.

Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ; or e-mail: administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees.

The University is an Equal Opportunities Employer

[2533-043 (2006) : 59]
A Postdoctoral Research Assistant is required for 2 years to work on a project examining the impact of changing patterns of agricultural land use on biodiversity and landscape quality, funded under the Rural Economy and Land Use Programme.

Applicants should have a PhD in a relevant ecological or environmental subject area, experience of GIS and the manipulation of large spatial datasets. For further information please contact Simon Mortimer, e-mail caer@reading.ac.uk

Application forms and further particulars are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH. Telephone (0118) 378 6771 (answerphone). Application forms are available in Word/RTF format from www.reading.ac.uk/ Jobs Closing date for applications: 20 January 2006. Please quote the reference number.

[2533-044 (2006) : 59]
ITT DUBLIN

SENIOR RESEARCH OPPORTUNITIES

Applications are invited for the following research positions at ITT Dublin funded under the Applied Research Enhancement Programme - MICROSENSORS FOR CLINICAL ANALYSIS.

The key scientific objective is to design and develop integrated micro(bio)sensors for clinical applications in point of care testing.

PRINCIPAL INVESTIGATOR/CENTRE MANAGER (5 YEARS). (Project Code: AREP/05/TA01)

Role: Responsibility for the scientific day-to-day running of the project while fulfilling a role of liaison between outside parties (academic, industrial, funding agencies etc.) and the academic members of the project's management team.

Requirements: BSc. (Hons) in Biology/Biochemistry, PhD in Biosensor Development or related area; relevant employment record in medical device/diagnostic industry at senior scientist/management level. A track record in the transfer of technology from an academic to a commercial environment, together with excellent team building, communication and project management skills are desirable.

Salary starting £70,000

POSTDOCTORAL FELLOWSHIP (2 YEARS). (Project Code: AREP/05/TA02)

Preference will be given to researchers with a PhD in Sensor Technology or related area with experience in electrochemistry/biosensor development and micro-sensor fabrication techniques. Previous postdoctoral experience and a good publication track record are desirable.

Salary starting £40,000

POSTGRADUATE STUDENTSHP LEADING TO PhD. (Project Code: AREP/05/TA03)

A BSc (Hons) (Grade 1.1 or 2.1) in Chemistry is a prerequisite for this three year position leading to a PhD. An interest in synthetic methodologies/analytical chemistry is desirable.

Postgraduate grant £15,000 p.a.

For more information please contact:

Dr. Eithne Dempsey, ITT Dublin 00 353 14042862, eithne.dempsey@it-tallaght.ie
Dr. Tim McCormac, ITT Dublin 00 353 14042814; tim.mccormac@it-tallaght.ie

Please send a CV and covering letter to.

Mr. Pat O'Donnell, Industrial Liaison Manager, ITT Dublin, Tallaght, Dublin 24, Ireland.

Tel: 00 353 1 404 2864 Fax 00 353 1 404 2174

Closing date for all applications by post: 5 pm Friday 24th February

NATIONAL DEVELOPMENT PLAN

EUROPEAN UNION STRUCTURAL FUNDS

University of Southampton  
School of Chemistry  

**Research Fellow - Ion Channel Proteins for Biophysical Studies**  
£23,457 - £28,850 p.a  

A postdoctoral research position is available for the study of Ion Channel Proteins as part of an ambitious EU research programme. The project is based in superbly equipped laboratories in the School of Chemistry at the University of Southampton. You should have experience of protein biochemistry, eukaryotic protein expression, Ion Channel Proteins and a background in Chemistry, Biochemistry or Molecular Biology.

The post is initially available for a period of 32 months.

Informal enquiries about the post can be made to Dr Peter Roach, School of Chemistry, email: plr2@soton.ac.uk

An application form and further particulars may be obtained from the Human Resources Department (F), University of Southampton, Highfield, Southampton SO17 1BJ, tel: 023 8059 2750, email: recruit@soton.ac.uk or minicom: 023 8059 5595. Alternatively, visit our website at www.jobs.soton.ac.uk Closing date for applications is 3 February 2006. Please quote reference 0SF0374.

POSITIVE ABOUT DISABLED PEOPLE  
Excellence through diversity  
www.jobs.soton.ac.uk  
[2533-046 (2006) : 59]
UCL
UCL Department of Physics and Astronomy
Lecturer/Reader

A vacancy exists for an Experimentalist to carry out research within the Atomic, Molecular, Optical and Positron Physics (AMOPP) group (www.tampa.phys.ucl.ac.uk/amp) in the Department of Physics and Astronomy at UCL (www.phys.ucl.ac.uk). Applications are invited from all areas of AMOPP from candidates with significant accomplishments and promise for future achievements. An interest in performing work at the Life Sciences interface would be advantageous. The successful applicant will also be expected to teach at undergraduate and postgraduate level. Candidates wishing to transfer a long-term fellowship are welcome to apply.

The salary scale will be in the Lecturer range: £26,470 to £36,959 or the Reader range: £38,685 to £43,850, plus £2,400 London Allowance pa, plus relocation benefits. (Salaries under review). The appointment grade will be commensurate with accomplishment and experience.

Applications, accompanied by a full CV, including a statement of research interests and plans, plus contact details of three referees, should be sent to Professor J Tennyson (hod.physast@ucl.ac.uk) Head of Physics and Astronomy, University College London, Gower Street, London WC1E 6BT. Informal enquiries may be made to the AMOPP Group Leader, Professor G Laricchia (g.laricchia@ucl.ac.uk).

Further details are available at: http://www.phys.ucl.ac.uk/people/vacancies/

We particularly welcome female applicants and those from an ethnic minority as they are under-represented within UCL at this level.

Closing date: 15th February 2006.

UNIVERSITY OF OXFORD  
UNIVERSITY OF OXFORD  
Clinical Trial Service Unit and Epidemiological Studies Unit (CTSU)  

**Clinical Trial Administrator**  
Heart Studies Group  
Academic-Related Research Staff 1 B: £20,044 - £25,565 p.a.

The Clinical Trial Service Unit and Epidemiological Studies Unit (CTSU) is one of the world's leading centres for research into the causes, prevention and treatment of chronic diseases, such as heart disease and cancer. The main area where additional help is required is the SEARCH study, a double-blind, randomised clinical trial with 12,064 patients randomised across 88 centres. Patients are followed up every 6 months in nurse run clinics, with data collected electronically on to laptop computers. The patients' blood samples collected at the clinic are returned to CTSU for analysis.

We are looking for an enthusiastic individual to provide support to the senior study administrators. Applicants must have a degree (or equivalent experience), be proficient computer users and have at least two years' relevant experience, preferably in a medical research environment. The ability to communicate clearly is essential for this position, as are excellent organisational skills and the ability to work effectively as part of a busy team. Candidates should demonstrate excellent attention to detail and a logical and analytical approach.

The appointment will be for two years in the first instance. Please see [http://www.ctsu.ox.ac.uk/-jobs/](http://www.ctsu.ox.ac.uk/-jobs/) or contact the Admin Section on tel. (01865) 743867 or e-mail: recruit@ctsu.ox.ac.uk for further details. To apply, send a letter of application, curriculum vitae, and the completed supplementary information form and key abstraction form to Admin Section, Clinical Trial Service Unit, Richard Doll Building, University of Oxford, Old Road Campus, Roosevelt Drive, Oxford OX3 7LF, quoting reference 06/03/LW. The closing date for applications is 27th January 2006.

The University is an Equal Opportunities Employer.
Imperial College London  
Faculty of Natural Sciences  
Division of Cell and Molecular Biology

**Research Associate**  
Salary in the range £22,870 to £33,330

A Research Associate position is available in the Microarray group headed by Professor Andrea Crisanti, within the Infection and Immunity Section in Imperial College London. The post offers an exciting opportunity to conduct research at the interface between industry and academia and will involve liaison with a foreign industrial partner.

The successful applicant must have an honours degree in a relevant biological science, and a minimum of three years' postgraduate research experience. Candidates should be able to demonstrate enthusiasm, good communication skills, the ability to work independently and to interact with a team of researchers. General knowledge of immunoassay techniques, protein expression, purification and characterisation is required and some experience of protein micro-array technology is preferred. Salary will be commensurate with skills and experience.

A job description and an application form can be obtained from the following website: [http://www.imperial.ac.uk/employment/research/index.htm](http://www.imperial.ac.uk/employment/research/index.htm)

Completed application forms, accompanied by a covering letter, a CV and the names of two academic or industrial referees, should be sent to Professor Andrea Crisanti, Division of Cell and Molecular Biology, SAF Building, Imperial College, London SW7 2AZ  
(tel: 020 7594 5426, email: w.low@imperial.ac.uk).

Closing date: 31 January 2006.

Quality in Crop and Weed
Ecological research at Wageningen University

An international peer review, conducted in 2004, placed Wageningen University's Crop and Weed Ecology research group at the global top in crop sciences. The group's fundamental approach and strength in modelling of cropping systems are of highest international quality where the design of new generic crop models and functional architectural modelling have been commended as being world-class.

Contributing to the quality of life!
‘Improve the quality of life.’ This is the mission that Wageningen University and Research Centre is committed to fulfilling. Our more than 7,000 employees and 8,500 students from 98 countries are dedicated to protecting nature and the environment. They breathe new life into the food and agriculture industry. Our strength lies not only in our research. By combining the resources of a university for professional education and specialised institutes into one centre of knowledge, we are also able to translate the results of our research into innovation and education. The quality of this method is revealed by our leading score in the top-5 of the worldwide citation indexes in our specialised field. We seek practical solutions based on high-quality technology. Guided by a commitment to society that does not stop at national borders. This is what sets the Wageningen approach apart.

Full professor Crop and Weed Ecology (1.0 fte)
At the chair Crop and Weed Ecology, Wageningen University. Reference number: AT HGL 2005-1103

The professor will lead the chair Crop and Weed Ecology (academic staff, technicians and students) whose activities focus on the functioning of crops and cropping systems in relation to (a)biotic factors and on weed ecology, addressing (inter)national research issues. Aggregation levels studied range from plant to cropping system, with prime focus on crop level. Experimentation and modelling (e.g. simulation) play a central role in the systems approach.

Would you like to contribute to improving the quality of life? Visit www.jobsat.wur.nl for more information.

WAGENINGEN UR
For quality of life
[2533-053 (2006) : 61]
Imperial College LONDON
Safety Department

**Radiation Protection Officer**
Salary range: Level 4 (£33,330-£41,570)

Applications are invited for the post of Radiation Protection Officer (RPO). Reporting to the College Radiation Protection Manager, the RPO will be responsible for duties across all College campuses. These duties include: work registrations; dosimetry; record keeping; radioactive waste management; leak testing; monitoring; and training. The post is based at our South Kensington campus but will require regular travel to other campuses.

Applicants should have qualifications and/or experience in the field of radiation protection and have a degree in a relevant subject eg science or engineering. Experience in a similar position or as a Senior RPS would be advantageous. Communication and team player skills are vital.

This position offers an excellent opportunity for persons working towards RPA2000 accreditation.

The post offers 25 days' annual leave plus 6 additional closure days and an occupational pension scheme. Security clearance is a condition of employment.

Further information and an application form are available on the College website: [http://www.imperial.ac.uk/employment/administrative/index.htm](http://www.imperial.ac.uk/employment/administrative/index.htm) or from Sangita Kerai (020 7594 9423 s.kerai@imperial.ac.uk) quoting reference 05SAF03.

Application forms should be returned to Sangita Kerai, Safety Department, Imperial College London, 8 Prince's Gardens, London SW7 2AZ.
Closing date: 20 January 2006.
Interview date: 26 January 2006.

Valuing diversity and committed to equality of opportunity

The University of Reading  
Department of Physics  
**PhD Studentship** in Nanomaterial Physics

We invite applications from UK and EU candidates for a 3-year PhD Studentship in the Nanoscience and Materials Group of the Physics Department at the University of Reading. The project involves the development and application of a state-of-the-art theory for nano-structured polymeric systems (see [www.reading.ac.uk/~sps96mwm](http://www.reading.ac.uk/~sps96mwm) for further details). Applicants require an undergraduate degree in physics, strong mathematical skills, experience in computer programming, and a good grasp of statistical mechanics. The studentship is funded by EPSRC, and covers full tuition fees plus £11,600 per year for living expenses. Interested candidates should send their CV to Prof Matsen ([m.w.matsen@reading.ac.uk](mailto:m.w.matsen@reading.ac.uk)) by no later than 1 February 2006.  
[2533-060 (2006) : 63]
2006 BBSRC Targeted Priority **Studentships** in Crop Science

The University of Nottingham is an international centre for teaching and research in plant and crop biology, and is committed to training the next generation of crop research scientists. Two, four year studentships funded under the above scheme will be available from October 2006 for the following research areas:

- Comparative genetics of germination in Arabidopsis and cereals Professor M Holdsworth; michael.holdsworth@nottingham.ac.uk; [http://www.nottingham.ac.uk/biosciences/postgraduate/vacancies/current/transcript.htm](http://www.nottingham.ac.uk/biosciences/postgraduate/vacancies/current/transcript.htm)

- Improving the zinc (Zn) composition of Brassica crops Dr Martin Broadley; martin.broadley@nottingham.ac.uk; [http://www.nottingham.ac.uk/biosciences/postgraduate/vacancies/current/zinc.htm](http://www.nottingham.ac.uk/biosciences/postgraduate/vacancies/current/zinc.htm)

You should hold or expect to gain a first or upper second class honours degree.

Candidates should send a detailed CV and covering letter to the respective supervisor.

Closing date: 17 February 2006.

**Ph.D. Studentships at**
ROSLIN INSTITUTE (Edinburgh)

Roslin Institute is a world renowned centre for research in genetics, molecular biology and developmental biology. Applications are welcome for the following studentships.

- Regulatory mechanisms controlling osteocytogenesis during bone growth and development. Supervisor: Colin Farquharson ([colin.farquharson@bbsrc.ac.uk](mailto:colin.farquharson@bbsrc.ac.uk)). University of Cambridge registration.

- Gene expression differences underlying bovine resistance to a Rotozoan parasite. Supervisors: E.J. Glass & K. Jensen ([Kirsty.Jensen@bbsrc.ac.uk](mailto:Kirsty.Jensen@bbsrc.ac.uk)). University of Edinburgh registration.

- Tissue remodelling during gonadogenesis and the role of DMRT 1 in sex determination in the chick embryo. Supervisors: M. Clinton & H. Sang ([michael.clinton@bbsrc.ac.uk](mailto:michael.clinton@bbsrc.ac.uk)). University of Edinburgh registration.

- Genetics Dissection of ascites in chickens. Supervisor: C.S. Haley ([chris.haley@bbsrc.ac.uk](mailto:chris.haley@bbsrc.ac.uk)). University of Edinburgh registration.

Studentships are available from October 2006 and applicants must satisfy BBSRC criteria.

Applicants should have, or expect to obtain, a first or upper second class degree in a related discipline. Applications including a full CV with names and addresses (including email addresses) of two academic referees, indicating project of interest should be sent to: Roslin.HR@bbsrc.ac.uk Human Resources, Roslin Institute (Edinburgh), Roslin, Midlothian, EH25 9P5 (tel 0131 527 4481) by 27 January 2006.

Postgraduate study in Science or Engineering – **Research degrees**

We are one of the largest science and engineering groupings in the UK. When you join us you will become part of a vibrant academic community of international standing.

Our research encompasses both pure and applied science that find solutions to specific scientific, and technological problems in traditional disciplines and new interdisciplinary areas. One of the core objectives of the College is to encourage interdisciplinary research and training and our schools work in close association with each other and other research organisations and universities.

We support a comprehensive series of generic skills training courses designed to enhance your research training as well as your interpersonal, communication and managerial skills – skills that will help to make you highly sought after by employers.

Of course, we’re also proud to be part of the famous Edinburgh landscape as much a part of local life as the castle, Royal Mile, new Parliament, and the cosmopolitan lifestyle enjoyed by thousands.

For more information, check out our website - scieng.ed.ac.uk – or visit the individual school sites listed below.

**THE UNIVERSITY OF EDINBURGH**

[2533-063 (2006) : 64]
Applications are invited for PhD Studentships, funded by the Medical Research Council, which provide financial support for fees and stipend to start in October 2006. They are subject to the usual residency and eligibility requirements which can be found on the MRC website (www.mrc.ac.uk).

Studentships will be available in both the MRC HUMAN IMMUNOLOGY UNIT and the MRC MOLECULAR HAEMATOLOGY UNIT both located within the Weatherall Institute (www.imm.ox.ac.uk).

Expressions of interest in the form a letter detailing research area together with a CV and the names of 2 referees to:
Mrs Melanie Goble, MRC Human Immunology Unit, (melanie.goble@ndm.ox.ac.uk) OR Mrs Lynne Hughson, MRC Molecular Haematology Unit, (lynne@hammer.imm.ox.ac.uk)

Weatherall Institute of Molecular Medicine
John Radcliffe Hospital, Oxford OX3 9DS
[2533-064 (2006) : 64]
MRC
Epidemiology Unit

MRC PhD Studentships in Epidemiology 2006

The Medical Research Council Epidemiology Unit is seeking applications from eligible students who wish to undertake a PhD in Epidemiology commencing in October 2006. The MRC Epidemiology Unit aims to investigate the developmental, genetic and behavioural determinants of obesity and type 2 diabetes, and the translation of epidemiological findings into preventive action. PhD projects are available in the fields of genetic epidemiology, gene-environment interactions on fetal and childhood growth or on risk of type 2 diabetes in adults, nutritional epidemiology, physical activity epidemiology, and screening for diabetes. Applications for a three-year PhD would be welcome from individuals who already have a Masters in an appropriate scientific discipline. Opportunities exist for four-year studentships for those wishing to undertake the MPhil in Epidemiology course before proceeding to the PhD Programme. The minimum academic requirement for entry is an upper second class degree or equivalent. Only nationals from the EU and the UK are eligible for MRC PhD studentships. Details about eligibility are available at http://www.mrc.ac.uk/hei_dta_handbook_05-2.doc

Potential PhD students should send a full CV including the contact details of two referees, and a covering letter, to Dr Nita Forouhi, PhD Coordinator, MRC Epidemiology Unit, Elsie Widdowson Laboratory, Fulbourn Road, Cambridge CB1 9NL, United Kingdom. For enquiries about the PhD Programme and about the application process, contact Ms Dena Mason on 01223 745171 or email postgrad@mrc-epid.cam.ac.uk Information about the MRC Epidemiology Unit and the PhD Programme can be found at http://www.mrc-epid.cam.ac.uk

Closing date: 20th January 2006

The MRC is an equal opportunities employer. 'Investigating the Causes and Prevention of Diabetes and Obesity'.

[2533-065 (2006) : 64]
The Wellcome Trust is one of the world's largest biomedical research charities and our mission is to foster and promote research with the aim of improving human and animal health.

The Wellcome Trust would like to invite applications for the autumn 2006 intake to its Four-Year PhD Programmes.

The Wellcome Trust’s Four-Year PhD Programme is a flagship scheme aimed at supporting the highest quality students to undertake in-depth postgraduate research training. The first year combines taught courses with laboratory rotations to broaden students' theoretical and technical knowledge in the subject area of the Programme, before embarking upon a three year PhD project. The Programmes also provide training in vital transferable skills. Applications are accepted from candidates with backgrounds from within a broad range of disciplines, including the biological, chemical, physical and mathematical sciences.

Support includes stipend for four years using the Wellcome Trust's own scales, UK/EU student PhD registration fees, research expenses, personal development training funds and a contribution towards travel expenses. Applicants should have, or expect to obtain, a 1st or 2:1 degree, or equivalent (overseas applicants should contact the individual programmes for further advice).

Thirteen of the themed Programmes fund five places per annum. The Pain Consortium Programme funds three places per annum.

The fourteen Wellcome Trust Four-Year PhD Studentship Programmes are as follows:

- University of Cambridge Developmental Biology [www.gurdon.cam.ac.uk/phd](http://www.gurdon.cam.ac.uk/phd)
- University of Cambridge Infection and Immunity [www.cimr.cam.ac.uk/phd/phd.htm](http://www.cimr.cam.ac.uk/phd/phd.htm)
- University of Dundee Molecular and Cellular Biology [www.dundee.ac.uk/biocentre/wt_prog/index.htm](http://www.dundee.ac.uk/biocentre/wt_prog/index.htm)
- University of Edinburgh Cellular and Molecular Basis of Disease [www.gradlife.ed.ac.uk/wellcome/](http://www.gradlife.ed.ac.uk/wellcome/)
- University of Glasgow Molecular Functions in Disease [www.gla.ac.uk/ibls/GradSchool/4y/](http://www.gla.ac.uk/ibls/GradSchool/4y/)
- Imperial College London Bioinformatics [www.bioinformatics.imperial.ac.uk/wellphd/](http://www.bioinformatics.imperial.ac.uk/wellphd/)
- Imperial College London Molecular and Cellular Basis of Infection [www.wellcome-infection.ic.ac.uk](http://www.wellcome-infection.ic.ac.uk)
- University of Leeds Molecular Basis of Biological Mechanisms [www.astbury.leeds.ac.uk/studentships/WT4yr_2004.htm](http://www.astbury.leeds.ac.uk/studentships/WT4yr_2004.htm)
- University of Liverpool Cellular and Molecular Physiology [www.liv.ac.uk/physiology](http://www.liv.ac.uk/physiology)
- King's College London/University College London/Imperial College London: The Pain Consortium [www.lpc.ac.uk](http://www.lpc.ac.uk)
- University of Manchester Biochemistry of Cellular Systems [www.ls.manchester.ac.uk/postgraduate/research/wellcome4yrphd/](http://www.ls.manchester.ac.uk/postgraduate/research/wellcome4yrphd/)
- University of Oxford Neuroscience [www.medsci.ox.ac.uk/neuroscience/](http://www.medsci.ox.ac.uk/neuroscience/)
- University of Oxford Structural Biology [www.bioch.ox.ac.uk/wt-programme/](http://www.bioch.ox.ac.uk/wt-programme/)
- University College, London Neuroscience [www.physiol.ucl.ac.uk/neurosciencephd/](http://www.physiol.ucl.ac.uk/neurosciencephd/)

Further information is available from the individual programmes and the Wellcome Trust website ([www.wellcome.ac.uk/node2126.html](http://www.wellcome.ac.uk/node2126.html)). Each programme runs independently and interested candidates
should, therefore, send enquiries and applications to the individual programmes and not to the Wellcome Trust.

THE WELLCOME TRUST IS COMMITTED TO BEING AN EQUAL OPPORTUNITIES EMPLOYER. THE WELLCOME TRUST IS A REGISTERED CHARITY, NO. 210183

NEW

**MSc Integrated Pharmaceutical & Medical Engineering**
Commencing October 2006
Studentships available up to £10,000*

Career opportunities exist within the exciting global, multi-billion pound pharmaceutical and medical device industries.

The new MSc Integrated Pharmaceutical & Medical Engineering is a highly vocational programme designed and developed by Cranfield University, in conjunction with major global manufacturers. It focuses on the design of 'hardware' solutions for disposable pharmaceutical and medical products and their associated manufacturing processes.

Cranfield, in partnership with 3M Health Care Limited, will be supporting highly qualified graduates to undertake the course. Cranfield graduates are highly sought after by industry.

For more information please contact SIMS Enquiries quoting ref no: NS24/12.

T +44 (0) 1234 754086.

Bursaries available

UNIVERSITY OF BIRMINGHAM
UB
Master of Research (MRes) in Chemical Engineering Science

Available at the Centre for Formulation Engineering, Department of Chemical Engineering

• One-year postgraduate qualification
• 60 credits of taught modules in science, engineering, project management and other transferable skills
• 120 credits of industry or department-based research
• Tax-free bursaries of £12,000 plus fees paid by the EPSRC
• Open to UK/certain EU nationals only with a first degree (upper second class or better) in Maths, Engineering and the Physical/Life Sciences or Materials Science
• Projects available to start now:
  - Influence of air phase volume on foam rheology (Unilever, Colworth)
  - Mathematical modelling of diffusion through porous food networks (Unilever, Colworth)
  - Surface analysis of polymeric films (Dupont Teijin Films, Wilton)
  - Investigation of hydrodynamics in tubes fitted with heat transfer enhancement devices using PIV (CalGavin, Alcester)
  - Evaluation of spray-drying technology to prepare powders containing silicone oil (Dow Corning, Belgium)
  - The thermal stabilisation of industrially important enzymes (Departmental)
  - Gas hold-up and bubble size in a catalytic stirred three phase reactor (Departmental).
For more up-to-date list of projects and programme details visit www.eng.bham.ac.uk/chemical/pg/mres If you meet the above entry requirements then please email your CV to r.w.greenwood@bham.ac.uk
Closing date for applications: 16th January 2006.

Over 90% of professional scientists recommend New Scientist to find the top jobs in science. New Scientist Jobs www.newscientistjobs.com
Committee on TOXICITY

Forthcoming Committee on Toxicity Workshop York, 15 February 2006

The Development and Function in Adulthood of the Male Reproductive System: Potential Chemical-Induced Effects

The Committee on Toxicity (COT) of Chemicals in Food, Consumer Products and the Environment is to hold a one-day workshop on Wednesday 15 February 2006.

Internationally distinguished speakers will present the latest hypotheses together with experimental and epidemiological data on potential chemical-induced effects on the development and subsequent function of the male reproductive system.

Full details of the scientific programme and information on the activities of the Committee can be found on the COT’s website at http://www.food.gov.uk/science/ouradvisors/toxicity

Requests to attend the meeting, which will be held at the York Moat House Hotel, York, should be addressed to Ms Toni Gray at: Chemical Safety Division, Room 511 C, Food Standards Agency, Aviation House, 125 Kingsway, London WC2B 6NH. Tel: 020 7276 8588 Fax: 020 7276 8513 or e-mail at Toni.Gray@foodstandards.gsi.gov.uk

Early application is encouraged, as places are strictly limited, however, the closing date for requests to attend the meeting is Friday 20 January 2006.

Research Fellowship
Applications are invited for a two-year Research Fellowship for research and training in hypertension and related fields. The Fellow appointed will hold a medical degree or higher degree in science (PhD) and have evidence of research aptitude or clinical experience in hypertension. The award will support a two-year period of research at an institute, university or other academic centre in the UK or Republic of Ireland. Awards will be given preferentially to UK or EC nationals working in the UK or the Republic of Ireland. The stipend will be based on UK Clinical/Academic Staff salaries in the range of £25,000-£35,000 p.a. (+ NI, superannuation and London Allowance if appropriate).

Research Studentship
Applications are invited for a three-year Research Studentship for research and training in hypertension and related fields leading to a PhD. Applicants will usually be graduates of an EU university or currently working in a UK or Republic of Ireland hospital or institution. Awards will be given preferentially to UK or EC nationals working in the UK or the Republic of Ireland. The stipend will be based on current MRC rates and will cover PhD fees.

Applicants for both the Fellowship and the Studentship must identify a preferred research centre, an indication of why that centre is particularly appropriate for the research, and confirmation from the relevant head of department that they will administer and supervise the Research Fellowship/Studentship. Up to £5,000 per annum may be made available for justifiable additional expenses related to the project. It is expected that successful applicants will commence their research positions by October 2006.

Application forms can be downloaded from www.hypertensiontrust.org and are also obtainable from: Mrs Gerry McCarthy, Administrator, The Hypertension Trust, 113-119 High Street, Hampton Hill, Middx, TW12 1NJ, UK. Tel: 020 8979 8300 Fax: 020 8979 6700 Email: gmccarthy@hamptonmedical.com www.hypertensiontrust.org

Deadline for applications: Friday 3rd March 2006

An old form of energy. A new way to catch it.

Alternative energy™

Powered by BP

We can't change the way the wind blows. But we can change wind into electricity. BP is introducing alternative energy – a new business that will use the power of the wind, as well as the sun, hydrogen and natural gas to create cleaner, low-carbon electricity. We aim to extend our global wind power capacity to over 3,000 megawatts by 2015, enough to power more than 1.5 million typical homes. NPL
National Physical Laboratory

Higher Research Scientists
£23.5k - £29k depending on skills & experience – Teddington, Middx.

Physics, Electrical Engineering & Mechanical Engineering

NPL is the UK’s national standards laboratory. We carry out fundamental research and develop measurement technologies, vital to improving quality of life, trade competitiveness and protecting the environment.

Opportunities exist to join NPL as a Higher Research Scientist in the following areas:

PHYSICIST/ELECTRONIC ENGINEER - PRIMARY ELECTRICAL MEASUREMENT Ref: EM/022
To join a team responsible for realising the electrical units of Voltage, Resistance and Current and developing the next generation of instrumentation based on quantum phenomena such as the Josephson effect, Single Electron Transport and quantised Hall resistance. The successful candidate will play a significant role in providing novel and innovative solutions in electrical measurement for industry and other centres of excellence around the world.

PHYSICIST/MECHANICAL ENGINEER - THERMOPHYSICAL PROPERTIES Ref: EPC/001
To join the Thermal Group working to improve the quality of the thermal property measurements needed to meet UK Kyoto targets. The Group also provides a respected measurement service for industry. Good practical skills are essential and experience of solving thermal performance problems using numerical methods would be useful.

PHYSICIST - ACOUSTICS Ref: DQL/002
To join a team working on the measurement of sound (in air and water); audiometry; medical and industrial ultrasonics; measurement of machinery and environmental noise and development of new acoustical measuring instruments. Candidates will have relevant experience in acoustics.

All roles require a good degree in the relevant subject. Excellent interpersonal skills, strong customer focus and an ability to work to challenging deadlines are important aspects of the roles.

Full details and on-line application at www.npl.co.uk/recruitment/current or email your CV quoting the appropriate reference, to recruitment@npl.co.uk

Closing date: 16th February 2006.

NPL is committed to equal opportunities.
WAKEHURST PLACE
KEW
PLANTS PEOPLE POSSIBILITIES

Team Supervisor
Fixed term contract to end of 2009

Based in the Seed Conservation Department at Wakehurst Place, you will assist the Processing Manager in the day-to-day running of the seed bank and ensure new collections for the bank are accessioned and processed while seed viability is maintained. You will manage a team of assistants, helping them to process bank collections and develop expertise in methods used and material encountered. You will also monitor the condition of bank collections and ensure health and safety procedures are followed.

Educated to A Level standard or higher, you will have experience of working in a laboratory environment, basic management training and good laboratory skills. You will have excellent communication skills and the ability to work well in a team environment. A background and/or higher qualifications in biology or botany would be a distinct advantage, as would knowledge of plant physiology and plant anatomy, and experience of public speaking.

Salary is £18,030 per annum and benefits include a choice of final salary or stakeholder pension, generous annual leave and a stunning work environment.

Application packs are available from our website www.kew.org (click on the link at the bottom of the homepage). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5784/5750 (24 hour answerphone). Please quote Ref 3070.

Closing date: 24 February 2006.

Careers in Teagasc
Teagasc - the Agriculture and Food Development Authority - is the national agency providing research, advisory and training services for the Irish agriculture and Food industry. We are now seeking applications for the following contract research officer position based in Moorepark Food Research Centre, Fermoy, Co Cork.

**Nutraceutical Biochemist** (Ref: NB/MFRC/0106/NS)
The successful applicant will develop a research programme to characterise the composition and structure of oligosaccharides and their development as biological active components in Functional beverages. Applicants must have an honours level 8 degree in biochemistry or related discipline. A Ph.D in biochemistry or Food science is desirable with experience in oligosaccharide research and/or nutraceutical development. Appointment will be made on a contract basis for a period of up to 36 months.

**How to Apply**
Detailed job descriptions and application forms can be accessed on our website at [www.teagasc.ie/careers](http://www.teagasc.ie/careers) or obtained from the address below.
Completed application forms may be emailed to [recruit@hq.teagasc.ie](mailto:recruit@hq.teagasc.ie) or posted to: Recruitment Section, Teagasc, Head Office Oak Park, Carlow, Ireland
Please state relevant reference code in all correspondence.
The latest date for receipt of completed application forms is 5.00pm on Friday 10 February 2006.

THE MACAULAY INSTITUTE

The Ecology of Rarity

PLANT ECOLOGIST

We seek an innovative researcher to join a team studying the ecology of rare species and to contribute to the objectives of the Scottish Biodiversity Strategy. We aim to take a comparative approach to understand what are the main traits and attributes of rare higher plants and how these interact with environmental change drivers.

First and post-graduate degrees in relevant subjects and a deep knowledge of plant ecology are essential. Experience of modelling, genetics or climate change impacts would be an advantage. The work will be collaborative with Royal Botanic Gardens, Edinburgh, so a willingness to operate as a team player and an ability to engage with a range of external stakeholders are also important. Candidates should have a strong track record in publications and for a more senior appointment proven success in grant-winning. Starting salary within the range £22,351 - £31,186 per annum (pay award pending) with excellent employee benefits.
Quote Ref: MA 04/06

Enhancing Water Quality

HYDRO-ECOLOGIST

Applications are invited for a senior researcher to lead a small team seeking to elucidate the impact of environmental change and management on aquatic ecosystems. Particular expertise is sought in hydro ecology and/or aquatic ecology.

Candidates should have a PhD or equivalent experience in hydro-ecology or related subject area. Research interests in assessing the impacts of environmental change and management on the structure and function of aquatic habitats are desirable. As much of the work will be undertaken collaboratively, an ability to engage with stakeholders is an important quality. Candidates should have a strong track record in high impact peer reviewed publications and for a more senior appointment, evidence of external income generation and research grant success. Starting salary within the range £26,780 - £39,366 per annum (pay award pending) with excellent employee benefits.

BELFAST CITY HOSPITAL
An Equal Opportunity Employer

**Clinical Scientist** B sp pts 19-21 (NI Scale)
Regional Histocompatibility & Immunogenetics Laboratory
Belfast Link Laboratories
£33,829 - £36,593 per annum (under review)

Essential Criteria
• PhD with 2 years' postgraduate experience in molecular biology;
• HPC Registration.

This would be an opportunity for individuals who have research interests to combine that with permanency, funding and application to patient well-being. Applications are welcome from non HPC registered individuals who would be willing to commence at a lower level to achieve HPC registration. There would be an opportunity in due course for career advancement

Closing Date is Friday 10 February 2006 at 4.30 pm.

Waiting Lists may be created as appropriate

For application form please send a large SAE to the Personnel Department, A Floor, Belfast City Hospital, Lisburn Road, Belfast BT9 7AB or call in person. Applications may also be downloaded from [www.nijobs.com](http://www.nijobs.com)

Thames Water Utilities is the UK's largest water and wastewater services company with over 4,000 employees providing service round the clock to 13 million customers.

A flow of good ideas.

As suppliers of water and wastewater services to millions of customers we face all sorts of exciting challenges - from planning for climate change and finding more sustainable solutions to energy and water use, to developing better ways of identifying and monitoring water usage and customer needs.

We're looking for innovative engineers and scientists with expertise to help shape our 21st century water and environmental business. Whether you're a scientist, engineer or technologist, this is your chance to join our experienced Research & Development Group and help deliver sustainable solutions to some truly challenging future issues.

**Senior Research Scientist/Engineer**  
Sustainable Energy  
c. £26,000 - £30,000 p.a.  
With knowledge of renewable energy processes, you will join the research team to evaluate and help apply innovative and sustainable energy options throughout the business. These could range from biogas, biodiesel and bioethanol to low-head hydro or micro wind generation. You will have a relevant higher degree and/or be chartered with a track record of delivering energy management projects. Ref: 4167

**Research Scientist/Engineer**  
Metering & Customer  
c. £24,000 - £28,000 p.a.  
Using your analytical skills you will help undertake research to better understand customer water usage and evaluate new metering technology to inform the ongoing development of the company's metering strategy. Projects will include assessing the impacts of increasing levels of customer metering, using existing and newly developed data sources, appraising new technology and developing models. You will have a degree in a relevant science or engineering discipline and good skills in numerical and data analysis. Ref: 4146

**Research Scientist/Engineer**  
Wastewater Networks  
c. £24,000 - £28,000 p.a.  
Joining our talented team, you'll help to develop new drainage technologies for a range of projects affecting individual houses right through to whole cities. You'll have a degree in science or engineering and possibly a higher degree (or relevant experience). Ref: 4155

**Research Scientist/Engineer**  
Water Recycling & Efficiency  
c. £24,000 - £28,000 p.a.  
You'll be a key member of the research team developing alternative solutions to reduce the future pressure on drinking water supplies in London. You will focus on the areas of water recycling and water efficiency from pilot schemes to full-scale implementation on a range of exciting new sustainable water initiatives. You'll have a degree in a relevant science or engineering discipline and ideally a higher degree (or relevant experience). Ref: 4147

**Engineering Doctorate in Environmental Engineering Science (UCL) Sustainable Water Resources**  
4 year stipend at £17,750 p.a.  
This is a collaborative EPSRC funded, 4 year research post facilitated by the University College London (UCL) Civil and Environmental Engineering Department. The researcher will work with Thames Water exploring their customers' attitudes and behaviour towards both water recycling and requests to conserve
water using social science methodologies. Applications are invited from UK residents with a degree, MSc or MA in a related subject, and possibly some industrial experience. For more information or an application form please visit www.civeng.ucl.ac.uk/EngD or contact Katie Dallison (k.dallison@ucl.ac.uk).

For all our R&D roles we're looking for a real passion for scientific research and drive for implementing findings, plus the ability to communicate effectively. While you'll be based in Reading, all roles will involve fieldwork and travel throughout the River Thames catchment area, plus occasional overseas work.

To apply (excluding Engineering Doctorate role above), please send your CV, quoting the appropriate reference number to HR Service Centre, Thames Water Recruitment Team, Clearwater Court Ground West, Vastern Road, Reading RG1 8DB or email sharedserviceshr@thameswater.co.uk

Closing date: 17th February 2006.

If you have not had a response by 3rd March 2006, please assume that on this occasion your application has been unsuccessful. Thames Water is an equal opportunities employer.

www.thames-water.com

RWE GROUP
Thames Water
[2537-007 (2006) : 59]
Deputy Director, OIE/FAO/EU Community Reference Laboratory for Avian Influenza & Newcastle Disease
based at Addlestone, Surrey, UK

Come and help us do battle with Avian Influenza. We aim to win, and this post is key to our success. As Deputy Director of OIE/FAO/EU International Reference Laboratory for Avian Influenza and Newcastle Disease, based at VLA Weybridge, you will be responsible for the research that underpins our international role in this high profile area, as well as providing support to the Director in the international forum.

This is a rare and exciting opportunity for a veterinary virologist of vision, drive and ability to step into the international spotlight, working at one of the world's premier veterinary institutes. As such, you will need to be able to cope with high workloads, be effective at communicating your science and have a proven track record of successfully leading scientific teams and managing multiple projects.

You will also be responsible for projects on other avian diseases. As an Agency of Defra, our research portfolio primarily addresses Defra aims and objectives and also serves the poultry industry, by performing R & D, surveillance and laboratory diagnosis for a whole range of notifiable and endemic avian viral diseases.

You should have a veterinary or scientific degree and a relevant higher degree at post-doctoral level, extensive post-doctoral experience in virology research, a good knowledge of notifiable avian viruses, and ideally, some knowledge of policy issues surrounding Avian Influenza and Newcastle Disease.

The post is in Pay Band B £38,000 - £52,865 per annum. The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age. Further information can be found on our website at www.vla.gov.uk.

An Executive Agency of the Department for Environment, Food and Rural Affairs.

Veterinary Laboratories Agency

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (AMK), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP 3605.

The closing date for receiving completed application forms is 24 February 2006.

INVESTOR IN PEOPLE
[2537-008 (2006) : 60]
A Virology Diagnostician is required to oversee the day-to-day running of the virology laboratory and supervising assistant diagnosticians within the Plant Health Group virology sub-team at CSL. Duties include diagnosis of plant diseases caused by viruses, viroids or phytoplasmas, using both traditional and modern techniques, quality checking of results and meeting customer requirements in terms of quality and deadlines. There are also line management and staff training responsibilities.

A HNC, degree or equivalent level qualification in biology or another life science is required. Candidates without these qualifications would need at least three years relevant experience. In addition you will be well organised, experienced with MS Word and Excel, a good communicator and have experience of molecular methods.

For an application pack call 01904 462302 or email jobs@csl.gov.uk. Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk.

CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.

Closing date for applications is 24 February 2006. Interviews to be held the week commencing 6th March 2006.

The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra). The Agency provides policy advice and technical support underpinned by high quality R&D to help Defra and other customers safeguard food supplies, protect consumers and the environment.

Sand Hutton, York
[2537-009 (2006) : 60]
The CR-UK Gene-Targeted Drug Design Research Group focuses on the design, synthesis and biological evaluation of sequence-selective DNA-interactive agents with the aim of targeting and silencing cancer-related genes.

The group is currently seeking an experienced postdoctoral chemist to spearhead its synthetic chemistry programme. Ideally candidates should have a strong background in synthetic organic chemistry, especially in the areas of palladium-catalysed carbon-carbon bond formation and parallel solution phase combinatorial synthesis. The successful candidate will be expected to provide leadership for the Group's synthesis technicians and PhD students. Candidates should also possess good presentational skills. Salary range £28,000 to £31,525 p.a. plus London Allowance (£2,393).

A covering letter and a full CV should be sent to Ms Ruth Pickering at the above address, or e-mailed to ruth.pickering@ulsop.ac.uk

Note: Although current funding expires in September 2007, subject to a successful quinquennial review by CR-UK in 2006, it is anticipated that the post will continue beyond this.

Closing date: 16th February 2006.

124 billion cups of our tea are drunk each year and you can impact them all.

**Tea Scientist**  
Sharnbrook, Beds

Do you think you have it in you to touch the everyday lives of people? Tea has been consumed for many thousands of years for a whole variety of reasons such as taste, thirst quenching and health benefits. It is consumed in nearly every country in the world and yet the rich variety of tea taste properties still provides exciting opportunities to expand the market for both hot and ready to drink beverages.

Unilever is the world's largest tea company and owns the Lipton brand. We are looking for an enterprising scientist that will perform and co-ordinate a research programme unravelling the molecular basis of tea taste and mouth-feel. Integrating into your research together with a team of scientists and specialists from different disciplines across food research, to understand the power of just how a cup of tea can quench thirst so remarkably.

It is an exciting and challenging role in which you will be able to influence many innovation projects, so besides strong leadership and experience of working with multi-discipline teams, your academic and professional record will need to be top-class. A related PhD (e.g. biomedical sciences, clinical biochemistry, natural products chemistry or sensory science) is therefore essential, and a keenness to exploit fundamental science of taste and physiological functionality in a consumer product business.

A role with real influence, you'll get a deep satisfaction from mixing the scientific and business world, as well as chemistry and consumer research. All in the name of developing the finest cup of tea in the world. To apply, please send your CV to recruitment.peoplelinkuk@unilever.com quoting reference 108016. Closing date: 17th February 2006.

In applying for the above position, you agree, unless you notify us when responding to this advert, that we may consider you for other vacancies we have and make your details available to other companies in the Unilever Group for the same purpose. Some Unilever companies are in countries without any data protection laws. We are committed to diversity in everything we do.

Editorial Support Manager

Nature Reviews editorial teams work with leading scientists from across the life sciences to publish high-quality reviews and perspectives. As part of our commitment to providing authors with a superior service, we are seeking to appoint an Editorial Support Manager. As the senior member of the copy-editing team, the successful candidate will help train and manage the team and be expected to have experience in editing scientific/biomedical articles to the highest degree of accuracy, consistency and accessibility.

The ideal candidate will have a degree in the life sciences and previous management experience is desirable, but not essential. A key area of responsibility is in liaising between editorial and web and print production so excellent communication skills are required, as is the ability to work with colleagues in an efficient and flexible manner.

The position will be based in Nature Publishing Group's modern London offices, and the terms and conditions are highly competitive, reflecting the importance and responsibilities of the role.

For further information about the Nature Reviews series visit [http://www.nature.com/reviews](http://www.nature.com/reviews)

Please send your CV and a cover letter (quoting reference number NPG/LON/371 including details of your current salary to Rebecca Innes, Personnel Assistant at londonrecruitment@macmillan.co.uk

HPA advises on the safe limits for pollution

Who’s most at risk?
And other big questions for big thinkers.

We're the people asking the big questions about how we can best protect the nation's health and well-being; and there's no other agency better placed to answer them. An independent body, our remit covers the entire spectrum of health protection issues, from chemical, poisonous and radioactive hazards to potential threats such as bio-terrorism or new strains of infectious disease.

**Environmental Health Surveillance Scientist**
Up to £27,808 pa - Birmingham
You will be involved in the surveillance of environmental insult, related diseases and research the effects of environmental pollution. You will also assist the development of an Environmental Public Health Tracking System and the acute chronic chemical incident surveillance system.

In return you'll enjoy excellent benefits, including NHS pension scheme, training opportunities, NHS discounts, family friendly policies and childcare vouchers.

To apply for this vacancy please visit [www.jobs.nhs.uk](http://www.jobs.nhs.uk) and follow the log in details. For a hard copy of the application pack please call 01235 822822 quoting 48/05.

Closing date: 17th February 2006.

This post is subject to a terms and condition review (Agenda for Change).

The HPA promotes diversity in the workplace and is an equal opportunities employer.

Health Protection Agency

Scientist
based at Addlestone, Surrey

We are seeking an enthusiastic scientist with good communication skills to work on detailed sequencing testing within the laboratory acting as the central sequencing service provider for the VLA. You will be working within a team on short-term projects to establish new techniques and advise management team of development of existing techniques, test portfolio and establish wider outside contacts in the sequencing sphere of activity. You will bring your scientific knowledge and sequencing laboratory experience to add depth to a developing sequencing facility. The successful applicant should have a relevant science degree and a PhD or relevant research/ laboratory experience. Hands-on sequencing experience in a range of applications is required. Experience with automated sequencing techniques from a university, research, public health or industry sequencing laboratory would be an advantage.

The post is full-time, (however part-time applicants will be considered) in Pay Band D £22,300 - £32,100 per annum. Benefits include 30 days annual leave, an on-site nursery, flexible working, annual pay reviews and an optional partnership pension account.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs.

Veterinary Laboratories Agency

The VLA provides a specialist veterinary resource to the Government and commercial customers and has an international reputation for scientific excellence.

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (JAJ), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP 3599.

The closing date for receiving completed application forms is 17th February 2006.

Mars
Clinical Packaging Supervisor
Merck Sharp & Dohme Limited, the UK subsidiary of Merck and Co., Inc., Whitehouse Station, NJ, USA is one of the world's leading pharmaceutical companies with more than 50,000 employees worldwide. Merck discovers, manufactures and markets a broad range of products to improve human health.

Our clinical supplies department, based in brand new facilities at our head office in Hoddesdon, Herts, has an impressive track record of achievement in supplying international clinical studies.

Working with a dynamic team that has built an excellent reputation for supplying clinical trials globally, you will be responsible for the entire clinical supplies packaging process. Working closely with Quality Assurance, Clinical Supplies Programme Managers, Despatch and Supply Planning, this vital role pulls together the documentation required to complete an order and ensures that the process is conducted to rigorous GMP/GCP standards and in accordance with various international requirements. Supervising a small team of Packaging Technicians, you will create and issue packaging instructions then oversee their execution.

Educated to degree level (2:1 or above) in a life science discipline, you will have an understanding of GMP/GCP requirements, excellent communication and organisational skills, a sharp eye for detail and computer literacy. Experience gained in a similar working environment would be an advantage.

We offer a first-rate benefits package, a stimulating environment and rewarding projects. This opportunity offers the chance to further your career within the clinical supplies arena, playing an important part in supporting our reputation as a world leading pharmaceutical and healthcare company.

Part-time working or job share may be considered for this position.

Please write enclosing a full CV and covering letter, quoting reference CPS06/A to: Human Resources Department - Devlab, Merck Sharp & Dohme Ltd, Hertford Road, Hoddesdon, Herts EN11 9BU or by email to: devlabrecruit@merck.com

HERON evidence development

You pride yourself in your analytical rigour. Do you want to use it to influence health policy change?

Heron Evidence Development Ltd is a leading independent health economics and reimbursement company with a global client base and offices in the UK. We are recruiting throughout 2006. We seek six people, in four positions to join our dynamic, rapidly growing company:

**Health Outcomes Analyst** (HOA): Permanent, to £28K. You will be responsible for analysis and interpretation of health outcomes data, and the production of systematic literature reviews and pharmaceutical reimbursement dossiers.

**Health Economics Modeller** (HEM): Permanent, to £50K. You will apply your economic modelling expertise in the development of complex models using the latest software.

**Health Economist** (HE): Permanent, to £50K. You will apply your HEOR knowledge to design and manage health economic projects.

**Database Programmer** (DP): Minimum of six-month contract, to £25K. Your role will include the enhancement of an existing analytical Access database and assistance in HE modelling.

A relevant first degree is required, although a PhD is desirable for the HE roles. Ideally, this should be complemented by relevant agency, industry or academic experience.

To find out more about the roles, please contact Deborah Beale on +44 (0) 1462 476543. Alternatively, to apply please send your CV to vacancies@herongroup.co.uk stating which role you are applying for.

www.herongroup.co.uk

POST DOCTORAL RESEARCH SCIENTIST
Ref 03/01/06

As part of a Genesis Faraday initiative jointly funded by SEERAD, BBSRC and Pfizer Plc. a research immunologist is required to study toll-like receptors (TLR) in sheep and cattle, with a particular interest in those expressed on genuine dendritic cells (DC) obtained \textit{ex vivo}. The purpose is to define DC heterogeneity with respect to TLR expression and exploit this for rational vaccine design for ruminants.

You must have a PhD in a relevant biological science and some experience in molecular biology and cell biology.

Salary: £22,351 -£25,767 (pay award pending) plus excellent employee benefits.

For application details and further particulars, please visit: \url{www.moredun.org.uk} or telephone +44 (0)131 445 5111.

Closing date: 10 February 2006.

INVESTOR IN PEOPLE
Moredun
[2537-019 (2006) : 64]
Clinical Project Manager

Pfizer is one of the world's leading pharmaceutical companies. We're also the largest global player in the Animal Health market. We're constantly discovering new therapies to treat animal diseases, and with cutting-edge science, state-of-the-art technology and world-class individuals, we're dedicated to maintaining our position. Which makes our European R&D headquarters at Sandwich a truly first-class environment in which to work.

In this role you will be leading the European clinical area of a global programme for assigned development candidates. You'll have full technical and operational responsibility for designing, executing and reporting clinical programmes. As well as writing and approving protocols, you will prepare the clinical sections of regulatory dossiers, prepare trial budgets, and provide definitive scientific interpretation of study data, including writing and approval of study reports. In addition, you may also support the commercial division, helping with technical transfer and scientific promotion activities related to candidate commercialisation. It's a world-class environment - one that will challenge, stimulate and develop you in equal measure.

You must have a veterinary or life sciences degree and significant animal vaccine trial experience, preferably companion animal, and ideally within the pharmaceutical industry. Some postgraduate study would also be an advantage. Knowledge of GLP and GCP studies will be useful, but good writing and communication skills are essential - for writing protocols, and liaising with research organisations. We're looking for someone results-driven and organised. A second language would be advantageous, as considerable European travel is involved in the role.

As well as working with some of the most innovative products available today you will also enjoy the kind of outstanding benefits you'd expect from an exceptional organisation.

To find out more or to apply, visit [www.pfizer.co.uk](http://www.pfizer.co.uk) quoting requisition number 046382.

THE QUEEN’S AWARDS FOR ENTERPRISE 2000
2001 -2002 AWARDED TO PFIZER LIMITED
SIGMA-ALDRICH

Sigma-Aldrich is a world leader in the manufacture and distribution of research chemicals and biochemicals. The corporation is also rapidly developing a presence in fine chemical custom development and manufacturing to Pharmaceutical customers.

SYNTHETIC ORGANIC CHEMIST
Poole, Dorset

Sigma-Aldrich is a dynamic multi-national Company offering top quality products to the Life Science and High Technology markets.

This is an exciting opportunity for a synthetic organic chemist with a desire to join a lively multi-disciplinary team. The role comes with many different challenges to stimulate and inspire you.

In this broad role, you will take lead responsibility of developing new and existing products using your technical organic skills ultimately increasing our global profile. Applying your expertise, you will be engaged in influencing early stage projects in all matters of design and development. You will also play a key role in mentoring and advising other chemists thus strengthening the knowledge of our laboratory teams. This is your chance to join us.

You will have a PhD in Organic Chemistry with a well developed broad technical knowledge. While Industrial experience is not essential, practical experience in purification and analytical techniques is. It is essential to possess a proven track record of independent research. Just as important will be the confidence and communication skills to operate in a multi-disciplinary team environment, and knowledge that includes mechanistic organic chemistry and problem solving.

You will relish the opportunity of living on the stunning south coast of Dorset. In addition to a salary commensurate with your skills and experience, our offer to the successful candidate will include relocation assistance if required.

If this role appeals to you and you have the determination to succeed within Sigma-Aldrich, please send your current CV and a covering letter to Human Resources Department at Sigma-Aldrich Company Ltd, The Old Brickyard, New Road, Gillingham, Dorset SP8 4XT or email GBRHumanres@europe.sial.com

ASSOCIATE DIRECTOR OF RESEARCH & INFORMATION
Agenda for Change Band 8a (£34,372 - £41,246)

The West Midlands Cancer Intelligence Unit (WMCIU) collects, records, analyses and interprets data on cancer diagnosis, treatment and mortality which provide vital information for health care planning, epidemiological studies and research.

Applications are invited for the position of Associate Director of Research & Information. The post is responsible for managing the WMCIU's intelligence function, ensuring the provision of a high quality cancer information service to clinicians, managers and others in the West Midlands, and for developing and expanding the WMCIU's research profile at local, national and international level.

For further information, or an informal discussion please contact Dr Gill Lawrence, WMCIU Director on 0121 415 5129. An application pack is available from the H.R. Dept., Birmingham Women's Hospital, Edgbaston, Birmingham B15 2TG, tel: 0121 607 4774 (24 hrs) or email recruitment@bwhct.nhs.uk quoting ref: 06/CI/01. Closing date for completed applications 24th February 2006: interview date 17th March 2006.

This post is subject to the Rehabilitation of Offenders Act (Exceptions Order) 1975 and as such it will be necessary for a submission for Disclosure to be made to the Criminal Records Bureau to check for any previous criminal convictions. We are committed to Equal Opportunities in Employment and actively discourage smoking at work.

POSITIVE ABOUT DISABLED PEOPLE
The Veterinary Medicines Directorate (VMD) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra) and is responsible for ensuring the safety, quality and efficacy of veterinary medicines in the UK within the statutory framework of various EC Directives and Regulations, and the Veterinary Medicines Regulations.

This Scientific Officer post is responsible for the management of data provided by Marketing Authorisation Holders (MAH) at intervals specified in legislation. The data consist of details of adverse reactions reported to the MAH during the period under review, and the postholder will maintain the associated section of an in house database in which the information is recorded. The postholder will retrieve product-related information from the database for analysis, and will provide reports in different formats depending on the recipient. This will include the publication of data on the VMD website. In addition, the postholder will monitor the progress of product and batch recalls, under the direction of the Senior Research Officer (SRO).

Essential Qualifications and experience
A degree or other equivalent qualification in a relevant scientific discipline such as pharmacology, veterinary science, epidemiology or clinical data management.
An understanding of the animal health industry would be an advantage.

IT skills
Competence with Access, Visual Basics, Excel, Word and e-mail is essential. Experience of electronic document management systems, Crystal Reports and statistical packages is desirable.

For application packs please write to Mrs Jo Gough, Human Resources and Training, Veterinary Medicines Directorate, Woodham Lane, New Haw, Addlestone, Surrey KT15 3LS E-mail: j.gough@vmd.defra.gsi.gov.uk

Please ensure you quote the appropriate reference number PEL0313.

The closing date for receipt of completed applications is 17 February
Interviews will be held on 8 March at the VMD.

Please note that CV's will not be accepted as applications.
Further information on the position, and the VMD, is included in the application pack.

The Veterinary Medicines Directorate is an Equal Opportunity employer.

Your technology partner
A CSIR company

Materials Technology and Healthcare Technology

Quo-Tec is a small technology consultancy, based in Amersham, Bucks. We work with our clients to develop and exploit technology through:
- In-depth analysis of challenges and opportunities;
- Identification and evaluation of relevant technologies and expertise; and
- The development of practical solutions to real problems.

Technology strategy assignments are a mix of short-term technology/market evaluation projects and longer term technology programme management. In all cases, we aim to develop strategic partnerships with our clients in industry and the public sector in the UK and abroad. Our success is based on team effort in a culture that rewards enthusiasm and ability to meet challenges. Our company is growing and it needs intellectually strong individuals who can drive their own development according to their skills, aptitude and experience.

Two particular vacancies are available now:

**Assistant Projects Leader/Projects Leader** in Materials Technology
You will have a degree in materials science/engineering with several years industrial experience, or technical experience in an industrially focused R&D/technology transfer environment.

You will have a demonstrable enthusiasm and commitment to working with industry in pursuit of innovation and spreading best practice in the use of technology and exploitation of scientific knowledge. Working with and for diverse partners/collaborative organisations you will be able to prioritise and manage several different activities in parallel.

**Assistant Projects Leader/Projects Leader** - Healthcare Technologies
You will be a versatile, pro-active, commercially aware PhD or exceptional graduate with a strong grounding in health or biological related science or engineering. A broad interest in technology, with the confidence and ability to manage complex stakeholder relationships is desirable.

You will have excellent written and oral communication skills with organisational skills relevant to the management of a multidisciplinary science and engineering R&D programme involving NHS units, universities, industry and charities.

Both posts require good IT, communication and inter-personal skills, as well as a relevant technical background/experience. Post-holders need to be able to deliver high-quality project work from remote locations, client premises (with occasional foreign travel), and Quo-Tec offices with minimal supervision. A proven record of delivery of completed technical projects to the brief, on budget and on time is essential.

Salaries are £20-30k for Assistant Projects Leaders, £30k+ for Projects Leaders, depending on experience.

To apply see [www.quotec.co.uk](http://www.quotec.co.uk)  
Closing date: 28\textsuperscript{th} February 2006
What can you achieve through direct action?

Greenpeace's non-violent 'actions' against those responsible for environmental crimes make headlines across the world. Greenpeace International needs an **Action Logistics Co-ordinator**. This is a once-in-a-career opportunity to be at the forefront of their planning and execution. We are seeking an experienced campaigner and people manager versed in land, sea and air operations. Someone who can back innovative ideas with sound investigative research and mature judgement to plan and co-ordinate direct action campaigns globally. You'll be based in Amsterdam and travel extensively. Fluency in English is essential and you should be used to working in a dynamic, multi-cultural campaigning environment.

Thames Water Utilities is the UK's largest water and wastewater services company with over 4,000 employees providing service round the clock to 13 million customers.

Make a difference - source to tap.

**Key Field and Regulatory Scientists**  
Reading  
c.£23,000 p.a.

**Regulatory Scientist**  
In this high-profile role as part of the Regulatory Response team, you'll keep an eye on events that affect our customers' drinking water supply, notifying the Drinking Water Inspectorate (DWI) of any important changes. As a key representative to the DWI, you'll prepare and issue written reports, assist in the running of 'wash up' meetings following an event, and ensure that any DWI recommendations are put into practice. You'll also have the opportunity to be involved in ongoing project work within the wider Water Quality team. Ref: 4109

**Field Scientist**  
Responsible for monitoring the quality of water source to tap, you'll carry out thorough site surveys, reports and high-risk database maintenance as you investigate company water quality infringements and produce verbal and written reports on your findings. You'll build internal and external professional relationships as you provide technical support and advice to asset owners for purposes of capital expenditure schemes, optimisation, normal operation and troubleshooting. Ref: 3069

In both roles, you'll be an enthusiastic, motivated, degree-calibre professional, with at least one year's relevant experience, preferably scientific or operational. A good understanding of water quality issues and the regulatory framework would be ideal, and your confidence in problem-solving, influencing and relationship-building will be what sets you apart. A full current driving licence is also essential.

To apply, please send your CV, quoting the appropriate reference number to HR Service Centre, Thames Water Recruitment Team, Clearwater Court Ground West, Vastern Road, Reading RG1 8DB or email sharedserviceshr@thameswater.co.uk

Informatics Laboratory • £21,500 - £30,000 • Hertfordshire

The National Institute for Biological Standards and Control is a multidisciplinary scientific Institute concerned with the control and standardisation of biological substances used in medicine.

The Institute is looking for a candidate with strong data networking skills and good all round computing abilities. Minimum qualifications are a good honours degree in computer science, science or related discipline and experience of TCP/IP networking. A background in bioinformatics and/or experience of working in a scientific organisation would be highly advantageous. Experience of desktop support and some knowledge of Windows Server 2003/UNIX systems is also desirable.

For a full job description please see our website www.nibsc.ac.uk.

Salary will be dependent on experience between £21,500 and £30,000 per annum.

To apply, please submit a full CV (2 copies), including the names and addresses of two referees to the HR Dept, NIBSC, Blanche Lane, South Mimms, Potters Bar, Hertfordshire, EN6 3QG or e-mail HR@nibsc.ac.uk.

Closing date for applications is 17th February 2006.

Please quote reference number IT.185(NS) on all correspondence.
SCIENTIFIC OFFICER – ADVANCED COURSES
12-month contract
Wellcome Trust Genome Campus, Hinxton, Cambridge

The Wellcome Trust is one of the world's largest biomedical research-funding charities, and its mission is to foster and promote research with the aim of improving human and animal health.

The Advanced Courses programme is well-established and highly regarded, attracting post-docs and late stage PhD students from around the world. The courses aim to teach advanced laboratory techniques in leading-edge areas, principally genomics-related.

We are looking for a Scientific Officer to work closely with the Advanced Courses Manager on the general management of the programme by providing both full administrative support and some practical technical support for the courses. As well as the day-to-day administrative tasks, you will also assist in identifying new courses, contribute to the development of the strategy for the Advanced Courses Programme and promote the programme within the scientific community.

You will possess a PhD in genetics, genomics or other related area with at least three years' relevant research experience, although candidates with an MSC and at least five years' research experience will also be considered. A background in scientific administration would be highly desirable, as would some understanding of the wider issues of biomedical research funding and policy. In addition to good written and verbal communication skills, you will be able to demonstrate the ability to generate ideas and develop opportunities. Computer skills are essential. A good team worker, you must be able to work flexible hours and occasional overseas travel may be involved.

This post is offered initially on a 12-month contract and the salary will be in the region of £26,000 depending on experience.

To apply, please send a full CV and a covering letter explaining how you feel you meet the criteria above, to the HR Department, The Wellcome Trust, 215 Euston Road, London NW1 2BE or to hr@wellcome.ac.uk by Friday 17 February 2006.

THE WELLCOME TRUST IS COMMITTED TO BEING AN EQUAL OPPORTUNITIES EMPLOYER.
THE WELLCOME TRUST IS A REGISTERED CHARITY, NO. 210183
[2537-036 (2006) : 70]
The Physiological Society

**Chief Executive**
Central London, Full time, 36.5 hours per week
A part-time appointment (min 3 days/week) might also be considered. Salary negotiable, not less than £60,000

The Physiological Society is seeking a Chief Executive who will, together with the academic officers of the Society, develop the Society's strategy to achieve its aims, provide leadership to the staff and who will be responsible for the overall operation of the Society, including its fiscal, legal and ethical probity. Applicants will have professional qualifications in life sciences, preferable Physiology. They must demonstrate a clear understanding of, and commitment to, the furthering of the discipline of Physiology. A proven track record of successful management and leadership is desirable.

The Physiological Society is a learned Society and a registered charity founded in 1876 to promote scientific research and the teaching and study of physiology. We have a staff of 19, in London and Cambridge, and an annual turnover of £2.5 million. The Society publishes The journal of Physiology and Experimental Physiology, with income from its publications supporting its charitable objectives (organising scientific meetings/conferences, supporting young physiologists, awarding grants and education of the public).

We offer 27 days annual leave, an 8% non-contributory pension scheme, life and travel insurance, childcare allowance and an interest-free season ticket loan.

For a full job description and person specification, please visit the Society's website at [www.physoc.org/jobs](http://www.physoc.org/jobs).

For an informal discussion regarding the post, please contact Prof Alan North, President of the Society, on 0161 275 1497. To apply, please send a covering letter, demonstrating your suitability for the post, contact information for three referees and your CV to:

Prof Alan North FRS, REF: Chief Executive post, University of Manchester, Faculty of Life Sciences, Michael Smith Building, Oxford Road, Manchester M13 9PT

The closing date for receipt of applications is Friday, 24 February at 5pm.

[2537-037 (2006) : 70]
The CSIR is South Africa's largest research and technology organization. It has a strong track record in directed and multi-disciplinary research focused on improving the quality of life of the people of South Africa. For more information, visit www.csir.co.za.

As part of a plan to strengthen its science base and to support new research fields, the CSIR will be establishing a number of Emerging Research Areas (ERAs) over the next three years. Applications are now invited for group leaders of the Nanoscience ERA and the Photonics ERA. These posts are opportunities for dynamic, result-oriented and well-qualified individuals with a minimum qualification of a PhD in a relevant scientific area and at least two years experience as leader of a research group (consisting of two to five researchers plus technical support staff).

**Group Leader Position (Nanoscience)**
Relevant scientific areas include physics, materials science or chemistry. The applicant must have at least five years post-doctoral experience in areas such as nanocomposites, bionanotechnology or nanostructured materials.

**Group Leader Position (Photonics)**
Relevant scientific areas include laser physics, materials science, engineering or electronics. The applicant must have at least five years post-doctoral experience in areas such as solid state light sources, fibre optic sensors, electro-optic materials or laser design (especially femto-second lasers).

**General**
A proven performance record in the form of peer-reviewed publications, integration with the international research community and demonstrated abilities to conduct research independently in multi-disciplined diverse team will be essential. A good understanding of the potential application of the research outputs to the development of the South African economy will be an advantage. The initial appointments will be for five years and the posts will be based on the CSIR campus in Pretoria.

**Contact Details and Closing Date**
Applicants are kindly requested to submit a letter of motivation, stating clearly the position for which you are applying, and a comprehensive CV to Nicole Humpel at nhumpel@csir.co.za. Attached files in pdf format are preferred and no posted or faxed applications will be accepted. The closing date for applications is 31st March 2006.

where the land ends

Environment Agency

The flood defence challenges begin.

**Coastal Processes Engineer** – Flood Risk Management
Peterborough Up to £29,000 + excellent benefits

Across England and Wales there are five million people at risk from flooding. We’re investing over £400 million on vital projects to protect communities and businesses from this major threat. Robust shoreline management policies and practices are essential: especially in the Anglian region. We’re now looking for a technical specialist to join the Regional flood Risk Management Team and have a key input into overall strategy and specific schemes covering our coast and estuaries.

You’ll provide specialist technical advice on coastal processes, geomorphology and wider ranging management issues, liaising with diverse stakeholders to promote sustainable shoreline solutions. It’s a highly visible role that will broaden your existing knowledge of coastal flood risk management and provide scope to make a real and significant impact for future generations. Ideally MSc qualified, you’ll need good communication and influencing skills, GIS literacy and preferably some experience of estuary and coastal modelling.

In return you can also look forward to an attractive package including a final salary pension scheme, flexible working and generous holidays.

To find out more or to apply, call us on 01925 542370 or visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs)

We are committed to making our organisation as diverse as the environment.

[2537-039 (2006) : 71]
Eurofins Laboratories Limited is a dynamic and fast-growing analytical services company supplying clients in both the public and private sector. As a result of continued expansion, we are looking to recruit a number of highly motivated people to add value to our newly created Public Analysts team at our Wolverhampton site.

**Public Analyst Laboratory - Manager**
This role is for an analytical chemist with a minimum of five years' postgraduate experience of food and agricultural analysis. The successful applicant will be responsible for supervising the PA team in line with our accredited methods and quality system. Full or part M.Chem. A qualification would be preferred, but equivalent industry experience will be considered.

You will have a track record for successful team management, planning for and delivery of deadlines, sound professional knowledge and excellent all-round communication skills.

**Public Analyst Laboratory - Senior Scientist**
This role is for an analytical chemist with a minimum of three years' post graduate experience of food and, where possible, agricultural analysis using a variety of techniques. You will report to the Team Leader and conduct analysis in line with our accredited methods and quality system.

You should be able to demonstrate an aptitude for team working, achieving targets, attention to detail, good verbal and written communication skills and customer focus.

Competitive remuneration packages based on experience will be offered.

Please apply in writing enclosing a current CV to: Anne Thorne, HR Director, Eurofins Limited, Woodthorne Road, Tettenhall, Wolverhampton WV6 8TQ or E-mail: annethorne @eurofins.co.uk

CLOSING DATE: 17th February 2006

In working to achieve Equal Opportunities, we welcome applications from all groups of society.

[2537-041 (2006): 71]
GREENPEACE
RESEARCH SCIENTIST £26,612 pa
Greenpeace Research Laboratories, University of Exeter

Funded by Greenpeace International, our laboratories are staffed by an enthusiastic team comprising a principal scientist, four other scientists and a research administrator. The team conducts environmental sampling and analyses and provides scientific advice across a range of expertise encompassing toxicology, organic and inorganic chemistry, biochemistry and marine ecology. You will have the opportunity to work on a wide range of projects appropriate to your skills, with an emphasis on marine and terrestrial ecology, from planning and carrying out fieldwork - often outside the UK - to communicating the results.

WHAT WE ARE LOOKING FOR
• A versatile, flexible and enthusiastic scientist capable of working successfully with Greenpeace offices around the world
• The ability to conduct scientific work and produce reports of a high standard
• A commitment to pursue science in support of our campaigns for environmental change
• The capacity to multi-task, contribute to teamwork and deliver to deadline

HOW TO APPLY
For a job pack please write (postcards only please, no CVs or phone calls) to: HR Department, Greenpeace, Canonbury Villas, London N1 2PN.
Or e-mail your name and address to: recruitment@uk.greenpeace.org
Job packs can also be downloaded from our website.

CLOSING DATE: 16 FEBRUARY 2006 INTERVIEWS: 2 MARCH 2006

Greenpeace promotes equal opportunities and welcomes applications from all sections of the community. We select people purely on their skills and abilities.
Visit our website www.greenpeace.org.uk

Greenpeace stands for positive change through action: the independence and global reach to defend nature and promote peace.

We'll value your achievements. And reward your success.

**Contract and Resource Manager**
£Competitive + Benefits  Welwyn Garden City, Herts

At Roche, we believe passionately in what we do, and that our success changes lives. Driven by innovation, our people have created a uniquely supportive and rewarding culture: an environment where feeling valued, respected and empowered is a daily experience. Bring us your talents, and we’ll bring you a real commitment to your development - plus outstanding opportunities for career progression.

This key role, within Roche's Drug Safety team will see you develop a process and strategy to maximise the effective use of contract personnel and CRO resources in the context of the department's overall incoming workload and resources. As well as establishing a team to optimise CRO workflow, your wide-ranging brief will include ongoing evaluation of performance of vendors with respect to quality of work, productivity and communication. Your goal will be to ensure that our use of CROs is as cost and time-efficient as possible, and that they are in compliance with SOPs and regulatory timelines.

A proven team leader with a commercially-focused approach, you will bring at least five years' experience in the pharmaceutical or CRO industries in a Drug Safety/ Pharmacovigilance role. Strong project management, communication and negotiation skills are all essential, combined with a thorough understanding of contract management. You must also be able to travel both domestically and internationally on occasion.

With continued growth, Roche is looking for ambitious people to join its teams in a wide range of areas. If you have the vision and energy to be part of our future, register in the Roche Talent Pool now. Just visit [http://careers.roche.com/uk](http://careers.roche.com/uk)

We Innovate Healthcare and inspire your career in contract management

Headquartered in Basel, Switzerland, Roche is one of the world's leading research-focused healthcare groups in the fields of pharmaceuticals and diagnostics. As a supplier of innovative products and services for the early detection, prevention, diagnostics and treatment of disease, the Group contributes on a broad range of fronts to improving people’s health and quality of life. Roche is a world leader in diagnostics, the leading supplier of medicines for cancer and transplantation and a market leader in virology.

[2537-046 (2006) : 73]
The Commission of the European Communities has approved a network for the study of inorganic cementitious substances. Portland cement concretes are supreme in construction because of their flexibility, yet their very success creates pressing technical and environmental problems and need for improved functionality requiring new approaches. Accordingly, applications are invited for 10 Fellowships leading to award of a PhD. These will commence in September 2006. The Fellowships will be shared between leading European institutions. Applicants must be of high intellectual calibre, ambitious, willing to work in an interdisciplinary and transnational environment and to experience academic as well as industrial approaches. Intensive specialist training will be given in a formal setting by leading experts.

A detailed list of projects, with titles, brief abstracts and expected prequalifications, as well as locations of the participant institutes, and application forms, is given at http://www.nanocem.org. Intending applicants are invited to consult this, perhaps seeking further details and to express preferences. Application must be on-line.

General conditions of the Marie Curie scheme, including equality of opportunity and stipends, are at: http://europa.eu.int/comm/research/fp6/mariecurie-actions/action/training_en.html. Applicants may be interviewed in early March and mid-April 2006: cut off dates for these rounds are March 01, and April 01, 2006. A further round may be announced.

The project will also support several postdoctoral positions with various commencement dates between 2006 and 2008.

Details can be obtained from vagnjohansen@tele2.ch
Syngenta is the leader in crop protection and the third largest seeds business worldwide, with sales in 2004 of around US$7.3 billion. We are a young company for the 21st century, yet we have years of innovation behind us. This is your chance to join a team of more than 20,000 people in over 90 countries, all of whom are committed to helping farmers feed the world today and tomorrow. Come and help us grow.

**Technical Specialist Study Director**  
£32k - £36k & benefits - Alderley Park, Cheshire

Based at our internationally renowned Central Toxicology Laboratory, you'll lead a team of scientists as they conduct studies required for the registration of chemicals, pharmaceuticals and proteins. Your role will focus on designing and interpreting multidisciplinary toxicology studies to evaluate the safety of chemicals and proteins. Ensuring scientific robustness and GLP compliance will all be down to you, as will reporting findings and liaising with customers.

With a first degree in biological sciences and a higher degree, preferably a PhD, you'll have experience or an interest in respiratory biology or inhalation toxicology. Ideally, we're looking for post-grad research experience and strong communication and organisational skills.

To apply, please send your CV to: HR Central Support, Syngenta, Jealott's Hill International Research Centre, Bracknell, Berkshire RG41 6EY, quoting ref: APPREGTOX13 or email: uk.recruitment@syngenta.com  
Closing date: 16th February 2006.

Kew
PLANTS PEOPLE POSSIBILITIES

**Digital Collections Manager**
Full-time, 2 year 11 month fixed term contract
From £26,225 p.a.

You will manage digitisation projects led by the Herbarium, including management of the Digital Collections Officer; support senior management, chair the Herbarium Computer Group, and liaise with the Information Services Department in establishing Herbarium priorities and strategy and developing and documenting policies and procedures relevant to the digital collection. You will also raise funds for priority digitisation projects led by the Herbarium and develop partnerships with relevant institutions in the UK and abroad.

You should have a degree and 3-5 years' postgraduate experience working with collections and/or collections digitisation, be familiar with institutional collection data and have experience of managerial role implementing projects; digitising large collections. Ref: 797
Closing date: 23 February 2006.

**Digital Collections Officer**
Full-time, 2 year 11 month fixed term contract £18,030 p.a.

You will work together with Herbarium staff, under the direction of the Digital Collections Manager, in the curation of digital records and datasets, including manipulation and exchange of data between projects and responsibility for data quality issues. The role also includes responsibility for managing the digitisation facilities and support for digitisation projects, including training, procedural guidance and management of staff/volunteers.

You should have a degree or equivalent, curatorial skills relevant to working on herbarium or biological collections, and be familiar with digitisation equipment and software. You will also have experience of museum collections digitisation procedures and experience of supporting and training others. Ref: 798
Closing date: 9 March 2006.

For both posts, benefits include a choice of final salary or stakeholder pension, generous annual leave and an excellent work environment.

Application packs are available from our website [www.kew.org](http://www.kew.org) (click on the 'about us' icon). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184/5150 (24 hour answerphone). Please quote the appropriate Ref in all correspondence.

INVESTOR IN PEOPLE
ROYAL BOTANIC GARDENS KEW
WORLD HERITAGE SITE
[2537-050 (2006) : 74]
World leading careers with a world leading company

gsk
GlaxoSmithKline

As one of the World's top pharmaceutical companies, GSK employs over 100,000 people in 116 countries. The Barnard Castle site is a key secondary manufacturing site with a diverse portfolio of sterile, liquid and antibiotic products. Due to the volume of New Products and Technologies coming to the site and a significant investment programme, we have several exciting opportunities for highly motivated Scientists to join our progressive team.

**New Product Introduction Scientists**

In these key roles, you will be part of a multi-disciplined team working on a number of diverse projects from technical transfer of products from R&D through to process optimisation for existing products. Using your technical skills coupled with a flare for innovation, you will be encouraged to develop your level and breadth of technical expertise.

We are looking for candidates with a range of experience who could fill a variety of positions from experienced scientists to recent graduates. You will demonstrate natural leadership skills, an ability to communicate effectively at all levels and a passion for your work.

Working in a secondary manufacturing environment, you will be part of a unique team specifically recruited to drive new product introduction and process improvement. You will take responsibility for a range of duties covering all aspects of manufacturing based technologies, including validation, troubleshooting and dose formulation.

You will have graduated in a Science based discipline and have the ability to resolve technical issues and drive process improvements. You will be a highly talented individual with drive, flair and an ambition to develop into tomorrow's managers.

GSK is dedicated to workplace innovation and will support you with career-long opportunities and learning.

In addition to an excellent base salary, we offer a highly competitive Total Reward Package including an attractive non-contributory pension, 26 days' holiday on starting, rising with service, free private medical insurance, annual bonus and discounted share purchase schemes.

If these positions sound of interest to you, then please email your CV to gskns@srg.co.uk or call Probier Chatterjee on 0191 284 6768 for a confidential discussion.

Closing date: 26 February 2006.

**POSITIVE ABOUT DISABLED PEOPLE**

GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is an equal opportunity employer.

SUCCINCT MEDICAL COMMUNICATIONS

Medical Writer
(40+k depending on experience)

We are an exciting, vibrant Medical Education company with a rapidly growing reputation for excellence in all aspects of medical communications, particularly in the fields of oncology and other specialist disciplines.

We provide a wide range of marketing, consultancy and communications services to the pharmaceutical industry and our clients expect us to provide a range of creative and analytical writing skills - from advisory board minutes to primary clinical papers and a host of other medical education initiatives. Ideally you will have oncology writing experience possibly gained from a postdoctoral research background. Previous experience of working within an agency and so understanding what is required to meet the demands of clients would be an advantage, but is not essential.

Succinct Communications is a company that believes in providing a stimulating, professional and fun environment in which people can prosper. We offer you a career move that will give you every opportunity to grow with your company and receive the satisfaction and rewards that brings.

Please send your CV and covering letter to the Managing Director, Succinct Communications Ltd, Burton House, Repton Place, White Lion Road, Amersham HP7 9LP
Email to sean@succinetcomms.com
[2537-052 (2006) : 75]
Based at the FRS Marine Laboratory in Aberdeen, you will join the Fisheries Management Programme, providing scientific advice on the status of fish and shellfish stocks important to Scotland. You will prepare data, develop stock assessment methods and participate in international stock assessment expert groups. You will also conduct analyses on mixed fisheries; investigate patterns of exploitation and the relationship between fleet capacity, fishing effort and fishing mortality; evaluate alternative management and harvesting strategies; and contribute to the development of an ecosystem approach to fisheries management. You will be required to travel within Europe to attend working groups and other international meetings. You may also be required to participate in research vessel cruises and FRS’ fish market sampling programme.

You should possess a graduate level qualification or equivalent in a mathematical, statistical, or biological science (the latter would require evidence of a strong numeric ability) combined with at least three years’ relevant research experience. This should be in the areas of population dynamics or mathematical modelling. You should also have some experience of statistical modelling and knowledge of a high-level programming language (a working knowledge of Fortran 90, S-Plus or R would be desirable). You will be highly motivated and clear about your objectives, and be capable of planning and prioritising work to meet important deadlines. You should be able to critically appraise data, to ensure its validity and accuracy, and be skilled in data handling, storage, manipulation and retrieval. You will build and maintain good working relationships, be willing to share knowledge, and to value the contributions others make.

The starting salary for these permanent posts is £21,292 per annum (pay award pending). Salary is performance related, offering progression to a maximum of £26,278 and bonuses to high achievers. The Civil Service offers a choice of final salary and stakeholder pension, giving you the flexibility to choose the pension that suits you best.

For further details and an application form contact: Human Resources on 01224 295689 or by emailing HR@marlab.ac.uk

The closing date for all applications is 17 February 2006. Fisheries Research Services is an Agency of the Scottish Executive. We welcome applications from all suitably qualified individuals and aim to employ a diverse workforce which reflects the people of Scotland.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
[2537-053 (2006) : 75]
wellcome trust

BUSINESS ANALYST

The Wellcome Trust is one of the world’s largest biomedical research-funding charities and its mission is to foster and promote research with the aim of improving human and animal health.

The Technology Transfer Division aims to maximise the impact of this research on health by facilitating the development of innovations to the point at which they can be developed further by the market. To do this, the Division administers a fund for early stage translation projects and operates in partnership with scientists, their research institutions and small companies. Recent successes from funded projects include the launch of three products and the generation in aggregate of over £40M in third party support.

As a result of growth in translation activity the Trust is seeking to appoint a Business Analyst, who will work as part of a team and report to the Head of Business Development. As a Business Analyst, you will assist in promoting the Division and its translation activities and be responsible for undertaking due diligence of Translation Award applications and evaluation of their anticipated commercial exits. You will use databases, business and scientific media and liaise with a network of internal and external scientific experts to support your own analyses. You will also contribute to the management of certain funded projects, manage intellectual property and negotiate funding transactions.

Candidates should have a strong scientific background and ideally possess industry experience or alternatively experience with the process of evaluating and funding science projects. You should possess a PhD relevant to the biomedical sciences with at least two years’ postdoctoral research experience. You should have good interpersonal and communication skills and be capable of working independently or as part of a team. You should be able to engage in critical scientific and commercial analyses of applied research projects across a range of life science disciplines, possess a creative approach to problem solving and enthusiasm for delivering healthcare outcomes.

To apply, please send a full CV, along with a covering letter, outlining your current salary package and indicating how you meet the above criteria to Human Resources, Wellcome Trust, 215 Euston Road, London NW1 2BE or to hr@wellcome.ac.uk by 24 February 2006.

Institute for Animal Health
The future of animal health is in our hands. And yours.

Postdoctoral Research Scientists
£22,351 to £25,767 + Benefits
Campylobacter colonisation of poultry
Ref: 05/0743 • Two year fixed term contract

This post is to run jointly with a project at the London School of Hygiene and Tropical Medicine, and will investigate the role of predicted host specific sequences in colonisation and persistence of Campylobacter jejuni in poultry.

Efficacy of heterologous expression vaccines
Ref: 05/0744 • Three year fixed term contract

The post-holder will work jointly with the School of Veterinary Sciences Cambridge to investigate the immunology of Salmonella based heterologous vaccines in poultry. They will investigate the in vivo immune response of poultry to specific vaccines.

Role of macrophages in bovine tuberculosis
Ref: 05/0752 • Three year fixed term contract

This post will join a team investigating the immune response and pathogenesis of bovine tuberculosis. This project aims to investigate the macrophage activation program and modulation of the immune response after mycobacterial infection.

For the above posts, you will have an appropriate degree and relevant PhD, ideally backed by molecular-microbiology skills and a familiarity with in vivo techniques. For post 05/0752, familiarity with Bioinformatics would be a major asset.

Research Assistant
£17,613 to £19,939 + Benefits
Bovine toll-like receptors
Ref: 05/0753 • Three year fixed term contract

This post will join a team investigating the immune response of cattle. The project will consider the roles of toll-like receptors in the responses of bovine antigen presenting cells.

For the above post, you will have an appropriate degree, ideally backed by experience with a range of molecular biology techniques.

Closing date for all posts: 16th February 2006.

Please write, enclosing full personal and career details to: Human Resources, Institute for Animal Health, Compton, Newbury, Berks RG20 7NN (tel: 01635 577203; e-mail iah.vacancies@bbsrc.ac.uk) quoting the appropriate reference number. The IAH is an equal opportunities employer. Please see www.iah.bbsrc.ac.uk for further details.

Reporting to the Senior Editor, you will liaise with international opinion leaders and be involved in the editorial process from content acquisition through to publication, both in print and online formats. The role requires a good eye for detail and a team-oriented approach to work.

Please send or e-mail your CV and a covering letter describing your reasons for applying to: Elisa Manzotti, Editorial Director, Future Medicine Ltd, Unitec House, 2 Albert Place, Finchley Central, London N3 1QB. e.manzotti@futuremedicine.com

[2537-056 (2006) : 76]
CC
Campden & Chorleywood Food Research Association Group

Be our key ingredient

CCFRA is a major independent research organisation. It is supported by approximately 1700 companies who are directly involved with the food and drink industry. Due to continued success and expansion we are currently looking to fill a number of vacancies throughout our business.

Baking & Cereal Processing Department

Baking Science & Technology Manager
An opportunity has arisen for a Baking Science & Technology Manager, to lead a team of practical bakers, scientists and technologists.

This is a high profile position involving regular contact with CCFRA members and other personnel in the Baking industry.

Key responsibilities will be to manage the setting up, execution and reporting of research and contract projects conducted by the Baking Technology team, which covers cereal-based ingredients and products including bread, biscuits, cakes, pastries and other products. This includes ensuring the maintenance of high standards of scientific content and accuracy of all work, and tidiness and cleanliness in the practical areas.

The ability to review, report and present complex scientific and technical information in a clear and concise form is essential, including the ability to manage projects to agreed budgets and deadlines.

Bakery Scientist
We are seeking a full-time a Bakery Scientist whose duties will include carrying out and managing research projects as well as reporting results to our clients and also providing them with technical advice. Experience in the use of scientific instrumentation such as rheometers, spectrometers and chromatographic systems would be advantageous.

Food Manufacturing Technologies Department

Food Technologist/Engineer
There is an exciting opportunity for a highly motivated self starter to contribute to and initiate research and development activity for our industrial clients in the areas of new product development, process development and food packaging.

You should be a graduate in Food Technology, Food Science or other relevant engineering discipline with a broad interest in the technical issues that underpin food manufacturing. These opportunities are ideally suited to graduates with relevant industrial experience seeking to develop their career within the fields. Good communication and interpersonal skills are essential.

Microbiology Department

Senior Research Officer
A vacancy has become available for an enthusiastic graduate to work in the heat resistance team involved with research and contract projects. This very active group conducts experiments by contract to food companies and other funding bodies in relation to heat processes, and food safety.

The successful applicant would be responsible for the day to day running of research and contract projects, the in-depth analysis of the experiments and maintenance of documentation according to accredited standards. We are looking for an excellent team player with good client liaison skills, who is able to adapt to our ever-changing busy schedule. Such a post would appeal to someone with an enquiring mind, who is well motivated and able to solve problems.
For all vacancies we offer a range of benefits including competitive salary, pension and private medical scheme.

For an application pack, please contact the Personnel Department, CCFRA, Chipping Campden, Gloucestershire GL55 6LD by either telephone 01386 842091, or email: personnel@campden.co.uk
Please visit www.campden.co.uk
[2537-057 (2006) : 77]
The Department of Health and Human Sciences currently has the following opportunity:

**Graduate Assistant**
Fixed term for 4 years
Salary £12,400 per annum bursary

Owing to successful recruitment to the Department's MSc courses, the opportunity has arisen for employment of a Graduate Assistant in the Microbiology Research Unit.

The Assistant will be expected to spend 3 months per year on the teaching and supervision of MSc (and occasionally undergraduate) students, mainly during the months of June-August inclusive, when the MSc students will be engaged on their research projects.

The Applicant must have a good degree (Honours 2:1 or above) in Microbiology, or one of the Biological or Food Sciences which includes a substantial element of microbiology.

The Assistant will, after discussion with the project supervisors, select a research project for studies leading to the degree of PhD from one of the following areas:

- Predictive microbiology and bioinformatics
- Survival of foodborne pathogens
- Probiotic microorganisms and human intestinal microbiology
- Natural fermentations.

The post will be held for a 4-year term, subject to satisfactory progress in the research project. Tuition fees will be paid by the University.

For further information contact:
Dr A Varnam (a.varnam@londonmet.ac.uk) or
Dr J Sutherland (j.sutherland@londonmet.ac.uk) or phone 020 7133 2571/2524.

In the first instance further details and an application form can be downloaded at www.londonmet.ac.uk/vacancies or e-mail recruitment@londonmet.ac.uk or write to London Metropolitan University, London City campus, Human Resources, 31 Jewry Street, London EC3N 2EY. Please quote reference number 419FXNR.

Closing date for applications will be 16 February 2006.

Please note we do not accept CVs.

London Metropolitan University is an equal opportunities employer.

**POSITIVE ABOUT DISABLED PEOPLE**

Find your place in London
www.londonmet.ac.uk
LONDON metropolitan university
Applications are invited for the following posts in the School of Biosciences based at the Sutton Bonington Campus. The successful candidates will contribute to a four year research programme investigating the physiological, molecular, genetic and genomic basis of pre-harvest sprouting in wheat. This project is part of a large research consortium consisting of UK research institutes and members of the UK wheat breeding sector and downstream industries.

**Research Associate/Fellow**
Candidates should have, or be close to submitting, a PhD in plant biology/genetics, with experience in crop physiology or crop genetics an advantage.

Salary will be within the range:
- Research Associate scale: £20,842 - £22,774 pa, depending on qualifications and experience (salary can progress to £25,633 pa, subject to performance).
- Research Fellow scale: £23,457 - £28,850 pa, depending on qualifications and experience (salary can progress to £33,445 pa, subject to performance).

This post will be offered on a fixed-term contract for a period of 4 years. Please quote ref. MH/01.

**Research Technician (Fixed-term)**
Candidates should hold a graduate qualification in biology, and have an interest in plant/crop science.

Salary will be within the range £17,978 - £21,467 pa, depending on qualifications and experience (salary can progress to £25,633 pa, subject to performance). This post will be offered on a fixed-term contract for a period of 31/2 years. Please quote ref. MH/02.

Informal enquiries may be addressed to Professor M Holdsworth, Chair of Crop Science, tel: 0115 951 6100, fax: 0115 951 6099, Email: Michael.Holdsworth@Nottingham.ac.uk or Dr J Foulkes, tel: 0115 951 6024, Email: John.Foulkes@Nottingham.ac.uk.

Candidates should send a detailed CV, together with the names and addresses of two referees, to Mrs S Northover, Division of Agricultural and Environmental Sciences, School of Biosciences, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicestershire LE12 5RD. Tel: 0115 951 6100. Fax: 0115 951 6099. Email: Sheila.Northover@Nottingham.ac.uk. Please quote relevant reference number. Closing date: 17 February 2006.

[2537-059 (2006) : 78]
University of Cambridge - Pfizer Institute for Pharmaceutical Materials Science
Scanning Probe Microscopic Analysis of Pharmaceutical Materials

Postdoctoral Research Associate
Pensionable salary from £20,044 - £30,002 pa depending on experience
Appointment for up to three years

The Pfizer Institute for Pharmaceutical Materials Science is an exciting new partnership between Pfizer Inc., the Cambridge Crystallographic Data Centre (CCDC), and the University of Cambridge. The Institute focuses on research into amorphous pharmaceuticals, crystal structure prediction and cocrystal formation using both experimental and computational strategies. Extensive experimental facilities are available.

The Institute now intends to develop expertise in the area of scanning probe microscopy of organic crystals, and especially pharmaceutical materials. Initial work will focus on the interface of crystalline and amorphous domains. Applicants are therefore sought from experimentalists with experience in these areas.

General enquiries should be addressed to Dr Bill Jones e-mail: WJ10@cam.ac.uk Applications including a CV, the names and contact details of two referees and a completed PD18 form, which can be downloaded from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18, should be sent to Ms Jane Bryant, Department of Materials Science, New Museums Site, Pembroke Street, Cambridge C82 3QZ. E-mail: pipmsadmin@msm.cam.ac.uk

Closing date: 3 March 2006.

The University offers a range of benefits including attractive pension schemes, professional development, family friendly policies, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

[2537-060 (2006) : 79]
UNIVERSITY of GLASGOW

DIVISION OF CANCER SCIENCES AND MOLECULAR PATHOLOGY
SECTION OF EXPERIMENTAL HAEMATOLOGY

Research Assistant £20,044 - £30,002

You will join the "normal and CML stem cell" research group to investigate novel drug combinations for the eradication of Ph+/Bcr-Abl + haemopoietic stem cells in CML. Available for two years.

Applications including CV and names and addresses of two referees should be sent to Professor Tessa Holyoake, Division of Cancer Sciences & Molecular Pathology, University of Glasgow, Glasgow G12 8QQ, E-mail: tlh1g@clinmed.gla.ac.uk, Tel: 0141 211 4676 quoting Ref 11925/DPC/A3. Further information is also available from Professor Holyoake. Closing date: 3 March 2006.

The University is committed to equality of opportunity in employment.

POSITIVE ABOUT DISABLED PEOPLE
UNIVERSITY of GLASGOW

The University of Manchester
www.manchester.ac.uk/vacancies
Faculty of Medical and Human Sciences

**Postdoctoral Research Associate** in Targeted Therapy (Radiology / Radioimmunotherapy / Radiobiology)

Salary in the range £20,044 - £28,829 p.a.   Ref: MHS/026/06

You will be a postdoctoral scientist with a PhD in Immunotherapy or a closely related subject and you will work in the Cancer Research UK Targeted Therapy Group, based at the Paterson Institute for Cancer Research (PICR). This is a dynamic research programme investigating antibody-targeted novel therapeutics and radioimmunotherapy (RIT). You will be expected to be integral to the development of innovative translational research in developing novel radioimmunconjugates and testing a range of immunological strategies in pre-clinical models.

The Targeted Therapy Group

The programme of translational research aims to increase our understanding of the interactions between monoclonal antibodies (mAb) and irradiation in the treatment of cancer. The two main foci of the work are the optimisation of RIT in haematological malignancies and using irradiation with mAb that induce immunoregulation. In the first research domain, the roles of mAbs as both vectors in delivering irradiation to tumours and also in direct cancer cell killing are further explored. The second area involves using mAbs to augment T-cell responses to tumour by blocking or stimulating co-receptors in the immune system. The focus of the research for the laboratory studies is to directly inform future clinical studies.

The Post

You should have a PhD in immunology, or a closely related subject, some postdoctoral research experience, an established research profile and ability to create a strong research plan and communicate effectively with other scientific disciplines and clinicians.

The post is funded by Cancer Research UK and will be for three years subject to satisfactory review after 12 months and is available immediately. You will be responsible to Professor Tim Illidge in the Division of Cancer Studies and will have significant interactions with other research groups in the CRUK Paterson Institute for Cancer Research and Christie Hospital NHS Trust.

For more information, please contact Professor Tim Illidge on 0161 446 8095 or tmi@manchester.ac.uk

Application forms and further particulars are available from our website. If necessary, you can obtain them from 0161 275 8835 or e-mail: mhs-hr@manchester.ac.uk

Closing date: 16 February 2006.

Faculty of Life Sciences

**Research Technician**

Salary circa £14,500 p.a.   Ref: LS/014/06

Sponsored by the Wellcome Foundation, for an initial period of one year commencing 1 March 2006, this post will be part of a team undertaking new and exciting cellular and molecular research connected with the effects of hormones and ageing on wound healing. You will be responsible for undertaking fundamental scientific research as directed by Professor Gillian Ashcroft and also managing some aspects of our multi-user facilities, as directed by associated academic staff and the sectional chief technician. You must be familiar with a range of modern genetic manipulation techniques and microscopy and be able to demonstrate some aptitude towards managing group facilities and operating as part of a team.

You will be required to hold a BSc in Biological Sciences or an equivalent qualification.

Application forms and further particulars are available from our website. If necessary, you can obtain them from e-mail: gary.porteous@manchester.ac.uk Closing date: 24 February 2006.
For both posts, please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community. Combining the strengths of UMIST and The Victoria University of Manchester
[2537-062 (2006) : 79]
Applications are invited for a Lectureship in Soil Biology, or a closely related area, tenable from 1 September 2006.

The successful candidate will be expected to:
• Contribute to BSc Environmental Science teaching in the broad first year introductory material and be able to offer Part 3 options
• Contribute to MSc options in the field of soils and environmental pollution
• Willing to support field teaching across the degree
• Contribute to research in the Department of Soil Science in one or more of the following fields: soil organic matter dynamics; risk assessment; soil remediation; biogeochemistry; and soil respiration, particularly in relation to climate change
• Ideally be able to work at both an organism and molecular level in a numerical rather than simply descriptive approach.

Details of the Department's and School's teaching and research activities can be found in the further particulars for this post.

Further enquiries should be directed to: Professor Stephen Nortcliff, Head of the Department of Soil Science, telephone (0118) 931 6559/8911 or e-mail: s.nortcliff@reading.ac.uk.

Application forms and further details are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH, telephone (0118) 378 6771 (voicemail). Application forms and further particulars are also available in Word/RTF format from www.reading.ac.uk/Jobs. Closing date for applications: 24 February 2006. Please quote the reference number.
VACANCIES FOR POSTDOCTORAL RESEARCHERS in the
SCHOOL OF LIFE SCIENCES and WELLCOME TRUST BIOCENTRE
UNIVERSITY OF DUNDEE, SCOTLAND

The 5* research-rated School comprises 70 Research Groups and 700 staff from 53 countries and was recently rated the best European Research Institute in which to work ("The Scientist", November 7th 2005). Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. Current research grants exceed £24 million p.a. A new research building opened in July 2005. There are new postdoctoral vacancies to work with Professors Barton, Ferguson, Hardie and Dr Stanley-Wall. Postdoctoral vacancies also exist in several Divisions. For further details about these positions and how to apply, please consult our website or email j.v.brown@dundee.ac.uk

http://www.dundee.ac.uk/biocentre/
[2537-064 (2006) : 80]
School of Chemistry  
www.st-and.ac.uk

6 Research Fellowships in Fuel Cell Technology  
£20,044 - £30,002 per annum

We require a Research Fellow to work on a new fuel cell concept, that of carbon fuel cells, which has recently been developed at St Andrews. You will work on the optimisation of the electrochemical performance for the oxidation of carbon in such fuel cells. Experience in molten carbonate and/or the solid oxide fuel cell technology would be of considerable advantage. The position arises from a research grant recently awarded by Scottish Enterprise. Ref: ME118/06.

We also seek to identify up to five individuals in the area of solid oxide fuel cell technology to work on a project initially to be subcontracted from St Andrews Fuel Cells Ltd to St Andrews University. We seek specialists in metallurgy, ceramics processing, tape casting, fuel cell stack development and thermal modelling. You should have experience of working as part of an interdisciplinary team, ideally gained in an industrial environment. Salaries will be in the RA1A skill range, although for appropriately experienced individuals higher rates may be negotiable. Ref: ME119/06.

We anticipate that all of these positions will commence on 1 March 2006, or as soon as possible thereafter and will be for 12 months in the first instance.

Informal enquiries to Professor John Irvine (email: jtsi@st-and.ac.uk).

Please quote the appropriate reference number. Closing date for all posts: 17 February 2006.

Application forms and further particulars are available from Human Resources, University of St Andrews, College Gate, North Street, St Andrews, Fife KY16 9AJ (tel: 01334 462571, by fax: 01334 462570 or by e-mail: jobline@st-andrews.ac.uk). Clinical Studies Co-ordinator  
Fixed term for 3 years  Ref: 401/06  
St George's is one of the leading units for research and clinical care in stroke. This post offers an enthusiastic motivated individual an opportunity to join a friendly team and play a lead role in coordinating patient recruitment to a number of studies looking at ways to improve both acute and long-term care of stroke patients.

The post would be ideal for a health professional (nurse, therapist or other) either looking for an introduction to research, or with some research experience. Alternatively it would suit a science graduate with experience of working with people, ideally in a healthcare setting, who wishes to gain experience of research.

Salary will be circa £25,000 plus London Allowance on either nursing scale G (point 27) for a qualified nurse or the RA1A scale.

Closing date: 20 February 2006.

Division of Cellular and Molecular Medicine Oncology  
Research Technician  Grade D  
Fixed term for one year Ref: 304/06.  
Applications are invited for a research technician to work on a project investigating the putative anti-tumour properties of Thalidomide and its analogues. Studies will involve in vivo work, tissue culture, flow cytometry, immunohistochemistry, ELISA and cell proliferation/migration assays.

You should have a BSc degree or similar qualification in a biological subject and some previous laboratory experience. You should be able to work independently and as part of a team and possess enthusiasm, good organisational skills, and initiative. Experience in basic laboratory skills such as cell culture is essential. Preference will be given to applicants in possession of a Home Office Personal Licence.

The starting salary will be in the range £18,946 - £22,015 per annum inclusive.

Closing date: 16 February 2006.

For further information, visit www.sgul.ac.uk/ or contact the Personnel Office on 020 8725 5020 (24-hour answerphone) or email: personnel@sgul.ac.uk Please quote appropriate reference number.

St George's is an Equal Opportunities Employer
**Hourly Paid Lecturer Vacancies**
Department of Health and Human Sciences

The Department of Health and Human Sciences is looking for enthusiastic and student-focused part-time professionals to help in the delivery of a range of undergraduate and postgraduate courses in the areas of Biology, Molecular Biology, Biochemistry, Chemistry and Nutrition commencing in February 2006.

Applicants should be appropriately qualified in one or more of the above areas and preferably have experience of teaching in an HE environment. The role will involve extensive contact with both students and staff, so an understanding of the needs of students and a good customer service approach are essential.

Good time-management and organisational skills are essential.

For an informal discussion, please contact Dr Trushar Adatia on 020 7133 4545 (e-mail: t.adatia@londonmet.ac.uk).

To apply please send a copy of your CV together with a cover letter identifying your particular teaching interests to: Deborah Byatt, Department of Health and Human Sciences, London Metropolitan University, Tower Building, 166-220 Holloway Road, London N7 8DB.

Closing date for applications is 16 February 2006.

[2537-069 (2006) : 82]
Viral entry into cells and virally induced leukaemia

Applications are invited for this Leukaemia Research funded post in the Centre's Molecular Virology Group. The project will investigate the mechanism of retroviral entry into human cells, with emphasis on the role that the envelope glycoprotein of human Tcell leukaemia virus (HTLV-1) plays in this process. The project will involve a range of molecular biology techniques, microscopy, flow cytometry, and viral infectivity assays. Candidates should have a PhD and ideally experience in one or more of these techniques but relevant training, especially in virological methods, will be provided.

The Centre offers a stimulating research environment, excellent modern laboratories and access to outstanding core facilities.

This post is available for a fixed-term period of three years and initial appointment on the scale will be dependent on qualifications and experience.

Informal enquiries may be made to Dr David Brighty, tel: +44 (0)1382 660111 Ext. 33513, or e-mail: david.brighty@cancer.org.uk (Also, see http://www.dundee.ac.uk/biomedres/).

 Further details and an application pack are available from our website: www.jobs.dundee.ac.uk
 Alternatively, contact Personnel Services, University of Dundee, Dundee DD1 4HN, tel: (01382) 344817 (answering machine). Please quote Reference number: MD/1133/NS.
 Closing date: 17 February 2006

The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community.

www.jobs.dundee.ac.uk
UNIVERSITY OF DUNDEE
Experimental Haematology Laboratories
Division of Pathology and Neuroscience

RESEARCH ASSISTANT
Salary scale RA1A/B (£20,044 - £22,289), depending on qualifications and experience, fixed-term for 36 months.

Applications are invited for a position based in the Division of Pathology and Neuroscience at Ninewells Hospital and Medical School in a multidisciplinary research group investigating the responses of the haemopoietic system to ionizing radiation, the influences of genetic factors on these responses and the mechanisms underlying the development of longer-term pathological changes particularly leukaemia.

The successful applicant will be required to use specialized cell culture techniques together with a variety of immunocytochemical and immunoassays to investigate inter-cellular signalling between haemopoietic stem/progenitor cells and their stromal microenvironment including the specific role of macrophages in such responses.

The position is funded by Children with Leukaemia for three years and a background in haematology/immunology would be advantageous but is not required.

The successful applicant will be an appropriately experienced graduate or someone who has recently completed relevant PhD studies.

The University of Dundee is internationally renowned for research in biomedical sciences and the area provides a high quality affordable living environment. Informal enquiries may be directed to Prof Eric Wright, e.mail: e.g.wright@dundee.ac.uk, tel: (01382) 632169. Further details and an application pack are available from our website www.jobs.dundee.ac.uk Alternatively, contact Personnel Services, University of Dundee, Dundee DD1 4HN, tel: (01382) 344817 (answering machine). Please quote reference number: MD/1146/N5. Closing date: 16 February 2006.

Applicants will only be contacted if invited for interview. The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community. www.jobs.dundee.ac.uk

UNIVERSITY OF STIRLING
Institute of Aquaculture

Lecturer in Environment and Aquaculture
£24,352 - £36,959 pa

Based in our 5 rated (2001 RAE) department, your work will involve liaising with colleagues in the Institute, international collaborators and with the aquaculture industry. You will supervise doctoral students and participate in teaching at masters and undergraduate level. A PhD and a significant postdoctoral research record is required. Experience in postgraduate supervision and teaching is desirable.

You will develop a significant research programme in interactions between the environment and aquaculture focusing on aspects of molecular toxicology, GIS applications, environmental chemistry or other related fields.

Informal enquiries to Professor Randolph Richards, Director, Institute of Aquaculture (tel: 01786 467870 or e-mail: r.h.richards@stir.ac.uk).
Please quote ref: 11850/4210.

Closing date for applications: 10 February 2006. Further particulars are available from HR Services, University of Stirling, Stirling FK9 4LA. Tel: 01786 467028. Fax: 07 786 466155.
E-mail: hr-services@stir.ac.uk

An equal opportunities employer
hr-services@stir.ac.uk
Research Associate
KING's College LONDON
School of Biomedical and Health Sciences

Applications are invited for a 12-month postdoctoral research position within The Neural Degeneration and Clinical Trials Group of the School of Biomedical and Health Sciences, King's College London (Guy's Campus). The post provides an opportunity to work on a novel collaborative project led by Dr David J Begley (KCL) and Professor Bryan Winchester, Institute of Child Health (UCL). The work is funded by the UK Society for Mucopolysaccharide Diseases and the Spanish Sanfilippo Association. The work will focus on the role of the blood-brain barrier and pathological changes in the barrier in Sanfilippo Syndrome. The work will use two transgenic models of Sanfilippo Syndrome (MPS III A and A-TPS III B).

The successful candidate will have the opportunity of working in close association with groups of clinical and basic medical scientists at both King's College London and the Institute of Child Health (UCH)/Great Ormond Street Hospital for Children.

You will possess a postdoctoral qualification in a relevant biomedical science and preferably have some experience of whole-animal integrative physiology and Pharmacokinetics although full training will be provided. You will have a methodological approach to scientific research and possess excellent communication skills, able to report the results of research to both scientific and lay audiences.

The appointment will be full-time fixed-term for 12 months. The salary is up to point 12 on the RA1A salary scale (£28,829 per annum plus £2,323 London Weighting Allowance).

For an application pack please contact The Personnel Department, Room 1.26 Henriette Raphael House, Guy's Campus, London SE1 1UL on 020 7848 6899 or e-mail biomed-recruitment@kcl.ac.uk quoting reference W1/JFA/058/06.

Closing date: 17 February 2006

Equality of opportunity is College policy

UNIVERSITY of GLASGOW

DEPARTMENT OF PHYSICS AND ASTRONOMY AND
DEPARTMENT OF ELECTRONICS AND ELECTRICAL ENGINEERING

Research Assistant - Spin@rt:
Room Temperature Spintronics
£20,044 - £30,002

You will be responsible for fabricating and characterising nanostructured magnetic thin film elements within the Departments. Element fabrication will involve focused ion and electron beam lithography techniques and characterisation will be by transmission electron microscopy, especially Lorentz microscopy. The research forms part of a consortium project involving the Universities of Cambridge, Durham, Exeter, Leeds and London and RAL. This post is available for up to 36 months.

For an application pack, please see our website at www.ssp.gla.ac.uk/ or write quoting Ref 11972/DPL/A3 to Dr S McVitie, (s.mcvitie@physics.gla.ac.uk).

Closing date: 24 February 2006.

The University is committed to equality of opportunity in employment.

POSITIVE ABOUT DISABLED PEOPLE
UNIVERSITY OF GLASGOW
Readership and Three Lectureships in Experimental Particle Physics

As one of the first elements of a major strategic investment in the Physics Department, which includes a several tens of million pounds development of the research and teaching facilities and a significant injection of new posts, the University invites applications for the above posts. The successful candidates will have an outstanding record of research, or have demonstrated outstanding research potential, in the subject area and will be expected to take leading roles in a vibrant research programme at the energy and symmetry frontiers, in particular in the exploitation of data from the LHC. The Bristol group has substantial expertise in triggering, fast electronics, and computing and its current activities focus primarily on the LHC with the CMS and LHCb experiments. The group intends to expand its future research activities beyond the LHC, including, but not restricted to, the linear collider or to neutrino physics. We seek to appoint a person at Readership level to drive this future programme. Candidates for this position should have a demonstrated excellent track record in leading a successful and sustained research programme at the forefront of particle physics.

Appointees will be expected to contribute to teaching at both undergraduate and postgraduate level in the Physics Department. Salary for the Lectureships will be in the Lecturer Grade B range £28,829 - £36,959 and for the Readership in the Senior Lecturer Grade £38,685 - £43,850. For further information about current research activities in the Department see http://www.phybris.ac.uk/research.html

For informal enquiries please contact Professor N. Brook on (0117) 928 8735 or e-mail n.brook@bristol.ac.uk

IT IS AN APPLICANT'S OWN RESPONSIBILITY TO ENSURE THAT LETTERS OF REFERENCE FROM THREE REFEREES ARE RECEIVED BY Professor N Brook, e-mail n.brook@bristol.ac.uk Fax (0117) 925 5624 BY THE CLOSING DATE OF 15th FEBRUARY 2006.

Further details and an application form can be found at www.bristol.ac.uk/vacancies Alternatively you can telephone (0117) 954 6947 or e-mail recruitment@bristol.ac.uk (stating postal address ONLY), quoting reference number 11919.

The closing date for applications is 9.00am, 15th February 2006. Anticipated interview dates 22nd - 24th February 2006.
UNIVERSITY OF LEEDS
Faculty of Medicine and Health
Leeds Institute of Molecular Medicine

**Research Fellow**
The University of Leeds
This full-time post is available for a fixed term of one year. The aim of the project is to examine the involvement of the angiopoietins in the development and progression of colorectal cancer in clinical samples, using a variety of protein expression analyses, including tissue microarray techniques. You will contribute to the academic development of the project, which will require a comprehensive understanding of literature.

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY
[2537-082 (2006) : 85]
PhD studentships (3 years) are available in the MRC Functional Genetics Unit based in the Department of Physiology, Anatomy and Genetics at the University of Oxford. The Functional Genetics Unit consists of four interacting groups who are using genetics and genomic approaches in model organisms to understand the function of genes involved in human neuromuscular and neurological diseases.

Two groups (David Sattelle and Marcel van den Heuvel) work with invertebrate model-organisms that allow rapid development of assays for gene function using genetics and other techniques. Findings can be immediately translated into higher vertebrates within the third group (Kay Davies). The fourth group of the Unit (Chris Ponting) is studying the evolution of genes and genomes using comparative genomics' methods and often contributes to high-profile genome sequencing consortia.

The Unit is well equipped to allow the student to gain experience in various techniques such as cell and molecular biology, genetics, transgenesis and physiology in different animals, as well as transcriptome and proteome analysis. Bioinformatics training will be provided if required.

Please refer to our website (http://www.mrcfgu.ox.ac.uk) for information on the laboratory scientific programmes, further information on projects and email addresses of the group leaders mentioned above.

Applicants will normally be expected to reside (or have residency) within the UK. Subject to this the financial package may include all or some of the following:

- MRC maintenance stipend
- allowances (where applicable)
- approved University fees
- Research Training Support Grant and a Conference Allowance.

Further details on MRC studentships can be obtained from the following website (http://www.mrc.ac.uk). Also please refer to the University of Oxford Graduate Students pages for eligibility, as well as possible stipend information (http://www.admin.ox.ac.uk/gsp/). An application form for the University will be required.

There is no formal application form for the MRC. Please send your CV and indicate in which projects you are particularly interested, to: Mrs Sarah Atkinson, Unit Secretary MRC Functional Genetics Unit, Department of Physiology, Anatomy and Genetics, University of Oxford, Le Gros Clark Building, South Parks Road, Oxford OX1 3QX or by email to sarah.atkinson@anat.ox.ac.uk

Closing date: 31st March 2006.

The Medical Research Council is an Equal Opportunities Employer.

The Macaulay Institute

Environment Change Research

Applications are invited from natural, social and economic scientists holding, or expecting to gain, a 1st or 2nd (i) honours degree for the following PhD studentships:

Interactions between climate and other key drivers of change in tree-line and montane scrub communities
Lead Supervisors: Professor Hester (a.hester@macaulay.ac.uk) [Macaulay Institute], and Dr Legg (Edinburgh University)
PhD 1

Modelling the impact of climate change on the hydrothermal regimes of rivers
Lead Supervisors: Dr Langan (s.langan@macaulay.ac.uk) (Macaulay Institute) and Dr. Fowler (University of Newcastle)
PhD 2

Belowground responses to browsing in regenerating Scots Pine Forest
Lead Supervisors: Professor Millard (p.millard@macaulay.ac.uk) (Macaulay Institute) and Professor Bardgett (Lancaster University)
PhD 3

Impact of land use changes on the diversity of methanotrophic bacteria
Lead Supervisors: Dr Singh (b.singh@macaulay.ac.uk) (Macaulay Institute) and Professor Murrell (Warwick University)
PhD 4

Developing an analytical framework of sustainable agro-tourism in Scotland
Lead Supervisors: Dr Blackstock (k.blackstock@macaulay.ac.uk) (Macaulay Institute) and Dr Hunter (University of Aberdeen)
PhD 5

Mitigation of climate change through forestry : socio-economic implications for Scotland
Lead Supervisors: Dr Nijnik (m.nijnik@macaulay.ac.uk) (Macaulay Institute) and Professor Mather (University of Aberdeen)
PhD 6

Adapting to a changing world : plant evolution
Lead Supervisors : Dr Pakeman (r.pakeman@amacaulay.ac.uk) (Macaulay Institute), and Dr. Kunin (University of Leeds)
PhD 7

Climate change, grazing and breeding success in upland birds
Lead Supervisors : Dr Thirgood (s.thirgood@macaulay.ac.uk) (Macaulay Institute), and Dr Redpath (CEH Banchory)
PhD 8

Three of these studentships will be funded for three years. The stipend will be £12,300 in 2006-07. Although registered through UK Universities as indicated above students will usually be based in Aberdeen.
For further information contact the Macaulay Institute supervisor by E-mail. Candidates should submit to Human Resources a CV, to include the names and addresses of two referees, and a statement as to why you are interested in the Studentship and return to:
Human Resources,
The Macaulay Institute, Aberdeen AB15 8QH, UK

F: 01224 324880
E: hr@macaulay.ac.uk
(quotting Ref No of the studentship)
Closing date: 20 February 2006.
Interviews will be held in the week commencing 13 March 2006.

INVESTOR IN PEOPLE
www.macaulay.ac.uk/jobs
[2537-084 (2006) : 86]
Assuring the quality of biological medicines
NIBSC

PhD Student
£12,500 • Hertfordshire

NIBSC is a multi-disciplinary scientific establishment with the crucial role of protecting public health through standardizing and controlling biological substances found in medicine.

Undertaking an important three year project, you will explore the structure and formation of meningococcal outer membrane vesicles (OMVs), vaccine candidates with the potential to offer protection against meningococci irrespective of their serogroup. In particular, you will study the function of genes and the effect on corresponding OMV formation, investigate vesicle production in carriage and invasive strains to establish whether OMV quantity correlates with pathogenesis. Vesicle structure will be examined by image reconstruction following scanning electron microscopy.

This will require at least a 2:1 degree or MSc in a relevant biological science, ideally giving you broad knowledge of microbiology, immunology or molecular biology. Previous experience of practical laboratory work would be advantageous and you must be keen to further your study and gain your PhD.

For full details of the position can be found at www.nibsc.ac.uk

To apply, please submit a full Curriculum Vitae (2 copies), including the names and addresses of two referees, to the Human Resources Department, National Institute for Biological Standards and Control, Blanche Lane, South Mimms, Potters Bar, Hertfordshire, EN6 3QG, or email HR@nibsc.ac.uk

Closing date for applications is 24th February 2006.

Please quote reference SU.BP272 clearly on your application.

CPI was incorporated in 2004 as a centre of technical excellence created by the regional development agency One North East. The centre aims to be the pre-eminent innovation resource and partner for the Process Industry in the UK. Applications are invited for the following newly created position - NATIONAL INDUSTRIAL SYMBIOSIS PROJECT (NISP)

TECHNICAL MANAGER UP TO £35,000+ BENEFITS R16469
NISP is a major project within the CPI at Teesside working closely with the University of Teesside. NISP requires a Technical Manager, reporting to the CPI Business Services Manager. The industrial symbiosis contract is to develop solutions to environmental waste projects in the chemical process industry. The Technical Manager will work closely with the CPI Cheminet Team to evaluate and prioritise potential projects.

The person appointed will be a graduate scientist or engineer with excellent problem solving and communication skills based on experience of at least 5 years, across a range of process industry activity. He or she must also have good interpersonal and team working ability.

The appointment will be for an initial fixed term of two years.

Closing Date Friday 17th March 2006.

For further information on this position logon to www.roevin.co.uk/cpi for an information pack or call Helen Watson on 01642 430033 or email your CV to hwatson@roevin.co.uk

ROEVIN ENGINEERING RECRUITMENT
Technically speaking...we're the answer
Principal Plant Pathologist

Science & Learning
C.£27,500 Wisley (near Woking), Surrey

Pathologists in the Society's Horticultural Sciences Department provide advice to our members on plant disease, in response to more than 6000 enquiries p.a. to the Wisley laboratory. They have active research programmes in support of that advice; current areas of interest include taxonomy and biology of honey fungus, Phytophthora, powdery mildews and box blight.

You will lead our pathology team, participating in the advisory work and ensuring high standards. You will develop and diversify the research programme and strengthen contacts with other research organisations.

You should have a first degree and PhD in an appropriate discipline and a proven record of post-doctoral research, evidenced by publications. An ability to design experiments and analyse data is particularly important. Previous diagnostic and advisory experience is desirable but not essential.

What could world-renowned scientists learn from you?

Our Safety and Environmental Assurance Centre (SEAC) is home to a huge range of experts – from toxicologists and mathematical modelers to analytical chemists – many of them recognised throughout the world in their field. Here’s your chance to work with them – even those who are outside of your specialist area. Join us, and you’ll collaborate across a variety of categories and functions in Unilever on multi-disciplinary projects; you’ll exchange ideas for novel approaches to risk assessment; and you’ll learn from some of the brightest scientific minds around.

We’re looking to build our team in the following areas:
Toxicology
Microbiology
Environmental Science
Occupational Safety

Within the multi-disciplinary structure of Unilever, we’re currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac

FINANCIAL RISK MODELLER
Nationwide

This is the only time you'll see our financial risk modellers in a box.
SWINDON OR NORTHAMPTON

Pigeon-holing our modellers is just something we'll never do. We like to get them as widely involved with the business as we can – and it makes sense: after all, our modellers play an absolutely key role in shaping where we're going as a business. That's why, whether you've a wealth of experience or are just at the start of your career, we'll encourage you to broaden your experience in new directions, and gain valuable exposure right across Nationwide.

You'll work on Credit Risk models from the initial modelling stage – including research – all the way through to analysing and rebuilding models, and assisting in developing strategies.

We'll consider people at all levels. You should either have a degree or equivalent in a quantitative discipline, or at least four years' experience in a range of quantitative disciplines (ideally in modelling), along with a strong academic background, preferably with a good understanding of current statistical software, such as SAS, SPSS and GIS. It's not just technical ability that we're after, however: we need people with the confidence, enthusiasm and people skills to make a real difference to our teams – and the business as a whole.

Show us that and we'll show you a very open, friendly and collaborative place to work. As The Sunday Times Best Big Company To Work For 2005 we can also offer a great working environment, excellent career progression and an enviable range of benefits.

To apply, send your CV, quoting ref: FRM/NS to Sue Tucker, Personnel Operations, Nationwide House, Pipers Way, Swindon SN38 2GN. Alternatively, email sue.tucker@nationwide.co.uk For more information about working for Nationwide, please visit www.nationwide.co.uk/careers Closing date: 17th March 2006.

Environment Agency

improving a diverse environment,

requires some pretty diverse people.

**Technical Advisor (air modelling) • £32,100 - £36,500 • Cardiff**

There's no greater responsibility than improving the environment. Which is why we explore every avenue, and make use of every tool at our disposal. From flood defence, to governmental policy advisors, to conservation specialists; our 11,000 strong organisation is working hard to improve our land, rivers, coasts, even the air that we breathe. But it's not just a better environment we're building, we're creating a great one to work in too. Full of talent and innovation, somewhere you can really move on in your career.

We don't need to tell you the link between the quality of air and life. And with a relevant degree in a numerate discipline, a full professional qualification and at least six years' relevant experience, you can influence the entire country's air pollution control from industry. As well as managing other team members, you'll also advise us on odour, dust, deposition and air quality modelling. Management experience is essential and air quality and legislation knowledge is useful too.

In return you can expect an attractive benefits package, including a contributory final salary pension scheme (with life cover), generous holidays, good training and development opportunities and flexible working.

For a full information pack and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs)

If you don't have internet access, call Tina Drew on 0117 914 2915 for an information pack quoting reference PM0136. Closing date for applications: 17 March 2006.

We are committed to making our organisation, as diverse as the environment

Could you influence everyday brands with extraordinary science?

We've many world-leading brands under our umbrella at Unilever - like Lynx, Cif, Dove, Liptons and Knorr, for example - and our Safety and Environmental Assurance Centre (SEAC) works with them all, to ensure the safety of our consumers, employees and the environment. For you, that could prove very exciting indeed: after all, it will give you the chance to use novel approaches to risk assessment on a variety of complex projects, for a number of global products. What's more, the fast pace of the market means you'll see the results of your work on the shelf quicker than in almost any other industry.

Keeping these brands at the very top of their respective trees, of course, also represents a big challenge. That's why we're looking to build our team in the following areas:

Toxicology    Microbiology    Environmental Science    Occupational Safety

Within the multi-disciplinary structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac

STRATHCLYDE POLICE

Examine the evidence.

At Strathclyde Police, the individual skills our people bring make us the successful organisation we are today. We are Scotland's largest police force, and look after nearly 2.3 million people, from Glasgow's lively urban centre to the rural remoteness of the Inner Hebrides.

Glasgow

HEAD OF FORENSIC SUPPORT, £63,171 - £67,773

The area we police is one of the most unique in the country, as is this opportunity. As a forensic expert, you will already understand that this is the biggest role of its kind in Scotland and one of the biggest in the UK, therefore it is a significant opportunity, with considerable influence and accountability. You will provide the strategic leadership that will enable the service to thrive, grow, change and develop. A complete focus on quality service provision, and how to maintain it, is also important, and you will address budget management, best value and our business objectives with the same quality-led commitment. The department is entering a period of unprecedented change and challenge, and you must bring the vision and energy to negotiate this successfully.

You must be degree qualified and offer at least 10 years' high calibre forensic support experience, five of which should have been spent working at a senior level. You may also have a business or a management qualification but certainly your precision, experience and professionalism will have prepared you for the serious nature of this remit and the responsibilities you will undertake. You will also need confident and informed decision making skills, a background in strategic planning, negotiation and change management, as well as strong, inspirational and persuasive leadership abilities. A driving licence is also essential. (Ref: R311/05/NS)

Click online to find out more, email recruiting.forcesupport@strathclyde.pnn.police.uk or call 07355 566350. Closing date - 24 March 2006. Interview date - w/c 1 May 2006.

Ferring Pharmaceuticals is a speciality, research-driven bio-pharmaceutical company active in the global market. The company identifies, develops and markets innovative products in the fields of urology, gynaecology, gastroenterology and endocrinology.

**PhD Medicinal Chemist**

We are seeking a highly motivated medicinal chemist to join our drug discovery project team. The post will involve designing and synthesizing small organic molecules for screening as potential drug candidates. Skills in traditional organic synthesis and automated parallel synthesis as well as in chromatographic and spectroscopic analyses will be required. The successful candidate will be expected to develop a thorough understanding of medicinal chemistry techniques such as drug design, SAR analysis and interpretation of ADME data. The post-holder will make a significant contribution to the discovery of new drug development candidates at Ferring.

The successful applicant should have a PhD in organic or medicinal chemistry and up to two years academic or industrial experience. Excellent communication skills and the ability to interact effectively within an integrated drug discovery facility are essential. Experience in high-throughput chemistry or parallel synthesis is an advantage.

We offer the successful applicant an inspiring and innovative inter-disciplinary environment located within the pleasant surroundings of a green-field science park. Also we offer a competitive benefits package including attractive salary, non-contributory pension scheme, group income protection and health insurance cover.

Applications in writing together with CV should be sent to:
The Personnel Office, Ferring Research Limited, Chilworth Science Park, Southampton. SO16 7NP, UK. Email: admissions@ferring-research.co.uk

Closing date for applications is 24 March 2006.

Windsor Scientific markets and sells instruments and accessories for surface science characterisation and analytical measurement. Our markets are diverse with customers both in universities and industry involved in micro- and nano-technology and ranging in application from fuel cell development to the ‘Bio’ interface.

Our products range from our own dual mode iprobe AFM/SECM, Electrochemical instruments and SPR from Ecochemie, the portable AFM/STM from Nanosurf, Research SPMs from Quesant and other innovative products to be launched this year.

We are seeking a competent multi-disciplinary scientist to join our sales and marketing team. You must be able to multi-task and offer a flexible approach to problem solving to satisfy our customers' needs. Experience in AFM and/or electrochemistry is mandatory. Knowledge of SPR and relevant technology would be an advantage.

This is an exciting opportunity for a real team player with the energy and drive to generate tangible results and contribute to our expansion into a £multi-million enterprise. In return, you can look forward to an open and harmonious working environment where results are recognised and rewarded.

Please send your application to office@windsorscientific.co.uk

No agencies please.

Will science benefit from your latest developments?

The innovative, competitive and progressive nature of the Fast Moving Consumer Goods industry means that, if we're to bring the best products to market, quick and creative thinking is paramount. That's why you'll find the team at our Safety and Environmental Assurance Centre (SEAC) consistently developing groundbreaking approaches to risk assessment. It's different from other environments because the variety of our work and the challenges involved mark it out as a place where you can really make a difference.

Now, we are looking to build our team in the following areas:

Toxicology  Microbiology  Environmental Science  Occupational Safety

Within the multi-disciplinary structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac

Environment Agency

There’s a huge issue the environment needs your help with.

Atoms.

Nuclear Regulation and Incident Planning
With the creation of the Nuclear Decommissioning Authority in 2005, nuclear regulation and planning is a hot topic. It's changing the way the nuclear industry works and is giving us an incredible opportunity to persuade our external partners to put environmental considerations right at the top of the agenda. Help us to protect the environment as we develop a more collaborative approach to tackling the nuclear legacy.

**Team Leaders • £38,966 to £46,715 + lease car Wallingford, Oxon or South of England**
Credibility, management skills and technical knowledge are crucial here. Not just because your team of experienced Regulators will come to you for enforcement and mentoring advice; but also because you could lead major projects across a number of sites, and will have to solve complex issues yourself. You'll also need the sharp influencing skills to champion nuclear regulation throughout our organisation, to public bodies like the Nuclear Decommissioning Authority, and to a variety of media and other external partners. Ref: 10519 (Wallingford) or 10520 (South of England)

**Nuclear Regulators • £38,966 - £44,280 + lease car Flexible location (reporting to Penrith or Wallingford)**
The front line of nuclear regulation, you'll work closely with site operators, other regulatory bodies and even the media as you inspect and assess a variety of nuclear installations. Enforcing legislation like the Radioactive Substances and Environmental Protection Acts isn't easy, it takes an impressive mix of nuclear know-how and regulation experience; but it's your sensitivity to the political issues at stake that will show you're perfect for the role. Ref: 10522 (Wallingford) or 10523 (Penrith)

**Incident Planning Manager • £29,913 - £33,992 + lease car Flexible location (reporting to Wallingford, Oxon)**
It pays to be prepared, especially where radioactive material is concerned; a university might lose a source, or a power station could discover a fault that has potential consequences for human health or the environment. However, you'll make sure we're ready by using your radiological expertise and astute management skills to improve our incident response procedures. Responding to incidents involving radioactivity involves a wide range of organisations including site operators, local authorities, other regulators, emergency services and Government Departments. You'll have a key role liaising with our partners, rolling out our new measures and co-ordinating incident response training. You'll also help to take forward our approach to incident recovery processes. Ref: 10521

You'll receive benefits like a final salary pension and generous holidays, and get all the opportunities you'd expect from a 12,000-strong organisation. But, we're sure you'll agree, the biggest buzz will come from leading the management of such an important resource. A driving licence is essential for all roles.

Please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) for more information and to apply. Alternatively, call Delyth Owen on 01925 542363 quoting the appropriate reference. Closing date for applications is 16 March 2006.

We are committed to making our organisation as diverse as the environment.

Now there’s a healthier future

API Manufacture Opportunities
Sandwich, Kent

At Pfizer, we understand that innovative science is essential to the discovery and development of new medicines. But equally important is the speed at which our discoveries reach full-scale manufacturing. That’s why we’ve introduced 24-hour, 7-day a week working in our Active Pharmaceutical Ingredient (API) Manufacturing Pilot Plant area. We’re now inviting specialists to secure a healthier future for us and themselves by adding their expertise to our Day Operations Support Team.

Compliance Team Leader - Req: 050424
Leading and developing a small, talented team, you’ll ensure we meet regulatory, quality, environmental and health and safety issues for activities within the plant.
With your science-based or Chemical Engineering degree, at least five years’ experience in the active pharmaceutical synthesis industry, knowledge of compliance and technical knowledge of plant and process equipment, you’ll make sure operational targets are met and corporate standards exceeded.

Projects & Technology Engineer - Req: 050418
You’ll lead and assist in the commission, design and validation of a variety of plant development and improvement projects, from concept to hand-over. You’ll deliver specifications for purchasing suitable upgrades and design reviews, and work with internal and external technical colleagues on commissioning, validation and start-up. A degree in Engineering and ideally, three years spent in a chemical processing or pharmaceutical manufacturing development environment - at least a year of which was in a support role - will have given you a keenness and aptitude to learn and apply new technologies. You’ll also have an awareness of regulatory frameworks such as cGMP and EH&S.

Process Control Engineer - Req: 049916
Leading a small team, you’ll provide specialist engineering support for software and hardware process control systems.
A degree in Science or Engineering and a broad awareness of the regulatory framework will complement at least four years’ relevant experience in the fine chemical, or pharmaceutical industry and a good record of delivering control projects on manufacturing plant.

Chemical Engineer - Req: 049064
Developing API processes for technology transfer from research to manufacture, you’ll look at issues connected to scale up, whilst introducing innovative processes.
You’ll be involved in manufacturing areas from 20 litres to 2,500 litres, using your knowledge of chemical engineering concepts and techniques to solve practical scale up problems.
Importantly, you’ll also be comfortable exploring new technologies. To make the most of an environment where you’re encouraged to grow, you’ll need a degree in Chemical Engineering and you’re likely to have two to five years’ experience.

For a chance to showcase your skills in these outstanding opportunities, visit www.pfizer.co.uk quoting the relevant requisition number.

Closing date: 22nd March 2006

Global Research and Development

THE QUEEN’S AWARDS FOR ENTERPRISE 2000
2001-2002
AWARDED TO PFIZER LIMITED
Publishing, Science Communication, Conferences
Where could it lead?
Graduate Training London & Cambridge

Many graduates see their first role as the start of a chain reaction. By joining the Royal Society of Chemistry's graduate training programme, you’ll not only help to shape the development of our publishing, science communication or conference activities, but you’ll also help to set your own career in motion.

For the publishing and conference roles we’re looking for people who've studied chemical science or a related subject. For the science communication role we need a graduate who appreciates the important role science plays in society. For all of them we ask for an honours degree, Master's or PhD - along with excellent communication and organisational skills.

We'll invest both time and money in your personal development and give you all the skills you need for a successful future. You'll also receive a salary of £19,731 plus pension, life assurance and private health insurance.

Find out more by visiting www.rsc.org. Then phone our 24-hour answerphone on 01223 432238 or email hr@rsc.org to apply with a CV and covering letter, quoting ref: NS/8. Closing date: 17th March 2006.

Astex THERAPEUTICS

Research Scientist – Biology Group
Astex Therapeutics is a world-leading UK based biotechnology company committed to developing molecularly-targeted drugs in areas of unmet medical need. Astex has successfully progressed its first oncology compound into clinical trials and has further programmes progressing through preclinical development.

As a result of this continued success in our drug discovery programmes we are now seeking a graduate level scientist to join the Biology group. The role will support a range of Pre-clinical and Clinical stage projects in the oncology area. Previous experience in an industrial environment or the healthcare sector would be advantageous as would experience working with clinical material.

The position will be laboratory based and to support assay development of pharmacodynamic biomarkers applicable to a clinical setting. In addition the candidate will support processing and analysis to GCLP-like standards of samples received from ongoing clinical trials.

Some previous knowledge of techniques such as immunohistochemistry, flow cytometry, western blotting and gene or protein arrays would be an advantage.

The salary and benefits package will be highly competitive. Please send your application, quoting reference B-09ns, to Personnel, Astex Therapeutics Ltd, 436 Cambridge Science Park, Milton Road, Cambridge CB4 0QA, UK. Tel: +44 (0)1223 226200, e-mail info@astex-therapeutics.com

The Closing date for applications is 30th March 2006.

BIOSENSORS

Creating new ways for better diagnosis & treatment of diseases
With Laboratories in five different countries, Philips Research is one of the world's major private research organisations.

Research Scientist Opportunities  Redhill, Surrey

The UK Laboratory in Redhill, Surrey has capabilities spanning wireless systems & displays technology. The Active Matrix Systems Group has unique expertise in the design of electronic circuits on glass and plastic. We are world pioneers in innovations such as Flat Dynamic X-ray Detectors and the technology behind LCDTVs.

This electronics expertise is now also being focussed on emerging biosensor technologies for health and wellness in clinical and consumer applications. Join us and inspire the direction of our research as we blend biochemical systems to electronics in areas such molecular diagnostics and healthcare.

Opportunities exist for experienced or postgraduate researchers with enthusiasm and vision for electronics and biochemistry. As part of a team of electronics & technology experts, you will work within a collaborative framework of key universities in the UK as well as the Philips European Laboratory.

Your technical background could be in Electronics/Physics and you'll preferably have experience, through post-graduate studies or employment, in a biochemical or biomedical research environment. If you can demonstrate a similar combination of skills developed through a different route, we'd be keen to hear from you. Your personal characteristics will include strong communication and influencing skills, an appreciation for the business context and a desire to see things through to completion.

In addition to competitive pay and benefits, those joining the Philips Research community enter a superb working environment and an international company that is committed to the development of people to their full potential.

For information call: Morag McLeod 01293 815s 10 email CV to: m.mcleod@philips.com

www.research.philips.com

PHILIPS
[2541-016 (2006) : 64]
RESEARCH SCIENTIST
COMPUTER PROGRAMMER
PLANT & INVERTEBRATE ECOLOGY DIVISION

A computer programmer is required for an EU-funded project concerned with the co-existence of genetically-modified crops. The post holder will work in a team and liaise with colleagues in the UK and France to help to construct software for a landscape simulator. The simulator, designed by colleagues within the PIE Division at Rothamsted, will replicate appropriate crop rotations over a large region in time and space.

Appropriate experience in programming is essential. The post holder will assist with design specifications, particularly regarding the user interface. The post holder will write code and implement the software. They will take the lead in testing and documenting the software.

The post is for one year. The post holder will need to make several short journeys to France to make presentations and to liaise with colleagues.

Salary is offered at Band 6 level, which is normally within the range of £22,351 to £25,767 p.a. (pay award pending).

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ.

An Equal Opportunities Employer

ROTHAMSTED RESEARCH
[2541-017 (2006) : 64]
ROYAL BOTANIC GARDENS, KEW

Appointment of Trustees
(Part-time public appointments)

The Department for Environment, Food and Rural Affairs is inviting applications for future membership of the Board of Trustees of the Royal Botanic Gardens, Kew (RBG, Kew). Two positions on the Board will become vacant in 2006.

RBG, Kew has an international reputation for its scientific research into plants, and its living and preserved plant collections are unique in their global scope and coverage both at Kew and its other site at Wakehurst Place in West Sussex. Its mission statement is: "To enable a better management of the earth's environment by increasing knowledge and understanding of the plant and fungal kingdoms - the basis of life on earth".

RBG, Kew operates as an executive Non-Departmental Public Body (NDPB) sponsored by Defra, but is managed by the Board of Trustees. The Board consists of a Chairman and 11 Trustees, appointed by the Secretary of State for Environment, Food and Rural Affairs. The body has over 550 staff and its income in 2004/05 was some £42 million.

Board meetings are held at Kew or Wakehurst Place, generally six times a year for a day on each occasion. The total time input for Trustees is estimated at about 15 days per year. To fill these positions, we are looking for people with a commitment to public service and a range of general skills and experience from the public or private sector, education or voluntary sector, as well as those with specific skills in either informal public education, international development, commercial development, financial oversight, landscape architecture, architecture, design or heritage. An interest in the botanical and horticultural work of Kew would be an advantage but detailed knowledge is not necessary.

Successful applicants will be expected to take on an active interest in the affairs of RBG, Kew and to use their skills and experience to help further its mission and programmes. This will primarily be through their work on the Board and its subcommittees, but other input may be encouraged by agreement with the Chairman of the Board and the Director. All new Board members will be given appropriate induction.

Defra is committed to improving the diversity of the boards of its public bodies and welcomes in particular applications from members of currently under-represented groups including women, people from ethnic backgrounds and disabled people. All public appointments are based on the principle of merit and in accordance with the Commissioner for Public Appointments' Code of Practice.

It is envisaged that appointments will initially be for a three year period commencing as soon as possible. The appointments are currently unpaid though necessary expenses will be reimbursed.

For information and an application form which should be returned by 23rd March 2006, please contact: Martin Lewis, Area 1D, Defra, Science Strategy & International Division, 1st Floor, Nobel House, 17 Smith Square, London SW1 P 3JR. Telephone: 020 7238 1614. Or you can either email a request for an application form to kewrecruitment@defra.gsi.gov.uk or visit the Defra website at the following address: http://www.defra.gov.uk/corporate/appointments/index.htm

PLANTS PEOPLE POSSIBILITIES

OCPA REGULATED
defra
Department for Environment Food and Rural Affairs
Johnson & Johnson
WOUND MANAGEMENT
Nr. Skipton, North Yorkshire

Johnson and Johnson is the world's leading healthcare organisation with operations in 57 countries. Gargrave, near Skipton, is a key strategic centre with a well earned reputation for excellence in the development and manufacture of Wound Management products and medical devices for international markets.
A number of key appointments are now required:

**Technical Group Manager**  £ attractive + benefits
Reporting to the Engineering and Technical Manager, you will lead a team of Technical Product Managers in the delivery of the company's world leading product portfolio from conceptual design to point of sale, taking full project responsibility for the interpretation and establishment of protocols & practice and extending from new product development, material selection and approval, regulatory compliance, to internal and external quality.

With a consultative and flexible approach, candidates will be graduates from a technical or scientific discipline, with a strong product/process development background and at least 5 years experience in a senior Technical/Project Management role, ideally in a highly regulated environment, e.g. medical, cosmetic, food, FMCG.

**Technical Project Manager**  £ attractive + benefits
Reporting to the Technical Group Manager, you will lead projects, teams of Scientists and Technicians to deliver projects from new product introductions to process improvements and technical investigations.

Degree qualified in a scientific subject, you will possess 3-5 years experience in process or project management, ideally across a range of technologies. Experience of leading and working in multi-disciplined product development teams will have been gained in a high volume process manufacturing or possibly a research environment. Previous regulatory exposure would be an advantage.

**Project Engineer**  £ attractive + benefits
You will lead a diverse and exciting range of projects to introduce new products or to improve current manufacturing processes, assuming responsibility for their timely management and delivery. A flexibility of style will mean you are equally at home working within a team or taking the responsibility to lead.

A graduate, in either a mechanical, electrical or scientific discipline, you will already have gained at least 3 years project management experience ideally, but not essentially, in manufacturing and preferably in a highly regulated environment, whilst excellent organisational and communication skills will be essential to success.

**Operations Leader**  £ attractive + benefits
Working within one of the 3 key business units of the operation and reporting directly to the business unit manager, you will take full responsibility for: the delivery of production objectives; the continual improvement of process and techniques within the business unit; the management and development of your team. Key to your success within this role will be excellent interpersonal skills and the ability to work effectively alongside site based client personnel.

Degree qualified, ideally in an engineering discipline, you will already have at least 2 years experience in manufacturing/production management gained in a high volume batch manufacturing environment, where your leadership and people skills have enabled you to deliver results.
These are challenging and demanding opportunities to join a world class organisation where the emphasis is on personal and career development both in the UK and overseas. Comprehensive remuneration packages include contributory pension, family healthcare, 5 weeks holiday, bonus and a relocation package if appropriate.

Interviews will be held throughout the UK. For further information or to apply with full CV, please contact: Andrew Bishop, Senior Consultant, Perrott Associates Ltd., 103 Clarendon Road, Leeds LS2 9DF Email: ab@perrottassociates.co.uk. Tel: 0113 3846051

Perrott Associates
Heterogeneous Catalysis Expert

Lucite International
Going further
Excellent Salary & Benefits Package
Wilton, Nr Redcar, Cleveland

About the Company
Lucite International is the world's largest manufacturer of methyl methacrylate (MMA), the vinyl monomer for high quality acrylic plastics. It is the energy and driving force behind two of the world's best-known contemporary material brands Lucite® and Perspex®. Products are used in rapidly developing applications such as flat screen televisions and transparent computer housings. The R&D team at Lucite International has recently developed a pioneering new catalytic route to MMA which is expected to be a major driver for expansion of the business.

About the Role
We are looking for a heterogeneous catalysis expert to support the commercialisation of the technology and to develop improved catalysts and reaction processes for the new MMA technology. With a PhD in heterogeneous catalysis, and preferably with experience in synthesis of inorganic catalysts, the successful candidate will join our high performing multidisciplinary team to deliver these exciting challenges.

Benefits
The successful candidate can expect an attractive remuneration package including a final salary pension scheme, up to 30 days' holiday, profit related bonus, Company paid healthcare and relocation assistance.

To Apply
Please send CV to Pauline White, Lucite International, F2 Suite, Wilton Centre, Redcar, TS10 4RF, Tel: 01642 447111, pauline.white@lucite.com

CLOSING DATE: 31 MARCH 2006
abcam

Technical Support Assistant - Cambridge, UK

Abcam is a rapidly growing business, specialising in the production and sale of antibody research reagents. We are a web-based business, with offices in Cambridge, UK, and Cambridge, MA, USA.

Responsible for providing technical support to Abcam's customers, you will be eager to use your experience of working with antibodies and problem solving skills to resolve product and application queries. You have a minimum of a BSc in a life-science field and two years research experience using antibodies in Immunohistochemistry on formalin fixed paraffin sections plus at least one other application from Flow Cytometry/ FACS, Western Blotting and Immunoprecipitation.

You will have an outgoing personality, be proactive and enjoy solving problems, have bags of enthusiasm and enjoy working with people. The role involves talking to researchers over the telephone as well as corresponding via e-mail so it is essential for you to have excellent oral and written communication skills. The position is ideal for a scientist with practical experience of working with antibodies who now wishes to use their technical expertise outside of the laboratory.

Please send a CV and cover letter highlighting the experience and skills you can bring to this role to Sarah Brutnell sarah.brutnell@abcam.com Abcam plc, 332 Cambridge Science Park, Cambridge, CB4 0FW Closing date for applications is 17 March, 2006.

BRE ENVIRONMENT - VARIOUS POSTS
£ competitive

As an integral part of the 200 strong team of environmental experts at BRE Environment, the centre for Environmental Consultancy has over 50 highly qualified and experienced staff with specific expertise associated with environmental impact assessment, air pollution/quality, building diagnostics, acoustics and noise, analytical chemistry, building services, indoor air quality and contaminated land. The centre also has outstanding laboratory and test facilities.

Vacancies exist in the following areas:
• Senior Consultant
  - Water Efficiency (ref. ED006)- Acoustics Team (Ref. ED004)

• Graduate/Consultant
  - Wind Tunnel Research & Environmental Impact Assessment (Ref. ED005)

• Principal Consultant
  - Wind Tunnel Research & Lighting consultant (ref. ED001)

• Senior Consultant
  - Environmental Assessment (Ref. ED003)

The centre is also seeking other senior positions.

For full descriptions of the above positions and details of how to apply, please visit our website http://www.bre.co.uk/careers.jsp
or contact Sarah Dolan, 01923 664738, dolans@bre.co.uk

NB: All applications submitted must clearly indicate the title of the position you are applying for and the corresponding reference number.
JSC is a team of independent consultants providing expert regulatory and environmental risk assessment services to agrochemical and chemical companies. We currently have vacancies for regulatory scientists in a number of scientific disciplines

**Regulatory Affairs Manager** - we are looking for an enthusiastic person with a knowledge of European regulatory systems for pesticides to provide expert advice to our clients and co-ordinate a team of scientists in the preparation and support of regulatory submissions

**Toxicologist** - To provide a principal source of regulatory toxicology expertise and detailed high level advice to our pesticide/biocide clients

**Environmental Scientist** - To work with the existing team investigating the environmental fate of chemicals. Experience of modelling the environmental fate of pesticides and/or biocides would be a major advantage

Appointments at all levels will be considered in this flexible and outward looking company. For further information contact: Jackie Hall using e-mail (Jackie.hall@jsci.co.uk) or post, including a recent CV

Simpson House Windsor Court Clarence Drive Harrogate HG1 2PE UK TEL 44(0)1423 520245 Fax 44 (0)1423 520247 : [www.jsci.co.uk](http://www.jsci.co.uk) [2541-023 (2006) : 67]
Domantis is one of the fastest growing biotechnology companies in the UK and is pioneering the development of the next generation of antibody molecules: Human Domain Antibodies (dAbs). We are in a strong financial position, having raised $29 million in a private equity financing last December, and are seeking to expand our Cambridge UK R&D team with high calibre, motivated scientists.

**Research Scientist/Associate - In Vitro Selection Technologies**

The Protein Engineering (PE) group focuses on the development and application of cutting-edge technologies for lead isolation and optimisation. One position is available within the PE group to work on improvement of lead dAbs using in vitro selection technologies. You will have a BSc, MSc or PhD in a biotechnology discipline with at least two years experience in molecular biology and protein engineering. The candidate will have a strong basis in recombinant DNA techniques, be accurate as well as dedicated to high-quality laboratory work. Familiarity with selection technologies would be an advantage. Strong attention to detail and excellent record keeping are essential as well as the ability to work both independently and as an important member of a team within a highly creative and rapidly expanding company.

Domantis offers a scientifically stimulating environment, competitive salaries, private medical cover, a contributory pension scheme and a generous share option package.

To apply, send a covering letter and detailed CV, including names of three referees, to jobs154@domantis.com No agency applications will be considered at this stage.

For information about Domantis please visit our website at www.domantis.com

To apply, email your CV to: cvs@camcoscientific.co.uk

All applicants must be eligible to work in the UK.

Medical Device Specialists

BSI

Due to a significant expansion of business we are seeking dynamic engineers, metallurgists, or polymer chemists experienced in orthopaedic, wound care or ophthalmic medical devices to work within the Notified Body. Candidates with a strong background in general devices or implants will also be considered.

As part of the overall client management responsibilities, successful candidates will be competent to review critical design data (including risk analyses, biocompatibility, clinical investigation data, and post-market surveillance information) and to prepare recommendations for EC certifications. With at least five years in-depth medical device experience, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/ she has worked.

The position is based at our Hemel Hempstead office however occasional UK and overseas travel will be required.

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided.

All positions offer a competitive salary, pension and benefits, with a car for the home-based positions. Interested and qualified candidates should submit a copy of their CV, together with their current remuneration package and the appropriate reference for the vacancy.

Applications to Laura Baird, British Standards Institution, Human Resources Dept, Maylands Avenue, Hemel Hempstead, Hertfordshire HP2 4SQ. Email: PS.Applications@bsi-global.com Telephone: 01442 230442.

Successful candidates will be contacted within 2 weeks.

LIPID NUTRITION
The Natural Way to Better Health

Lipid Nutrition innovates and markets scientifically sound lipid ingredients from natural origin, which improve and maintain health and well being. Lipid Nutrition is a relative new division for IOI Loders Croklaan with a proven growth record and high growth expectations for the future. Their innovations are based on researching consumer needs, ongoing clinical trials and consumer focus group findings.

For our client Lipid Nutrition we are searching for a

SEASONED R & D DIRECTOR M / F
Lipid Nutritions' combination of well researched, high quality ingredient products and service make them the supplier of choice. They offer exceptional customer support in key areas, including: regulatory issues, application techniques, interpretation of scientific studies, product logistics, product certification, consistent product delivery.

Lipid Nutrition is focusing on the following three health areas: Body Weight Management, Heart Health and Natural Defense. The global objective is to become the dominant supplier in nutritional lipids for dietary supplements and functional foods.

The R&D Director is a.o. responsible for the R&D department by setting priorities, targets and milestones. He/she is responsible for the strategic integration of R&D and for Program Management.

Next to that the R&D Director organizes scientific intelligence and maintains an efficient scientific external network. He/she has to manage risks, i.e. the anticipation, assessment and minimization of environmental, safety, regulatory, PR and competitive challenges.

The ideal candidate preferably has a PhD in e.g. (bio)chemistry, biology, life science with experience in strategy, innovation, portfolio management and risk management. He or she has at least 8 years management experience in industrial R&D environment, with a proven track record in supplement/food product development. Location: Wormerveer (close to Amsterdam).

Candidates who are interested are invited to send their application by e-mail to Ms Frédérique Groen at Maes & Lunau Executive Search: frederique.groen@maeslunau.com, T +31 (0)20 535 62 56, www.maeslunau.com.

The Home Office Scientific Development Branch has dedicated teams of engineers and scientists from a wide range of backgrounds. We develop technology and provide technical guidance across a range of areas for the UK Police and government departments. The available post is for a self-employed contractor to provide assistance to others on a project investigating the detection of illicit drugs. The project involves the detection of illicit drugs in oral fluid using Surface Enhanced Raman Spectroscopy (SERS). The work will be carried out at the Sandridge Facility near St Albans, Hertfordshire.

We are looking for a candidate with a good honours degree or equivalent in general physics (or chemistry) with a good working knowledge of chemistry (or physics). Candidates should have knowledge of the theory and practical experience of Raman Spectroscopy/SERS knowledge and experience in the use of silver sol-gels and nanostructured surface development is also required. The contract, under government terms and conditions, will be dependent on qualifications and experience. Security clearance is required prior to starting in post and takes a minimum of 10 weeks to obtain. Personal and Public Liability Insurance is essential.

To apply send a full CV and an indication of salary to: Sarah Lamping, HOSDB, Sandridge, St Albans, Herts AL4 9HQ.

Further information about HOSDB is available on our web site
www.hosdb.homeoffice.gov.uk

Agencies need not apply. Please quote reference RP/RSDD/2.
Closing date for receipt of CV: 15th March 2006.
Rebuilt & Delivering

**Heads of Chemistry**  
Winnersh & Cambridge

Events over the last 12 months have transformed Vernalis. We have marketed products for migraine and Parkinson's disease as well as a strong pipeline of products in development and a new sales force in the US. Internal promotion has created these two senior roles, where research is focused in the CNS and oncology therapeutic areas.

Heading up our chemistry groups at Cambridge and Winnersh (near Reading), you will lead a team of chemists in the discovery, design, synthesis and optimisation of lead molecules. Working in multi-disciplinary teams with structural scientists, biologists, molecular modellers and DMPK/pre clinical development scientists the Winnersh role is likely to be more laboratory based whilst at Cambridge the bias will be towards projects.

Several years' experience of leading a team of chemists is essential along with a proven track record in the design of novel therapeutic agents, as exemplified by patents, publications and presentations and ideally for Cambridge, by experience with development candidates. For either role you will need to create and initiate with commitment whilst developing your team.

We offer excellent rewards for both positions and relocation assistance where necessary.

Find out more about our Company by visiting [www.vernalis.com](http://www.vernalis.com) and email your CV to Ted Smith, HR Director at careers@vernalis.com by 12th March 2006.

Vernalis  
Domantis is one of the fastest growing biotechnology companies in the UK and is pioneering the development of the next generation of antibody molecules: Human Domain Antibodies (dAbs). Domantis was founded in December 2000 and has established more than a dozen proprietary dAb therapeutic programmes, primarily in the fields of inflammation and oncology.

Domantis is in a strong financial position having raised $29 million in a private equity financing last December. We are currently expanding our Cambridge UK R&D team and are seeking to recruit high calibre, motivated scientists.

**Research Scientist/Associate – Assays**

The Assay Team is looking for scientists to characterise the binding properties and biological activity of dAbs. You should be a graduate scientist with at least one year's experience in designing, troubleshooting and validating ELISAs as well as some mammalian tissue culture experience. Experience of flow cytometry and biological functional assays would be an advantage. Excellent communication and organisational skills are essential.

You will be able to work flexibly, both independently and as an important member of a team within a highly creative and rapidly expanding company. Domantis offers a scientifically stimulating environment, competitive salaries, private medical cover, a contributory pension scheme and a generous share option package.

To be considered, please send a covering letter and detailed CV, including a full publication record and names of three referees, to jobs152@domantis.com. No agency applications will be considered at this stage.

For information about Domantis please visit our website at www.domantis.com

domantis
Mobility. The gift of movement that means you're free to go where you choose, make your own decisions and lead the life you really want - not just now, but tomorrow and the next day. For over 100 years we've been restoring movement to people suffering from pain and discomfort. In the process we've become a world leader in orthopaedic rehabilitation, or to put it another way - making life better for people. It's appropriate then that we're equally committed to liberating the working lives of our team here. Through the finest professional support and continued exposure to a wealth of absorbing projects. Join us at DePuy today and we can all look forward to a bright and active tomorrow.

**BioEngineer**

£25 - £40k plus benefits

Working in a team environment you will take full responsibility for the design, development, and technical enhancement of orthopaedic implants and associated instruments. The role will involve extensive customer collaboration and internal liaison with possibility of international travel. Degree qualified in Mechanical Engineering or related discipline with post graduate qualifications or related light/precision engineering industrial experience an advantage, you will possess excellent interpersonal, presentation, and communication skills. You will be analytically minded with a problem solving and innovative approach towards achieving objectives.

**Project Manager**

You will play a key role in driving multiple product development projects for our Hip and Knee businesses from concept to delivery. Your practical experience of best practice in project management methodology, together with your engaging personal style and excellent organisational skills will enable you to focus and inspire team members to achieve demanding milestones. Degree qualified in an engineering discipline, you will have previous experience of planning and controlling small to medium engineering projects. Passionate about achieving results, you can demonstrate the ability to build effective relationships and influence outcomes across diverse functions, cultures and organisational levels.

Interested? To find out more please send your CV with current salary details and indicate which job you are applying for to: Melanie Colwill, HR Manager, DePuy International, Number One, White Rose Office Park, Millshaw Park Lane, Leeds L51 0EA recruitment@dpygb.jnj.com

Closing date: 24 March 2006.

Safeguarding public health
MHRA

The Medicines and Healthcare products Regulatory Agency (MHRA), an Executive Agency of the Department of Health, is responsible for safeguarding public health by ensuring that all medicines, healthcare products and medical equipment meet the appropriate standards of safety, quality, performance and efficacy.

**Information Processing Regulatory Team Leader • circa £24,965**

**Information Processing Submission Centre Team Leader • circa £22,664 London**

The information processing unit is responsible for key aspects of the administration of Market Authorisations for medicinal products in the UK. Reporting to the Information Processing Manager, you will oversee the day to day allocation of the Information Processing Function's workload and co-ordinate resources in order to meet set targets and Service Level Agreements (SLAs). This will involve ensuring the accuracy, quality and timely production of case folders and determining which certain regulatory submissions require further medical or pharmaceutical assessment. You will be responsible for the development and performance of a team of 9 - 11 staff (depending on role). You will liaise with Agency teams and other internal customers regarding the submission process, data quality control and service provision. In addition, you will answer and resolve information processing queries and service issues and act as the key point of contact for queries from stakeholders both within and outside of the MHRA.

With a minimum of two years' experience at Team Leader level, you will have proven management, organisational and delegation skills plus the ability to ensure the delivery of work on time where there are a range of deadlines and competing priorities. Excellent verbal and written communication skills will also be complemented by demonstrable knowledge of the regulatory procedures surrounding the Licensing of medicinal products in the UK and Europe.

Please note that the full salary range for the Information Processing Regulatory Team Leader is £24,965 - £37,037. The full salary range for the Information Processing Submission Centre Team Leader is £22,664 - £32,499.

For the Information Processing Regulatory Team Leader position, you will have a degree in chemistry, medical chemistry, pharmacology, or another relevant scientific discipline or equivalent qualification.

**Scientific Classifier • circa £19,500 Depending on Experience**

London

The information processing unit is responsible for key aspects of the administration of Market Authorisations for medicinal products in the UK. As a Scientific Classifier in the unit, you will interpret case information and conduct Data Capture and Case Validation activities, ensuring that electronic case folders are ready for specialist assessment within the required timescales. Your key responsibilities will be to enter detailed scientific information and reference data for scientific submissions and index, split, rename and combine electronic dossiers to ensure total document formatting. You will also be responsible for checking fee and submission type and allocating the case folder to the relevant MHRA function for assessment. You will also respond to requests for information and utilise your scientific knowledge to validate scientific submission types. You must stay informed of both National and European regulatory procedures surrounding the licensing of medicinal products.

A graduate in life sciences or another relevant scientific discipline, you will be able to demonstrate excellent attention to detail when reviewing complex documentation and possess proven organisational and administrative skills. You will also possess good communication and interpersonal skills and have the ability to work to deadlines in a pressurised, fast paced environment.

The full salary range for the Scientific Classifier is £19,208 - £23,740.
Please note that all positions in the Agency require a minimum standard of IT literacy, including skills in MS Word and Outlook.

If these challenges inspire you, you can download further information and apply on-line via our website - www.mhra.gov.uk Similarly, you can download our application at this address and send your completed form via email to jobs@mhra.gsi.gov.uk or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: 17th March 2006.

Molecular Targeting and Imaging Group,
Paterson Institute for Cancer Research, Manchester Cancer Research Centre, Christie Hospital and university of Manchester.

Paterson Institute for Cancer Research

**Senior Postdoctoral Scientist**

- £24,325 - £36,497 (Includes 9% NCSS)
- Ref: PI/06/07

A Postdoctoral Scientist with experience in Molecular Nanotechnology and Multi-Modality Imaging or related field is required to join the Radiochemical Targeting and Imaging Group ([http://www.paterson.man.ac.uk/groups/rti.jsp](http://www.paterson.man.ac.uk/groups/rti.jsp)) to drive a project seeking to develop Molecular Nanotechnology Multi-Modality Imaging to study cancer biology and therapeutics. This position will seek to integrate and exploit the group's work on targeted imaging and multi-functional probe development to develop a new class of tumour targeted multi-functional nano-probes.

It is essential that you have experience in molecular imaging and nano-chemistry techniques including radio- and nano-particle chemical techniques. You should have evidence of publications in good scientific journals and the ability to work independently and in a team. The Group has close links with other academic and hospital imaging groups.

The post is available from April 2006 and is funded by CR-UK core grant for three years.

For informal enquiries please contact Dr Jamal Zweit on 0161 446 3152 or email: jzweit@picr.man.ac.uk

For further information on this position please visit our website [www.paterson.man.ac.uk/djs](http://www.paterson.man.ac.uk/djs).

To apply please download an equal opportunities form from our website and forward this with a full CV to Laura Humes (lhumes@picr.man.ac.uk) quoting the reference number above. For applicants who are unable to download this information please contact Laura Humes on 0161 446 3124 to have this information sent by post.

Closing Date: 30 March 2006.

*Salary is subject to review in summer 2006 on CR-UK pay scales.*

Safeguarding public health

MHRA

The Medicines and Healthcare products Regulatory Agency (MHRA), an Executive Agency of the Department of Health, is responsible for safeguarding public health by ensuring that all medicines, healthcare products and medical equipment meet the appropriate standards of safety, quality, performance and efficacy.

**Expert Committee Secretary** - Licensing Division • circa £23,000

London

In this role you will be responsible for all secretariat and administration activities of a group of Expert Committees and manage a small team of administrators.

We will expect you to build strong relationships with the Chairperson and other members of the designated Expert Committees and act as a key liaison between Expert Committee members and Agency Committee delegates and Assessors. In addition, you will coordinate the administration of the Persons Appointed process, oversee the production of the Expert Committees annual report and incorporate all changes in legislation or procedure to the operating procedures of all Expert Committees.

With a degree or equivalent qualification, you will have at least 3 years' experience of working in the pharmaceutical, medical sector and/or regulatory sectors. You must also be able to demonstrate effective customer service, management, organisation, problem solving and delegation skills and have the ability to build relationships at senior levels within and outside the MHRA.

Please note that the full salary range for the Expert Committee Secretary is £22,664 - £32,499.

**Expert Committee Support Senior Administrator** - Licensing Division • circa £20,000

London

We will look to you to assist the scientific Committee Secretary in undertaking all secretariat activities for an Expert Committee.

You will act as the key contact point between scientific secretaries and the central support function to ensure the needs of scientific Committee Secretaries are met in a professional and timely fashion, typically acting as the Assistant Secretary and second point of contact for Committee members. This will involve evolving a good relationship with the Chairperson and other members of the designated Expert Committees. You may also act as secretary to a small sub-committee and support and/or supervise administration assistants where appropriate to ensure the workload of the ECS function is completed within timeframes.

You will have at least 2 years’ experience of working in the pharmaceutical, medical sector and/or regulatory sectors. We will expect to see proven team working skills to work across functions and teams throughout the MHRA and have the ability to solve ill-defined problems. You will be proud of your communication, organisation and delegation skills, and have the confidence and ability to work in a pressurised, target driven environment, whilst maintaining high standards of quality.

The full salary range for the Expert Committee Support Senior Administrator is £19,209 - £23,740.

Please note that all positions in the Agency require a minimum standard of IT literacy, including skills in MS Word and Outlook.

If these challenges inspire you, you can download further information and apply on-line via our website - [www.mhra.gov.uk](http://www.mhra.gov.uk). Similarly, you can download our application at this address and send your completed form via email to [jobs@mhra.gsi.gov.uk](mailto:jobs@mhra.gsi.gov.uk) or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: 17th March 2006.
POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE

As an Equal Opportunities employer, the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

[2541-036 (2006) : 73]
It all starts with high performance relationships.

**Strategy & Procurement Manager** - High Performance Computing £50-59,000  Nr Reading, Berkshire

Tasked with maintaining the UK's nuclear deterrent, the Atomic Weapons Establishment is renowned as a global centre of scientific and engineering excellence. Our Aldermaston site, near Reading, was home to the nation's first Supercomputer and later this year, we'll be taking delivery of what is expected to be Europe's most powerful Supercomputer.

This latest purchase is just part of an ongoing commitment to stay leading edge, and in what is a high-profile and influential role, you'll be responsible for determining our Supercomputer procurement plans and strategy. As you can probably imagine, this will involve nurturing relationships with Supercomputer vendors across the globe, as well as the AWE scientists, engineers and procurement staff who constitute your client base.

It could be that you have experience in a similar Supercomputer environment, or that you're looking to make the move from a Supercomputer vendor. Either way, you'll need an in-depth technical knowledge of Supercomputer products themselves and a commercial understanding of the wider Supercomputer marketplace.

As well as the opportunity to continually develop your abilities within a challenging area, you'll enjoy a good benefits package that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme.

To find out more about this role and apply online visit [www.awe.co.uk](http://www.awe.co.uk). Alternatively, you cal call us on 0118 982 9009 for an application form.

AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age (up to 65) or responsibility for dependants. Successful candidates will be selected solely on their ability to carry out the duties of the post.

Because of the nature of the work undertaken at AWE, this post is required to meet special nationality rules and therefore is only open to British Citizens. All selected candidates will be required to undergo security clearance.

[www.awe.co.uk](http://www.awe.co.uk)

NOVARTIS
NOVARTIS INSTITUTES FOR BIOMEDICAL RESEARCH
The New Pathway to Drug Discovery
[2541-038 (2006) : 74]
Formed in 1986 and comprising 19 European Member States, EUMETSAT's role is to establish, operate and exploit European meteorological satellite systems. Data from these systems are not only essential for precise and accurate weather forecasting, they also assist global observation and climatological programmes and directly benefit national economies by enabling marine, agricultural, aviation and other industries to plan and act more effectively.

EUMETSAT's geostationary satellite programmes include the continuation of the current Meteosat system with a Meteosat Second Generation (MSG). The first MSG satellite was launched in August 2002, to provide continuity and improvement of the service well into the next decade. The second MSG satellite was launched in 2005 and the third MSG satellite at the nominal end of life of MSG-1. Preparation is under way for a fourth MSG satellite.

In addition to these two geostationary systems, an entirely new Low Earth Orbit (LEO) system is under development within the framework of the EUMETSAT Polar System (EPS) programme. EPS will provide the operational meteorological satellite service delivering earth observation data for extraction of meteorological and climate monitoring products starting late 2006.

**Head of Strategy and International Relations**

Ref. VN-06/02

As Head of Strategy and International Relations, you will assist EUMETSAT's Director General in implementing key areas of EUMETSAT strategy and develop related business areas in conjunction with existing and new partners. In particular, you will define and support the implementation of strategic plans for future satellite systems and establish and support the implementation of coordinated long-term plans for Earth observation. Furthermore, you will expand the funding base for future EUMETSAT programmes by identifying and cultivating additional partners to develop technical Programmes. You will also develop long-term plans for cooperation with other international satellite operators with a view to harmonising global Earth observation requirements and increasing the sharing of data and support capacity building in Earth observation in the African countries.

To be successful, you should have a University degree or equivalent in an environmental science, meteorology or a relevant technical area, and a minimum of 6 years experience in the planning and management of international satellite activities, with proven experience of successful negotiations. Experience acquired in an appropriate international organisation, would be an asset. Proven capacity for intellectual and managerial leadership is indispensable. Good interpersonal skills, with a proven ability to apply these to working within and across teams, internally and externally, is essential. The official languages of EUMETSAT are English and French. Candidates must be able to work effectively in one of these languages and also have a working knowledge of the other.

Based in Darmstadt, the post is offered on an initial four-year contract. Further information on the position and salary details can be found on the EUMETSAT web site: [www.eumetsat.int](http://www.eumetsat.int).

To apply, please send your CV in English or French with covering latter, quoting reference VN 06/02, to EUMETSAT, Mr. J. K. Myatt, Head of Personnel, Postfach 10 05 55, 64205 Darmstadt, Germany, or [recruitment@eumetsat.int](mailto:recruitment@eumetsat.int).

Please note that only applications from nationals of one of the EUMETSAT Member States can be considered and that applications will not be returned.

Closing date: 27 March 2006

Member states: Austria, Belgium, Denmark, Germany, Finland, France, Greece, Ireland, Italy, Luxembourg, The Netherlands, Norway, Portugal Slovakia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Barloworld Scientific
ASSISTANT PRODUCT MANAGER (MARKETING) - 2 Posts
£17,000-£19,000 per annum

Barloworld Scientific Laboratory Group is one of the world's leading manufacturers of Laboratory products, including reusable and disposable labware in glass and plastics and benchtop scientific equipment. We are a successful and profitable company with an annual turnover of £85 million and we employ over 1,000 people. For more information about the company, please visit our website (www.barloworld-scientific.com).

Due to planned growth within the organisation, two vacancies have arisen within the Marketing department at our head office in Stone for Assistant Product Managers, responsible for a range of products aimed at the Life Science market.

These positions offer an excellent opportunity to build a career in marketing within a leading global organisation.

The role involves a wide variety of marketing activities including Market Research, New Product Development, Pricing and Promotion. The job-holders would also be expected to support both the internal and external customers by providing product training and application support. A high level of end-user contact, both in the UK and internationally, will also be required.

The successful candidates must have a degree level qualification in a life science subject and preferably a business qualification in Marketing or Business Studies. Ideally, the candidate will have two years' work experience at the laboratory bench in a life science environment.

It is essential that applicants can demonstrate outstanding communication skills, enthusiasm and the ability to work within a team environment.

If you feel you can meet the above requirements, please apply in writing (indicating qualifications, experience and current salary) to:
The Human Resources Department
Barloworld Scientific Ltd Beacon Road
Walton Stone Staffordshire ST15 0SA
Tel: 01785812121 Fax: 0 1785 812104
E-mail: elizabeth.babilas@barloworld-scientific.com
Head of the APPLIED SCIENCE DIVISION (VN2846)
Rutherford Appleton Laboratory

CCLRC's Rutherford Appleton Laboratory plays a key role in UK science through its design and delivery of world class science facilities and programmes. Underpinning these activities are a number of core 'science-technologies'. Within the Applied Science Division these range from magnet and materials technology, through cryogenics and energy technologies, to high power target engineering and advanced engineering analysis. The division undertakes a wide range of projects, both within the UK and overseas and also operates the Engineering Instrument Pool on behalf of the EPSRC.

The successful candidate will have a proven track record in bidding for and running major scientific projects. He/she will have an established reputation, a technological background related to the work of the division, and will be someone who can communicate effectively with both scientific and non-scientific audiences. They must also be able to demonstrate the leadership and vision required to maintain the Applied Science Division, as a key component of CCLRC's future technology needs.

Responsibilities will include managing the 30 staff members of the division, developing and delivering a technology strategy for the Division, and successfully managing the portfolio of projects undertaken by the division, from 'new opportunities' to project completion. The successful candidate will advise the Head of CCLRC Technology on future requirements for infrastructure, assist in developing a quality management system that meets ISO9001 requirements, and ensuring the highest standards of health and safety practice within the division.

Starting salary will be up to £51,484 dependent on relevant skills and experience. In addition we offer an excellent index-linked final salary pension scheme, generous leave allowance and the opportunity to work in a stimulating environment in an attractive rural location.

Further information on this post is available from the Director Technology, Dr Mike Johnson (01235) 445418.

To apply, please obtain an application form from: HR Operations Group, CCLRC, Chilton, Didcot, Oxfordshire, OX11 0QX. Telephone (01235) 445435 (answer phone) or email recruit@rl.ac.uk quoting the relevant reference VN2846.

For more detailed information about the CCLRC please visit www.cclrc.ac.uk

All applications must be returned by 13 March 2006. Interviews will be held late March 2006.

SERVICES DEPARTMENT  ENVIRONMENTAL HEALTH

POLLUTION CONTROL OFFICER
Salary Scale 4/P1+ (£16,137 - £30,843 per annum) (with effect from 1st April 2006) (Salary and grade dependent on qualification, experience and responsibilities)

We need a motivated and enthusiastic Officer to help protect the environment of this beautiful part of Sussex for our residents and visitors.
If you have the ability to be a key member of a Team which is actively involved in a wide range of pollution related issues and environmental initiatives, we would like to hear from you. The successful candidate will be involved with investigating noise and pollution complaints, enforcement action, environmental monitoring, processes requiring permits under LAPPCC, developing and implementing the Council’s Contaminated Land Strategy, handling requests for Environmental information, as well as maintaining and querying databases to produce management information.
Suitable applicants for the post will be flexible, well organised, self-motivated individuals capable of undertaking projects with a minimum of supervision, whilst also working as part of a Team. You will display excellent oral and written communication skills, be assertive whilst polite and tactful, and skilled in the use of IT, particularly GIS and databases.
Further information and an application form can be obtained from the Human Resources Section, Arun District Council, Arun Civic Centre, Maltravers Road, Littlehampton, West Sussex BN17 5LF, or downloaded from our website at www.arun.gov.uk or sent by post by contacting the 24 hour recruitment line.
TELEPHONE: 01903 737727 FAX: 01903 713606 MINICOM: 01903 732765 (24 hour recruitment line)
CLOSING DATE: 17TH MARCH 2006
Arun has a commitment to equality of opportunity in employment.
If you have a disability which makes it difficult to complete our application form, please contact the Human Resources Department, who will assist you with your application.

ARUN DISTRICT COUNCIL
POSITIVE ABOUT DISABLED PEOPLE
[2541-046 (2006) : 76]
Advisory Committee on Pesticides (ACP)

**Government Advisers on Pesticides**
The ACP is established under the Food and Environment Protection Act 1985 (FEPA) to give independent advice to Ministers on all matters relating to pesticides. There are currently 20 Members on the Committee. Members serve an initial term of three years and the Committee meets up to seven times a year in York. Four ACP positions will become available in January 2007.

**Scientific and Environmental Members**
The Advisory Committee on Pesticides is looking for three new members to provide scientific advice to Government and the devolved Administrations on the safe and effective use of pesticides and other pest control methods.

**Lay Member**
We are also looking for one Lay Member (Consumer issues) whose function on the Committee is to provide input to the Committee's highly technical discussions and to provide a public explanation of the work done by the Committee. Such a role furthers the Government's intention that every aspect of the pesticides approvals system is open and transparent. Put simply, your function would be to reflect the everyday concerns of the consumer or the general public at Committee meetings.

We are specifically seeking expertise for the vacancies in the following areas:

**Ecology/Ecotoxicology (Job reference ACP/01)**
Expertise in ecotoxicology and environmental risk assessment. Scope for a range of expertise particularly relevant would be experience in experimental ecotoxicology of terrestrial and/or aquatic ecosystems. The post requires a breadth of expertise since the ACP deals with avian, mammalian, invertebrate and plant ecology.

**Toxicologist (Job reference ACP/02)**
Expertise in reproductive toxicology and in experimental reproductive toxicology, with an ability to relate experimental findings to human risk.

**Environmental Fate and Behaviour (Job reference ACPI03)**
Expertise in fate and behaviour of chemicals in the environment. Consumer Affairs Lay Member (Job reference ACPI04)

A Lay Member to represent the public interest from the consumer perspective on the ACP.

Potential applicants will need to be able to demonstrate their ability to contribute to detailed technical discussions. Committee Members serve an initial term of three years and the Committee meets about seven times a year in York. Scientific applicants should have considerable postgraduate experience and have gained recognition in the scientific community in their field.

The posts are part-time and voluntary, although modest travel and subsistence costs are met and attendance and preparation fees paid. Applicants should be aware that the work can generate a considerable amount of both public and media interest. Travel and subsistence costs will also be met for those attending interviews for these posts.

Appointments will be based on merit, with independent assessment, openness and transparency of process.

The Government and devolved Administrations are committed to the principles of equal opportunities and welcome applications from all sections of the Community regardless of gender, sexual orientation, race, colour, ethnic origin, religion or disability. Women, representatives of ethnic minority
communities and people with disabilities are currently under-represented on the Committees and applications from such people are therefore particularly welcome.

If you are interested in serving and have the necessary qualifications and experience, an information pack and application form are available from: Mrs Kathy Wood, Pesticides Safety Directorate, Room 312, Mallard House, Kings Pool, 3 Peasholme Green, York Y01 7PX. Tel: 01904 455707. Email: kathy.wood@psd.defra.gsi.gov.uk Interviews have been provisionally scheduled to take place end of June/beginning of July 2006 and to be held in York/London.

The closing date for applications is 16 April 2006.

Trawling for Fishery Scientists!

The Marine Institute vision is for a thriving maritime economy in harmony with the ecosystem and supported by the deliverance of excellent scientific services. The fishing industry is a key component of the maritime economy and the waters around Ireland contain the most productive fishing grounds in the NE Atlantic. The sustainable exploitation and management of these fish stocks must be underpinned by sound fishery science. Against this background, the Marine Institute seeks to recruit two high calibre fishery scientists to strengthen its stock assessment and advisory team.

**Team Leader Demersal Fisheries** Ref: FAA/TL/FEB06

The Team Leader will have special responsibility for leading a small team engaged in the collection, management and analysis of the data necessary to carry out assessment work on demersal fish stocks, both in house and at various ICES Working Groups. To be successful you must possess a relevant degree in a fisheries science, marine science or a related field, with a minimum of three years’ work experience in conducting scientific projects which included people and budgetary management. You will be able to demonstrate a higher level of experience in the use of Stock Assessment packages, Microsoft Office software and statistical packages. A proven track record in scientific report writing and publications is essential along with the ability to communicate effectively in all situations.

**Scientific Technical Officer - Monkfish Stock Assessment** Ref: DAF/STO/FEB06

You will join a team with specific responsibility for the scientific investigation on the status of the fish stocks exploited by the Irish demersal fleet. You will be responsible for the collection and primary analyses of demersal data that is collected under the data collection programme. You must possess a degree in a Biological Science or equivalent related subject and demonstrate a higher level of experience in statistical analyses as well as relational databases and data manipulation. The ability to write detailed scientific reports is essential along with experience of working aboard research and commercial fishing vessels.

A detailed job description for each position can be obtained from Human Resources in Galway. T: (091) 730400 or our web site [www.marine.ie](http://www.marine.ie)

Interested candidates should send an up to date Curriculum Vitae and Letter of Application by post to: Human Resources, Marine Institute, Galway Technology Park, Parkmore, Galway or via Email to recruitment@marine.ie

The last date for receipt of applications for the above positions is Friday 24th March 2006

The Marine Institute is an equal opportunities employer.

Achieve continuous improvement as our
Quality Manager
£33,330pa + benefits
Hampstead, London NW3

The Anthony Nolan Trust takes lives back from leukaemia by managing the UK's most successful bone marrow register. We created the turning point in the fight against leukaemia and our work continues to gain momentum.

Our small, informal, highly focused team now has an opportunity for a Quality Manager to design, implement and run a quality management system for the Anthony Nolan Trust and all issues relating to it.

The ANTHONY NOLAN Trust
Taking back lives from leukaemia

Your challenge will be to achieve continuous quality improvement in all departments, ensuring that we become more effective, efficient and totally compliant with all regulatory and statutory requirements. Working closely with the Chief Executive, Head of Histocompatibility Laboratories, and Head of Operations, you will participate in local management meetings and advise on QM matters, develop the quality manual and train staff to use it. Document control and quality of information will be high priorities.

A graduate, preferably in science, with 3 years' experience in a clinical laboratory and 2 years' experience of QM in a CPA/ISO9000 environment, you must have exceptional organisational, administrative and interpersonal skills.
PC literate and an excellent communicator verbally and in writing, you must be able to work both independently and as part of a tight-knit team.

For an application form, please contact Sarah Woodruff of the HR team, quoting reference N5136.

Tel: 020 7284 1234
recruitment@anthonynolan.org.uk
www.anthonynolan.org.uk

Closing date: Friday 24th March 2006.
Interview date wc: Monday 3rd April 2006.

To help concentrate our resources on our vital work, only short listed candidates will be contacted.

Assuring the quality of biological medicines
NIBSC

The National Institute for Biological Standards and Control is a multi-disciplinary scientific establishment which protects public health through standardization and control of biological substances used in medicine.

**Senior Scientist - Bioinformatics**
£28,710 to £42,000 p.a. • Ref SS.244/2(NS)
You will be able to take the lead in developing bioinformatics in the context of biological control and standardization as well as having some responsibility for more classical statistical analysis.

You will have a record of ability to carry out both independent and collaborative research and to communicate these results clearly. You can expect significant opportunities for career development, by leading collaborative research in application and development of bioinformatics in the field of biological medicines.

Ideal candidates will hold a PhD in Bioinformatics, Statistics or equivalent or have a significant record of post-graduate achievement in these areas.

**Statistician**
£19,153 to £27,648 p.a. • Ref SS.186/2(NS)
Joining a small team of experienced statisticians, you will be involved in the application and development of statistical methods for the analysis of biological assays. Ideally, you will hold or be completing an MSc in statistics or a related field and have an awareness and interest in the application of statistics in the biological/medical areas. However, new graduates with a good honours degree in statistics or a related field will be considered. You will need to demonstrate an aptitude to develop your statistical knowledge and expertise.

Full details for these positions can be found at [www.nibsc.ac.uk](http://www.nibsc.ac.uk)

To apply, please submit a full CV (2 copies), quoting relevant ref to the HR Dept, NIBSC, Blanche Lane, South Mimms, Potters Bar, Hertfordshire, EN6 3QG, or email HR@nibsc.ac.uk

Closing date for applications is 31st March 2006.

Fuel our future

Based Pangbourne, Surrey, with some global travel

We're aiming to create more energy for the world without compromising the resources of the planet. Our global fuels technology team is developing future differentiated fuels. Join us and you'll lead a range of technically challenging programmes and contribute to the development of fuels that have a reduced impact on the environment.

**Senior Product Development Technologist**
Leading programmes to support fuel developments, you'll use combustion fundamentals, combustion diagnostics, flow visualization and modelling toolsets, and deliver technical data based on fuel test programmes. You'll need at least five years' mechanical or combustion chemistry experience and a relevant degree, while a PhD in combustion chemistry or similar would be useful.

**Research Technologist**
You'll support fuel developments in combustion, base fuel and additive technology, using experimental rigs, and engine and vehicle tests. This will involve designing, managing and carrying out advanced tests. With five years' chemical or mechanical engineering experience and a relevant degree, you'll be comfortable coaching staff in fuel and engine technology tools and techniques. A PhD in engineering technology, combustion chemistry or similar is an advantage.

[2541-051 (2006) : 79]
Species Trade and Policy Officer
C.£28,000 GODALMING, SURREY

WWF is a global conservation organisation that is actively building a future in which people can live in harmony with the natural world. It is involved in a wide range of issues -from the conservation of endangered species to campaigning for regulation of toxic chemicals. Our work is crucial and stimulating and this is an exciting time to be part of our Species and Forests team.

Are you looking for an exciting position focussing on species conservation? If so, we are currently looking for a conservation professional, with campaigning and advocacy experience to join our Species and Forests team. This position is key to helping WWF-UK achieve its species conservation objectives, through working closely with the WWF Global Species Programme, other conservation organisations, TRAFFIC (the joint wildlife trade programme of WWF and IUCN) and governments (in particular the UK and EU). You will aid other internal departments with your knowledge and expertise that rely on timely and accurate information on species conservation and familiarity with international policy institutions that deal with species conservation and wildlife trade, in order to further the goals of the organisation.

Candidates will have an advanced degree in zoology and/or a related discipline and have a solid knowledge of species issues, with at least 5 years' experience in the sector. You will need excellent presentation and communications skills, experience of dealing with the media and the ability to work well within and across teams. With proven field experience and an understanding of developing country perspectives and livelihoods issues that relate to species conservation, you will have both the drive and commitment to achieve challenging goals, therefore a problem solving attitude is essential.

For more information about this opportunity, please visit www.wwf.org.uk/jobs

If you would like to play a key role in our future success, please send your CV and covering letter, to The Recruitment Officer, WWF-UK, Panda House, Weyside Park, Godalming, Surrey GU7 1XR or email: recruitment@wwf.org.uk When applying, please quote job code CHEC and state where you saw this post advertised.

Closing date: 16th March 2006.

Charles River Laboratories, provides fully comprehensive laboratory research, product development and clinical services. Charles River's 8000 employees serve clients in more than 50 countries.

Head of Bioanalysis
Ref: 07/971
Working closely with the Director of Clinical Science Services, you will provide leadership and strategic development to the Bioanalysis function of our European Clinical and Preclinical operations. A primary responsibility will be the growth of the business and the expansion of the department's customer base.

The department is located in a custom built laboratory facility and is equipped with the most up-to-date analytical equipment, including LC-MS/MS, LC-MS, HPLC, GC-MS and GC as well as a range of automated sample preparation instruments.

With complementary facilities in Canada and the USA, the Department is part of a truly global Bioanalytical function. You will work closely with your counterparts to ensure that our service delivery is consistent across the group and able to respond dynamically to business needs.

With responsibility for 25 staff who provide the full range of bioanalytical services in support of preclinical studies and clinical trials, you will be able to develop people and ensure that your team is motivated and focused on shared goals at all times, whilst fostering effective internal relationships.

Ideally, you'll have a first degree in Chemistry and preferably a postgraduate qualification and a minimum of ten years' experience within a CRO or pharmaceutical environment. Experience of managing Bioanalysis in support of large-scale clinical trials would be particularly advantageous. You should also be able to demonstrate you are a motivated, self-starter, with effective interpersonal, management and organisational skills. In addition, you should have experience in interacting with customers and business development and be willing to undertake travel on a regular basis as part of the department's marketing activities.

This position will be at a senior level and the remuneration and benefits package will reflect this.

Commercial Development Manager
Pharmaceutical/Clinical Sciences Ref: 78/662
Working closely with the Director of Client and Regulatory Services, our scientific departments and your team, you'll construct, instigate and supervise a global sales and marketing plan which will increase the company's profile. In this key role, you'll ensure that financial targets are met, generate an appropriate forward load and determine future areas of activity.

So, you'll need excellent business development abilities coupled with leadership qualities and strong interpersonal skills. In addition, you'll have ten years' postgraduate experience, ideally gained in one of the following scientific disciplines Bioanalysis, Central Laboratory Services/Immunology or DMPK. In return, we offer a competitive salary, excellent benefits package and first class working conditions.

To apply please send your CV - including an indication of current salary and salary expectations - to the Human Resources Department, Charles River Laboratories, Tranent, East Lothian EH33 2NE UK or by email to hr.euro@eur.crl.com Please quote relevant reference.

CCLRC

Accelerator Physicists (VND295)

The Council for the Central Laboratory of the Research Councils, CCLRC, is one of Europe's largest multidisciplinary research organisations supporting scientists and engineers world-wide.

Opportunities exist for physicists to join the CCLRC Accelerator Science and Technology Centre (ASTeC). This Centre's role is to perform particle accelerator research and development and the team you would join are experts in the design, construction and development of advanced high-energy particle accelerators.

Vacancies in accelerator physics exist at Band 6 for graduate level physicists, at Band 5 for physicists with relevant postgraduate experience and at Band 4 for established accelerator physicists.

The work, based at Daresbury Laboratory in North Cheshire, would support the development of UK and international accelerator projects, including the commissioning and development of the energy recovery linac prototype (ERLP), the design of a highly advanced national light source 4GLS and research towards the International Linear Collider (ILC).

We are looking for highly motivated scientists with an independent outlook, but who must be able to work in a team. You should have a willingness to take or lead a variety of tasks, both experimental and theoretical.

For both Band 5 and 6 we are looking for candidates with a good honours degree in physics. Previous experience of accelerator physics, although welcome, is not essential; training and career development opportunities will be available in this core professional activity of CCLRC. Additionally for Band 5 level, relevant postgraduate or possibly post-doctoral experience, which could be applied with appropriate training to the field of accelerator physics, is required. At Band 4 level the candidate should be an established physicist with a successful track record of innovative research in the field of accelerator physics, including a proven ability to lead such research.

A willingness to travel within the UK and overseas is essential, as is the desire to participate in large multinational collaborations. The job may involve an element of experimental accelerator research out of normal working hours.

Additional information is available from Susan Smith (s.l.smith@dl.ac.uk +44(0)1925 603260) and also from http://www.astec.ac.uk/jobs.

The salary for Band 6 is up to £20,765, for Band 5 it is up to £26,911, and for Band 4 is up to £34,163 pay award pending. A recruitment and retention allowance may also be offered. Salary on appointment is awarded according to relevant experience. An index-linked pension scheme, flexible working hours and a generous leave allowance are also offered.

Application forms are available from Recruitment Office, Human Resources Division, CCLRC Daresbury Laboratory Daresbury, Warrington, Cheshire, WA4 4AD. Telephone (01925) 603467 quoting reference VND295/06, or email recruit@dl.ac.uk

More information about ASTeC and CCLRC is available from http://www.astec.ac.uk/

Applications must be returned by 20 March 2006.

The Council for the Central Laboratory of the Research Councils (CCLRC) is committed to Equal Opportunities. CCLRC is a recognised Investor in People. A no smoking policy is in operation.

ADINSTRUMENTS
making science easier

ADInstruments is expanding and currently requires two outward going, self motivated individuals to join its European sales team. ADInstruments manufactures the PowerLab range of computer based data acquisition systems, used by scientists and doctors in universities, research institutes and hospitals throughout the world.

Field Sales Application Scientist - UK North (Reference ADI-132)
As an Application Scientist for ADInstruments you will be expected to sell and advise customers in a highly technical market, and must have the ability to develop a good understanding of the ADInstruments product range and its practical application areas. It is essential that all applicants hold a suitable science degree in either the life sciences or bioengineering, have previous research experience in a scientific laboratory, medical or pharmacological environment, and are already located in the north of England. The position will be field based involving regular travel throughout the required territory (north of England and Scotland).

Salary will be dependent on qualifications and experience and will form part of a package commensurate with a field sales position.

Application Support Scientist (Reference ADI-133)
As an Application Support Scientist for ADInstruments you will be expected to provide educational, technical and sales support services to both customers and the field sales team.

For this position applicants should hold a suitable science degree and have experience working in a scientific environment in either a technical support or research role.

This position will be based at our office in Oxfordshire but will involve travel throughout the UK and Europe. It is essential that you are able to communicate fluently in both written and verbal French as this position will involve extensive support of our French customers.

Salary will be dependent on qualifications and experience

**Editor**
THE ROYAL SOCIETY OF TROPICAL MEDICINE AND HYGIENE

*Transactions of the Royal Society of Tropical Medicine and Hygiene*

*The Transactions of the Royal Society of Tropical Medicine and Hygiene* is an international journal that publishes original papers on tropical medicine and international health. The journal publishes results of high quality clinical and basic research studies, especially those that have an impact in on clinical practice and public health in tropical countries. The *Transactions* publishes invited reviews, significant papers and abstracts of papers and posters presented at meetings of the Society, rapid reports, together with correspondence in response to papers published in the journal, and reviews of books of interest to the international community.

The Editor of the *Transactions* is responsible for the management of the scientific content of the journal and of the editorial team involved in the review and assessment of submitted scientific papers.

The post of Editor of the Transactions will become vacant in July 2006.

The Society is seeking an enthusiastic and creative individual to:
- maintain the Journal's high publication standards
- oversee the Journal's peer review process
- steer the Journal's editorial development
- ensure the Journal's continuing success
- work closely with the Journal's Editorial team

The appointment is part-time (approximately 20 hours a week) and will be for 3-5 years initially.

Previous editorial experience is desirable but not essential. An editorial budget and competitive salary will be available to the successful candidate.

Any person who would be interested in being considered for the post is invited to submit a letter of interest and C.V. to the Editorial Search Committee, attention John Horton, RSTMH, 50 Bedford Square, London WC1B 3DP. A detailed Job Description is available on request from the same address.

Closing date for applications: 30th April 2006

The United Nations Environment Programme is recruiting a Secretary of STAP (P-5) to be located in UNEP's Office in Washington DC. The Scientific and Technical Advisory Panel (STAP) is an advisory body to the Global Environment Facility, which is a financial mechanism that provides grant and concessional funds to developing countries and countries with economies in transition for projects and activities that aim to protect the global environment. UNEP is an Implementing Agency of the GEF, along with the United Nations Development Programme and the World Bank. The STAP comprises 15 eminent scientists appointed by the Executive Director of UNEP in consultation with the GEF partners. UNEP provides secretariat support to the STAP. The Secretary of the STAP supervises day-to-day functioning of the STAP Secretariat in providing support to the Panel.

Duties of the Secretary to STAP: Supervise the day-to-day functioning of the STAP Secretariat in providing management, coordination, and administrative support to the Panel. Facilitate and guide the implementation of the STAP work programme, and oversee the management of the STAP roster of experts. Help to organize and oversee the interaction between STAP and the GEF Council, GEF Secretariat, and Implementing Agencies. Appraise STAP members of strategic scientific and technical issues affecting GEF policies, operational strategies, and programmes. Assist in mobilization of scientific and technical expertise in the GEF through STAP, its working groups and Roster of Experts, so that STAP functions as a conduit between the GEF and the scientific community at large.

Qualifications:
Advanced university degree, preferably Ph.D. in natural or social sciences (e.g. sociology, development studies) relevant to a study of global environmental issues. Interdisciplinary background, experience in managing international scientific and technical programmes. Ability to interact with the scientific community at the highest level is a must. Excellent command of English; working knowledge of other United Nations languages (Arabic, Chinese, French, Russian and Spanish) an asset. Minimum ten years' work experience. Working at the science-policy interface an asset.

Department of Genetics Arabidopsis Gene Silencing  
£16,739 - £20,553

Applications are invited for this new post in Ian Furner's laboratory to work on a BBSRC funded project investigating gene silencing in Arabidopsis.

You will be performing analysis of cytosine methylation using bisulphite sequencing, expression analysis using real-time PCR and examining siRNA using specialised northern blots. You will work under the guidance of an experienced postdoctoral researcher, gaining valuable research skills in an exciting field of research. Practical experience in molecular biology would be an advantage, although full training will be given. A background in biology, genuine enthusiasm and a willingness to learn are essential.

This is a full-time position funded by the BBSRC for eighteen months starting in spring 2006 and may, subject to the availability of funding, be extended for a further period.

Informal enquiries should be addressed to Dr Simon Engledow: e-mail: sde24@mole.bio.cam.ac.uk For further details and a PD17 application form please see http://www.gen.cam.ac.uk/About/Vacancies/vacancies.htm or call (01223) 333999. Completed applications should be sent to Mrs T Oakley, Department of Genetics, Downing Street, Cambridge CB2 3EH. E-mail: toakley@gen.cam.ac.uk Please quote ref: GC102.

Closing date: 31 March 2006.
UNIVERSITY OF CAMBRIDGE

The University offers a range of benefits including attractive pension schemes, professional development, family friendly polices, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

**Lecturer in Biology of Animal Welfare**  
£28,829

Based in the internationally-recognised Animal Behaviour and Welfare Research Group within the School of Clinical Veterinary Science at Langford, this role will involve developing an active research programme in one of the following broad areas: 1) vertebrate behavioural or stress physiology, 2) vertebrate sensory or biology, or 3) decision making and animal motivation. You should have an interest in developing collaborative links with animal welfare scientists and will also contribute to teaching, particularly on the Animal Behaviour and Welfare BSc programme.

You will have, or be expected to achieve, an excellent international research profile in a biological subject that is relevant to animal welfare assessment, which will complement existing strengths within the University of Bristol. You will have a degree and PhD (or equivalent) in a relevant subject, a good publication record commensurate with age and experience and the ability to lead and motivate people. This is a full-time, permanent position.

For informal enquiries please contact Prof CJ Nicol on (0117) 928 9473 or e-mail c.j.nicol@bristol.ac.uk

Further details and an application form can be found at [www.bristol.ac.uk/vacancies](http://www.bristol.ac.uk/vacancies). Alternatively you can telephone (0117) 954 6947 or e-mail recruitment@bristol.ac.uk (stating postal address ONLY), quoting reference number 12002.

The closing date for applications is 9.00am, 22nd March 2006.

EXCELLENCE THROUGH DIVERSITY

LEARNING DISCOVERY ENTERPRISE

Lectureship in Pharmacology
£24,352 - £36,959

For this lectureship based in the Department of Physiology and Pharmacology, you will be suitably qualified with experience in smooth muscle electrophysiology and Ca$^{2+}$ signalling. The post will be funded for three years in the first instance. You will have a PhD in an appropriate discipline, a proven record of research achievement and will be expected to develop a research programme and attract external funding.

For an application pack (available on request in alternative formats for applicants with a disability), visit Vacancies at our website www.strath.ac.uk or contact the Personnel Office, University of Strathclyde, Glasgow G1 1XQ, tel: 0141548 4133 (24 hour Voicemail Service) quoting Ref 19/06.

Applications closing date: 24 March 2006.

Some University posts will be subject to a pre employment Disclosure Scotland Check.

We value diversity and welcome applications from all sections of the community.

Research Associate (MRI Physicist)
Cardiff School of Biosciences

You will join a multi-disciplinary team of Chemists, Psychologists and Neuroscientists working on novel MRI techniques, plasticity, learning and memory and studies involving implantation therapies to cure neurological disease. You will be employed to operate a 9.4T small bore MRI machine and maintain a service for Neuroscience and related research within the School of Biosciences.

You should have a PhD in any area of Chemistry, Physics, Biological or Medical Sciences related to experimental studies involving MRI and have at least 2 years' experience with MRI. This post is fixed-term for 3 years.

Salary: £20,044 - £30,002 per annum

For an application pack and details of all our vacancies, visit www.cardiff.ac.uk/jobs Alternatively email vacancies@cardiff.ac.uk or telephone +44 (0) 29 2087 4017 quoting vacancy number 115.

Closing date: 23 March 2006
The position of Laboratory Manager/Chief Technician is available within the Institute of Cancer, Barts and The London School of Medicine and Dentistry, and will be based in the School's state-of-the-art Cancer Research UK-funded Centre for Molecular Oncology at Charterhouse Square. The laboratory consists of approximately 65 staff involved in research into cancer. This position offers a challenging range of responsibilities and the opportunity to develop a career in laboratory management.

Duties include responsibility for financial planning and control, including consumables / equipment purchasing, technical management, maintaining an overview of accommodation status and requirements within the Centre, co-ordinating personnel, safety and training activities within the Centre, including acting as the Centre's Safety Advisor. Other duties include day-to-day supervision of junior technical staff and providing support and advice to the Director and Institute Manager on institute-wide technical practices. You should have a strong background in laboratory research (ideally with formal qualifications at degree level or equivalent) with good organisational, communication, management, financial and interpersonal skills. You should have experience of laboratory management and have strong IT skills.

This is a non time-limited post with guaranteed funding until September 2010. Future funding of the post is determined by 5-yearly performance reviews of the entire programme by the charity. This is a full-time post and is available immediately, with a starting salary in the range £33,408 - £39,093 per annum inclusive of London Allowance, depending on experience.

Informal enquiries about this post can be made to Professor Nick Lemoine (nick.lemoine@cancer.org.uk).

For further information and an application form, please contact our 24-hour recruitment line on 020 7882 6149 or email: csg-recruit@qmul.ac.uk quoting the reference number 06057/KM. Alternatively, visit the Human Resources website on http://www.hr.qmul.ac.uk/vacancies/

The deadline for return of completed application forms is 5pm (GMT) on 17th March 2006. Forms should be returned via email to csg-recruit@qmul.ac.uk or by post to: Recruitment Office, Campus Management Team, Barts and The London School of Medicine and Dentistry, Queen Mary University of London, The Lodge House, Charterhouse Square, London EC1M 6BQ. Applications must not be sent directly the Centre for Molecular Oncology.

[2541-072 (2006) : 84]
The University of Sheffield
Academic Neurology Unit, Division of Genomic Medicine

Research Technician (Fixed-term)
Salary from £20,235 - £22,774 per annum, with the potential to progress to £24,886

The post holder will join the translational neuroscience group headed by Professor Mimoun Azzouz, and will use molecular and cellular techniques to generate viral vectors for gene therapy treatments for neurodegenerative diseases such as motor neuron disease. Applicants should hold relevant qualifications in some aspect of biological science and will have previous experience of molecular biology. This post is available immediately and is tenable for 12 months.

Closing Date: 16 March 2006 Ref. R3864

Committed to equality through diversity. For full details and application pack visit: www.sheffield.ac.uk/jobs or e-mail: jobs@sheffield.ac.uk Tel: 0114 2221631(24 hrs) Please quote Ref. in all enquiries.

[2541-073 (2006) : 84]
The Medical Research Council Epidemiology Resource Centre, wishes to appoint a Research Assistant to take part in a programme of research into the effects of fetal and childhood nutrition on adult disease. The post is based in Southampton, but relates mainly to a programme of research taking place in India. You must be willing to work flexible hours and be able to travel within the UK and, on a regular basis, for periods of up to a month in India.

The post is designed to develop research skills. Tasks will be varied, ranging from data cleaning / coding, proof reading, and organising hospitality for visiting academics, through to developing research methods (for example the measurement of diet, physical activity and body composition in adults and children), training field staff in these techniques, and the analysis and writing up of research data. You will work alongside a team in Southampton of doctors, statisticians and systems analysts, and with research teams in India.

We are looking for a science graduate with a Masters degree, who is interested in developing a career in epidemiological research. The most appropriate background subjects would be Epidemiology and Public Health, and / or Nutrition, but because of the variety of tasks required for this post, graduates from other disciplines would be considered, given willingness to learn. You should be computer-literate, well-organised, self-motivated, a good communicator and good at solving problems.

A UK driving licence is essential.

For informal enquiries contact Dr Caroline Fall on 023 8077 7624 or email: chdf@mrc.soton.ac.uk

The post is full-time and fixed-term for two years with the possibility of an extension, in which case there may be an opportunity to enrol for a PhD in a topic allied to the research programme. Salary will be in the range of £23,457 - £28,850 per annum depending on qualifications and experience.

An application form and further particulars may be obtained from the Human Resources Department (M), University of Southampton, George Thomas Building, Highfield, Southampton SO17 1BJ, tel: 023 8059 2750, email: recruit@soton.ac.uk or minicom: 023 8059 5595. Alternatively, visit our website www.jobs.soton.ac.uk

Closing date for applications 23 March 2006.

School of Engineering
Electronic, Electrical and Computer Engineering

Research Fellow
Applications are invited for a Research Fellow to work on an EPSRC-funded project on superconducting microwave filters for radio astronomy. The Emerging Device Technology Research Centre has been working on the microwave applications of superconductors for a number of years. The fabrication technology is well established and there is enormous effort in the demonstration of high-performance microwave devices and systems. The successful candidate will work on the development of new microwave filter structures for applications in radio astronomy. The work is in collaboration with Jodrell Bank radio observatory, and the high-performance filters will be tested out on a number of their telescopes.

The successful candidate is not expected to have experience with superconducting materials but will preferably have worked in the area of microwave engineering.

Starting salary in the range £23,457 - £30,607 a year (potential progression on performance once in post to £32,490). The post is available immediately until 31 March 2008.

Informal enquiries can be made in strict confidence to Prof Mike Lancaster, tel: 0121 414 4317, e-mail: m.lancaster@bham.ac.uk

Application forms (returnable by 24 March 2006) and details from Personnel Services, University of Birmingham, Edgbaston, Birmingham B15 2TT. Tel: 0121 415 9000; web: www.personnel.bham.ac.uk/vacancies

UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Sir William Dunn School of Pathology

Postgraduate Research Scientist
Salary on University's RA1 B scale: £20,004 - £25,565 p.a.
A graduate position funded by a grant from the International AIDS Vaccine Initiative (IAVI) is available for 3 years in the laboratory of Dr Quentin Sattentau. The post will involve help in day-to-day running of the laboratory and learning and teaching a variety of techniques to other members of the group. The successful candidate will also participate in one or more projects designed to investigate the molecular basis of human immunodeficiency virus infectivity and viral resistance to antibody neutralisation. The successful candidate is expected to have obtained a good degree in virology, microbiology or a related area of biological sciences, have good organisational skills and some previous laboratory experience.

Applications with a full CV and the names and addresses of three referees should be sent to the Administrator, Sir William Dunn School of Pathology, South Parks Road, Oxford OX1 3RE (fax: (01865) 275515, e-mail: administration@path.ox.ac.uk). The closing date for applications is 31st March 2006. Please quote reference QS/08/006.

The University is an Equal Opportunities Employer.
[2541-076 (2006) : 85]
Physical Oceanographer
£20,044 to £27,929 per annum  Ref: RA252

We seek a Physical Oceanographer with experience in modelling and theory of the overturning circulation to work on Southern Ocean dynamics and its influence on the carbon cycle of the Earth to work with Professor Andy Watson, Dr Neil Edwards and colleagues in the 5** School of Environmental Sciences, University of East Anglia and 5-rated Department of Earth Sciences, Open University. The project is funded by the NERC QUEST programme. The research involves testing theories for how Southern Ocean mixing and circulation may have changed between glacial and inter-glacial times, and how this may have influenced atmospheric carbon dioxide concentrations. The work will involve modelling and theory of the dynamics of the global ocean, concentrating on the Southern Ocean, and its response to changes in forcing by the atmosphere.

Applicants must have a PhD in physical oceanography previous experience in numerical modelling and a strong mathematical background, as well as a familiarity with the carbon cycle and the oceanic processes controlling natural concentrations of atmospheric carbon dioxide.

The post is available from 1 April 2006 for a period of 3 years.

Further particulars are available at http://www.uea.ac.uk/env/vacancies.html

Informal enquiries can be made to Professor Andy Watson, e-mail: a.watson@uea.ac.uk or Dr Neil Edwards, e-mail: n.r.edwards@open.ac.uk

Closing date: 17 March 2006

Further particulars and an application form can be obtained from the University's web page at: http://www.uea.ac.uk/hr/jobs or by e-mail at: hr@uea.ac.uk or by calling the answerphone on 01603 593493 or by mail to the Human Resources Division, University of East Anglia, Norwich NR4 7TJ.

[2541-077 (2006) : 85]
Applications are invited for two Advanced Fellowships funded through the Scottish Universities Physics Alliance (SUPA), one to be held at the Department of Physics and Astronomy, University of Glasgow (Ref 11973/DPL/A3), and the other to be held at the School of Physics and Astronomy, University of St Andrews (Ref PS109/06). You will join a new Scottish collaboration of highly active research groups targeted at addressing some of the principal challenges involved in developing and understanding the properties of nanoparticles, and in exploring their potential applications. For the St Andrews position we seek applicants who demonstrate a strong interest in the preparation and synthesis of nanoparticles via colloidal routes. For the position at Glasgow we seek applicants with expertise in nanomagnetism and/or nanoassembly.

Full application and job details can be found at http://www.supa.ac.uk/SUPA_F/Jobs/Jobs.php

Closing date extended to: 24 March 2006.
Clinical Trials Monitor
£26,120 - £33,330
This appointment is for one year in the first instance.

The International Centre for Circulatory Health is looking for an experienced Clinical Trial Monitor to join our dynamic team. This is an excellent opportunity to consolidate your skills in an exciting academic research environment. The postholder will be responsible for monitoring clinical trials to GCP/FDA standards in various regional study sites around the UK and overseas.

The successful candidate will have a good science degree or equivalent and organisational skills gained in a research environment. Accuracy, attention to detail, a flexible approach to working hours and a willingness to travel, including overnight stays, are essential. It is also imperative that the postholder has an excellent command of written and spoken English. This post would suit someone with relevant experience of monitoring clinical trials and a proven ability to deal appropriately with people at all levels.

To obtain an application form go to: [http://www.imperial.ac.uk/employment](http://www.imperial.ac.uk/employment) or write to the Recruitment Assistant, HR Division, Imperial College London, Medical School Building, Norfolk Place, London W2 1 PG, quoting reference number MJ028/06.

Please note that CVs will not be considered if submitted without a completed application form.

Closing date: 16 March 2008.

**INVESTOR IN PEOPLE**

Middlesex University is working towards equality of opportunity. Job share applications will be considered.

[2541-081 (2006) : 86]
Epidemiologists/Medical Statisticians

Department of Public Health and Primary Care
£20,044 - £30,002 pa
(according to qualifications and experience)

Required to join a dynamic, multi-disciplinary team working on large-scale research into the molecular and genetic causes of heart attacks.

You should possess a relevant first or postgraduate degree in epidemiology, medical statistics or a closely related discipline and relevant experience. The main focus is on the collation, analysis and synthesis of large epidemiological datasets.

The appointment will be for up to two years on the Research Assistant / Associate grade.

Further information and application details can be obtained from Vanessa White, Department of Public Health and Primary Care, Strangeways Research Laboratory, Wort's Causeway, Cambridge CB1 8RN. Tel: (01223) 741302. Fax: (01223) 741339. E-mail: vjw22@medschl.cam.ac.uk Closing date: 15 March 2006. Interview date: 29 March 2006.

The Department operates a non-smoking policy.

UNIVERSITY OF CAMBRIDGE

The University offers a range of benefits including attractive pension schemes, professional development, family friendly policies, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

[2541-082 (2006) : 86]
A NERC funded postdoctoral position is available from March 2006 for a period of three years (the first 1.5 years based at UEA and the second 1.5 years at Oxford). The goal of the research is to establish the role of the Major Histocompatibility Complex (MHC) in sexual selection in birds, using the red junglefowl, Gallus gallus, and its domestic subspecies, G. g. domesticus, as model systems. The researcher will help develop a molecular protocol to screen for MHC variation and then use this to; (i) determine the extent to which sexual selection is MHC-mediated under natural conditions, and (ii) to experimentally identify the mechanisms of pre- and post-insemination sexual selection through which the MHC influences variation in paternity.

Applicants must have, or be about to obtain, a PhD in a relevant discipline such as evolutionary or molecular ecology and have a keen interest in sexual selection and sperm competition. Practical experience in modern molecular techniques, such as PCR, cloning and sequencing, is essential. Field experience/animal handling will also be a benefit.

The project will be undertaken jointly at UEA and Oxford. At UEA, the researcher will be based with Dr D S Richardson in the School of Biological Sciences (RAE 5-rated), and will be part of the Centre for Ecology, Evolution and Conservation (CEEC). The School and research centre provide excellent research facilities and a stimulating and dynamic research environment. Further information about the school can be found at [http://www.uea.ac.uk/biol](http://www.uea.ac.uk/biol) At Oxford the researcher will be based with Dr T Pizzari in the Edward Grey Institute of Ornithology, at the Department of Zoology of the University of Oxford. The Department of Zoology at the University of Oxford has a long-standing reputation for world class research and teaching. The EGI is one of the fastest-growing groups of the Department, and conducts research in behaviour, ecology, evolution and conservation of birds, with a strong emphasis on understanding organisms in their natural environments. Further information about the Department and the EGI can be found at [http://www.zoo.ox.ac.uk/](http://www.zoo.ox.ac.uk/)

Informal enquiries to Dr David S Richardson ([david.richardson@uea.ac.uk](mailto:david.richardson@uea.ac.uk)) or Dr T Pizzari ([tommaso.pizzari@zoo.ox.ac.uk](mailto:tommaso.pizzari@zoo.ox.ac.uk)).

Closing date: 16 March 2006.

Further particulars and an application form can be obtained from the University's web page at: [http://www.uea.ac.uk/hr/jobs](http://www.uea.ac.uk/hr/jobs) or by e-mail at: [hr@uea.ac.uk](mailto:hr@uea.ac.uk) or by calling the answerphone on 01603 593493 or by mail to the Human Resources Division, University of East Anglia, Norwich NR4 7TJ.

**POSITIVE ABOUT DISABLED PEOPLE**

[2541-083 (2006) : 87]
School of Cancer Studies - Division of Pathology
The successful applicants will be working on the role of tumour suppressor genes, transmembrane receptors for growth factors and hormone receptor genes and the alternative splicing of these genes in hormonally regulated cancers (breast/ovary and prostate). Informal enquiries for both posts to Professor Christine Gosden on 0151 706 4964: email: cgosden@liv.ac.uk

**Postdoctoral Research Fellowship**
£26,401 - £30,607 pa
We are looking for an enthusiastic Scientist for a three year Postdoctoral Research Fellowship in molecular genetic oncology. You should have a working knowledge of a wide range of experimental techniques, including molecular cloning and sequencing methods, preferably including experience with RT-PCR of mammalian genes, gene expression studies, microarrays and mammalian biotechnology databases. You will have a PhD and ideally post-doctoral experience and a track record of publication.
Quote Ref: A/033/NS

**Research Assistant**
(Molecular Genetic Oncology)
£22,111 - £23,457 pa
It is envisaged that the findings will advance new strategies for diagnosis, prognosis and therapy of these cancers, especially with regard to hormone refractory disease.

You should be an enthusiastic Scientist, with experience in molecular biology/molecular genetics that includes molecular cloning, RT PCR, gene expression and gene sequencing methods. Postgraduate qualifications would be advantageous. This is a one year post. Quote Ref: A/032/NS

Department of Veterinary Pre-clinical Sciences

**Postdoctoral Researcher**
£26,401 pa
An enthusiastic individual with a background in Protein Chemistry/ Molecular Biochemistry is needed to help drive a BBSRC funded project focusing on the molecular basis for muscle performance. You will be pivotal in this collaboration between the Protein Function Group and Muscle Research Group in the Faculty of Veterinary Science at Liverpool. You will have a Life Science degree and a relevant PhD. Ideally you will have experience in mass spectrometry techniques and you should have knowledge of, or be willing to learn, techniques in muscle physiology including intracellular calcium measurements and muscle mechanics. The post is available for three years.
Quote Ref: A/031/NS

Closing date for all posts: 24 March 2006

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY
[2541-084 (2006) : 87]
Department of Haematological Medicine at King's College London is a centre of research and clinical excellence, with one of the largest haematopoietic stem cell transplantation programmes in Europe. In addition to the other School- and College-wide services, there are in-house state-of-the-art facilities, including laser dissection microscopy, transcription profiling, proteomics and GMP laboratories for the production of cell and gene therapy investigational medicinal products for clinical evaluation. The Department has an active clinical, translational and basic research programme with a number of specific areas of focus, including cell cycle regulation and epigenetics, functional genomics, gene therapy and leukaemia immunobiology.

Following a generous grant of £1.4m for the start of the Burton Research Programme in Myeloma, the Department wishes to initiate a programme of basic and translational research aimed at better understanding of the molecular basis of myeloma and development of more effective therapeutic strategies.

Applications are now invited for appointments in each of the following positions:

**Lecturer (non-clinical)**
An established record of research excellence in the study of cell and molecular biology of haematological malignancies is an essential requirement for this position. Additional interest/expertise in stromal cell interactions and analysis of the role of leukaemic stem cells in disease progression will be an advantage.

Salary will be on the Lecturer B Non-Clinical Academic scale ranging between £31,152 and £37,577 (inclusive of London Allowance), depending on qualifications and experience. Please quote reference number A2/MCD/546/06.

**Clinical Cytogeneticist**
Previous experience in clinical cytogenetics with an extensive knowledge of fluorescent in situ hybridisation (FISH). Previous research experience essential, as is experience in G banded analysis. The main role will be to establish cell separation of bone marrows from myeloma patients and the subsequent use of FISH with a view to enhancing diagnostic capabilities. Appointments will be made between £22,367 and £32,325 (including London Allowance), depending on qualifications and experience. Please quote reference number W3/MCD/543/06.

**Postdoctoral Research Associate**
Previous research experience in cell and molecular biology is required and experience in cell/molecular immunology and/or gene therapy-related research will be an advantage. A major focus of work will be analysis of myeloma cell immunology and development of immune therapy-based approaches for the treatment of residual progressive disease. Salary will be on the RA1A scale ranging between £22,367 and £27,888 (including London Allowance), depending on qualifications and experience. Please quote reference number W0/MCD/544/06.

**Research Assistant in Enabling Technologies**
This position, which will be based within the enabling technologies group in the Department, will help with the application of proteomics, SNP and expression array technologies to the analysis of myeloma and its response to therapy. Salary will be on the RA1A scale ranging between £22,367 and £27,888 (including London Allowance), depending on qualifications and experience. Please quote reference number W0/MCD/545/06.

All appointments will be made according to qualifications and experience and for a period of up to 5 years in the first instance.
To receive an application pack please e-mail recruitdi@kcl.ac.uk or send an A4 self-addressed envelope to the Personnel Department, 4th Floor Capital House, 42 Weston Street, London SE1 3QD. Alternatively, visit www.kcl.ac.uk/jobs where a full job description and person specification are available when you view this advert on the vacancy bulletin.

Informal inquiries can be made to Professor Ghulam J Mufti, Head of Department, by email (ghulam.mufti@kcl.ac.uk) or by telephone 020 7346 3080.

Please quote the appropriate reference number on all correspondence. Closing date for applications is 23 March 2006.

Equality of opportunity is College policy

KING'S College LONDON
IGBMC
Généétique et de Biologie Moléculaire et Cellulaire

A position for an advanced post-doctoral researcher in molecular and pre-clinical cancer research is available at the Institut de Génétique et de Biologie Moléculaire et Cellulaire (IGBMC) in the department of Hinrich Gronemeyer.

Applicants should possess a PhD in a relevant biological science and have at least 2 years of post-doctoral experience.

[2541-087 (2006) : 88]
University of Brighton  
School of Pharmacy and Biomolecular Sciences

**Reader/Professor**  
from £35,254 to £44,328 (Reader) or £47,562 (Professor)

For this new role we would welcome applications in any area of Biomedical research, but wish particularly to encourage applicants whose experience and expertise would strengthen and complement the existing research profile of the school. The University of Brighton is one of the most active-research post-1992 universities. The School of Pharmacy and Biomolecular Sciences was 5-rated in the 2001 Research Assessment Exercise and has particular strengths in Biomedical Materials, Applied Microbiology, Pharmacology and Biology of Disease, Molecular Design and Health Care Psychology.

The successful applicant should be recognised internationally as a leading scientist in their field and have an exceptional research and publication record. You will be expected to lead an active research group, make a wider contribution to research within the school and participate in the teaching of your speciality.

For informal enquiries contact either Professor Adrian Bone on (01273) 642120;

**POSITIVE ABOUT DISABLED PEOPLE**

Working for equality of opportunity
[2541-088 (2006) : 89]
Applications are invited for a Senior Laboratory Technician post available in Professor A L Harris' laboratory to study the mechanisms of resistance to Tamoxifen in randomised trial therapy for breast cancer. This is funded by Cancer Research UK Translational Research Committee for a two-year period. Previous expertise in handling tumour samples, producing tissue microarrays, cutting of sections, staining and evaluating sections is necessary. Experience of extraction of slides for analysis of RNA or DNA, maintaining a database and basic statistics would be desirable. The aim is to evaluate new pathways relating to hormone resistance, to help understand their outcome of the trial on the study and devise new trials and develop insight into the mechanisms of hormone resistance. Previous experience in cell biology or molecular biology would be an advantage.

For further information, please contact Professor Adrian L Harris (e-mail: aharris.lab@cancer.org.uk) tel. (01885) 222457. To apply, please send a covering letter and CV with contact details of three referees to Professor A L Harris by e-mail or by mail to: Professor A L Harris at Cancer Research UK, Molecular Oncology Laboratories, Weatherall Institute of Molecular Medicine, John Radcliffe Hospital, Headington, Oxford OX3 9DS. The closing date for applications is 16th March 2008.

The University is an Equal Opportunities Employer.

[2541-089 (2006) : 89]
The University of Edinburgh
THE UNIVERSITY OF EDINBURGH

The University of Edinburgh is an exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow’s world.

Research Fellowships in Epidemiology (2)
£27,929 - £36,959

Two research fellowships are being offered as part of a DEFRA/SFC Veterinary Training and Research Initiative award to Professor Mark Woolhouse in Edinburgh and Professor Stuart Reid in Glasgow. These prestigious fellowships are for three years from September 2006. One fellow will be based in Edinburgh and one in Glasgow.

Applications are invited from individuals wishing to work on any aspect of quantitative epidemiology relevant to animal or zoonotic disease, but preference will be given to projects which complement existing research in the host group (see www.epi.vet.ed.ac.uk and http://www.gla.ac.uk/faculties/vet/research/index.htm). You may be at any stage of your career but should have a PhD or equivalent research experience and/or a veterinary qualification. You will have opportunities for training in state-of-the-art quantitative techniques.

Applicants for both posts should apply via the University of Edinburgh.

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131650 2511. Ref: 3005572NS. Closing date: 23 March 2006.

Committed to Equality of Opportunity

[2541-090 (2006) : 89]
UWE BRISTOL
Research Associate/ Nitric Oxide Research

www.uwe.ac.uk/jobs

Faculty of Applied Sciences

This is an exciting opportunity to investigate the generation and release of nitric oxide, a key signalling molecule, from plant pollens. Funded by The Wellcome Trust, this is a collaborative project with the University of Bristol.

Funding is for one year and you should have a PhD in an appropriate subject.

Salary £24,300.

For an informal discussion about the post please contact Dr John Hancock on 0117 32 82475.

Visit our Website to see full details and to complete an on-line application form, or telephone our 24 hour answerphone service on 0117 32 82890 to request documents by post.

Closing date for applications is 16 March 2006.

Please quote reference number. R/10458/NS.

University of St Andrews
The University is committed to equality of opportunity
BBSRC-funded PhD Studentships

Three and four year PhD research studentships are available for October 2006 in the RAE 5-rated Schools of Biology, Chemistry and Physics. Projects are available across a range of modern and interdisciplinary research areas including structural biology, biochemistry, virology, biological chemistry, enzymology, neurobiology, cell biology, physiology, computational biology and biophotonics.

Full details are available at [http://biology.st-andrews.ac.uk/postgrad/bbsrc](http://biology.st-andrews.ac.uk/postgrad/bbsrc)

MRes in Structural Proteomics

The Centre for Biomolecular Sciences offers a one year MRes degree in Structural Proteomics. The course consists of three months of lectures and practicals followed by two 14 week extended research projects, and can constitute the first year of a four year PhD studentship. More details are available at [www.st-andrews.ac.uk/~glt2/MRes](http://www.st-andrews.ac.uk/~glt2/MRes)

Students should have, or expect to gain, a first or upper second class degree in Biological or Physical Sciences.

For further Information contact Postgraduate Secretary, School of Biology, Gatty Marine Laboratory, University of St Andrews, St Andrews, Fife KY16 8LB, tel: 01334 463472 or e-mail: pgbiology@st-and.ac.uk

Ph.D OPPORTUNITIES

TWO fully-funded Ph.D. studentships are available for 3 years from September 2006, in this friendly, research-orientated and dynamic department. Applications are invited for well-qualified students wishing to undertake research in either: Environment and Society, or Environmental Processes, (see http://geography.lancs.ac.uk/ for details). Closing date for applications: 20th March 2006.

MASTERS OPPORTUNITIES

Applications are also invited for our innovative and nationally- and internationally-recognised Masters programmes:
• M.Sc. in Environmental Informatics
• M.Res. Environment and Development (Overseas Placement)
• M.Sc. Resource and Environmental Management

Fully- and part-funded NERC studentships are available for the M.Sc. in Environmental Informatics. Additional bursaries may be awarded by the Department to well-qualified applicants for any of the three schemes (see http://geography.lancs.ac.uk/ for details).

Application packs may be obtained (quoting reference 06/GTA) from: Mrs Marlene McNaught, Postgraduate Secretary, Department of Geography, Lancaster University, Lancaster LA1 4YB. Tel: 01524 593736 Fax: 01524 847099. Email: m.mcnaught@lancs.ac.uk

A campus university dedicated to excellence through research and teaching
GlaxoSmithKline Industrial Collaborative Studentships
Available from October 2006

We are delighted to invite applications for our collaborative studentships between leading academic institutions and GlaxoSmithKline. Each project offers you an exciting opportunity to combine studying for a PhD with gaining industrial experience in a world leading company.

As well as GSK's unique training and resource opportunities, these awards also provide a valuable contribution towards project consumables, travel to conferences, production of your thesis and accommodation whilst working at one of our research sites. GlaxoSmithKline will be collaborating on over 80 PhD studentships this year. Places are still open for the following projects:

**BBSRC**
Characterisation of the key viral and cellular determinants of HCV replication in a cell culture model.
Dr Mike McGarvey, Faculty of Medicine, Imperial College London, mmcgarvey@imperial.ac.uk

Mechanisms of airway remodelling after exposure to environmental allergens.
Dr Clare Lloyd, Leukocyte Biology, Imperial College London, c.lloyd@imperial.ac.uk

Characterisation of inflammation associated with chronic pain.
Dr Richard Williams, Cytokine Biology and Cellular Immunology, Kennedy Institute of Rheumatology, Imperial College London, richard.o.williams@imperial.ac.uk

An investigation of bioavailability of different minerals from fortified food using a Caco-2 cell model.
Professor Sue Fairweather-Tait, School of Medicine, Health Policy and Practice, University of East Anglia, sue.fairweather-tait@bbsrc.ac.uk

Assessment of brain activity *in vivo* following manipulation of biological targets implicated in cognitive processes - Analyses using electroencephalography (EEG), microdialysis and pharmacological MRI.
Professor Steven Williams, Neuroimaging Research, Institute of Psychiatry, s.williams@iop.kcl.ac.uk

Identification and characterisation of the effects of food substances which increase perceived energy levels.
Dr Michael Heinrich, Centre for Pharmacognosy and Phytotherapy, School of Pharmacy, michael.heinrich@ulsop.ac.uk

Novel ligands and binding modes of protein kinases by high field NMR spectroscopy.
Professor Michael Overduin, Institute of Cancer Research, University of Birmingham, m.overduin@bham.ac.uk

Mechanisms underlying central neuroinflammation; implications for chronic pain.
Professor Kevin Whitehead, Division of Neuroscience, University of Birmingham, k.j.whitehead@bham.ac.uk

Investigation of widely distributed retroviral-like proteinase sequences.
Dr Colin Berry, School of Biosciences, Cardiff University, berry@cardiff.ac.uk

Chronic airways inflammation models induced by repeated antigen: Airways function and sensitivity to anti-inflammatory agents.
Professor Ken Broadley, Welsh School of Pharmacy, Cardiff University, broadleyKJ@Cardiff.ac.uk

Molecular modelling of G-protein coupled receptors.

3513
Dr Christopher Reynolds, Department of Biological Sciences, University of Essex, C.A.Reynolds@essex.ac.uk

The regulation of mRNA translation in response to xenobiotics and role of microRNA species.
Dr Tim Gant, MRC Toxicology Unit, University of Leicester, ajhi2@le.ac.uk

Biochemical and mutational analysis of the extracellular ATP-binding domain and antagonist binding site of purinergic P2X receptors.
Dr Richard Evans, Department of Cell Physiology and Pharmacology, University of Leicester, rje6@leicester.ac.uk

Development of genotoxicity screening assay technologies: Investigation of the regulation of the human GADD45a gene in response to carcinogens and other toxins.
Dr Richard Walmsley, Faculty of Life Sciences, University of Manchester, richard.walmsley@manchester.ac.uk

Development of innovative biomarkers of testicular toxicity.
Dr Richard Sharpe, MRC Reproductive Sciences Unit, r.sharpe@hrsu.mrc.ac.uk

Imaging MALDI mass spectrometry for direct drug distribution analysis.
Dr Malcolm Clench, Biomedical Research Centre, Sheffield Hallam University, M.R.Clench@shu.ac.uk

Applications of wavelet analysis to the computer representation of molecules.
Dr Valerie Gillet, Department of Information Studies, University of Sheffield, v.gillet@sheffield.ac.uk

EPSRC
Development of three component 4+1 cycloadditions. Dr Dave Carbery, Department of Chemistry, University of Bath, D.Carbery@bath.ac.uk

Dr Robin Bedford, School of Chemistry, University of Bristol, r.bedford@bristol.ac.uk

Assessment of tract-specific atrophy in the temporal lobe as a potential imaging biomarker for neurodegenerative processes.
Dr Geoff Parker, Division of Imaging Science and Biomedical Engineering, University of Manchester, Geoff.Parker@manchester.ac.uk

Ion mobility spectrometry combined with mass spectrometry for the analysis of formulated pharmaceuticals.
Professor Colin Creaser, Department of Chemistry and Physics, Nottingham Trent University, colin.creaser@ntu.ac.uk

An asymmetric synthesis of (+)-cavicularin. Professor David Harrowven, Department of Chemistry, University of Southampton, dch2@soton.ac.uk

Doubly tethered intramolecular-Michael approach to complex natural products.
Professor Richard Taylor, School of Chemical Sciences, University of York, rjktl@york.ac.uk

EPSRC EngD
The EPSRC Engineering Doctorate is a 4 year course enhanced by the provision of taught material in both management skills and technical areas.
Quantum mechanical determination of chemical properties and reaction mechanisms in drug discovery for an interactive web tool.
Dr Paul Popelier, Department of Chemistry, University of Manchester, paul.popelier@manchester.ac.uk

MRC
Developing lentiviral vectors to study the role of connexins in neuronal signalling and cognition. Dr James Uney Henry Wellcome Laboratories, University of Bristol, james.uney@bristol.ac.uk

Phenotypic and molecular analyses of neural stem cells. Professor Austin Smith, Cambridge Stem Cell Initiative, University of Cambridge, Austin.Smith@ed.ac.uk

Health economic aspects in the management of COPD. Professor Andrew Briggs, Health Policy and Economic Evaluation, University of Glasgow, A.Briggs@clinmed.gla.ac.uk

Magnetic resonance spectroscopy investigations of transgenic mouse brain to determine how proteins involved in Alzheimer's disease alter function. Professor Steve Williams, Imaging Science and Biomedical Engineering, University of Manchester, steve.williams@man.ac.uk

Studies of the role of the Syk tyrosine kinase in B cell function using conditional gene targeting. Professor Victor Tybulewicz, Division of Immune Cell Biology, National Institute for Medical Research, vtybule@nimr.mrc.ac.uk (http://www.nimr.mrc.ac.uk/phd/projects/thirty2/)

Effects of persistent pain on the function of endocannabinoids in vivo.
Dr Vicky Chapman, Department of Physiology and Pharmacology, University of Nottingham, Victoria.Chapman@nottingham.ac.uk

University co-funded
New transition-metal-catalysed methodology for heterocycle synthesis.
Dr Hou Wai Lam, Department of Chemistry, University of Edinburgh, h.lam@ed.ac.uk

Dorothy Hodgkin Postgraduate Award
Identification and manipulation of novel regulators of Th1/Th2 development.
Dr Giovanna Lombardi, Department of Nephrology and Transplantation, King's College London, giovanna.lombardi@kcl.ac.uk For details of eligibility and the closing date for this award, please visit http://www.kcl.ac.uk/research/research-students/dhpa.html

Structure determination of G-protein coupled receptors. Professor So Iwata and Dr Bernadette Byrne, Division of Molecular Biosciences, Imperial College London, b.byrne@imperial.ac.uk

Marie Curie Host Fellowships for Early Stage Training
Queen's University Belfast and GSK have been awarded 6 PhD-EST fellow or visiting-EST fellow positions. For information regarding the projects, "The chemistry and biochemistry of non-chiral C-nucleosides" and "The chemoenzymatic synthesis and biochemistry of chiral carbasugars", eligibility and application procedures, please contact Dr Marie Migaud, m.migaud@qub.ac.uk http://www.ch.qub.ac.uk/staff/migaud/mm.html

To apply for any of these awards please send your CV plus details of two referees by email to the academic supervisor at the email address given by 24 March 2006, unless otherwise stated. Please indicate your preferred project.
The Research Councils have strict eligibility requirements for their studentships. Details can be found on the relevant Research Council website - www.epsrc.ac.uk, www.bbsrc.ac.uk or www.mrc.ac.uk.

The Dorothy Hodgkin Postgraduate Awards also have strict eligibility requirements, please see www.rcuk.ac.uk/hodgkin/ for more details.

Please ensure you check these eligibility requirements before contacting the academic supervisor.

THE UNIVERSITY OF WARWICK
Warwick HRI - Wellesbourne

Postgraduate Studentships available October 2006
3 Crop Science BBSRC 4-year Studentships:
Project 1 - Genetic characterisation of post harvest spoilage in lettuce under the supervision of Professor D Pink and Dr V Buchanan-Wollaston
Ref: HRI10-026

Project 2- Characterisation of genetic loci controlling shelf life in broccoli under the supervision of Dr V Buchanan-Wollaston
Ref: HRI11-026

Project 3 - Targeted genetic selection for improved varieties of lettuce under the supervision of Dr S Jackson
Ref: HRI12-026

Applicants must satisfy BBSRC criteria. Further information on the BBSRC eligibility guidelines can be found at http://www.bbsrc.ac.uk

HDC 3-year Studentship (available immediately):
Project 4 - Epidemiology of the bulb-scale mite (Steneotarsonemus laticeps) in Narcissus under the supervision of Dr R Collier
Ref: HRI08-026

Up to 3 Departmental 3-year Studentships on the following projects:

Project 5- Integrative Biology of Signalling networks in Arabidopsis
Ref: HRI13-026

Project 6 - Experimental genetics and biodiversity in crop plant species
Ref: HRI14-026

Project 7 - Genetic diversity and domestication of cereal and pulse crops
Ref: HRI75-026

HDC and Departmental Studentships are available to overseas candidates. It is a requirement of the Studentships that candidates from outside the UK and EU will pay the overseas student fees and will need to pass an IELTS or TOEFL English Language proficiency test. Further information on the language proficiency can be found at: http://www2.warwick.ac.uk/services/international/regionalinfo/language/

You must have or expect to receive a first or upper second class honours degree in a Biological Science subject.

There is an annual stipend of £12,300. For Project 1 (BBSRC CASE) there will be an additional £2,500 per annum.

Application packs are available by e-mail: whri.phd@warwick.ac.uk, Tel: 024 7657 5231 (24 hour answer phone), or at: http://www.warwick.ac.uk/fac/sci/hri2/study/mphilphd/. An application form must be completed if you wish to be considered for these Studentships.

Closing date: 31 March 2006

www.warwickhri.ac.uk
PhD studentships are available within this RAE 5* A-rated Department. We are currently recruiting in the following research areas:

Medicinal & Biological Chemistry, Pharmaceutical Biology, Pharmaceutical Technology, Pharmacology, Regenerative Medicine, Pharmacy Practice.

Candidates should hold or expect to gain a good Honours degree in a relevant scientific discipline. For further details and application procedure see www.bath.ac.uk/pharmacy
email: pg-pharm@bath.ac.uk

Scottish Crop Research Institute

**PhD STUDENTSHIP**

A PhD Studentship suitable for UK/EU students is available for three years funded through the Horticulture Link Programme. The project is based at the Scottish Crop Research Institute in collaboration with Strathclyde University and leading companies in the soft fruit industry. A start date from 1st April - 1st October 2006 is envisaged. The project aims to understand the genetic basis of flavour in red raspberries with a view to developing marker assisted breeding for fruit quality parameters such as sweetness and acidity and the balance between them. Candidates should have a BSc Hons. in plant molecular biology or a related discipline.

Further details can be obtained by contacting J. Graham at Julie.Graham@scri.ac.uk Covering letter and CVs should be sent to, Human Resources Office, SCRI, Invergowrie, Dundee, DD2 5DA, by 10th March 2006, quoting the reference JG/PhD/06.

The Institute is an equal opportunities employer and is grant-aided by the Scottish Executive Environment & Rural Affairs Department (SEERAD).

[2541-103 (2006) : 95]
UNIVERSITY OF SOUTHAMPTON
New Courses in Complexity Science

New MSc programme and 15-day Spring School

The University of Southampton is pioneering new developments in Complexity Science. Learn how to use advanced techniques to understand the robust, adaptive and self-organising properties of biological and natural systems, and to exploit these properties to address the pressing problems presented by the increasing scale and connectivity of today's engineered systems.

The courses address the critical challenges currently facing the computational and engineering industries by focusing on the underlying principles of complexity in common with biological systems. Topics include spatially-embedded complex systems; adaptive modelling of complex data; principles of biomolecular organisation; evolution of complexity. We also offer an intensive Spring School (29th March - 12th April) covering some of the same topics, designed for postgraduate students and industrial employees. A limited number of free places are available to students.

The insider Cancer research
Let's get it together

The UK's cancer research funders have realised that they need to change the way they support science if they want to beat the disease. Michael Day reports

TAKE a look at cancer research in the UK and you will find a new urgency. Cancer is overtaking circulatory disease as the biggest killer in the western world. Not surprisingly, the amount of money and effort poured into the search for new treatments is huge.
With a reputation for innovative basic science, the UK has always punched above its weight in terms of Nobel prizes, but has a poor record when it comes to cancer death rates. Policy-makers and researchers are hoping this will change with a major shake-up of the field. So far, the efforts appear to be working.
The pivotal development came five years ago with the launch of the National Cancer Research Institute (NCRI). The 19 biggest cancer research funders came together to form this umbrella organisation to coordinate research activities and avoid duplication of effort. Already it has flagged up neglected areas of research and treatment, such as palliative care and lung cancer, and made them priorities. Another of its successes has been the creation of a database known as the Informatics Initiative. Its goal is to bring information gained in every area of cancer science and medicine together into one accessible place.
The NCRI has also helped create the National Cancer Research Network, which has boosted recruitment for cancer clinical trials. According to Aoife Regan, a research programme manager at the NCRI, around 10 to 15 per cent of all cancer patients are now entered into a clinical trial, and the UK leads the world in this respect.
There is more in the pipeline. A follow-up to the clinical network is planned, which should provide some of the most exciting opportunities for non-clinicians in cancer research. Soon 14 new Experimental Cancer Medicine Centres at universities and research institutions across the country will provide more opportunity and extra funding for biomedical scientists to work on translational cancer medicine. This is the crucial crossover between lab work and large-scale clinical testing. Many believe this trend will lead to the emergence of US-style comprehensive cancer centres, where cutting-edge research and treatment go hand in hand. Leading figures in the NCRI feel that by breaking down the barriers between the different parts of the cancer research effort, the process of improving treatment will be speeded up. This will have an impact on the kinds of skills researchers will need. Roland Wolf, a cancer scientist and the director of the Biomedical Research Centre at the University of Dundee says that in addition to the obvious need for molecular biologists, geneticists and cell biologists in the next few years, there will be an increasing demand for scientists who have broad interests and training, because the process of creating new drugs, from basic genetics to clinical trials, will need research that overlaps many traditional disciplines.
Cancer Research UK has put in place a number of schemes to encourage the researchers it supports to break out of a silo mentality, for example by training chemists in pathology.

Back to basics
Basic research will remain just as important to the overall cancer effort, however. Richard Sullivan, the head of clinical programmes at Cancer Research UK, which along with the Department of Health is funding the Experimental Cancer Medicine Centres, notes that cancer research starts a lot further upstream than early drug tests - perhaps further than many people realise.
He says that a third of all studies funded by cancer groups are not picked up by scientific search engines using the word "cancer". "This shows that we're funding incredibly fundamental and important research, which is often of major importance to other fields of medicine." This is a theme picked up by Wolf. "Traditionally, scientists see themselves as working only on cancer or diabetes or neuroscience. But if we learn how to switch on a particular gene it could turn out to be as important in other fields of medicine.
Basic research is rapidly becoming more generic. Often cancer research charities have to defend their willingness to spend a certain proportion of their funds on research into basic organisms. But that's the kind of work that Paul Nurse did on yeast - and he got a Nobel prize.'
Some believe that UK cancer research funders could do more to support research like this. "There needs to be more funding in basic research. And for that reason the US, which spends so much on pure research, remains the real centre of excellence," says Andy Wright, a cancer bioscience director at AstraZeneca.

That is not necessarily the case, according to other cancer scientists. It is true that many of the primary cancer funders such as Cancer Research UK are redirecting their support towards translational research to accelerate treatments from lab to patient, but not at the expense of basic research, says Nic Jones, the director of the Paterson Institute and the Manchester Cancer Research Centre.

Get personal

One area where basic research is now showing its worth is personalised medicine. A consensus is emerging that personalised cancer treatment will prove to be one of the most important – if not the most important – focus for research in the next decade. This has already begun with the arrival of Herceptin, an engineered antibody that targets the HER2 receptor protein, which is over-expressed on the surface of tumour cells in around 25 per cent of women with breast cancer.

"The next big thing will be distinguishing between the different types of say, breast cancer, and treating them appropriately" says Sullivan. Clinicians need the basic science to be done that will allow them to distinguish, for example, between a slow-growing, relatively benign tumour and aggressive cases where a treatment with harsher side effects is justified.

"This is the future of cancer research," says Wolf. "It will be broken down into the nature of the individual's cancer and therefore we will know how that person's cancer should be treated.' This will mean distinguishing between tumours on a molecular or genetic level and generating a range of different treatments.

A new generation of biomedical scientists will be needed for this task. The vast amounts of genetic and pharmacologic information generated will need to be stored and analysed, Wolf says. As a result, scientists with both computing skills and biological training will be needed. People with expertise in medicines' modes of action and chances of interaction will also be in demand. This area is a glaring weakness in the UK, according to Wolf. "Pharmacologists are terribly underrepresented in cancer research. We need cutting-edge pharmacologists working in every research centre: unfortunately most don't have them," he says.

The Paterson Institute is trying to fill this gap. It now offers a new training programme in pharmacology for clinical scientists. "We're just waking up to the fact that pharmacology is desperately needed," says Jones. Pharmacologists trained in animal experimentation are even rarer in the UK, Wright says. "In-vivo pharmacology is a dying art. It is expensive to teach and there are ethical and security concerns, but it is vital and there is a huge shortage of qualified people," he says. "It sometimes seems as if everyone has become a gene-jockey, and that the conventional sciences have been forgotten.' The shake-up of the UK's cancer research effort has also brought the salaries and career structure of biomedical scientists under the spotlight. It is high time that salaries were improved for these scientists in academia and the NHS, Jones believes. "For too long we've relied on the goodwill and sacrifice made by scientists and that has to change." The good news is that things are improving, he says.

Sarah May, the executive head of strategy at the Institute of Biomedical Science, a professional body for scientists, notes that a biomedical researcher working in the NHS can now earn up to £60,000 a year. She says the career paths are now much more attractive as well.

"It sometimes seems as if everyone has become a gene-jockey"

Another big step towards overhauling the working conditions of biomedical scientists will begin later this year when yet another grouping of the great and the good – this time the UK Clinical Research Collaboration – begins a review of the career structures of biomedical scientists and how these might be improved. This follows its recent investigation into the careers of physicians who do scientific research. The report singled out the lack of flexibility in their career paths. As a result, physicians on their route to consultancy should now find it easier to take time out for research, without being penalised for doing so.

At the NCRI Regan says the upcoming review for non-clinical scientists will take a fundamental look at the structure of biomedical science. "No one has any idea how many people with which skills are
"doing what," she says. "Unlike clinicians who have the Royal Colleges to keep tabs on them and promote their cause, biomedical scientists are a very disparate bunch."

Jim Elliott, head of research at Macmillan Cancer Relief, agrees that many of the skills applicable to cancer research are underestimated. For example, Macmillan Cancer Relief, which has historically had more interest in treatment than biomedical science, is funding areas such as the psychological impact of cancer (see "Mind and body", opposite).

A second untapped research area is cancer prevention. In the UK this is changing with the introduction by the National Prevention Research Initiative, another creation of the NCRI, which has just announced a disparate collection of 26 research projects aimed at preventing cancer and other major illnesses.

Whether researchers are studying prevention, gene pathways in yeast or the psychological responses to chemotherapy, they all share one aim: the reduction of suffering caused by cancer. And the opportunities to join the quest have probably never been better. "It's a fantastic time to be working in cancer research," says Jones. "There has never been a more exciting or optimistic period. In the coming years and decades really important and effective treatments will arrive."

• Medical Research Council
• R&D Office, Northern Ireland
• The Roy Castle Lung Cancer Foundation
• The Scottish Executive
• Tenovus
• Welsh Assembly Government
• The Wellcome Trust
• Yorkshire Cancer Research

A new generation of biomedical scientists is needed

Mind and body
Cancer organisations are realising that a previously neglected research area could shed new light on the cancer effort and help them better direct their funding. Insights into the psychological impact of cancer...
could lead to more effective clinical trial design and treatments with which patients are better able to comply. A recent study by psychologists at the University of Southampton illustrates this trend. When the team quizzed the public and cancer patients, they discovered that quality of life was much more important to patients than new treatments and increased life expectancies, whereas non-sufferers thought the opposite.

"Psychological aspects are so important," says Jim Elliott of Macmillan Cancer Relief, which funded the study. "As more people get cancer and more people live longer with cancer, we need to be able to help patients with the anxiety and depression and side effects of the disease and its treatment."

**Why satisfactory is not enough**

Scientists have a greater responsibility to society than merely publishing their findings, says Alex Markham, chief executive of Cancer Research UK.

Our knowledge of cancer is growing at an explosive rate, making this a fascinating time to be involved in cancer research. Yet I believe that scientific endeavour should not finish at the point of publication. We must make sure it is recognised as the foundation of public policy. Decisions that affect us all must be made with the best research evidence available.

The passing of the smoking ban in England in February was the most significant advance in public health in the country since the link was made between smoking and cancer more than 50 years ago. The level of support from MPs for a total ban was overwhelming and unanticipated. We had campaigned long and hard for this legislation, but we should not have needed to wait half a century for legislators and the public to accept and act upon the science.

As we continue to translate scientific findings into new treatments for patients, we must also translate science into information that creates responsible public policy and helps people reduce their risk of disease. There are many more ways to reduce the incidence of cancer and mortality, such as national screening programmes and informing the public about how a healthier lifestyle can reduce their risk of cancer. Prevention is better than cure, yet few people today connect a healthy weight and activities such as walking to the shops with fewer cases of cancer.

We have never had a better opportunity to achieve these aims. Cancer has become less of a taboo. More people are comfortable talking with friends and relatives about their experiences, and public interest in the 200 or more diseases that we call cancer is growing.

**SHARED EFFORT**

It would be foolish to think Cancer Research UK, the charity I lead, can succeed alone. Change can only be achieved if all those involved with cancer work together. That is why for the past two years I have been delighted to chair the National Cancer Research Institute (NCRI), a partnership of cancer-related organisations working together on a shared cancer agenda.

I will be stepping down as chair this year and am proud of what the NCRI has achieved so far. Last October, the first annual NCRI conference brought together researchers of different disciplines from all over the world to discuss their work. We have set up networks that have improved the speed and quality of clinical trials, and promoted under-funded research such as palliative care and disease prevention.

Gaps in the research portfolio are another thing we must address. Cancer Research UK has begun a review of the research that we fund - and some fields that we don't – to identify "orphan" areas. For example, we have identified weaknesses in medicinal chemistry and molecular pathology, and as a result we have set up training programmes to encourage more scientists into these fields. If other reviews show up more gaps, we'll deliver more training. A huge part of our responsibility is to ensure we have the right people and skills in place to maintain and improve cancer research and cancer care.

Over the next five years, we are committed to doubling Cancer Research UK's drug development activity. We fund all aspects of cancer research, from scientists studying the fundamental processes that control the cell cycle in yeast, to phase III clinical trials of new cancer therapies in patients, and just about everything in between.

Many, indeed most, cancer researchers and clinicians in Britain will be supported at some point in their career by Cancer Research UK. That's something else of which we are very proud. Because it is not just
about Nobel prize-winning scientists — although we've had our share of them. It is about having a comprehensive and well-structured research base that enables the best possible science to flourish. Now we must maintain our productivity and momentum, so that cancer patients and their families will benefit at the time they need it.

Career-enhancing MSc degrees for the health and pharmaceutical sectors

Our courses are developed hand-in-hand with employers, thus ensuring that our graduates are in demand - 97% gain employment almost immediately. Financial awards and flexible payment plans are available.

MSc Applied Bioinformatics
MSc Clinical Research (p/t only)
MSc Environmental Diagnostics
MSc Integrated Pharmaceutical and Medical Engineering
MSc Medical Diagnostics
MSc Molecular Medicine
MSc Medical Technology Regulatory Affairs (p/t only)

Cranfield UNIVERSITY
[2545-005 (2006) : 60]
The Radiobiology Initiative at the University of Oxford is a project jointly funded by Cancer Research UK, the Medical Research Council and the University of Oxford to create a world-class centre for research in Radiation Oncology and Biology. The new department will house 16 research groups and up to 170 scientists and clinicians in newly constructed, custom-built space on the Old Road Campus in Headington, Oxford, adjacent to the Wellcome Trust Centre for Human Genetics, the Richard Doll Centre for Epidemiology and Biostatistics and a new cancer hospital, currently under construction.

Applicants for Group Leader positions (equivalent to Assistant or Associate Professor appointments in the USA or Canada) are sought. A generous package of salary and research funding is available. We are currently seeking to recruit scientists with interests in imaging in vivo and in DNA damage signalling, but scientists specialising in any field related to radiation biology are encouraged to apply. Candidates should hold a PhD, MD, or equivalent qualification, and have an outstanding publication record.

Details of the initiative and existing research groups can be found at http://www.rob.ox.ac.uk
Enquiries should be addressed to:
Professor W Gillies McKenna, Head
Radiation Oncology and Biology
University of Oxford Radiobiology Research Institute
Churchill Hospital Old Road, Headington, Oxford OX3 7LF
United Kingdom

Targeting Cancer
W5, London
Attractive Salary + Share Options + Excellent Benefits

PROJECT MANAGER
Antisoma is an established biopharmaceutical company focusing on the development of novel therapies against cancer.

This is a challenging opportunity for an experienced Project Manager to work in an innovative and evolving Company. You will be responsible for leading multidisciplinary teams to deliver development programmes involving all aspects of pre-clinical, CMC and clinical development.

Ideally you will have a science degree with a minimum of eight years experience gained in the pharmaceutical or biopharmaceutical industry plus 2-4 years project management experience. You will have a proven track record of working in multidisciplinary teams and will have demonstrated both a meticulous attention to detail and the ability to develop a strategic overview.

A self motivated individual, you will have excellent communication skills, and the ability to engage and motivate a team. Experience of working in a commercial environment would be an advantage.

Please send your CV and letter of application to:
Head of HR, Antisoma Research Limited West Africa House, Hanger Lane Ealing, London W5 3QR

We would appreciate all responses by the closing date of Monday 24th April.

www.antisoma.com
ANTISOMA
[2545-007 (2006) : 60]
World Cancer Research Fund International is seeking an enthusiastic research manager to head up its science and research department.

You will be responsible for the day-to-day functions of the department, including a research grant programme and a major new expert report. You will manage a small team of scientists and administrators and work with a wider group of international scientific experts and consultants, who contribute to the work of WCRF International. Keeping up to date with the latest developments in the field of nutrition and cancer is vital and you will need to attend and present at national and international conferences. As head of a key department within the WCRF global network, you will be instrumental in formulating and implementing strategy and liaising with government NGOs, academics and consultants in order to achieve the objectives of the organisation.

You will most likely be educated to PhD level or equivalent and will have excellent project management skills with at least 3 years experience of heading a science related department. Experience of planning and managing budgets, and working with committees and senior scientists from different disciplines is essential. The successful candidate will have excellent oral and written English language skills and experience in nutrition and/or cancer biology would be advantageous.

Closing date: 28 April 2006

First interview: 6 or 8 June 2006
Second interview: 22 June 2006
Visit [www.wcrf-uk.org](http://www.wcrf-uk.org) for an application pack

Send your CV and cover letter with your current salary outlining your reasons for applying and suitability to the position to
Cheryl Coulby, HR Manager
WCRF International
19 Harley Street
London W1G 9QJ;
or email hr@wcrf.org

WCRF's mission is to raise awareness that the risk of cancer is reduced by healthy food and nutrition, physical activity and weight management.

World Cancer Research Fund International
[2545-008 (2006) : 60]
Paula promised she’d always be there. We’ll help her keep her word.

Paula and Kim have the kind of special bond that only mothers and daughters really understand. When Kim was a little girl, Paula dreamed of watching her grow up and become a mother herself. And she made a promise that she'd be there to help every step of the way. But since being diagnosed with breast cancer, she's worried about being able to keep that promise.

The task facing the scientists and physicians in our Centres of Excellence for Drug Discovery and Worldwide Medicine Development Centres is to create and deliver therapies that could give people like Paula and Kim hope for the future and transform the way cancer is targeted and treated.

Over-expression of epidermal growth factor receptors (EGFR or ErbB2) has been reported in a variety of human tumors and has been associated with a number of negative clinical factors including poor prognosis and reduced survival. Through our research into these receptors we have identified a number of potent ErbB inhibitors that have a selective dual action targeted at tyrosine kinases. Initial clinical studies have shown that orally-administered compounds may achieve their promise in being sufficiently active and well tolerated.

Examples of other targets within the portfolio include NK-1 antagonists and interaction with platelet growth factors [thrombopoietin] and also with vascular endothelial growth factors [VEGF].

It's our goal not only to develop therapies that are effective and safe, but also to point towards greater precision in the development of future cancer drugs. Every day we take another step towards a world where cancer can be managed and controlled.

This is an exhilarating time to be working in R&D at GlaxoSmithKline, and you could join us on our journey of discovery. If you are interested in finding out more about the science behind ErbB receptor inhibition, 'meeting' some of the scientists involved or job opportunities then visit our website http://www.gsk.com/careers/research-paula.htm

We are also particularly interested to hear from physicians and clinical scientists currently working within oncology who wish to join us in delivering to patients the promise of one of the best oncology pipelines in the industry.

POSITIVE ABOUT DISABLED PEOPLE

GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is an equal opportunity employer

gsk
GlaxoSmithKline
[2545-009 (2006) : 61]
**Head of Histology Services**
Total salary package £32,000 - £39,000 pa incl London

Cancer Research UK is the world's leading independent organisation dedicated to cancer research, spending £217m a year on cutting-edge research into treating, preventing and curing cancer. Cancer Research UK Research Services provide state-of-the-art scientific services to CR-UK funded researchers across the country.

This challenging role will see you lead and develop a team to provide histological services to support the CR-UK scientific community. You will also ensure that appropriate technology and infrastructure is in place to support the objectives of the service.

To be considered, you should have a strong background in practical histology. You should also have experience of interacting with researchers and responding to their evolving needs, and in promoting services.

On the personal front, you must be able to think creatively, innovate and actively build networks with diverse scientific communities. You will exhibit excellent team leadership and project management skills, with some leadership experience already behind you, ideally in a scientific research environment.

For further details and to apply online, please visit [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)

Alternatively please send in two copies of both your covering letter and CV to Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX or email: recruitment@cancer.org.uk quoting reference NS5100 on all correspondence.

Closing date: 20th April 2006.

For details on all our current jobs please go to [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)

HYMS
THE HULL YORK MEDICAL SCHOOL
UNIVERSITIES OF YORK AND HULL

Postdoctoral Marie Curie Fellowship
(EVAN Training Network)
A joint appointment of HYMS and the Department of Computer Science, University of Hull.
A Computer Scientist is required to work within the Marie Curie Research Training Network: European
Virtual Anthropology Network (EVAN) involving 15 research partners. You will work within a focused
research team with members the Simulation and Visualization Research Group (Computer Science at
Hull) and the Functional Morphology and Evolution Research Group (HYMS at York and Hull). The
task is to develop innovative visualization-based, geometric morphometric software to be used in studies
of biological form by the other partners of EVAN.

You should have a strong background in algorithm development, computer graphics and object-oriented
software development. Skills in C++ and OpenGL are essential. In order to comply with Marie Curie
programme rules, you must not be a UK national or have resided or carried out your main activity in the
UK for more than 12 months in the three years immediately prior to commencement. Salary will be
within the £27,929 - £36,959 p.a. This post is available from 1 April 2006 for a period of two years.

For further particulars and details of how to apply, please see our website: http://www.york.ac.uk/admin/persnl/jobs/ or write to the Personnel Office, University of York, Heslington, York YO10 5DD, quoting reference number DR06109. Closing date: 28 April 2006.

The University of York is committed to diversity and has policies and developmental programmes in
place to promote equality of opportunity. It particularly welcomes applications from ethnic minority
candidates.

MAKING KNOWLEDGE WORK
INVESTOR IN PEOPLE
MAKING KNOWLEDGE WORK

INSTITUTE OF CANCER THERAPEUTICS

Postdoctoral Research Assistant
£27,194 - £28,850 per annum  Ref: RCRU2312/NS
Two years fixed term
This position will contribute to a team designing and developing novel tumour targeted anticancer agents within a new Institute of Cancer Therapeutics. You will join the medicinal chemistry group and play a full role in designing and synthesising new chemical entities for biological and pharmacological evaluation within the ICT. First class synthesis and analytical facilities are available within the ICT. You will have a PhD in organic chemistry or synthetic medicinal chemistry.

Research Technician
£17,454 per annum  Ref: NCRU4069/NS
Two years fixed term
This position is available to provide technical and laboratory support for the activity of the drug discovery team within the new Institute of Cancer Therapeutics. You will be part of a team developing potential anticancer therapies and will focus on synthetic medicinal chemistry. With a HND or degree in a life science subject and research laboratory experience, you will perform relevant laboratory techniques to support the drug synthesis including bulk synthesis and will be required to maintain general chemistry laboratory areas.
Enquiries prior to application may be made to Prof Laurence Patterson on 01274 232226. Email: n.j.anness@bradford.ac.uk

Postdoctoral Research Assistant
£23,457 - £25,633 per annum  Ref: RCRU2311/NS
One year fixed term
This position is funded by a Yorkshire Forward Concept project grant, designed to investigate a series of potential anticancer agents and their prodrug derivatives. The project will involve the synthesis of anthraquinones with masked heterocyclic alkylating functionalities as novel potential anticancer agents. Biological studies will involve chemosensitivity testing, metabolism and stability studies. You will have a PhD in synthetic organic chemistry, pharmacology or a similar discipline. Experience in cancer research, drug discovery and cell biology would be a distinct advantage.

For further information see www.cancer.brad.ac.uk and contact Dr Klaus Pors on 01274 236482 or email: k.pors1@bradford.ac.uk

Closing date for all posts: 14th April 2006.

How to apply: jobs@bradford.ac.uk tel: 01274 233091 (minicom: 01274 235807). For more information see www.bradford.ac.uk/jobs

Applications submitted by agencies will not be considered.

Confronting Inequality : Celebrating Diversity
Job Opportunities for Specialists

Part of the European Molecular Biology Laboratory (EMBL), the European Bioinformatics Institute (EBI) is located on the Wellcome Trust Genome Campus at Hinxton, near Cambridge, UK, and provides cutting-edge research, service and training in the field of bioinformatics. The EBI is searching for various positions:

**Bioinformatician** Ref. no. NS/06/41
The Bioinformatician will contribute to the maintenance and development of the databases in EBI's Sequence Database Group. Responsibilities include the analysis and annotation of sequence data using UNIX-based software tools, the execution of biological information from scientific literature or databases using high-throughput methods and the development of new analysis and annotation tools. In addition, he/she will contribute to the development of the group's external services and will develop software specifications.

A university degree in Life Sciences as well as a broad knowledge of molecular biology and/or biochemistry. A postgraduate qualification in Computer Science and experience with biological databases and sequence analysis would be desirable. Candidates should be computer literate and have working knowledge of a popular programming language.

**Database Application Developer** Ref. no. NS/06/46
The Software Engineer will become a part of the ChEBI (Chemical Entities of Biological Interest) project development team. The aim of this project is to standardise chemical and biochemical terminology across biological databases. The successful candidate will design and implement a chemical data exchange format as well as tools to load, export, analyse and visualise data. In addition he/she will be involved in the re-engineering of the database schema to accommodate our partners' data.

A degree in Computer Science and ideally at least two years professional experience. Applicants must have solid database development experience (Oracle) as well as Java and XML experience. Previous experience in data loading and a good knowledge of molecular biology or computational chemistry/chemoinformatics would be a plus.

**Scientific Database Curator** Ref. no. NS/06/36
The Scientific Database Curator will contribute to the maintenance and extension of the IntAct molecular interaction database. The main task is the analysis of published literature on protein interactions and their integration into the IntAct database. The Curator will also contribute to the preparation of large-scale datasets for database integration as well as assisting external data providers in the submission process. The definition of curation standards and guidelines; and cooperation with Swiss-Prot and IntAct curators both at the EBI and at IntAct partner sites, e.g. in Geneva and Rome will be another duty. ([www.ebi.ac.uk/intact](http://www.ebi.ac.uk/intact))

A PhD or MSc in Molecular Biology, Biochemistry, or a related field. An interest in bioinformatics is required, prior experience in database curation, analysis of protein interactions, molecular pathways or cellular complexes is a plus.

**Software Engineers** Ref. no. NS/06/40
Integr8 is a project set up at the EBI to integrate and interpret data concerning complete genomes and proteomes. The Software Engineers will contribute to the technical and scientific development of the project. Opportunities exist to work on all areas within the project. Our future challenges include the ongoing construction and operation of robust systems for data retrieval, storage, analysis and distribution; and the enhancement of scientific content available via the Integr8 web portal. ([www.ebi.ac.uk/integr8](http://www.ebi.ac.uk/integr8))

A degree in Computer Science or Bioinformatics, or proven professional experience in software development. Applicants should be proficient in Java. Experience with any of the following technologies...
will be advantageous: relational database management systems; Perl; Apache; web interfaces; application servers; web services.

Self-motivated candidates with good communication and interpersonal skills, willingness to build and share competences and an ambition to work in an international field are invited to apply. An initial contract of 3 years will be offered to all successful candidates. This can be renewed, depending on circumstances at the time of review.

To apply for this post, please email a CV, cover letter and references, quoting the respective ref. no. in the subject line to: application@embl.de. For more information please visit: www.embl.org/jobs

EMBL is an inclusive, equal opportunity employer offering attractive conditions and benefits appropriate to an international research organisation.

www.embl.org
EMBL-EBI
Client Service Analyst
Global Tandem Oncology Monitors
Salary £21k - £27k dependent on experience
Based Putney, London

synovate
Healthcare

The Global Tandem Oncology Monitor at Synovate Healthcare is currently looking for a Client Service Analyst to join their European team to analyse client queries and prepare results presentations for global pharmaceutical oncology clients. This is an excellent chance to join a top International market research group. In return, successful candidates can expect an excellent salary and benefits package, ongoing development and training plus outstanding future career prospects. Please visit our website for more information about the company: www.synovate.com/healthcare

The main responsibilities of this role will be as follows:
• Analysis of day to day ad hoc client queries on a detailed oncology database, dedicated account management and client contact to ensure client objectives and deadlines are met.
• Preparing and supporting desk research and annual results presentations. Occasionally assisting in the quality control of data.
• Assistance and running of supplementary studies and occasional project development through preparation of sales case studies and contribution to group brainstorming.

The ideal candidate will have the following skills, experience and qualifications:
• Educated to degree level or equivalent.
• Experience with Microsoft Word, PowerPoint and Excel and SPSS Quanvert analytical database or similar.
• Previous experience in healthcare and oncology is desirable but a genuine interest in both areas is essential.
• Strong organisational and time management skills.
• Attention to detail.
• Ability to conduct and interest in desk research.

If you are interested in applying for this position please send a CV and covering letter to: Sarah Kennedy, Synovate Healthcare, The Boathouse, The Embankment, Putney, London SW15 1L8 or email: sarah.kennedy@synovate.com

The closing date for receipt of applications is Friday 21st April 2006
Avidex

**Project Manager**

We are currently working on novel treatments for cancer, inflammation and autoimmune disease and have one small molecule in clinical development with other projects due to reach development status in due course. We are now looking to strengthen our Development team and are looking for an experienced Project Manager. Suitable candidates will have a strong development background with excellent communication skills, the ability to work to deadlines, experience of managing multidisciplinary projects and the ability to select and manage contract organisations. A technical background in immunology and pharmacodynamic models would be an advantage.

Candidates should be highly self-motivated and have the ability to both work independently and as part of a team. Experience of working with both small molecules and proteins would be advantageous but not essential.

If you feel you could fulfill this demanding role please send us your CV for consideration.

Please reply with CV to Corin Canuto, Avidex Ltd, 57C Milton Park, Abingdon, Oxon OX14 4RX, or email to corin-canuto@avidex.com
Closing date 3rd April 06. Interviews from 10th April 06.

New Scientist Jobs
www.newscientistjobs.com
[2545-016 (2006) : 64]
Research Technician
Salary £22,870 - £25,430

Applications are invited for a Research Technician to work in a team focusing on the development of novel techniques for the improved diagnosis and treatment of primary breast cancer patients. The position will involve working with 45 clinicians and scientists on a large EU-funded project entitled "Molecular-oriented detection and treatment of minimal disease".

The successful applicant will work in a 6-strong team within a laboratory of 40 scientists studying breast cancer. This exciting area of research may lead to a more effective approach to the staging of treatment, thus resulting in a higher percentage of curable patients.

The ideal candidate should possess an honours degree in a biological science plus previous experience in a relevant discipline (although recent graduates will be considered). Experience with cell culture and basic techniques in molecular biology would be an advantage.

Informal enquiries should be addressed to Dr Martin Slade by phoning 020 8383 8043 or emailing m.slade@imperial.ac.uk

An application form and job description may be obtained from the following web link http://www.imperial.ac.uk/employment/technical Alternatively, for an application pack please contact the Human Resources Assistant, Imperial College London, Hammersmith Campus, Commonwealth Building, Du Cane Road, London W12 0NN, or email hrrecr@imperial.ac.uk quoting reference number HJ 974.

Closing date: 20 April 2006.

Public Appointments

Opportunities to help shape Government policy on gene therapy

**GENE THERAPY ADVISORY COMMITTEE**
Vacancies for 4 members Ref: DH6008

The Gene Therapy Advisory Committee (GTAC) is a Department of Health Ministerial advisory body and the UK national research ethics committee for gene therapy clinical trials. The Committee has a responsibility for assessing proposals from doctors who wish to conduct gene therapy research on human subjects. Over 70% of UK gene therapy trials have been aimed at combating cancer. We are looking to appoint 4 new members.

4 Members (3 experts and 1 lay)
The expert members should have a proven track record in Medical/Clinical Oncology, Infectious Diseases or Stem Cell Biology. The lay member should have a proven track record as a patient advocate with a particular interest in, and knowledge of, cancer. Experts and lay members will have the ability to consider complex ethical issues around gene therapy and be excellent communicators.

Time commitment and location
The Committee usually meets six times a year for full-day meetings (10.00 - 17.00) in central London. The annual public meeting may be held outside London. In addition, members may be asked to attend occasional sub-group or other meetings, and be available by telephone.

Remuneration
Members will receive £149 for each meeting attended. Reasonable travelling expenses will be paid at Department of Health rates. All appointments will be for periods of three years.

How to apply
If you think you have the qualities we require and want to apply for a post please call 0870 240 3802 during office hours or go to our website: [www.appointments.org.uk](http://www.appointments.org.uk), or e-mail [info@apcomm.nhs.uk](mailto:info@apcomm.nhs.uk), quoting the relevant reference number for an information pack and application form (which are available in large type or Braille or on tape). General information about the Committee can be found at: [www.advisorybodies.doh.gov.uk/genetics/gtac](http://www.advisorybodies.doh.gov.uk/genetics/gtac)

The closing date for returning applications is 21 April 2006. We will not consider applications received after this date.

Interviews are expected to take place late May 2006.

OCPA REGULATED

The NHS Appointments Commission is committed to equality of opportunity for all and the principle of appointment based on merit following an open and transparent process and independent assessment. Please note this is a public appointment not employment.

See [www.appointments.org.uk](http://www.appointments.org.uk) or [www.sector1.net](http://www.sector1.net) for more public appointments being filled by the Appointments Commission

NHS Appointments Commission
[2545-018 (2006) : 65]
Two exciting vacancies have arisen that offer the opportunity of working with the major supporter of cancer research in UK Institutes, universities and medical schools. The vision of Cancer Research UK is to conquer cancer through world-class research. We are the largest volunteer-supported cancer research organisation in the world with a dedicated team of 3,000 staff and an annual scientific spend of more than £200 million.

Post I: Senior Research Manager
(Personal Awards and Training) Ref: NS5091
The purpose of this job is to take a lead role in the development and implementation of the Cancer Research UK Training and Career Development Board's (TCDB) strategy, to be responsible for managing all aspects of Cancer Research UK's Personal Awards schemes, to provide the secretariat for the TCDB and to develop systems for monitoring the success of schemes. This will be a challenging role as Cancer Research UK has recently undertaken a major review of its fellowship schemes. The charity is currently expanding and developing its portfolio to meet the needs of the whole cancer research community, and the Senior Research Manager will have a key role in implementing the recommendations of the review.

Post 2: Senior Research Manager
(Institutes Funding and Scientific Events) Ref: NS5078
The purpose of this job is to take a lead role in the implementation of Cancer Research UK's strategy with respect to institutes, particularly the development of the funding relationships with the institutes, and to manage, in partnership with another Senior Research Manager, the organisation of Institute Reviews to the core-funded Institutes. Cancer Research UK is currently establishing a new institute in Cambridge. We have recently undertaken a review of the management and funding of our institutes, and the review of one of the four core-funded institutes will take place later this year. You will also be responsible for the scientific aspects of the organisation of the Senior Researchers' Meeting and for developing Cancer Research UK's portfolio of researchers' meetings, and you will manage the process for reviewing senior scientific salaries.

For both of these posts, you will have obtained a PhD in a bio-medically related area and completed a period of postdoctoral research of at least one year. You will have at least three years' experience in research administration plus experience of managing and supervising staff. For Post I you should preferably have an understanding of the issues currently affecting academic training and career development. For Post 2 you should have an understanding of the issues currently affecting funding in the Institutes sector.

You must have excellent written and oral communication skills, and an organised and adaptable approach is essential. The ability to think strategically, to put information in context and to interpret complex information is also important. Strong IT skills are essential (including familiarity with Microsoft Office and with Internet-based searches) as is the ability to deal calmly with people at all levels. In both these roles you will be expected to work closely with other research managers within the Directorate in order to deliver your set objectives. These roles demand the ability to work both independently and as part of a team.

For further details and to apply online, please visit https://jobs.cancerresearchuk.org/. Alternatively please send in two copies of both your covering letter and CV to: Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX or email: recruitment@cancer.org.uk quoting the relevant reference number on all correspondence.

Closing date: 20th April 2006.
CITY OF LONDON POLICE
CITY OF LONDON POLICE
24/7

Fingerprint Laboratory Technician
Wood Street, London EC2P 2NQ
Salary starting at £21,840 per annum

The Scientific Support Unit (SSU), Specialist Crime Operations is an integral resource for the Force to respond to Critical Incidents and Crime Scene Management. The Fingerprint Bureau holds a key role in delivering interpretation of fingermarks and development on latent marks from items collected as part of the investigative process.

In this role you will be required to undertake forensic examinations of a variety of items either as an individual or as part of a team. You will work within the Fingerprint Bureau dealing with the handling of the Force's forensic fingerprint exhibits, and recording processes and continuity on the Forensic Intelligence database eFex. You will carry out laboratory treatments to enhance latent marks and digital photography of the positive results. In addition you will undertake processing on Ident1 of arrestees' fingerprints. You can expect to be called to court to give evidence on your findings.

The role will be to identify and recover forensic evidence from a wide range of potential exhibits using chemical treatments and light source examinations, together with specialist photography for which you will be expected to attend residential courses.

To be eligible for this role you must hold a qualification in Forensic Science to BSc level. You will be part of the centre of excellence and best practice in this field within the organisation. You must be able to demonstrate commitment, self-motivation, good communication skills, determination, and a good standard of IT skills. A high level of resilience is paramount, as you may be exposed to traumatic scenes for protracted periods.

For further information or an application pack please email colprecruitment@city-of-london.police.uk or contact telephone number 020 7601 2869, quoting reference CSS/SCLT.

Expressions of interest will close on Thursday 13th April and the closing date for applications is Thursday 20th April 2006 at noon.

This vacancy is open only to those who have the right to work in the UK. Flexible working arrangements are available, subject to operational requirements.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE

The City of London Police welcomes applications from all sections of the community and will not discriminate on grounds of race, colour, ethnic or national origins, sex, disability, sexual orientation, age, religion or religious belief. All applications are considered and selection decisions made strictly according to merit. A no smoking policy is in operation.

[2545-020 (2006) : 66]
MRC Epidemiology Unit
investigating the causes and prevention of diabetes and obesity

MRC Epidemiology Unit, Cambridge
Senior Statistician, Ref: EPID/306/12

The MRC Epidemiology Unit was set up in October 2003 to study the genetic and environmental determinants of obesity, diabetes and related metabolic disorders. For further information about the Unit please visit www.mrc-epid.cam.ac.uk

A Senior Statistician is required to lead the Statistical Group and provide expertise in Biostatistics for the Unit by advising on new methods and latest developments. You will be expected to manage the resources available for statistical work and advise the Director on priorities, allocating research work to team members and representing the Group's interests at Senior Scientific meetings.

You should have a Master's or a doctoral degree in statistics or a related subject. You will have at least five years' statistical experience in using epidemiological and biostatistical principles, including experience in the design of research studies and investigations. You will have extensive experience in statistical analysis, interpretation and research methods in the context of Epidemiology. In addition, you should have a proven track record in leadership and management in order to develop the Unit's Statistical team as you will have responsibility for the line management of two Unit staff in the Statistical Group.

This is a permanent position with a starting salary in the range of £34,588 - £40,655 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward policy.

This position is 36 hours per week, and we can offer 30 days holiday entitlement and the option of joining our MRC final salary Pension Scheme.

To apply, please quote EPID/306/12 and include a covering letter and full CV with the contact details of two professional referees who can be approached prior to interview.

Please e-mail your application to: recruit@mrc-centre.cam.ac.uk or post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH.

Closing date: 20th April 2006

PREVIOUS APPLICANTS NEED NOT APPLY

The Medical Research Council is an Equal Opportunities Employer. 'Leading Science for Better Health' [2545-021 (2006) : 66]
NORTH WESTERN AND NORTH WALES SEA FISHERIES COMMITTEE
FISHERY ORDERS DEVELOPMENT OFFICER
Salary £17,985 - £24,708
This is a three year appointment with the possibility of extension, based at Lancaster University. You
will be committed to developing sustainable fisheries and protecting the marine environment.

An application pack is available by post from NW&NWSFC, Lancaster University, Lancaster LA1
4YY; or telephone Irene on 01524 68745
E-mail i.andrews@lancaster.ac.uk or visit nwnwsfc.org Applications must be received by Thursday, 13th
April 2006. Interviews for short-listed applicants will be held in Lancaster on 2nd or 3rd May 2006.
[2545-022 (2006) : 66]
The Medicines and Healthcare products Regulatory Agency (MHRA), an Executive Agency of the Department of Health, is responsible for safeguarding public health by ensuring that all medicines, healthcare products and medical equipment meet the appropriate standards of safety, quality, performance and efficacy.

Scientific Assessors (x2) - Pharmacovigilance Risk Management Group
London - £24,965 to £37,037

Reporting to the Pharmacovigilance Risk Management Therapeutic Group Unit Lead, you will undertake all aspects of pharmacovigilance including monitoring a portfolio of newly licensed medicines to identify new safety hazards and assessing pharmacovigilance data from a variety of different sources. In addition, you will assess risk management plans for new medicines, liaise with professional staff within the Agency and with pharmaceutical companies on pharmacovigilance issues and present pharmacovigilance issues to the Commission on Human Medicines and its pharmacovigilance sub-committee. You will also implement measures to minimise risk and provide information on safety of medicines to health professionals and the public.

Both positions will require a honours degree in a relevant subject with a minimum of three years postgraduate experience in pharmacy, pharmacology, drug evaluation, physiology or similar, and you will possess excellent written and verbal communication skills and be able to demonstrate effective organisational skills and a high attention to detail. Excellent report writing and analytical skills are essential. You will also have the ability to work to tight deadlines in a target driven environment whilst maintaining high standards of quality work and have strong IT skills with a good knowledge of Microsoft Office.

Medical Writer
London - £28,326 to £41,911

We will look to you to support assessment, transparency and communication activities within pharmacovigilance, including taking responsibility for producing and updating United Kingdom Public Assessment Reports within target timeframes. In addition, you will maintain efficient and thorough records on the MHRA internal database and website and assist in the writing of the safety communications. You will also contribute to Freedom of Information Act requests and any other queries.

A graduate in an appropriate life science discipline, e.g. medicinal chemistry, pharmacy, pharmacology, or other biological and pharmaceutical sciences (or equivalent) you will have a minimum of 2 years experience of medical or scientific writing and editing. This will have involved the development of your drafting and report writing skills and you will be proud of your excellent attention to detail. In addition you will have effective communication, interpersonal and organisational skills and the proven ability to work effectively to tight deadlines and under pressure as a member of a multi-disciplinary team.

Please note that all positions in the Agency require a minimum standard of IT literacy, including skills in MS Word and Outlook.

If this challenge inspires you, you can download further information and apply on-line via our website - www.mhra.gov.uk. Similarly, you can download our application at this address and send your completed form via email to jobs@mhra.gsi.gov.uk or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: Friday 14th April 2006.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
As an Equal Opportunities employer, the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

[2545-023 (2006) : 67]
**Principal Technologist**  
Medical Device Development  
Excellent salary package and benefits

The sanofi-aventis group is the world's third largest pharmaceutical company, ranking number one in Europe. With a turnover of €25 billion, we employ 100,000 people across the globe.

In the UK, sanofi-aventis employs around 3,200 people - our operations reflect the phenomenal achievements of the company worldwide. Set in attractive Cheshire countryside, the Holmes Chapel site is a state of the art product development and manufacturing site and our worldwide centre of excellence for respiratory inhalations technology.

Reporting directly to the Device Development Manager, you will be responsible for developing and industrialising new pharmaceutical delivery devices and primary packaging systems. As a senior member within a team of highly motivated scientists and engineers, you will work closely with suppliers to ensure that optimum design solutions are developed, verified and transferred to our production facilities. You will also be responsible for authoring high quality regulatory dossiers to ensure timely product approval.

To succeed in this role you are likely to have an engineering or scientific degree with at least five years' relevant experience in pharmaceutical inhaler or medical device development. A working knowledge of the medical device design control regulations will be a distinct advantage.

We are looking for an action oriented, innovative and details conscious individual, who, with an acute problem solving and customer focussed approach, will strive for the ultimate in product design and delivery.

In return, sanofi-aventis offers you the opportunity to develop your full potential in a thriving environment.

This role attracts a competitive salary and benefits package including relocation assistance where appropriate.

One team, one mission .......... because health matters.  
sanofi aventis

Placing People First
www.srg.co.uk
As the world's leading manufacturer of Liquid Crystal (LC) and Organic Electronics (OE) materials, Merck is dedicated to providing unique, high quality products for technically demanding applications. We are expanding our Southampton R&D facility and require world-class scientists with a track record of performing in successful projects, with excellent analytical and customer support skills.

**Physics Project Manager** - Organic Electronics (ref: PMOE/N)
A PhD in Physics or a related discipline, you will have managed complex research and customer support programs in the field of organic electronics. You will have excellent leadership and supervisory qualities, gained in leading teams of scientists. Experience in the physics of organic semiconductors and field-effect transistors is preferred. Multi-cultural working experience, in particular with Asian countries, an advantage.

**Physicist** - Organic Electronics (ref: POE/N)
A post graduate in physics or relevant discipline, you will have a proven record of customer technical support and innovation within the organic electronics field. At ease working to demanding customer programmes, you will be a strong experimentalist with a working knowledge of organic field-effect transistor fabrication and characterisation. Experience in Kelvin probe, high resolution microscopy and materials characterisation is preferred.

**Research Material Scientist** - Organic Electronics (ref: RMS/N)
A post graduate in materials science or a relevant discipline, you will have an in-depth knowledge of the materials science of thin films. An innovator, you will be able to develop morphology and physical characterisation techniques and understand the behaviour of multi-phase systems. Good knowledge of polymer science and physics is essential.

**Research Scientists** - Formulation and Ink-jet Formulation (ref: RCF/N)
As a post graduate in physics, chemistry or materials science, you will have a good technical expertise in inks and coatings, preferably involving advanced materials, in one or more printing processes. We expect a track record of performing successful relevant research in matrix managed projects and a significant contribution towards the generation of valuable innovations. Technical expertise in ink-jet formulation and processes is preferred.

**Physicist / Materials Scientist** (ref: PMS/N)
As a PhD or equivalent in physics or materials science with several years' experience in a relevant R&D environment, you will have a strong multi-disciplinary and technical understanding of complex polymer network formation. Ideally you will have a good knowledge of the optical properties of Liquid Crystal Displays and birefringent layers. We expect an innovative but practical approach to developing new products.

**Physicist** - Liquid Crystals (ref: PLC/N)
You will be a post graduate in physics or equivalent with several years' experience in the field of electro-optic Liquid Crystal Display (LCD) modes. You will have practical experience in working with complex liquid crystal phases, studying the electro-optical properties of LCD's and knowledge of the physical properties of LC materials. You will be able to demonstrate a strong multi-disciplinary and technical understanding and an ability to influence the development of new materials. We expect an innovative but practical approach to developing new LC systems.

For the most talented, we offer the best of everything - a great package, including relocation assistance within the UK, and a great place to live and work.

For more information please see [www.merckchem.co.uk](http://www.merckchem.co.uk) and contact us by E-mail to chris.legg@merckchem.co.uk, quoting the relevant job reference ID.
OPEN TO INNOVATION

Look behind our culture of science and you’ll discover a team that challenges conventional thinking, pursues radical innovation and actively expands the boundaries of current scientific knowledge. That's what leadership is all about.

So join our state-of-the-art facilities in Horsham, West Sussex, and we can promise you a career at the very forefront of respiratory medicine - and the chance to achieve the kind of recognition and rewards you deserve. We are now looking for highly talented Metabolism and Pharmacokinetics (MAP) Research Investigators to strengthen the global MAP group which supports the ADME needs of research projects.

As a **Research Investigator** - Inhaled Therapies, you will lead a team in performing *in vitro* and *in vivo* metabolism and pharmacokinetic studies for inhaled therapies, including the assessment of lung metabolism and the properties influencing lung retention. Responsible for the design, analysis and interpretation of these studies, you will contribute to multi-disciplinary project teams to aid optimal drug discovery. Proven experience in the design, analysis and interpretation of pharmacokinetic studies is essential. In vivo experience of this type would be highly advantageous.

We are also looking for two **Research Investigators** to join our Discovery Project Support team. You must have an in-depth understanding of all aspects of DMPK, with particular emphasis on the application of pharmacokinetics in drug discovery. A PhD in a relevant discipline, together with five years’ experience in drug metabolism and pharmacokinetics are essential, and you will have strong design and management skills in routine and mechanistic animal PK studies. Experience using non-compartmental techniques and pharmacokinetic modelling software is also required.

These are exciting roles within a dynamic and newly established global team. If you are ready to influence the future of drug discovery and development, we can promise you a competitive remuneration package, strong professional growth and the freedom to use a wide range of skills in pursuit of ambitious research objectives.

Research Investigator - Inhaled Therapies: 13293BR
Research Investigator - Discovery Project Support team: 13289BR

To find out more, view descriptions of all open positions and to apply online, visit [www.novartis.com](http://www.novartis.com) quoting the relevant reference number. Closing date: Friday 21st April.

NOVARTIS

NOVARTIS INSTITUTES FOR BIOMEDICAL RESEARCH

The New Pathway to Drug Discovery

[2545-027 (2006) : 69]
Our products change lives. Yours included

UK Radiopharma is a joint venture between Schering and IBA to supply FDG (a radiopharmaceutical used in Positron Emission Tomography (PET) imaging) to the NHS and private healthcare sectors in the UK. PET imaging can detect the presence of disease earlier than conventional imaging methods and, although in its infancy here, is widely used in Europe and the USA.

With both parent companies having considerable experience in supplying FOIS and establishing European and USA production sites, UK Radiopharma is ideally placed to take advantage of the growing demand for FDG in the UK.

As part of this ongoing development we are seeking to recruit a Site Production Manager for Guildford and Site Engineer for Dinnington and Guildford.

**Site Production Manager**

We are looking for someone with a degree in chemistry, biology, pharmacy, microbiology, radiopharmacy or engineering, and at least two years of sterile manufacturing experience (ideally with 12 months in Radiopharmaceuticals). Experience of managing a small team of people would be advantageous.

Your first months training will be spent training on the continent at an FDG manufacturing site, preparing you for the effective management of the process and production site. Responsibilities will include ensuring the product is supplied in accordance to customer demand while adhering to company, GMP and safety legislation.

**Site Engineer**

You need to be an experienced Electro Mechanical Technician or newly qualified Engineer with proven practical experience. Your ability to work alone and solve problems under pressure will be essential, as will a high level of computer literacy and knowledge of MS Office tools. Experience of cyclotron technology would be an asset but is not essential.

Initial training will be on site but further advanced training will be at IBA in Belgium to help provide you with the range and depth of specialist knowledge required to perform this role effectively. Once settled in the role, you will be responsible for the daily activity of the cyclotron including all routine maintenance. The role will also include supporting operational demands and maintenance of key pieces of equipment.

Both roles will enjoy a competitive salary, benefits package and ongoing training. They also involve working unsociable hours and will require a degree of flexibility - for further information on this please contact Rachel Davies, HR Executive, on 01444 232323.

If you are looking for a stimulating environment, working at the forefront of medical imaging, then apply by sending your CV and covering letter to HR Executive, SCHERING, The Brow, Burgess Hill, West Sussex RH15 9NE or email hr@schering.co.uk Please state clearly which role you are applying for.

Closing date: Tuesday 18th April 2006.

SCHERING are acting as recruitment agents for UK Radiopharma.
THE BINDING SITE
The Binding Site is an innovative immunodiagnostic company. We manufacture and develop a wide range of immunoassays for use in the diagnosis of autoimmune and infectious diseases as well as the detection of tumour markers. We are a well-established, highly successful company, based in South Birmingham and currently have the following vacancies:

SCIENTIFIC AFFAIRS MANAGER - FREELITE\textsuperscript{TM} (REF: 371 FRE)
Reporting directly to the Research & Development Director whilst maintaining strong links with the sales and marketing staff, the successful candidate will assume the primary responsibility for supporting a Medical education program across the UK and other specified International markets. This will involve written and verbal communications and collaborations relevant to scientific/medical issues pertaining to the use of Freelite\textsuperscript{TM}. The successful candidate will provide scientific/technical assistance to the Sales and Marketing teams and customers for educational efforts including presentations, e.g. Grand Rounds, CME seminars, Cancer networks and articles for Newsletters, etc, design and execution of studies, and evaluations of company's products. Extensive travel within the UK and internationally will be required (1-2 weeks/month).
Additional details regarding this vacancy (including position requirements and personal characteristics) are in the 'Careers' section on our website, \url{www.bindingsite.co.uk}

SENIOR RESEARCH SCIENTIST (ReF: 369 IDRL) A PhD scientist with some academic or industrial experience is required to manage a number of different projects mainly involving Freelite\textsuperscript{TM}. Responsibilities will include organising trials to evaluate clinical applications of Freelite\textsuperscript{TM} and paper, poster and oral presentations of data. The successful candidate will manage 3 members of staff. Applicants must have previous supervisory/management experience combined with good organisational, communication and interpersonal skills. Knowledge of immunology/immunoassays and protein analysis in addition to experience in project management, clinical trials/evaluations would all be an advantage.

Salary will be commensurate with experience and qualifications. In addition to the salary, the company has an excellent pension scheme and a workplace nursery with subsidised places for staff (subject to availability). Interested candidates should send a full CV and covering letter including details of current remuneration, quoting the relevant reference by post to Recruitment, The Binding Site, PO Box 11712, Birmingham, B14 4ZB, or by email to recruitment@bindingsite.co.uk. We welcome informal enquiries from interested candidates to find out more about any of the positions.

Closing date for applications: Friday 7\textsuperscript{th} April 2006

Materials Science & Engineering

NPL
National Physical Laboratory

Opportunities in Material Science
£18.5 - £27.5k depending on knowledge, skills, experience & level of role
Teddington, Middlesex

NPL is the UK’s national standards laboratory. We carry out fundamental research and develop measurement technologies, vital to improving quality of life, trade competitiveness, and protecting the environment.

We currently have the following vacancies within the Materials team at NPL:

**HIGHER RESEARCH SCIENTIST - FUNCTIONAL MATERIALS Ref. EPC/008**
To develop new techniques for the measurement of functional materials in thin film, integrated and bulk form. The Functional Materials group at NPL develops measurement capability in the materials areas encompassing piezoelectrics, multiferroics and other functional materials.

Opportunities now exist within the group to advance our metrological understanding of Functional Materials Science, Piezoelectrics and Multiferroics. Research topics currently include: Magnetic/piezo/strain coupling in multiferroics, high power non-linearity in bulk piezoelectric ceramics, piezoelectric MEMS/NEMS integration issues, nano-scale functionalised AFM probes, non-linear modelling for piezoelectrics, and measurement of thin film electroactive properties.

Key to the role is an aptitude in experimental design and lab based work, and Labview/Labwindows software control and acquisition. The group is expanding and you will also need to contribute to defining new opportunities and areas for development. You will be able to demonstrate understanding of the application of your research, and represent NPL at conferences and industrial consortia.

Experience in the field of materials science is essential as is a BSc/Masters in Physics or Materials Science. A related MSc is desirable. Please complete your online application with particular focus on how your skills match the roles of this position.

**RESEARCH SCIENTIST - ELECTRONICS INTERCONNECTION I Ref. EPC/006**
To contribute to leading research to further materials understanding and better measurement to support UK industry. Areas include the measurement of reliability of electronic materials systems (solder or conductive interconnects, substrate structures), electrochemical reactions of new solder materials, and performance of protective coatings for electronics. The group benefits from high levels of industrial interaction, providing a great opportunity to develop yourself and your career, and an opportunity to work in emerging electronics components and MEMS packaging solutions.

The successful candidate will be a Materials Science/Physics graduate, with an awareness of Microstructure and Metallurgy. Preference may be given to those with additional underlying knowledge of polymer materials and basic chemistry.

**RESEARCH SCIENTIST - ELECTRONICS INTERCONNECTION II Ref. EPC/007**
Also contributing to the research of materials understanding, the successful candidate will be a Materials Science/Physics graduate, with knowledge of Engineering, Software Control and Instrumentation.

Full details and online application at [www.npl.co.uk/recruitment/current](http://www.npl.co.uk/recruitment/current) or email your CV quoting the relevant reference, to recruitment@npl.co.uk

Closing date: 13th April 2006.
NPL is committed to equal opportunities.

ENGINEERING AND PROCESS CONTROL
QUALITY OF LIFE
ENABLING METROLOGY
www.npl.co.uk
[2545-031 (2006) : 71]
NHS
Blood and Transplant

At Bio Products Laboratory our aim is to develop and process life-saving biological products that offer the very best in patient care.

We are committed to using the latest technology to ensure the integrity of our products. This, combined with the dedication of our workforce, ensures our ability to provide first-class service to hospitals throughout England and Wales.

TECHNICIANS
£19,632 - £25,407 pa inclusive

There are currently vacancies within the Biochemistry, Chemistry and Laboratory Services sections of the Technical Department. We are seeking enthusiastic individuals, with good attention to detail and with a commitment to team working, who wish to develop a career within our busy laboratories.

Biochemistry - Ref: BC/08
The Biochemistry Section requires an individual with practical scientific skills to join a team specialising in enzyme, antibody and viral marker assay systems. A variety of manual and automated techniques are employed by this section in the testing of a wide range of starting materials and pharmaceutical products manufactured on site. The individual appointed will be expected to participate (after training) in the application of some of these assay techniques, together with the support activities including reagent preparation and equipment calibration.

Chemistry - Ref: CH/08
The Chemistry Section requires both a full-time and a part-time (20 hours per week) individual to join a team concerned with the analysis of intermediate and final product biological pharmaceutical products, incoming raw materials (chemicals/components) and utility samples (WFI water samples). A variety of manual and automated techniques are employed including various forms of spectrophotometry (UV, Vis, AA), chromatography (HPLC, FPLC, GC), and methods such as Karl Fischer moisture determinations and Kjeldahl protein determinations. Method development, validation and stability sample analysis also form an integral part of our lab operation.

Laboratory Services - Ref: LAB SER/08
Laboratory Services requires a part-time individual (20 hours per week) to join a small team offering a full support service to the testing laboratories. The role covers a wide variety of tasks from monitoring, servicing, validating and calibrating equipment as well as sample collection, stock control, preparing and ordering reagents, provision of sterile equipment to Microbiology, sterilisation of contaminated waste, cleaning and preparing equipment. The hours are to be worked over the 5-day period by arrangement with the Manager.

You must hold a degree or equivalent (GNVQ/HNC plus two years' laboratory experience in a relevant discipline, or a closely related subject e.g. Applied Biology). Alternatively candidates with four years' relevant pharmaceutical laboratory experience will also be considered. Candidates with two science A Levels may be accepted at trainee grade. Full training will be provided in all roles although proven practical laboratory skills will be considered an advantage, together with an understanding of Good Laboratory Practice and Good Manufacturing Practice.

In return we offer excellent working conditions, final salary pension scheme and a subsidised restaurant and café.

For an application form for any of the above roles, please apply in writing to the Personnel Department, Bio Products Laboratory, Dagger Lane, Elstree, Hertfordshire WD6 3BX or email us at vacancies@bpl.co.uk quoting the relevant reference number.
Closing date for all roles: 13\textsuperscript{th} April 2006.

bpl
Bio Products Laboratory
[2545-032 (2006) : 72]
RESEARCH SCIENTIST/ SENIOR SCIENTIFIC ASSISTANT
CROP PERFORMANCE AND IMPROVEMENT DIVISION

We require an experienced analytical chemist to develop and implement a high throughput GC-MS service in the recently established BBSRC-funded National Centre for Plant and Microbial Metabolomics at Rothamsted Research (www.metabolomics.bbsrc.ac.uk).

The post holder will report to the Centre Manager and work in a team to provide a comprehensive metabolite fingerprinting service to the UK plant and microbial research community. Primarily the post holder will be required to develop protocols and carry out analyses of biological extracts by GC-MS methodology, using a new Leco Pegasus TOF MS system, that is dedicated to the Metabolomics Centre.

Duties will include the setting-up of novel extraction, derivatisation and GC-MS protocols for biological extracts, the application of established protocols to submitted samples, the collection and interpretation of MS data and the application of statistical methods to data from large sample sets using multivariate methods such as PCA and PLS.

You will need a PhD or a degree in chemistry together with experience in GC-MS. Any experience in a Metabolomics environment would be advantageous. You must be a very organised team worker, a good record keeper with excellent computing skills.

The post is funded for two years at Band 6 or Band 7, dependent upon experience. The salary ranges are £23,022 to £26,541 (B6) or £18,142 to £20,538 (B7) per annum.

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ. Please quote reference 896. Previous applicants need not apply.

Closing date: 18 April 2006

ROTHAMSTED RESEARCH
[2545-033 (2006) : 72]
POST DOCTORAL RESEARCH SCIENTIST
Protein-ligand docking

The successful applicant will help develop improved scoring functions for our well-known protein-ligand docking program GOLD. This is a 3-year fixed-term appointment, and candidates should have a PhD in chemistry, cheminformatics or bioinformatics. Programming experience is highly desirable, with knowledge of C a particular advantage. During the project, the successful candidate will work in collaboration with computational chemists from three companies – Astex, AstraZeneca (Alderley Park) and Syngenta - to evaluate whether new scoring functions are delivering better enrichments in high-throughput virtual screening.

The CCDC is an independent organisation that compiles the Cambridge Structural Database and develops software applications in structural chemistry and molecular modelling. Our products are distributed worldwide to both academic and industrial users. We offer a lively working environment of 50 staff, competitive salaries, final salary pension scheme and other benefits.

Applications, including details of education, employment history, and the names of two referees, should be addressed to Dr S A Salisbury Business Director, CCDC, 12 Union Road, Cambridge CB2 1EZ, UK. The deadline for applications is Tuesday 18 April 2006.

At Roche, we're driven by a passion to push forward the boundaries of what's possible. Our mission, quite simply, is to improve the lives of people right across the world. Now, with a growing pipeline of exciting new products, we need you to be part of our future - and to thrive in this unique environment where feeling valued, respected and empowered is a daily experience. Join our team, and you can look forward to outstanding career opportunities, both locally and internationally.

You'll take responsibility for all statistical aspects of high-profile clinical development projects. It's a wide-ranging challenge that stretches from devising strategies and contributing to protocols to defining case report forms and scheduling analyses. We also need your expertise to play a key role in the development of new standards, policies and procedures that will maintain our global leadership in statistical methodology.

Qualified to MSc or PhD level in Statistics or a similar discipline, you must have at least eight years' experience of Biostatistics and clinical drug development within the pharmaceutical industry. A cooperative and collaborative approach is also essential.

Please apply on-line at http://careers.roche.com/uk

With continued growth, Roche is looking for ambitious people to join its teams in a wide range of areas. If you have the vision and energy to be part of our future, register in the Roche Talent Pool now. Just visit http://careers.roche.com/uk

We Innovate Healthcare and inspire your career in clinical drug development

ACCOVION

Medical Writer

Based near Frankfurt am Main

Accovion GmbH is a leading European research organisation comprising clinical development, medical writing, biostatistics, statistical programming, data management and pharmacovigilance departments. Numbering about 200 staff, Accovion provides comprehensive drug development services to the pharmaceutical and biotechnology industries. We employ some of the most skilled and experienced professionals to be found anywhere in the industry, and offer a creative scientific and international environment that will allow you to develop your own skills. Our headquarters are conveniently situated in Eschborn on the outskirts of Frankfurt, and we have additional locations elsewhere in Germany, as well as in France, Poland and the USA.

The Medical Writing department is a key function within Accovion, with highly experienced medical writers involved in all aspects of clinical and regulatory documentation, closely interacting with colleagues at all levels. We offer training and monitoring programmes to new staff, and are now further expanding the group to meet the increasing demand for quality medical writing services from our clients.

Projects include editing and writing (in English) of investigator brochures, clinical study protocols, reports, summaries, and manuscripts for publication. Senior writers also undertake co-ordination and planning of submission documentation, and other senior medical communication roles.

Applicants must be native English speakers and have the ability to express medical data accurately and concisely. They must have flawless English-language skills and will ideally have a background in life sciences including research experience and publications. Preference will be given to candidates with experience of medical writing within the pharmaceutical industry. A sound basis in German would be a considerable advantage, as would good word-processing skills. You will receive a competitive salary, bonus and benefits package to suit your qualifications.

To apply, please send your curriculum vitae including the names of two references, and two samples of your written work, to:
Gabriela Pawlak-Kuhlmann, Human Resources, Accovion GmbH, Helfmann-Park 2, 65760 Eschborn, Germany
Tel.: +49 6196 7709-466, Fax +49 6196 7709-110

[2545-039 (2006) : 74]
We'll give you more space to make your mark.

Want a bigger canvas for your ideas and initiatives?
As a member of the Tesco non-food team, you won't be restricted or constrained.

You'll operate in a dynamic and energetic retail environment, and while you're contributing to the delivery of our ambitious goals, we will help you realise yours too.

We have made it clear we aim to be as strong in non-food as we are in food. And we are determined to continue to offer the same great quality, value and service for customers across all categories as we grow.

The contribution of the **Category Technical Manager** is essential to the success of the strategy, plan and supply base that supports our technical categories. By managing our suppliers, delivering an efficient flow of merchandise and keeping a careful eye on safety, achieving good value is sure to be the end result.

Join us as a **Technical Manager** and you'll be the force behind developing and implementing the category technical plan. You'll also ensure our product portfolio meets all our customers' expectations in terms of quality, safety, legality and value. Working closely with the buying team, you'll implement action plans to resolve any issues connected to our products and services.

As a **Technical Executive**, we'll expect you to implement the technical plan across the relevant product portfolio. Developing specialist knowledge of our product portfolio, you'll ensure that all our quality and safety standards are met and that buying decisions are fully supported.

Helping us to keep the Technical Department running smoothly is the job of the **Technical Assistant**. These are absolutely essential roles and you can expect to assist in the operation of information systems such as DDIT and Technical Library. You'll also keep critical path trackers up to date, and follow up information and samples as required. Excellent administration skills are a must.

In return, we offer a salary and benefits that are designed to attract the best. So while your specific package will depend on your level of experience, rest assured you'd be hard-pushed to match it elsewhere.

Whichever role attracts you, you'll find yourself in a world that's evolving as fast as it is growing. All of the positions are based in Hertfordshire. To find out more, start exploring our world at [www.nonfoodworld.com](http://www.nonfoodworld.com)

Every little helps

[2545-040 (2006) : 75]
Chief Chemist

The Bahrain Petroleum Company (BAPCO) is the National Oil Company of the Kingdom of Bahrain. The Kingdom of Bahrain is an archipelago of low-lying islands located in the Arabian Gulf. It operates a 265,000 bpd Refinery.

BAPCO has a vacancy for an experienced Chief Chemist to oversee the operation of its Refinery Laboratory. The Laboratory, which comprises many modern, state-of-the-art analysers and a dedicated team of scientists, generates data for process control, finished product blending and certification, and for environmental purposes.

Applicants should have initiative and drive, the ability to trouble-shoot testing and analytical problems, possess good inter-personal skills and be able to motivate a team. Extensive knowledge of standard petroleum testing procedures for crude oil, refinery process streams and waters and a full range of finished products, from naphtha through to asphalt, is essential. Awareness of the protocols followed during the development of product specifications will be advantageous.

The ideal candidate will be a Chemistry Graduate with at least twenty years experience in a modern petroleum testing laboratory operating a certified quality system. The applicant is expected to have managed a Laboratory for at least five years. Knowledge and experience of environmental and laboratory health and safety protocols, including risk-assessment, will be advantageous. The candidate must be computer-literate and conversant with the use of laboratory information management systems as well as being able to communicate effectively at all levels. A high level of numeracy and statistical expertise is expected.

In return, the rewards are excellent for a two-year renewable contract (married or single status). The position offers an attractive tax free salary, with a full range of benefits including free furnished accommodation and utilities, generous assistance with local and overseas children's education, paid annual home leave with generous travel settlement and excellent social and recreational facilities. Bahrain is a safe and stable country with a cosmopolitan society.

To apply, please send your CV, with your letter of application demonstrating how you meet our requirements, to:

Safeguarding public health
MHRA

The Medicines and Healthcare products Regulatory Agency (MHRA), an Executive Agency of the Department of Health, is responsible for safeguarding public health by ensuring that all medicines, healthcare products and medical equipment meet the appropriate standards of safety, quality, performance and efficacy.

**Pharmacovigilance Information Scientists** (x5) - Vigilance & Risk Management of Medicines (VRMM) London • circa £20,000

Part of the multi-disciplinary Pharmacovigilance Group, you will be involved in a range of activities relating to drug safety monitoring. As such, the classification and interpretation of adverse drug reports, assessment of drug safety issues and the provision of drug safety information to enquirers will be key areas of your remit.

A graduate with relevant pharmacovigilance experience or a degree in pharmacy, pharmacology, toxicology nursing or physiology, you will have the ability to analyse and interpret complex data and excellent interpersonal and communication skills. In addition you will have effective communication, interpersonal and organisational skills and the proven ability to work effectively to tight deadlines and under pressure as a member of a multi-disciplinary team.

The full salary range for this role is £19,489 to £28,112.

Please note that all positions in the Agency require a minimum standard of IT literacy, including skills in MS Word and Outlook.

If this challenge inspires you, you can download further information and apply on-line via our website - [www.mhra.gov.uk](http://www.mhra.gov.uk). Similarly, you can download our application at this address and send your completed form via email to jobs@mhra.gsi.gov.uk or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: Monday 17th April 2006.

Nature Clinical Practice
NPG, publisher of the world's best science and medicine titles, has an exciting opportunity within its new series of "Nature Clinical Practice" journals. These journals are setting new standards of impact and quality, both in print and online, by helping to translate the results of biomedical and clinical research into accessible information for busy doctors. The eight journals cover cardiovascular medicine, endocrinology & metabolism, gastroenterology & hepatology, nephrology, neurology, oncology, rheumatology and urology.

**Copy Editor**
A Copy Editor is needed to handle the following varied responsibilities:
- Ensure accepted journal content has the correct style, grammar, punctuation and spelling
- Ensure content is consistent in its presentation
- Liaise with editors and authors
- Write short summaries of research published in other medical journals

The ability to understand complex biomedical information is essential, so you should have a good degree (preferably in a biomedical discipline) and time-management skills. Attention to detail and excellent literary skills are essential. Relevant scientific, technical or medical publishing experience (writing and/or copy-editing) would be an advantage.

The role is based in our modern London offices, near King's Cross Station. Applicants must have the legal right to work in the UK. Visit [www.nature.com/clinicalpractice](http://www.nature.com/clinicalpractice) for more information about the journals.

To apply, please send your CV and covering letter, quoting reference number NPG/LON/389, to Rebecca Innes, Personnel Department at [londonrecruitment@macmillan.co.uk](mailto:londonrecruitment@macmillan.co.uk) Include a short statement of why you are interested in this job, your current salary and notice period.

Closing date: 17th April 2006

[2545-046 (2006) : 78]
INDUSTRIAL CHEMIST

Tecknit Europe is seeking a graduate chemist to work in their UK centre in Grantham, Lincs. We are looking for a suitable person with 3-5 years’ experience in the development and use of polymeric materials for E.M.C. applications. Experience with silicones and or optical coatings would be an advantage though not essential. Tecknit manufactures materials that are used for E.M.C. applications in the telecommunication industry, for military purposes and many other electronic based industries.

The successful candidate will be expected to contribute initially to some of the following roles and possibly take responsibility for all areas on the retirement of the chief chemist in 2007.

1) R&D work in the area of metal filled silicones
2) Technical support/customer liaison in the application of existing products
3) Technical support for the manufacture of existing products
4) Technical support for shielded windows

Salary will be commensurate with qualifications and experience.
To apply send your CV in confidence to:
Alan Hudson, Tecknit Europe, Swingbridge Road, Grantham
Lincs. NG31 7XT

Think what’s possible.

Are you looking to work in a global growth company where you can make a real difference? With about 81,400 associates around the globe in our affiliates in over 140 countries, we share a vision of a better today and tomorrow - a vision that drives our growth and success. Our greatest job satisfaction is knowing that we improve lives, we extend lives, and we save lives - and we do it with increasing precision and efficiency through breakthrough science and innovation.

**Quality Compliance Manager**

Novartis Animal Health is one of the leading worldwide companies who provide pharmaceuticals for the prevention and treatment of animal diseases. As a result of internal promotion we now require a Quality Compliance Manager at our vaccines manufacturing unit in Braintree, Essex.

The successful candidate for this key position will be responsible for managing the QA team within our vaccines production facility. We are looking for a QA professional with a Life Science Degree or equivalent and a minimum of three years' experience preferably in a Biological manufacturing environment. You should already have Qualified Person status or be undergoing Qualified Person training.

In addition to the above you should:
- Have excellent communication skills;
- Have the willingness and aptitude to work as part of a close-knit team;
- Be able to motivate others and have a high level of self-motivation.

We are a profitable, multi-national company which offers excellent career prospects and is dedicated to developing staff through continuous training and personal development programmes. We offer a competitive salary, coupled with a comprehensive benefits package, which includes a company car, company pension scheme and private health insurance. A relocation package will be paid if necessary.

To apply, please send a copy of your up-to-date CV, giving your current salary details, to the Head of Human Resources, 4 Warner Drive, Springwood Industrial Estate, Rayne Road, Braintree CM7 2YW. The closing date is Friday 21st April 2006.

[2545-048 (2006) : 79]
Head of Product Stewardship
Location: Royston, Herts.
Salary: Excellent Package Ref: 7188

JM
Johnson Matthey

Johnson Matthey is a global business with operations in 34 countries, employing 7,400 people. The business is managed as four autonomous divisions; Catalysts, Pharmaceutical Materials, Precious Metal Products and Ceramics with a corporate headquarters based in Royston, Hertfordshire. Products are sold across the world to a wide range of advanced technology industries.

Against a background of increasing regulatory developments affecting the chemical industry product stewardship is a topic of growing importance, and a priority issue for the Company. This newly created role will provide technical leadership of product stewardship systems particularly with regard to hazard evaluation and communication and will act as a source of expertise in occupational and environmental toxicology. The prime purpose of the role will be to produce an implementation plan for the REACH directive, and to manage that plan for Johnson Matthey business with a view to the expected April 2007 timetable.

You will require an Honours science degree and preference will be given to candidates with a post-graduate qualification in a discipline relevant to occupational and environmental toxicology. This will be combined with at least 5 years of relevant experience in the chemical, pharmaceutical or metal industries, preferably in multinational organisations.

Johnson Matthey will offer the successful candidate a stimulating environment where technical excellence combined with customer orientation, strong project management skills and interpersonal awareness will be rewarded.

Research Assistants
The availability of the human genome sequence allows a more detailed look at DNA sequence variation in different individuals. A research programme of the Institute is to identify common variations in DNA collections, including both Single Nucleotide and Deletion Insertion Polymorphisms. A particular focus of current work is to search for variation in and around genes, with a view to correlating them with specific human genetic diseases in the future. The work is co-ordinated between a number of teams involved in gene annotation, exon sequencing, informatics and human genetics.

Research Assistant Ref NS1123
We are seeking a research assistant to join an expanding team responsible for exon assay development and other aspects of developing a complete set of working assays for every known exon in the human genome. This will include the study of selected genes in collections of patient DNA samples as part of collaborative projects. The successful applicant will be expected to work closely with members of other existing teams and to be flexible in their approach to the varied responsibilities and activities involved in this position. Experience working in a high throughput environment would be an advantage although full training will be given.
Informal Enquiries should be made to Kirsten McLay (kem@sanger.ac.uk)

Research Assistant Ref N51124
We are seeking another research assistant to join the team responsible for amplification of every known exon in the human genome as part of the exon resequencing programme. This will include the study of selected genes in collections of patient DNA samples as part of collaborative project. The successful applicant will be expected to work closely with members of other existing teams and to be flexible in their approach to the varied responsibilities and activities involved in this position. The ideal candidate should also be enthusiastic and pay good attention to detail. Experience in working in a high throughput environment would be an advantage although full training will be given.
Informal enquiries should be made to Andrew Dunham (ad1@sanger.ac.uk)
Benefits include 25 days annual leave, final salary pension scheme, optional private healthcare (on successful completion of a qualifying period), permanent disability insurance, life assurance, childcare voucher scheme, campus bus services from Cambridge and Saffron Walden, car-share scheme, on-site restaurant, café, gym and an active sports and social scene.
To apply for this position please email your CV (including two referees) and current salary details, Quoting the appropriate reference to: recruit@sanger.ac.uk
Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge CB10 1 SA

(SENIOR SCIENTIFIC OFFICER) Ref: SB/107/05
Salary: £21,747 - £36,389

AGRI - FOOD AND BIOSCIENCES INSTITUTE (AFBI)
Location: Newforge Lane, Belfast

For an application form and a candidate information pack, write to Recruitment Service, Northern Ireland Civil Service, Orchard House, 40 Foyle Street, Londonderry, BT48 6AT or visit the Recruitment Service web-site www.nicsrecruitment.gov.uk or email recruitment.cpg@dfpni.gov.uk

All requests must include your name, address and reference number SB/107/05.

Completed application forms must be returned to arrive not later than 12:00 noon (UK time) on Thursday 13th April 2006.

The Northern Ireland Civil Service is an Equal Opportunities Employer.

ALL APPLICATIONS FOR EMPLOYMENT ARE CONSIDERED STRICTLY ON THE BASIS OF MERIT.
[2545-052 (2006) : 80]
Are you prepared to safeguard public health from the effects of accidental and deliberate releases of hazardous chemicals?

The Health Protection Agency serves to prevent, minimise and reduce the burden of disease from exposure to chemicals pollutants, whilst also enhancing emergency planning, preparedness, response and recovery for chemical accidents and terrorism.

We are an independent body which provides integrated and holistic advice on environmental hazards, including chemical, biological, radiation or nuclear throughout England and Wales. Within this remit, the Chemical Hazards and Poisons Division provides advice and support to UK government departments and agencies on human health effects from chemicals in water, soil and waste as well as information and support to the NHS and health professionals, on the acute and chronic health effects of exposure to environmental chemicals.

**Senior Environmental Scientist**
Up to £31,000 per annum
Cardiff

You will provide advice and support on releases of chemicals into the environment predicting the likely chemical composition of releases, the products of environmental reactions, environmental fate and media likely to be contaminated. Probable routes of human uptake will be determined and a risk assessment made. Working closely with allied agencies and organisations, you will travel both within and outside the UK. You will participate in teaching and training, as well as being a member of the national on call rota for chemical incidents.

To apply for this vacancy please visit [www.hpa.org.uk/careers](http://www.hpa.org.uk/careers) For a hard copy of the application pack please call 01235 822822 quoting 02106 reference number.

In return you’ll enjoy excellent benefits, including NHS pension scheme, Childcare Vouchers, Flexible Working Environment, Training Opportunities, NHS Discounts, Employee Assistance Programme and Family Friendly Policies.

Closing date: Thursday 13 April 2006 at 12 noon.
Interview date: Wednesday 26 April 2006.

This post is subject to a terms and conditions review (Agenda for Change).

The Health Protection agency promotes diversity in the workplace and is an equal opportunities employer.

Health Protection Agency

Research Buildings and Estates Manager

Marie Curie Research Institute, Oxted, Surrey
£30,000 - £35,000

The Marie Curie Research Institute is undergoing a phased expansion of its scientific activities and now requires a dedicated Institute Estates Manager.

You will be responsible for maintenance and operations at the Research Institute relating to buildings and infrastructure, utilities, scientific services, waste management, cleaning, security operations and aspects of Health and Safety etc.

You will provide and ensure an efficient research orientated infrastructure service, and develop effective preventative monitoring, risk assessment procedures and best practices. You will also anticipate and be responsive to regulatory developments and statutory requirements relating to these matters.

You will have significant experience of infrastructure and estates management in a research environment and be expected to be qualified in safety management.

To download an application pack go to our website quoting reference REM/0/01.

Closing date: 14th April 2006

[2545-054 (2006) : 81]
ICI Strategic Technology Group

**Research Scientist** - Colloid, Science and Technology Team, based at Wilton, Teesside.

ICI

ICI is a global blue chip organisation producing high value speciality chemicals, with a broad portfolio of products and application areas. A vital part of ICI's research effort is the Strategic Technology Group, a team comprising of over 50 scientists and engineers with internationally recognised expertise in colloid science, particle process engineering, physical chemistry and modelling who have access to first class facilities and equipment.

The group is looking to recruit a physical chemist to work in the Colloid Science and Technology team. The work will initially concern developing an understanding of the processes occurring during the drying of coatings (such as paints) and how the structure of the coating after drying influences its properties. This understanding will then be used to support new product development in the paints, electronic materials and personal care businesses of ICI. A variety of different interfacial and rheological techniques will be employed including atomic force microscopy and nano indenter measurements, drying stress determinations, ultrasonic spectroscopy and mechanical testing.

The role will suit a new or recently qualified PhD Scientist specialising in physical chemistry, with colloid and/or polymer experience. Reasonable fluency in two European languages would be an advantage. As the work involves interaction with a range of different business units, the ability to work as part of a multidisciplinary team and liaise with customers and clients is essential. A high level of motivation and drive for results is essential.

If you want to be at the forefront of new technology, please e-mail your CV with cover letter to icicolloid@uib.srg.co.uk or write to Probier Chatterjee, SRG, The Grainger Suite, Dobson House, The Regent Centre, Newcastle upon Tyne. NE3 3PF.
Tel. 01912846768.

ICI is an equal opportunities employer.

[2545-055 (2006) : 81]
SYSMEX EUROPE GMBH is a subsidiary of Sysmex Corporation, a leading international company which designs and produces diagnostic systems and software solutions for medical laboratories worldwide. The brand name Sysmex is well known as respected globally as being synonymous with innovation and reliable products and services. We are looking to recruit a:

**Product Manager Life Science**
Within the Business Unit Life Science you will
• be responsible for Product Management within the UK
• oversee product application support (documentation, demonstration, training)
• build an interest group network within the UK
• develop and implement the local marketing strategy
• define and realise the appropriate marketing mix
• work closely with counterparts in Hamburg and colleagues in Sysmex UK

Candidates should have:
• academic experience in molecular biology or medicine, preferably oncology
• experience in the diagnostic industry, preferably in a product management or sales related position
• excellent communication capabilities with technical, academic and economical conversational partners
• good teaching skills
• entrepreneurial spirit coupled with strong target and sales orientation

This position is based in Milton Keynes. You will report to the Head of the Business Unit Life Science, Sysmex Europe (in Norderstedt, Germany).

**Manager Medical & Scientific Affairs for UK**
Within the Medical & Scientific Affairs Department you will
• support marketing, business development and sales force with high clinical and scientific expertise with focus on pathology, cancer and molecular biology
• develop concepts for new clinical applications for Sysmex products
• plan and supervise product evaluations and clinical studies, including data analysis
• write and edit scientific brochures and publications in peer-group reviewed journals
• participate as a speaker in Sysmex events (symposia, workshops) and in external congresses
• identify and co-operate with key opinion leaders

Candidates should have:
• academic degree in medicine, biology, biochemistry or chemistry (preferably PhD)
• broad experience in pathology, cancer and molecular biology
• some experience in clinical chemistry & haematology
• good English communication skills
• excellent skills in writing & editing general knowledge in statistics business focused
• ready to work in international project teams
• willingness to travel frequently

This position is based in Milton Keynes. You will report to the Head of Medical & Scientific Affairs, Sysmex Europe (in Norderstedt, Germany).

Please send CV and details of current salary to: Simon Kimber, Sysmex UK Ltd, Sysmex House, Garamonde Drive, Wymbush, Milton Keynes, MK8 8DF UK. Tel: 0870 902 9210 E-mail: kimber.simon@sysmex.co.uk

Closing date: April 14th, 2006

How often does a data management system affect the way we live?

INFORMATION SYSTEMS & DATA MANAGER

We’re responsible for carrying out leading-edge research into climate change - dealing with issues that affect the whole planet, our work has immense implications worldwide. Join us and you will have a key role to play, ensuring that we are supported by effective data management at all times.

Organising, maintaining, developing and implementing the relevant systems and software, you will enable us to deliver core scientific objectives. Training other staff as required, you will maintain an in-depth knowledge of current and future technologies, and will advise us on the possible implications of developments in this field. While you will be based in Cambridge, you will spend occasional periods in Antarctica.

Qualified to degree level in a computing or physical science discipline, you will have already worked in an IT environment where data analysis is high on the agenda. You must be able to demonstrate Perl, shell scripting and C programming skills, as well as experience of Linux/Unix OS. Additional expertise in Java, web development and databases (Oracle/MySQL) would be advantageous.

On-line application forms and further information are available on our website at www.antarctica.ac.uk/employment

These are also available from the Personnel Section, British Antarctic Survey, High Cross, Madingley Road, Cambridge CB3 0ET Tel 01223 221508. Please quote reference BAS 20/06. Closing date for receipt of application forms is 18 April 2006. Interviews are scheduled to be held on 2 May 2006.

[2545-062 (2006) : 83]
Information about the EPSRC is available on our website www.epsrc.ac.uk
Please note that this appointment will be made by way as a Professorial Research Fellowship. Candidates who are not currently employed by an organisation capable of receiving funding from the EPSRC are encouraged to apply and will be helped to locate a suitable employing organisation if successful.

EPSRC
Engineering and Physical Sciences Research Council

Director - EPSRC Autonomous Systems IRC

The Engineering and Physical Sciences Research Council (EPSRC) seeks to appoint a Director with the vision and skills to bring together a team of interdisciplinary researchers drawn from academic, industrial and Government institutions, to develop a coherent research portfolio around grand challenges in Autonomous Systems Application Domains.

The EPSRC plans to make a considerable strategic investment of £14.5 million in this area in the form of an Interdisciplinary Research Collaboration (IRC) that will be funded for an initial period of six years. The Director will be responsible for generating matching funding in cash or in-kind contributions from collaborating partners, etc.

Key to the IRC's success will be a Director eager to implement a creative approach combined with a clear vision and able leadership skills.

A full job specification is available at www.epsrc.ac.uk

Informal discussions are welcomed. Please contact Dr Lesley Thompson, EPSRC, Programme Manager, Information and Communications Technology on 01793 444394 or Lesley.Thompson@epsrc.ac.uk

To apply, please send your CV salary details and a document (one side maximum) entitled "Vision for the IRC in Autonomous Systems" with a covering letter outlining your match to the selection criteria to Lisa Woolford, EPSRC, Polaris House, North Star Avenue, Swindon SN2 1ET by 12 May 2006. Applications will be assessed by a panel who will select candidates. Interviews will be held in May/June 2006.

It is intended that the appointment should take effect as soon as possible, although there is some flexibility in order to secure the most effective Director.

The Engineering and Physical Sciences Research Council is the main UK Government agency for funding research and training in engineering and the physical sciences, investing over £500 million a year in a broad range of subjects - from mathematics to materials science, and from information technology to structural engineering.

We operate to meet the needs of industry and society by working in partnership with universities to invest in people and scientific discovery and innovation. The knowledge and expertise gained maintains a technological leading edge, builds a strong economy and improves people's quality of life.

[2545-063 (2006) : 84]
Renovo
Renovo is a rapidly growing biotechnology company engaged in the development of pharmaceutical therapeutics enabling wounds at all body sites to heal with reduced or absent scarring. We have a high performance culture, which has enabled the company to pursue pioneering programmes of drug discovery and development.

To apply for these roles you must have relevant experience and a recognised qualification.

**Clinical Project Manager**
Required to manage a series of international clinical trials, the role will involve trial design and protocol preparation, CRO selection and management, leadership of a multi-disciplinary team, trial timeline, budget management and interaction with key opinion leaders.

You should have at least four years' clinical research experience with at least 12 months' experience of trial management. Experience gained in a wound-healing environment would be advantageous.

**Senior CRA & CRA Roles**
Typical responsibilities will include site evaluation and selection, Investigator liaison, preparation of ethics submissions and trial site management. Senior CRA will be responsible for the supervision and training of less experienced team members and may also have trial management responsibility.

Applicants must have at least six months' trial monitoring experience (two years for the senior role), be familiar with ICH GCP and have proven personal organisation and communication skills. Excellent attention to detail and the ability to work to deadlines are a necessity. Experience gained in a wound-healing environment would be advantageous.

For further information regarding these and other vacancies, please see our website [www.renova.com](http://www.renova.com)

To apply, please send a full CV together with a completed application form, which is available from our website and the names and addresses of three referees, one of which must be your current/last employer to: Collette Butterworth, Head of H R, Renovo, Manchester Incubator Building, 48 Grafton Street, Manchester M13 9XX. Tel: 0161 606 7404. Fax: 0161 606 7333. Closing date for applications: 28th April 2006.

[2545-064 (2006) : 84]
Huntleigh HEALTHCARE

CLINICAL DEVELOPMENT MANAGER
Huntleigh Healthcare is a leading manufacturer of healthcare equipment operating with huge success in the healthcare market and with an international reputation for innovation, high quality products and service excellence.

We have a new and exciting opportunity for a Clinical Development Manager to drive all the Intermittent Pneumatic Compression (IPC) related clinical activity and communications. You will be responsible for implementing a global clinical communications and research strategy for the IPC product line and will play an active role in the New Product Development Process. You will be a central point for clinical information and advice in relation to IPC for internal and external customers.

This position is full time, monthly salaried and carries all the benefits associated with a major company.

The ideal candidate will require at least 5 years relevant experience. A clinical qualification or Lifescience degree is essential, as is previous experience in study design. A PhD qualification would be an advantage. Good communication skills, self motivation and a pro-active and resilient attitude are required. You will need to work flexible hours and be prepared to travel.

If you are interested in the above opportunity, please forward your CV with a covering letter including current salary to: Anne Macmillan, Business Director IPC, Huntleigh Healthcare Ltd, 310-312 Dallow Road, Luton, Beds, LU1 1TD or email to anne.macmillan@huntleigh-healthcare.com

Closing date: 7th April 2006

Huntleigh Healthcare is committed to equal opportunity for all its staff

[2545-066 (2006) : 85]
UNIVERSITY OF BATH
Department of Biology & Biochemistry

Experimental Officer
(Ref: 06/102) This technical opportunity is available to study the 'Structure and Function of Inflammatory Proteins'. The research project involves expression and purification of proteins for structural work in the group. In addition, the post holder will be involved in some preliminary aspects of crystallography work and laboratory maintenance.

Applicants should have a degree in Biochemistry/Molecular Biology/Biology (minimum 2:1 grade). You will also need to be familiar with protein expression and purification techniques.

The position will be from 1 May 2006, or as soon as possible thereafter, until 30 January 2007. The starting salary will be up to £19,622 per annum, depending on experience.

Informal enquiries can be made to Professor K. Ravi Acharya (telephone: 01225 386238 or email: K.R.Acharya@bath.ac.uk).

The closing date for this position is 21 April 2006.

Pharmaceutics Technician
(Ref 06/103) This is a new opportunity to provide technical support to our transdermal delivery research group laboratories, giving first-line support to academic and research staff, and postgraduate students. The department is 5* RAE rated, with an expanding and varied portfolio, providing a stimulating environment for its five distinctive areas of research.

The ideal candidate will have experience in technical support within a biology or chemistry discipline, and experience in the use of some of the following techniques: HPLC, LC and electrophoresis. Effective time-management skills and a flexible approach to work are desirable.

The starting salary is in the range of £14,372 to £19,622 per annum.

Informal enquiries can be made to Mr Malcolm Holley (email: M.Holley@bath.ac.uk). The closing date for this position is 12 April 2006.

To apply, please request an application form from the Human Resources Department, University of Bath, Claverton Down, Bath BA2 7AY (email: jobs@bath.ac.uk). Alternatively, please telephone the 24 hour answerphone service on 01225 386924, textphone 01225 386039, or apply online at www.bath.ac.uk/jobs quoting the post reference.

An Equal Opportunities Employer
[2545-067 (2006) : 85]
POSTGRADUATE MEDICAL INSTITUTE,
DEPT OF DIABETES AND ENDOCRINOLOGY

Post Doctoral Research Fellow
We are seeking a highly motivated, enthusiastic post-doctoral scientist to work on a novel ion channel family and its mechanism and functional relevance to human diseases. You should have a doctorate in any fields of biological or medical sciences. The research project will be carried out in the Biomedical Research Laboratory in the University of Hull. The project will focus on the expression and functional regulation in human primary cultured cells. The skills in molecular biology, such as the preparation of plasmid cDNA, cell culture and transfection, antibody skills and western blotting, cell proliferation or apoptosis are desirable (see related techniques in Dr S.Z. Xu's publications: Nature Biotechnol. 2005; 23(10):1289-93. Circ Res 2001; 88: 84-7), but not essential, all the techniques are available in the laboratory.

This two-year full-time post is available immediately.

Salary range £20,235 - £27,194 pa.

Informal enquiries can be made to Dr S Z Xu, email: s.xu@hull.ac.uk or Professor S L Atkin, email: s.l.atkin@hull.ac.uk.

For further information and details of how to apply, tel: (01482) 463888 (textphone for applicants with a hearing/speech impairment: 01482 466851), fax: (01482) 464173, or email: d.mann@hull.ac.uk (quoting ref. PG 119).

Closing date: 30 April 2006.

For online information see WWW http://www.hull.ac.uk/

We promote diversity in employment and welcome applications from all sections of the community.

THE UNIVERSITY OF HULL
[2545-068 (2006) : 86]
University of Newcastle upon Tyne

**Lecturer in Marine Biology**  £27,194 - £37,643

We are looking to appoint a Marine Biologist with exceptional research and teaching expertise to complement the existing strengths within the School of Marine Science and Technology. We offer world class research facilities which include access to flow through sea water aquaria, modern research laboratories, the Dove Marine Laboratory and use of the research vessel Bernicio. The School is the largest grouping of marine scientists and technologists in Europe, with internationally recognised expertise in areas that include tropical coastal management, chemical ecology and marine biofouling. With a strong publication record and the ability to attract substantial research funding, you will contribute to the teaching of the IMarEST accredited Marine Biology BSc degree as well as to Masters teaching and PhD supervision. Informal enquiries may be made to Dr M G Bentley, Degree Programme Director for Marine Biology, telephone: (0191) 222 5350, or e-mail: m.g.bentley@ncl.ac.uk  

Closing date: 13/04/06.

Job reference D1105A  Answerphone (0191) 222 5085

To apply, please forward your application to Human Resources, Faculty of Science, Agriculture and Engineering Offices (SAgE), 1st Floor, Agriculture Building, University of Newcastle NE1 7RU.

Committed to Equal Opportunities

[2545-069 (2006) : 86]
School of Biological Sciences (Plant and Soil Science)

Post-Doctoral Research Fellow - Soil Microbiology
£22,289 per annum

An enthusiastic and motivated post-doctoral scientist, you will work on a BBSRC-funded project investigating the contribution of nitrate ammonification to nitrous oxide (N$_2$O) and dinitrogen (N$_2$) emissions from agricultural soils. Ammonification rates and N$_2$O and N$_2$ emissions during this process will be quantified and related to the diversity of soil ammonifier communities and gene expression. This will involve the application and development of stable isotope and molecular techniques. Experience in either or both of these would therefore be an advantage.

The position is for 36 months and is anticipated to commence in May or June 2006.

Informal enquiries to Dr Liz Baggs (tel: 01224 272691, e-mail: e.baggs@abdn.ac.uk).

Online application forms and further particulars are available from www.abdn.ac.uk/jobs Alternatively telephone (01224) 272727 (24 hour answering service) quoting reference numberYBS016R for an application pack.

Closing date: 21 April 2006.

Promoting Diversity and Equal Opportunities throughout the University

1495
UNIVERSITY of ABERDEEN
[2545-070 (2006) : 86]
Senior Research Associate in the Climatic Research Unit
£22,289 to £30,002 per annum  Ref: RA262

Applications are invited for the post of Senior Research Associate to work with Professor Phil Jones in the 5** School of Environmental Sciences' Climatic Research Unit on the final year of a 3-year project, funded by the US Department of Energy. The project is on climate data and analysis and studies natural variability and anthropogenic change of climate. A PhD in environmental sciences or equivalent level of experience is required along with the ability to program, manipulate and manage complex datasets together with a proven ability to write reports and scientific papers.

The post is available from 1 June 2006 for 7 months.

Specific enquiries can be made to Professor Jones p.jones@uea.ac.uk and further details are available at http://www.uea.ac.uk/env/vacancies.html

Closing date: 14 April 2006

Further particulars and an application form can be obtained from the University's web page at: http://www.uea.ac.uk/hr/jobs/ or by e-mail at: hr@uea.ac.uk or by calling the answerphone on 01603 593493 or by mail to the Human Resources Division, University of East Anglia, Norwich NR4 7TJ.

POSITIVE ABOUT DISABLED PEOPLE
[2545-071 (2006) : 86]
School of Physics and Astronomy

**Lectureship** in Theoretical Cosmology Ref: EPS/112/06
Salary in the range £28,009-£38,772 p.a.

As part of a new initiative involving the Astronomy & Astrophysics and Particle Physics groups, the University seeks to appoint to the broad area of Theoretical Cosmology. You will be expected to take a proactive role in the development of a world class programme of research linking particle physics, cosmology and astrophysics. In addition, you will possess the ability to teach at both undergraduate and postgraduate level. You will have a strong research record and possess the potential to attract external funding. It is possible that more than one position could be available if sufficiently well qualified candidates apply. Informal enquiries may be made to Dr Richard Battye; e-mail: richard.battye@manchester.ac.uk Dr Apostolos Pilaftsis; e-mail: apostolos.pilaftsis@manchester.ac.uk or Professor John Durell (Head of School); e-mail: john.durell@manchester.ac.uk

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44 (0) 161 275 8837; fax: +44 (0) 161 306 4037; e-mail: eps-hr@manchester.ac.uk Closing date: 12 May 2006.

Wolfson Molecular Imaging Centre

This new state-of-the-art research facility is dedicated to the development of new treatments in cancer and brain disorder patients using Positron Emission Tomography (PET).

**2 X Chemistry Technicians**  Ref: MHS110/06 salary circa £13,500 p.a.

The post is to assist with the production of radiotracers for PET imaging applications, primarily acting as a production operative for senior radio chemists but also assisting the clean room technician in the maintenance of a grade C clean room. You will also be required to assist in other laboratory operations for development of protocols and procedures for radiochemistry production.

You will need a Science degree in Chemistry or Microbiology, a sound knowledge of organic chemistry synthetic routes, experience of chromatography (HPLC, TLC, GC), experience of Good Manufacturing/Good Laboratory Practice requirements and good written and verbal skills. Experience of pharmaceutical clean room procedures, working with radiation or knowledge of mechanical machine installations would be an advantage, but is not essential as training will be given.

**Laboratory Technician**  Ref: MHS/117/06
salary circa £13,500 p.a.

This post offers a unique opportunity to develop expertise in laboratory work related to PET research, with the main focus of providing technical support to the bioanalysis laboratory that supports the centres PET clinical research. Duties will consist of preparation of consumables for studies, including preparation of syringes, labelling and weighing of sample vials and calibration of equipment; involved in the acute processing of blood samples on study days; routine maintenance of laboratory equipment and monitoring of consumable stocks; and general laboratory housekeeping duties.

You will have general laboratory skills, preferably with experience in handling human blood samples, radiation and/or operation of gamma counters and HPLC systems. The ability to work independently, as part of a team and with people at all levels is essential.

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44(0) 161 275 0006; e-mail: catherine.doyle@manchester.ac.uk Closing date: 13 April 2006.
Faculty of Life Sciences

**Technician in Electron Microscopy**
Salary circa £20,000 - £22,000 p.a.  Ref: LS/060/06
This position, which is funded by the MRC, is to offer a high level of dedicated technical support in electron microscopy to the research groups of Dr Martin Lowe, Dr Viki Allan, Prof Stephen High, and Dr Philip Woodman. The Faculty of Life Sciences is one of the largest life science departments in the country and was awarded a 5* rating in the latest Research Assessment Exercise (the highest possible ranking). The Lowe, Allan, High and Woodman labs are studying protein biosynthesis and trafficking in eukaryotic cells and how defects in these processes contribute to disease.

Further details can be found at [www.ls.manchester.ac.uk/research/themes/organellefunction/](http://www.ls.manchester.ac.uk/research/themes/organellefunction/). Providing full-time electron microscopy support for the research groups described above will involve performing electron microscopy experiments that will complement ongoing work in these groups, and necessitate a close working relationship with the individual members of the groups involved. In addition, you will be responsible for developing and improving methodologies to answer specific research questions. Several years' research experience with a track record in performing and applying electron microscopy techniques, particularly transmission electron microscopy of cells or tissues, is essential.

The post is available immediately, and tenable for two and a half years. Application forms and further particulars are available from our website. If necessary, you can obtain them from, and make informal enquiries to,
Dr Martin Lowe on +44 (0)161 275 5387; e-mail: martin.lowe@manchester.ac.uk Closing date: 14 April 2006.

**Research Technician**  Ref: LS/057/06
Vision/Circadian Biology
Salary circa £16,946 p.a.
Required to work on a BBSRC sponsored research grant, you will be enthusiastic and highly motivated with an interest in vision and/or clock biology. The project builds upon one of the most surprising recent findings in the field of vision research, that the mammalian inner retina contains a class of photoreceptors quite distinct from the rods and cones. This discovery necessitates a comprehensive reanalysis of the ways in which the eye extracts information from the light environment (Lucas et al 2003; *Science* 299: 245-7). A Home Office personal licence and/or experience of general molecular biology or cell culture techniques will be advantageous.

Based in a vibrant and exciting research environment at the University of Manchester, the Faculty of Life Sciences (rated 5* in the last RAE) has recently moved into a brand new state-of-the-art building that provides superb facilities for all aspects of biological research.

This post is tenable for up to 16 months.

Informal enquiries can be made to Dr Robert Lucas on +44 (0) 161 275 5263; fax: +44 (0) 161 275 5363; e-mail: robert.lucas@man.ac.uk

Further particulars and application forms are available from our website. If necessary, you can obtain them from +44 (0) 161 275 5399; e-mail: ann.drozdowski@manchester.ac.uk

Closing date: 14 April 2006.

**Research Technician**  Ref: LS/058/06
Salary circa £16,135 p.a.
A highly motivated Research Technician is required to work in the laboratory of Dr Viki Allan in the Faculty of Life Sciences, based in the newly built Michael Smith Building.
You must be educated to at least ONC level (or equivalent) in any biological science discipline, together with an employment history in a research environment. You should have a well-developed sense of responsibility, be able to work independently, be interested in learning new techniques and have excellent communication skills. A practical knowledge of protein purification, molecular biology and cell culture would be an advantage. You must have the ability to analyse and present data both verbally and in written form and be able to organise and manage your own time and experimental protocols.

The position is available immediately and is tenable for one year in the first instance.

Further information on Dr Allan's research can be found at: www.biomed2.man.ac.uk/allan/

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44 (0) 161 2751585; e-mail: angela.reid@manchester.ac.uk Closing date: 14 April 2006.

For all posts, please quote the relevant reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

[2545-072 (2006) : 87]
THE UNIVERSITY OF NORTHAMPTON
E LEATHER
Knowledge Transfer Partnership
Research and Development Technologist £18,000 pa (Two year fixed term)

Following 10 years of developing a novel leather based material and technology, E-Leather is moving into production and sale of product. An exciting opportunity has arisen for a technologist to work on process mapping and the development of new forms of materials with engineered properties.

You should have a good degree in a materials science, textile technology or physics and should be interested in pursuing your career with a scientific base in a demanding environment.

The project is in partnership with The University of Northampton and you will have the opportunity to register for a research degree. The post is supported by the dti Knowledge Transfer Partnership Scheme and you will be expected to undertake an NVQ level 4 in management.

For informal enquiries please contact Prof Geoff Attenburrow on 01604 892056 or geoff.attenburrow@northampton.ac.uk
For an information pack please visit www.northampton.ac.uk/jobs or email: per.apply@northampton.ac.uk
Alternatively call the 24 hour answerphone on 01604 892822 quoting reference TLA3863JT.

Closing date: 21 April 2006.

Transforming lives, inspiring change

The University of Northampton as an employer strives to achieve diversity among its staff which reflects the community it serves.

[2545-073 (2006) : 88]
Working within the Coastal Modelling Group, you will study the effect of shore-parallel breakwaters in tidal and wave conditions on coastal morphology. This EPSRC-funded project (LEACOAST2) involves the development of computer models to study larger-scale morphodynamic impacts of segmented shore-parallel breakwaters (SSPB) on coasts and beaches, using large-scale field measurements taken at Sea Palling, Norfolk. You should have (or be about to obtain) a PhD in Applied Mathematics, Physics, Oceanography or Engineering, preferably with computer modelling experience. The post is available for two years initially, commencing 1 August 2006.

Quote Ref: B/706/NS
Closing Date: 25 April 2006

For full details, or to request an application pack, visit www.liv.ac.uk/university/jobs.html or email: jobs@liv.ac.uk Te1:0151 794 2210 (24 hour answerphone) Please quote Ref in all enquiries

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY
[2545-074 (2006) : 88]
Research Technician (Cancer Studies)
School of Medicine

You will join a RAE 5* group studying the process of cellular senescence, both in the context of cancer and of human ageing. This post is funded by a large Biotechnology and Biological Science Research Council grant, jointly with the School of Chemistry in Cardiff University where additional team members are located. The project seeks to investigate the role of p38MAPK signalling in a very dramatic premature ageing disease, Werner's Syndrome (Kipling et al. Science 305: 1426-31).

You will have proven skills in mammalian cell culture, a BTEC HND/HNC or equivalent in biological sciences or related discipline and preferably expertise in cell-based assays and Western blotting.

You will be appointed to an appropriate salary scale dependant upon your level of relevant experience, including practical training. This post is fixed-term for 3 years.

Salary: £20,202 - £22,776 per annum (Grade E)
£23,499 - £25,565 per annum (Grade F)

For an application pack and details of all our vacancies, visit www.cardiff.ac.uk/jobs Alternatively email vacancies@cardiff.ac.uk or telephone +44 (0) 29 2087 4017 quoting vacancy number 204.

Closing date: 13 April 2006
[2545-075 (2006) : 88]
Applications are invited for the above post based at the Sutton Bonington Campus. The successful candidate will use genetics and physiological approaches to define the influence of key genes and traits in the control of ear fertility in wheat. The project focuses on QTL detection in novel material generated by crossing a ‘large-ear’ CIMMYT line and a leading UK winter wheat. The project will be in collaboration with CPB-Twyford Ltd. ADAS and CIMMYT (Mexico).

Candidates should have, or shortly expect to obtain, a PhD in plant/crop genetics or physiology. Experience with cereal molecular genetics will be an advantage.

Starting salary will be within the range £20,842 - £24,886 pa, depending on qualifications and experience. This post will be offered on a fixed-term contract for a period of four years.

Informal enquiries may be addressed to Dr J Foulkes, tel: 0115 951 6024 or Email: John.Foulkes@Nottingham.ac.uk.

Candidates should send a detailed CV, together with the names and addresses of two referees, to Mrs S Northover, Division of Agricultural and Environmental Sciences, School of Biosciences, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicestershire LE12 5RD. Closing date: 21 April 2006.

The UK Clinical Research Network (UKCRN) was established in 2005 to support clinical research in the UK. It is initially supporting the development of six Topic Specific Research Networks in the fields of cancer, dementias and neurodegenerative diseases, diabetes, medicines for children, mental health and stroke and, over time, will hopefully enable research to be conducted across the full spectrum of disease and clinical need. An exciting opportunity now exists for a full-time Research Governance Officer based within the UKCRN Coordinating Centre in Leeds.

You will provide guidance, advice and support in Research Governance and Regulatory issues to a broad range of staff involved in clinical studies and will contribute to the development of the Research Governance and Regulatory team. This post provides an ideal opportunity for a motivated, enthusiastic individual who wishes to build on their existing experience in clinical research and further develop their career in this area. You will be educated to degree level in a relevant subject. Several years' experience of working in a clinical trials environment, as well as excellent communication and project management skills are essential. So too is the ability to work independently and as part of a team, and a willingness to travel. Working knowledge of the EU Directive for Clinical Trials is essential.

Other Related 3 (£31,274 - £36,959 p.a.)

LIPTERSHIP
Cardiff School of Biosciences

The School of Biosciences, with over 100 academic staff, is one of the largest groups of biological scientists in the UK and a major research strength within the University as a whole. We are therefore seeking to appoint a permanent Lecturer to contribute to our success as a centre of international research and teaching excellence. You should have the potential to achieve grade 3*/4* RAE level, be able to contribute to the School's existing areas of research expertise and ideally have specialist expertise in the area of data analysis/modelling of biological processes and biostatistics.

The School has an outstanding reputation for teaching at all levels and gained 'excellent' in all our submissions to, TQA panels, including those for Dentistry and Medicine. You will also be expected to contribute enthusiastically to this aspect of our mission.

The School's research covers the whole range of bioscience with focus in the following areas:

- Biodiversity and Ecological Processes
- Connective Tissue Biology
- Genetics
- Microbiology
- Molecular Cell Biology
- Neuroscience

Further details regarding these groups can be found at www.cardiff.ac.uk/biosi/research

Salary: £24,352 - £36,959 per annum

Informal enquiries can be made to the Head of School, Professor John Harwood (Harwood@cardiff.ac.uk), to the Joint Heads of Research, Professor Alan Clarke (ClarkeAR@cardiff.ac.uk) and Professor Kevin Fox (FoxKD@cardiff.ac.uk) or to the Head of Teaching, Professor Bernard Moxham (Moxham@cardiff.ac.uk).

Please include full details of publications and research grant income (as relevant) and an indication of your research plans, if appointed. A covering letter of application, setting out personal career aspirations, must be attached.

For an application pack and details of all our vacancies, visit www.cardiff.ac.uk/jobs Alternatively email vacancies@cardiff.ac.uk or telephone + 44 (0) 29 2087 4017 quoting vacancy number 180.

Closing date: 21 April 2006

University of Birmingham  
Division of Medical Sciences  
RESEARCH FELLOW

A three-year position funded by the GET-A-HEAD charity is available in the laboratory of Professor Jayne Franklyn and Dr Chris McCabe, Division of Medical Sciences, University of Birmingham. Housed in the prestigious new Institute of Biomedical Research, the laboratory has a long-standing interest in the mechanisms of tumourigenesis, with particular emphasis on the oncogene PTTG, and its induction of aneuploidy and genetic instability.

The post will suit talented candidates with an interest in genomic instability and tumourigenesis, and a desire to develop skills in the supervision of PhD students and clinical fellows within an established research group.

Informal enquiries can be made to Dr Chris McCabe (mccabcj@bham.ac.uk).

Starting salary in the range £23,457 to £25,633 a year (potential progression of performance once in post to £32,490).

The post is available for 36 months in the first instance.

Application forms (returnable by 5 April, 2006) and details from Personnel Services, University of Birmingham, Edgbaston, Birmingham B15 2TT. SAC

**PhD STUDENTSHIP** R&D/AHG/178/05

**USE OF GENETIC VARIATION IN FEEDING BEHAVIOUR TRAITS IN BROILER BREEDING PROGRAMMES**

**A GENESIS FARADAY BBSRC CASE STUDENTSHIP WITH AVIAGEN LTD**

A PhD Studentship is available from autumn 2006 for a study at the Department of Animal Nutrition and Health of SAC in collaboration with Aviagen Ltd. The study will generate a new set of selection tools for potential use in broiler breeding programmes. This involves estimating genetic parameters of individual short-term feeding behaviour traits of broilers in contracting genetic lines, associating these traits with animal health and performance and with genetic markers and evaluating the inclusion of these traits in breeding programmes.

The student will be registered for a higher degree at the University of Edinburgh and will be supervised by both SAC and Aviagen Ltd. This studentship will be based in Edinburgh with regular industrial training at Aviagen Ltd (Midlothian).

Applicants will be subject to standard BBSRC terms and conditions that include at least an upper second class UK honours degree or an equivalent qualification and/or an MSc in a relevant discipline (e.g. biology, genetics, mathematics, data mining) and a 3 year qualifying UK residence period. Applicants will not be considered unless they meet these qualifying standards.

The successful student will be supported for 3 years and will receive a stipend of £17,000 per annum which includes the top-up stipends from Genesis Faraday and Aviagen Ltd. They will also enjoy the benefits of Faraday Associates. Application packs are available from Human Resources, Scottish Agricultural College, West Mains Road, Edinburgh EH9 3JG.

Tel: (0131) 535 4343 (answering machine),
Fax: (0131) 535 4322, HumanResources@sac.co.uk or our website http://www.sac.ac.uk

Closing date: 5th May 2006.

INVESTOR IN PEOPLE

Supporting the land-based industries for over a century

[2545-087 (2006) : 92]
PhD studentships are available within this RAE 5*A-rated Department. We are currently recruiting in the following research areas: Medicinal & Biological Chemistry, Pharmaceutical Biology, Pharmaceutical Technology, Pharmacology, Regenerative Medicine, Pharmacy Practice. Candidates should hold or expect to gain a good Honours degree in a relevant scientific discipline. For further details and application procedure see [www.bath.ac.uk/pharmacy](http://www.bath.ac.uk/pharmacy)
email: pg-pharm@bath.ac.uk
[2545-088 (2006) : 92]
PhD Studentships for October 2006

Applications are invited from natural, social and economic scientists holding, or expecting to gain, a 1st or 2nd (i) honours degree for the following PhD studentships:

How diverse are newly discovered anaerobic ammonia oxidizers and how much do they contribute to marine and soil nitrogen cycling?
Prof Prosser (j.prosser@abdn.ac.uk), Dr Singh [Macaulay Institute]
PhD ACES1

Do reforestation-impacts on mycorrhizal diversity negatively affect soil C-balance?
Dr E Paterson (eric.paterson@macaulay.ac.uk), Dr Grelet (UoA)
PhD ACES2

Modelling and measurement of methane emissions from terrestrial plants
Dr Smith (jo.smith@abdn.ac.uk), Dr Chapman [Macaulay Institute]
PhD ACES3

Fifty years of upland environmental change: lessons for today
Dr Woodin (s.woodin@abdn.ac.uk), Prof Pakeman (Macaulay Institute)
PhD ACES4

Why do bacterial diversity and activity change in forest soils?
Dr Baggs (e.baggs@abdn.ac.uk), Dr Campbell [Macaulay Institute]
PhD ACES5

Importance of soil fungi for the sustainability of machair grassland
Dr Johnson (d.johnson@abdn.ac.uk), Dr Anderson [Macaulay Institute]
PhD ACES6

Increased land run-off and coastal ecosystem functioning
Dr Witte (u.witte@abdn.ac.uk), Dr Lumdson (Macaulay Institute)
PhD ACES7

Endocrine disrupting compound [EDC] accumulation by, and effects on, terrestrial molluscs
Dr Rhind (s.rhind@macaulay.ac.uk), Dr Wilson [UoA]
PhD ACES8

Up to 3 of these studentships will be funded for three years. The stipend will be £12,300 in 2006-07.

For further information contact the nominated supervisor by E-mail and the following websites:
http://www.macaulay.ac.uk/studentships,
http://www.abdn.ac.uk/clsm/graduateschool.
Prospective students should complete an Application Form
http://www.abdn.ac.uk/sras/postgraduate/apply.shtml and return it to Postgraduate Admissions (quoting ACES and the Ref No of the studentship in Section 7) by 13 April 2006.
In addition, candidates should submit a CV to the supervisor, to include the names and addresses of two referees, and a statement as to why you are interested in the Studentship.

Interviews will be held on Friday 5th May 2006
[2545-089 (2006) : 92]
Joint Studentships

Applications are invited for a number of three year postgraduate studentships leading to PhD degrees, beginning October 2006. These studentships will cover UK fees at Home/EU levels and provide a stipend at Research Council UK rates. They are available for the following projects which are all joint between St. George's University of London and Royal Holloway, University of London. Applicants should have, or expect to be awarded, a First or Upper Second Class Honours Degree or MSc in an appropriate discipline.

- The long-term effects of cannabis on cognitive function in young adults: a functional MRI study (niabousal@sgul.ac.uk)
- Anger and anger management in multiple sclerosis (d.langdon@rhul.ac.uk)
- Applications of SQGID NMR in medicine (j.saunders@rhul.ac.uk)
- A genome-informed approach for the development of effective detection and genotyping methods for Giardia lamblia (j.tovar@rhul.ac.uk)
- Directed proteomic approach to dissecting novel mechanisms underlying the pathology of the muscular dystrophies (g.dickson@rhul.ac.uk)
- Immunoproteomic/peptidomic analysis of antigen presentation in HIV infection (gcoulto@sgul.ac.uk)
- Ca²⁺/CaM/CaMKII complexes in hippocampal neurones: mechanism of formation and molecular composition (ktorok@sgul.ac.uk)
- Heparin-targeted vaccine delivery of mycobacterial antigens (rreljic@sgul.ac.uk)
- The function of protein-routing complex BLOC1 (esviders@sgul.ac.uk)

For further details on these projects please visit the webpages www.sgul.ac.uk/studentships or www.rhul.ac.uk/biosci/vacancies where you will also find details of the application procedure and application form. Any informal enquiries should be made by email to the appropriate lead supervisor as listed above.

The deadline for applications is 28 April 2006. Please send a hard copy of the completed forms, plus statements from two referees, by post to Dr B Davis, Faculties Support Office, Royal Holloway, University of London, Egham DT20 0EX, UK.
NEWI North East Wales Institute of Higher Education  
Athrofa Addysg Uwch Gogledd Ddwyrain Cymru  
corus

**Four Year EngD Studentship**  
Optimising High Speed Coating Processes  
Annual stipend c. £17k, tax free

Coil coating is a continuous and highly automated process for coating strip steel prior to fabrication. This high-speed process currently operates at speeds in excess of 100 metres/min and Corus produces approximately £1M tonnes per annum of pre-painted steel. Corus has ambitions to increase its manufacturing process speed significantly and this requires a fundamental understanding of the rheological properties of the polymer coatings and also application of this knowledge in the development of coatings with enhanced performance. The approach taken in the research will be experimental and involve characterisation of the rheology and microstructure of selected coil coating formulations with a view to establishing the influence of these attributes on performance - particularly with respect to their role in the formation of defects in the coating. Strategies to produce improved coatings systems capable of running at higher line speeds may include the use of high solids or water-borne polymer systems.

The Research Engineer will be based primarily at North East Wales Institute of Higher Education (NEWI), Wrexham, but will have opportunity to work closely with manufacturing and technical personnel at Corus Colours', Shotton Plant (Deeside) and also prestigious coating manufacturers. NEWI's Centre for Water Soluble Polymers is recognised as a Centre of Excellence by the Welsh Assembly and WDA within the CETIC Programme. The Centre currently has two permanent members of academic staff and around 15 postgraduate students and PDRAs. In addition to the generous stipend and possible future employment prospects within Corus, the Engineering Doctorate programme provides extensive technical and management training and also the opportunity to visit world class manufacturing facilities throughout Europe.

The successful candidate should possess a good first degree in Engineering, Materials or the Physical Sciences and some industrial experience of paints/ coatings would be desirable. The post is only available to those permanently resident in the UK. Informal enquiries may be made to Dr Rob English (NEWI) - r.english@newi.ac.uk 0781 130 5637. Further information regarding the EngD programme may be found at:  
PhD Student Opportunities
Babraham Institute

The Babraham Institute is an international focus for innovative research in post-genomics studying gene function in cells, organs and systems, supported principally by the Research Councils. It is a recognised postgraduate teaching Department of the University of Cambridge. Starting in October 2006 up to two further studentships (in addition to those already awarded via our Open Day) will be available at Babraham leading to a University of Cambridge PhD degree. Our studentships can be awarded for up to 4 years.

Eligibility for Funding: UK nationals and EU nationals with 3 years residency in the UK will have their academic fees paid and will be provided with a research council personal support stipend. Other EU nationals will have their academic fees paid but will be responsible for finding their own personal support. Non-EU nationals must find funding for academic fees and personal support. In cases where applicants must find their own funding, we will require evidence that the level of funding is at least equal to the standard BBSRC/MRC PhD funding package before we will consider applications. Students will join a thriving scientific community situated on an attractive parkland campus near Cambridge. Our 70 students are all members of Cambridge Colleges and participate fully in University social and academic life (www.bio.cam.ac.uk/gradschool).

Details of our scientific programmes can be found on our website. The Institute is fully equipped for state-of-the-art biological research including: innovative molecular biology, stem cell manipulation and transgenics, real-time laser scanning confocal microscopy, fluorescence sorting of cells, gene targeting and knockouts, mouse models of disease, mouse behavioural testing and proteomics. Selected students will be invited to the Institute to discuss their research interests and to view the Institute's facilities as soon as possible after the closing date.

Potential projects are listed below; supervisors welcome informal enquiries: Dr Martin Bootman (martin.bootman@bbsrc.ac.uk)
- Signal transduction in cardiac myocytes; mechanisms regulating contraction and arrhythmias.
Dr Miguel Constancia (miguel.constancia@bbsrc.ac.uk)
- Role of amino-acid transport System A in mammalian physiology and disease.
Dr Gavin Kelsey (gavin.kelsey@bbsrc.ac.uk) - The origins of genomic imprinting.
Dr Nicholas Ktistakis (nicholas.ktistakis@bbsrc.ac.uk)
- Phosphoinositide signalling during autophagy: the role of DFCP1 a novel FYVE domain protein.
Dr Raghu Padinjat (raghu.padinjat@bbsrc.ac.uk)
- Diacylglycerol kinase signalling and neuronal degeneration.

Travel expenses will be paid to those invited to attend the Institute. Applicants should submit a full Curriculum Vitae with a covering letter indicating the project in which they are most interested and ask two referees to write to the Institute on their behalf before the deadline given below. More detailed project descriptions may be found on the Institute website. Please send your applications to Ms Linda Notton, Graduate Studies Programme, The Babraham Institute, Babraham, Cambridge CB2 4AT. Tel: 01223 496000, Fax: 01223 496022, or e-mail babraham.graduate@bbsrc.ac.uk, by Friday 21st April 2006 at the latest.

An Equal opportunities employer. An Institute supported by the Biotechnology and Biological Sciences Research Council

The University of Reading

NERC MSc Studentships starting in October 2006

The University of Reading has a number of NERC studentships available across a variety of disciplines starting in October 2006. Applicants must hold or be expecting to gain a good Bachelor's Degree (2:1) in a relevant subject and be from the UK or EU.

MSc Mathematical and Numerical Modelling of the Atmosphere and Oceans
6 full studentships
Contact: Sue Davis  S.davis@rdg.ac.uk  Tel: 0118 378 8991;  Web: http://www.rdg.ac.uk/pg/pages/courses/taught/mscoceans.asp

MSc Renewable Energy: Technology and Sustainability
Up to 6 full and partial studentships for applicants from an environmental science background, whose interest is the environmental aspects of the course. Contact: Maureen Lewis, Postgraduate Programme Administrator.  Tel: 0118 378 7560;  Web: http://www.rdg.ac.uk/pg/pages/courses/taught/mscrenewable.asp
email: renewables.msc@reading.ac.uk

MSc Soils and Environmental Pollution
Up to 5 full and partial studentships
Contact: Dr Chris Collins. Tel: 0118 378 8910  Web: http://www.soils.reading.ac.uk/MSc
Email: c.d.collins@reading.ac.uk or soils@reading.ac.uk

MSc in Weather and Climate Modelling & MSc in Applied Meteorology
6 studentships (for the two programmes)
Web: http://www.met.rdg.ac.uk/Msc
Email: mscinfo@met.rdg.ac.uk

MSc Wildlife Management & Conservation
Up to 8 partial studentships
Contact: Dr Graham J Holloway  g.j.holloway@reading.ac.uk  Tel: 01183788013
Web: http://www.ams.rdg.ac.uk/zoolo/wildlife/ and
http://www.rdg.ac.uk/pg/pages/courses/taught/mscwildman.asp

Application forms for the above programmes can be obtained from http://www.rdg.ac.uk/pg/pages/apply/pg-appby sending an email to scipg@rdg.ac.uk
[2545-093 (2006) : 94]
Postgraduate studentships in infectious disease epidemiology

Two research studentships, funded by DEFRA/BBSRC, are available to work with Professors Mark Woolhouse and Andrew Read in the School of Biological Sciences.

MSc applicants should have a good Honours degree in a relevant subject, including veterinary medicine or medicine. The research project should relate to the epidemiology of infectious diseases of animals, including zoonoses, either suggested by the student or chosen from our web site. PhD applicants should have training (preferably to MSc level) that includes some mathematics. The research project aims to improve understanding of the epidemiology and evolution of animal pathogens in response to vaccination or chemotherapy (see web site for details). A variety of training opportunities are available, and the students will be part of a dynamic research group.

The awards cover fees and stipend. For further details and application procedures contact kath.tracey@ed.ac.uk or visit our website.

Closing date: 18 April 2006.

www.epi.vet.ed.ac.uk
[2545-094 (2006) : 94]
UNIVERSITY OF LEEDS
UNIVERSITY OF LEEDS
Energy and Resources Research Institute

**Research Studentship**
Co-combustion of Waste and Coal

Applications are invited for this three year studentship which is available immediately. The research project is funded by the EPSRC and involves the co-combustion of tyres and plastics with coal in a large scale experimental facility and is in collaboration with E-On (formerly Powergen).

You should have a good first degree in Energy Science/Engineering, Environmental Science/Engineering, Mechanical Engineering, Chemical Engineering or Applied Chemistry or related topic.

Informal enquiries to and application packs from Professor Paul T Williams, Energy and Resources Research Institute, University of Leeds, Leeds LS2 9JT tel 0113 343 2504 email p.t.williams@leeds.ac.uk

Closing date 13 April 2006

WORKING TOWARDS EQUALITY AND DIVERSITY
www.leeds.ac.uk
[2545-095 (2006) : 94]
Postgraduate Taught Courses at Cardiff School of Engineering

• MSc in Civil Engineering
• MSc in Structural Engineering
• MSc in Geoenvironmental Engineering
• MSc in Water Engineering
• MSc in Electronic Engineering
• MSc in Orthopaedic Engineering (surgeons only)
• MSc in Clinical Engineering
• MSc in Data Information Fusion (new scheme subject to university validation)
• MSc in Sustainable Energy and Environment (new scheme subject to university validation)

The above MSc programmes are available in either full-time or part-time modes of study (1 year full-time, 2 or 3 years part-time). They are ideal for engineers or those in engineering related professions wishing to upgrade their qualifications to postgraduate level. All programmes involve two semesters of lectures and coursework followed by a dedicated period for a project and dissertation. The entry requirements are generally an upper second class honours degree (or equivalent) from a British or recognised university. Applicants with relevant professional experience will also be considered.

For further information on all courses please contact, Ms Cherrie Summers, Cardiff School of Engineering Queen's Buildings, Newport Road, Cardiff, CF24 3AA. Tel: 029 20874421. Email: SummersC@cardiff.ac.uk or visit our website at: www.cardiff.ac.uk/engin

Founded in 1823 and based in Bloomsbury, Birkbeck extends educational opportunities while achieving world-class research results.

Birkbeck
UNIVERSITY OF LONDON

PhD, MRes and MSc Studentships for 2006

Birkbeck's School of Crystallography was rated 5A in the most recent RAE, and teaching has been judged to be excellent.

3 to 4-year studentships are available for a number of PhD projects including:
- Cryo-electron microscopy of amyloid
- Structural studies of DNA repair
- Bayesian approaches to antigen processing

1-year studentships are available for the following full-time courses:
- MRes Structural Biology
- MSc/MRes Bioinformatics and Systems Biology.

The Wellcome Trust & New Scientist Essay Competition 2006
HOW WELL CAN YOU WRITE?

Are you a current postgraduate student in science, engineering or technology? Can you captivate an audience with a lively, fresh 700-word article on your research and its implications for society?

Then why not tell the world?

Your chance to win a Wellcome Media Training Placement with New Scientist

Enter this year's essay competition and show your skills: it could gain you a career training opportunity

PRIZES
FIRST A two-week expenses paid media placement with New Scientist, £1000 spending money and your essay published in New Scientist
SECOND £750 THIRD £500

The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London late this year and in share their work with famous people from science and the media

Closing date Friday 26 May 2006

The Insider Switzerland

Careers with a breath of fresh air
How did a small, landlocked country with few natural resources become one of the world's most important chemical and pharmaceutical centres? Jo Whelan investigates

High-altitude thinking
Ask the Swiss what they see as their most important resources, and the response will likely be: "the mountains and our brains". Skiers and scientists alike would agree that this is a country with much to boast about both.

You do not need to look far to discover why researchers view this tiny, landlocked country with such enthusiasm. For a country with a population the size of London, it punches well above its weight. Switzerland's R&D spending sits at 2.7 per cent of its GDP - roughly the same as the US figure and second only to Scandinavia in Europe. Switzerland also has an impressive number of indigenous world-class companies. For example, Novartis and Roche are the world's seventh and tenth-largest pharmaceutical companies respectively. So how has it achieved its success?

The lack of obvious resources has forced the country to focus on high-value speciality products that it could sell to the rest of the world. It's a strategy that helped turn it into one of Europe's richest countries. Switzerland's three flagship science-based industries - pharmaceuticals, biotechnology and speciality chemicals - have benefited from this astute approach. And the second-tier concerns are also strong, from crop protection and materials science to mechanical and electrical engineering and communications technology.

Beyond borders
Switzerland may guard its political and cultural independence fiercely, but its scientific sector has a strongly international flavour. Companies and academic institutions actively work to bring in expertise from all over the world.

In recent years, the Swiss government has made boosting international collaboration a key part of its science strategy. For example, Swiss scientists can compete for funding from the European Union's Framework programmes for research, even though Switzerland is not an EU member. What's more, work and residency restrictions have been relaxed for EU citizens in Switzerland, and from May 2007, there will be no limit on the number of EU workers allowed into the country.

It is in Swiss universities that a willingness to welcome researchers from outside its borders is most evident. A fifth of students and a third of academic staff are foreigners. In the leading scientific research institutes the figures are even higher: Basel's Friedrich Miescher Institute, for instance, counts almost go nationalities among its go PhD students and 75 postdocs.

Swiss institutions work hard to attract and retain high-calibre researchers. The main science funding body, the Swiss National Science Foundation (SNF), funds assistant professor posts for selected researchers of any nationality starting an academic career. In addition, over 7000 researchers receive project-based funding each year. The Federal Institutes of Technology in Zurich (ETHZ) and in Lausanne (EPFL) are bolstering these efforts with tenure tracking. Assistant professors in the scheme are offered a tenured professorship within six years, subject to a performance evaluation.

Academic salaries are some of the best in Europe. Experienced postdocs earn up to 100,000 Swiss francs (£44,000) per year, while a full professor could earn as much as SFr 270,000. This above-average level of pay, combined with the quality of the science and standard of living, means researchers rate Switzerland highly. For example, the Friedrich Miescher Institute has recently been voted the best place to work for postdocs outside the US in a survey by The Scientist magazine.

Crack the system
Pharmaceutical companies worldwide are keeping an eye on the emerging field of systems biology because of its potential for finding safer, more effective drugs. Systems biologists aim to gain a big-picture view of complex biological systems by studying interactions between components such as genes, proteins and signalling molecules. Modelling these systems could help us understand how a drug will act.
So it should come as no surprise that Switzerland - with its strengths in life sciences and computing - is at the forefront. Two of Switzerland's biggest pharmaceutical firms, Roche and Novartis, along with the universities of Basel and Zurich and ETHZ, are backing a new network to coordinate Swiss research and teaching in the field. The network joins four "nodes", with another two in the pipeline. A key node will be the new Centre for Biosystems at Basel, due to open in June 2006 with at least 15 professorships. It is hoped that more universities will join to create a world-class European research hub to rival America's.

**Bio benefits**

You may not see it until you look closer at the figures, but Switzerland is a world-beater in biotech. If you measure success by number of companies, the country falls short - it has only around half the tally of Germany or the UK. But look at the money coming in, and you'll see that Switzerland's biotech industry is second only to that of the US, and accounts for a massive 40 per cent of European revenues in this area. Switzerland also employs more people in the sector than might be expected, with 1 in 3 of the biotechnology jobs in Europe.

Its top ranking is largely thanks to Serono, the largest biotech company in Europe and third largest in the world, after US giants Amgen and Genentech. The country's excellent science base, well-organised technology transfer and the proximity of big pharma companies are key to its biotech success, according to Ernst & Young.

Other big players include Actelion and Basilea Pharmaceutica, both based in or near Basel. Arpida and Addex Pharmaceuticals are among the rising stars. Several large US biotech companies also have Swiss outposts. Behind the seven publicly traded companies are 20 medium-sized biotechs employing 50 to 100 people, and 100 or so smaller companies.

Biotechnology companies are found in four main clusters (see Map, opposite). The largest grouping, around Basel, forms part of BioValley, a biotech cluster covering adjoining areas of Switzerland, France and Germany. Smaller clusters are located around Zurich in the north and Geneva and Lausanne in the west.

**Smashing stuff**

Switzerland is world capital of particle physics - a position it will cement in 2007 with the opening of the world's most powerful particle accelerator. The Large Hadron Collider is a global collaboration sited near the Geneva headquarters of CERN (the European Organisation for Nuclear Research).

It will accelerate beams of protons in a 27-kilometre ring, then smash them together in an effort to spot hitherto undetected particles. High on the wish list will be the Higgs Boson, thought to play a key role in endowing other particles with mass.

In the coming months, CERN scientists and engineers will begin making their final tests on the massive instruments used to detect the particles, before closing off the caverns in which they are housed ready for next year.

Jo Whelan is a freelance writer based in France

**BIOTECH HOTSPOTS**

Switzerland has four main biotech clusters
BioValley spreads into South Baden, Germany, and Alsace, France  
BIOVALLEY Basel region: 69 companies  
ZURICH MEDNET Greater Zurich area: 52 companies  
BIOPOLO Ticino region: 26 companies  
BIO ALPS Lake Geneva region: 48 companies

From up here you can see all the way to retirement

**Case study: the expat**

"There's an awful lot on offer here in terms of scientific careers," says Ian Metcalfe. "There's a good mix of companies, and the community is very close-knit. Once you are in it, there are a lot of connections."
Metcalf has been based in Switzerland since 2000, after moving from the UK. A graduate in applied biology, he worked for a biotechnology company in Bern before moving to Roche in Basel, where he works in the division that forms partnerships with other companies. Although Basel is Switzerland's third largest city, and the work ethic - as in the rest of the country - is strong, the pace of life is relaxed, says Metcalfe. "People arrive at the office early and stay late." However, you can often build up holiday by working extra hours, and the work culture is friendly and open. The first hurdle for newcomers is red tape. "The bureaucracy can drive you mad," says Metcalfe. The Swiss fondness for rules can be a shock. For example, in many apartment blocks it's forbidden to run water from the taps after 10 or 11 pm.

Yet the combination of high salaries and relatively low taxes is undeniably attractive. Switzerland has a reputation for being expensive, but overall Metcalfe finds living costs comparable to the UK, and says living standards are higher. Public amenities are good, and crime is low. As for leisure time, the mountains are on your doorstep, and Switzerland's central location is great for exploring other parts of Europe.

A scientist by training, Germany’s new chancellor has ambitious aims for the country’s R&D sector. Gaia Vince reports.

**R & D Renaissance**

Europe's most populous and economically powerful state is undergoing something of a science and technology renaissance under popular new chancellor Angela Merkel, who came to power in November 2005.

The German chancellor is a talented mathematician and scientist with a background in physics and chemistry, and is married to a university chemistry professor. Before becoming chancellor she spent many years as environment minister, where she is credited with helping foster the country's renewable technology sector, an area in which Germany is now a world leader (see "Green Glory").

Many are confident that she has the will and experience to boost Germany's global profile in science, and so far they are being proved right. Merkel has pledged to increase research funding and continue building on a programme of reforms introduced over the past five years. For example, she has set out plans to improve technology transfer by abolishing Germany's rigid divide of basic and applied research, and by encouraging international collaborations in the country's many academic, public and industrial research institutions. She has publicly committed to meeting the European Union target of spending 3 per cent of economic output on R&D by 2010. One-third of this will come directly from the government, with an extra €500 million per year, but much of the responsibility for reaching this target will fall to the private sector, which has traditionally funded the majority of R&D in Germany.

While it is early days for her government, she has every reason to make the necessary reforms to encourage greater R&D spending from Germany's companies. Today, the country's successful R&D-intensive industries such as biotech, chemicals and automotives account for more than half of all industrial production in Germany. In comparison with other countries, it relies on these industries more heavily for exports (rather than natural resources or crops, for instance) and R&D's importance for the economy as a whole is arguably greater than in any other major industrialised nation.

**Home and away**

"After you have learned a profession and before you settle down, go abroad and find out how things are done somewhere else.' So said Goethe, one of Germany's great literary figures. The advice is still pertinent for German research institutions. In recent years there have been intensive efforts to encourage international collaborations in science and technology.

The UK is a rich source of partners. For example, German biotech Novalung is collaborating with Imperial College London to develop the first tissue-grown human lung cells, destined for lung regeneration and repair.

Meanwhile, Germany has aggressively marketed its world-class universities and research institutes to foreign students and research scientists. The Alexander von Humboldt Foundation, for instance, issues up to 600 research scholarships each year to non-German academics. Foreign scientists now find it easier to get a place because institutions have much more control over how they spend their money. It is a far cry from the situation before 2000, when every new job position had to go through an approval process involving everyone from director to building custodian. Most universities now offer curricula in English and also grant master's degrees in addition to the traditional German diploma.

**Green glory**

Solar panels can be found on over 140,000 roofs in Germany. Renewable technologies like this enjoy wide public support, which has helped make this a rapidly growing sector. The industry has already created more than 150,000 jobs, and in 2004 it brought in around €11.6 billion - more than the pharmaceutical sector. With the government committed to shutting down all its nuclear reactors by 2020,
this growth is likely to continue, and Germany has its sights set on leading Europe - if not the world - in this area.

**IT revolution**

Forget the World Cup: it is the year of IT in Germany. Chancellor Angela Merkel plans to pour new money into the IT sector in an effort to restore Germany as a world leader in the field. German scientists invented the binary code and one of the world's first computers in 1941, but the country has since lost its edge against the US and Asia. In an effort to change this, Merkel has pledged €6 billion to the sector over the next four years. A new body High-tech Strategy Germany, which is due to be in place by June 2006, will be given the task of allocating this fund.

As part of a massive PR venture, 2006 has been labelled the Year of Informatics. Shows and conferences are scheduled to take place across Germany during the year. Merkel's government has also promised extra money to improve the country's digital and communications infrastructure and boost the number of high-speed internet connections.

Meanwhile, Europe's largest IT research institution has recently been set up following a merger of the Fraunhofer Society (see "Germany's research institutions") and the Society for Mathematics and Data Processing.

"Unlike her predecessor, Merkel is forward-thinking and she is getting people working together to improve the IT sector," says Bernhard Rohleder, director general of Germany's information technology, telecommunications and new media industry association (BITKOM). "Right now," says Rohleder, "we have the best situation ever to make a difference, and I am optimistic for our future chances.'

Gaia Vince is a freelance writer

**Turning the country green**

**GERMANY'S RESEARCH INSTITUTIONS**

The federal government has promised to increase funding for its research institutions by at least 3 per cent every year until 2010. The country has a complex and highly diversified structure of science and technology organisations (in addition to its universities, polytechnics and industrial bases).

The four main ones are:

• The Max Planck Society: 80 basic research institutes. It employs around 11,600 people and has a budget of more than €1 billion a year - "unconditional funding" that allows it to remain autonomous. It is internationally renowned, with 15 Nobel prizewinners since 1954, and 10 since 1984. Its tech-transfer arm, which was set up in 1970, is called Garching innovation.

• The Fraunhofer Society: 80 applied research institutes that perform contract research for industry, service companies and the public sector. Its remit is to translate research findings into products. It employs more than 11,000 people and has a budget of €1 billion, two-thirds of which is accounted for by contract research. Recent success stories include roll-up displays, microchip-embedded clothing and the MP3 format.

• The Helmholtz Association: 15 institutions that run large-scale equipment such as particle accelerators and research reactors used by international and national research teams. Around €600 million is raised each year by international users, and 7000 foreign scientists visit the association each year. The government provides a further €1.6 billion.

• The Leibniz Association: 80 research institutions work on forward-looking questions of national significance and economic importance with an annual budget of almost €1 billion - a third of which comes from the government. Around half the institutes are in the former East Germany and the association plays a key role in the economic revitalisation of the cities in which they are located.

THE RIGHT CHEMISTRY

WILEY-VCH, a subsidiary of the distinguished publishers John Wiley & Sons Inc. New Jersey, is an international science publisher based in Germany with 80 years experience of producing high-quality professional magazines, scientific journals, books, and electronic media in Chemistry, Physics, and Life Sciences.

For the leading international materials science journals Advanced we are seeking an

Editor-in-Chief
The editor is the leader of a highly motivated editorial team. He/she is in charge of manuscript acquisition and all editorial decisions on submitted manuscripts. The editor is responsible for the development and implementation of a long-term vision for the success of the journals with the input of the international Editorial Board and the editorial team. He/she will travel to international scientific meetings and is expected to participate in leadership functions within the company.

Applicants for this position should be self-motivated, innovative, and have the drive and enthusiasm to further develop these exciting journals. Excellent organizational, communication, and leadership skills as well as diplomacy and flexibility are needed. A broad education with an advanced degree in materials science, chemistry, or physics is essential. The applicant should be fluent in English (native speaker preferred) and have some experience in publishing. A knowledge of German is desirable but not essential.

The position is based at WILEY-VCH in Weinheim, a pleasant small town near Heidelberg in southwest Germany. Salary and benefits are competitive. Applicants should send their full CV with a cover letter describing their suitability for the post to: WILEY-VCH Verlag GmbH & Co. KGaA Christiane Rabe, Human Resources Boschstrasse 12 69469 Weinheim Germany E-mail: CRabe@wiley-vch.de

3 Postdoc Positions in Theoretical Evolutionary Ecology

RESEARCH AIMS
1) Dept. Behavioural Ecology, University of Berne, Michael Taborsky: Evolutionary mechanisms of conflict and cooperation, with particular emphasis on reciprocity. Ideal candidates will have a PhD in theoretical biology, mathematics or economy and should be experienced in modelling (e.g. game theory, agent-based simulation models, dynamic programming), preferably with a sound background in theoretical issues in evolutionary biology. The position is initially for three years and can be prolonged; deadline for applications: 31 May 2006.

2) Dept. Aquatic/Fish Ecology and Evolution, EAWAG/University of Berne, Ole Seehausen and Dept. Aquatic Ecology, EAWAG/ETH Zurich, Jukka Jokela: Theory of the relationships between environmental heterogeneity, historical contingency, neutral genetic and adaptive diversity, including the emergence of functional polymorphisms and speciation. Ideal candidates will have a PhD in theoretical biology, computational population genetics or a related field, and will have extensive modelling experience in metapopulation ecology and/or evolutionary genetics. The position is for three years; deadline for applications: 30 June 2006.

3) Dept. Aquatic Ecology, EAWAG/ETH Zürich, Jukka Jokela and Dept. Aquatic/Fish Ecology and Evolution, EAWAG/University of Berne, Ole Seehausen: Relationships between environmental heterogeneity, historical contingency, neutral genetic and adaptive diversity, investigating several taxa in the evolutionary melting pot aquatic biota of the Swiss alps using molecular (AFLPs) and ecological (stable isotopes, morphometrics) markers. Ideal candidates will have a PhD in population genetics or ecology with extensive experience in molecular genetic lab techniques and handling of large data sets for statistical hypothesis testing. The position is for three years; deadline for applications: 30 June 2006.

[2550-010 (2006) : 60]
Think what’s possible.

Are you looking to work in a global growth company where you can make a real difference? With about 81,400 associates around the globe in our affiliates in over 140 countries, we share a vision of a better today and tomorrow - a vision that drives our growth and success. Our greatest job satisfaction is knowing that we improve lives, we extend lives and we save lives - and we do it with increasing precision and efficiency through breakthrough science and innovation.

With our attractive portfolio of respiratory products and growth of our Inhalation and Device Development department, we have several exciting new opportunities for highly motivated Scientists and Engineers to join our dedicated team.

Basel HQ, Switzerland

**Principal Scientist, Formulation Development** Job ID: 12390BR

Key responsibility for this role will be development of inhalation dosage forms internally, as well as in collaboration with external partners. This comprises all stages of product development from pre-formulation through to transfer to the designated commercial production facility. Besides people management, the position will offer opportunities to work in multi-disciplinary and international teams, and to represent the department in external expert groups.

Ideal profile:
- A degree qualification in a scientific discipline (e.g. Pharmacy, Chemistry, Biochemistry)
- 2-5 years experience in a product development role within the pharmaceutical industry, ideally in the area of inhalation dosage forms

---

**Principal Scientist, Analytical Development** Job ID: 12921BR

In this role, you will be responsible for the analytical development of inhaled products at all stages (i.e. pre-formulation to commercialization). Responsibilities include the development and validation of new methods, analysis, stability monitoring and release of inhalation development products. Besides people management, the position will offer opportunities to work in multi-disciplinary and international teams, and to represent the department in external expert groups.

Ideal profile:
- A degree qualification in a scientific discipline (e.g. Pharmacy, Chemistry, Biochemistry)
- 2-5 years experience in a product development role within the pharmaceutical industry

---

**Project Leader, Inhalation Devices Engineering** Job ID: 8348BR

You will be responsible for the planning co-ordination and supervision of technical research and development activities related to medical device projects, to support our respiratory product pipeline.

The position will involve strong interaction, co-ordination and management of an established external network of suppliers and development partners.

Ideal profile:
- A degree in mechanical engineering, and/or a degree in plastic technology would be an asset
- At least 2 years experience in inhalation or medical device technologies and injection molding
- Understanding of QSR and related design control procedures
- Commercial awareness and excellent interpersonal skills

To find out more please visit our website [www.careers.novartis.com](http://www.careers.novartis.com) and go to appropriate Job ID to apply online. Applications can be received via post at the following address: Novartis Pharma AG, Staffing Center, WSJ-310.1.22, CH-4002 Basel, Switzerland.

Novartis is an equal opportunity employer.
Think what’s possible.

Are you looking to work in a global growth company where you can make a real difference? With about 81,400 associates around the globe in our affiliates in over 140 countries, we share a vision of a better today and tomorrow - a vision that drives our growth and success. Our greatest job satisfaction is knowing that we improve lives, we extend lives and we save lives - and we do it with increasing precision and efficiency through breakthrough science and innovation.

**Research Investigators (Science and Technology Analysts)**

Job ID: 14157BR (UK) and 11926BR (CH)

In one of these pivotal roles, you could realise the full spectrum of Office and Strategic Services (OSS) deliverables, including New Target Entity evaluation, patient analysis and competitive assessment, whilst taking ownership of global strategic and genomic/proteomic technology assessment projects. Much of your time will be spent contributing to early phase discovery activities through delivering insights relating to target competitive/patent situations and mechanistic/clinical relevance, and pursuing NTE and pathway knowledge using data mining technologies and internal analytical methodologies.

Alternatively, you could find yourself initiating and supporting drug and biomarker discovery research via analysing, integrating and interpreting scientific literature that will help further our business objectives and strengthen our overall strategy and planning process. This will give you truly global impact, as you ensure the advancement of our drug discovery efforts in the genome era.

The successful candidate will:

- Have a PhD (or MD) in biomedical sciences
- Have a minimum of three years' research experience in Pharma/Biotech industry experience or leading research project experience in academic institutions
- Be highly skilled in bioinformatic (data and information) analysis and biotech intellectual property analysis and highly knowledgeable in genome/proteome sciences
- Use excellent communication skills and analytical thinking in leading collaborative projects
- Have international collaborative projects and have the opportunity to be located in Horsham, UK or Basel, Switzerland

Employment Opportunities in Energy Research

20 Open Positions at leading Industries and Universities all over Europe

Possibility of obtaining a Ph.D.

For more information see:
www.mc-inspire.net
The European Molecular Biology Laboratory, EMBL is an international research organisation with its Headquarters Laboratory in Heidelberg, Germany and four additional Units in Hinxton (the European Bioinformatics Institute, EBI), Grenoble, Hamburg, and Monterotondo. EMBL offers a highly collaborative, uniquely international culture. It fosters top quality, interdisciplinary research by promoting a vibrant environment consisting of young independent research groups with access to outstanding graduate students and postdoctoral fellows. High-level expertise is available in Computational Biology, diverse aspects of experimental Molecular Biology as well as Physics, Biophysics, Chemical Biology and instrument development.

Coordinator Position at EMBL Structural and Computational Biology Unit

for a Structural and Computational Biology Unit Coordinator, who will replace Luis Serrano to lead the Heidelberg Unit jointly with Peer Bork. The candidate will have an outstanding record in any aspect of Structural Biology or Systems Biology. He or she will have a broad scientific view, possess scientific vision and leadership skills, will wish to work in an open, collegial environment and will possess administrative competence. The candidate will lead a research group, will mentor younger faculty members and will ensure the maintenance of world class standards of research throughout the Unit. Further, he/she will participate in the collegial leadership of EMBL.

The Scientific Programme of EMBL emphasises experimental analysis at multiple levels of biological organisation, from the molecule to the organism, as well as Computational Biology, Bioinformatics and Systems Biology. Within this structure, the Structural and Computational Biology Unit occupies a critical position. The Unit applies a wide range of modern technologies to diverse biological problems. Current Group and Team Leaders are: Peer Bork, Bettina Böttcher, Elena Conti, Achilleas Frangakis, Anne-Claude Gavin, Toby Gibson, Rob Russell, Michael Sattler, Klaus Scheffzek, Reinhard Schneider, Dietrich Suck. In addition, several group leaders from other EMBL Units have joint appointments in Structural and Computational Biology. Due to the EMBL turnover system, the Unit composition is highly dynamic, and the Coordinator will play a critical role in the choice of new Group Leaders and thus in the research direction of the entire Unit. He/she will help integrate the Unit's research activities with those of the other Units in Heidelberg (Cell Biology and Biophysics, Developmental Biology, Gene Expression) and in EMBL's Outstations, particularly with the Structural Biology research at the Grenoble and Hamburg Units and Bioinformatics research at the EBI.

EMBL is an inclusive, equal opportunity employer offering attractive conditions and benefits appropriate to an international research organisation.

Further information on the position can be obtained from the EMBL Director General, Iain Mattaj (dg-office@embl.de).

About EMBL please visit www.embl.org.

Applicants should submit a curriculum vitae, quoting ref. no. NS/06/05 in the subject line to: application@embl.de

THE MACAULAY INSTITUTE

PROTECTING THE NATION’S SOILS

MOLECULAR ECOLOGIST
We seek an innovative researcher to lead work to appraise, develop and apply molecular biological tools as indicators of soil health. The appointee will join a team of microbial ecologists, molecular microbiologists, soil scientists and spatial ecologists. The research contributes to the support of policy and other functions of the Scottish Executive Environment and Rural Affairs Department (SEERAD), and the work of its various client groups, as well as other funding bodies, through the provision of high quality and relevant scientific knowledge.

First and post-graduate degrees in relevant subjects, a strong track record in publications and grant-winning, and a willingness to operate as a team player in the Soils theme, are essential. Also commitment to collaborative, interdisciplinary approaches to science is highly desirable. Starting salary in the range £27,584 -£40,547 per annum (depending on experience) with excellent employee benefits. Quote Ref: MA 15/06

THE MACAULAY INSTITUTE
PROTECTING THE NATION’S SOIL

SOIL SCIENCE COORDINATOR
We seek an innovative researcher to coordinate work on Risk Based Methodologies to Assess Soil Quality. The appointee will continue developing their own high quality research, at the same time as shaping the research direction of an interdisciplinary team of soil physicists, biologists and geochemists, as well as spatial statistics and GIS experts. The research contributes to the support of policy and other functions of the Scottish Executive Environment and Rural Affairs Department (SEERAD).

First and post-graduate degrees in relevant subjects, a strong track record in publications and grant-winning, and a willingness to operate as a team player in the management of soils research at the Institute, are essential. A commitment to collaborative, inter-disciplinarity approaches to science, and experience in project coordination are also highly desirable. Starting salary in the range £34,692 - £40,547 per annum with excellent employee benefits. Quote Ref: MA 17/06

As a major division within the NHS National Services Scotland, the Scottish National Blood Transfusion Service (SNBTS) plays a vital role not only in the health of the people of Scotland but also on an international scale - through our leading position in manufacturing, product development, biomedical research and donor services. Our goal is to maintain the highest standards to patient care whilst remaining internationally competitive.

Alba Bioscience, the diagnostics division of the Scottish National Blood Transfusion Service (SNBTS), manufactures state-of-the-art immunohaematology products for use by the NHS in Scotland and by health care companies throughout the world.

Based within the Reference & Product Development Department at Ellen's Glen Road, Edinburgh, you will manage and co-ordinate the activities of the department to ensure that customer needs, strategic objectives and performance targets are met through innovative new product development, improvements in efficiency and the harnessing of new technology. In addition, you will lead and manage the immunohaematology reference services offered by Alba Bioscience to its customers throughout the world.

A relevant degree and at least five years' post qualification experience within an immunohaematology reference laboratory or related diagnostics industry are required. You must have managerial experience in a GMP/GLP environment and wide experience and knowledge of blood group serology and immunochemistry procedures. You must also have extensive knowledge and expertise with core IT packages i.e. MS Office (inc MS Project).

Our benefits package includes final salary pension scheme, comprehensive range of work life balance policies, occupational health services, learning resource centres and discounted leisure, financial and shopping benefits.

For an informal discussion, please contact John Allan (Director) on 0131 536 5907.

For an application pack please write to SNBTS HR Department, 21 Ellen's Glen Road, Edinburgh, EH17 7QT. Alternatively, please e-mail your request to BTSPersonnel@snbts.csa.scot.nhs.uk

Please quote Reference DS/5/06.

Closing date for return of completed applications is Wednesday 31st May 2006.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service

Quality means business

As one of the world's leading research-based pharmaceutical companies, GlaxoSmithKline (GSK) never loses sight of its mission to improve lives by enabling people to feel better, live longer and do more. Take our Global Manufacturing and Supply team; you may not have realised that we employ 34,000 people working across 80 sites worldwide (including 10 in the UK), ensuring the smooth and rapid transition of new products into full-scale commercial production and the continuing supply of over 1,000 products.

The Quality organisation plays a critical role in delivering safe, effective products in line with this mission and we are currently looking to further strengthen the senior team within this key function. The world in which we operate is changing fast and we know that an agile, business focused and technically strong quality organisation is essential going forward. We have recently re-organised our Quality function to meet the challenges of the future around regulatory expectations and new technologies and this has led to some exciting new opportunities.

We are looking for experienced Quality professionals to help us build the best organisation for the future. The kind of people that we are looking for are those with a real passion for excellence, change agents with the courage to challenge mindsets and behaviours, inspirational leaders who can motivate teams and technical masters who can ensure we maintain leading-edge knowledge.

The areas of expertise that we are looking to recruit for are:
- Biopharmaceutical products
- Validation, Compliance
- Quality Management Systems
- Advocacy & Regulatory Intelligence
- Risk Assessment
- Operational Quality Assurance
- Microbiology

Successful candidates must be able to demonstrate a proven track record within a highly regulated environment over a sustained period and have credibility in the Quality arena.

These opportunities span a number of different sites across the UK. Key locations include Brentford and Ware, but opportunities also exist in locations such as Worthing, Crawley, Dartford, the North East and Scotland.

GlaxoSmithKline is dedicated to workplace innovation and will support you with career-long opportunities and learning. We offer competitive compensation and benefits packages that include a comprehensive bonus and share options package reflecting both personal and corporate success.

To apply online, please visit [www.gsk.com/career](http://www.gsk.com/career) and enter requisition number 33441 (Senior Quality opportunities) in the "Req ID" search box. We have a range of other opportunities within the organisation so, if none of these specifically relate to your area of expertise, please do feel free to review the website for vacancies relating to your specialism.

Closing date: 19th May 2006.

All data is processed in accordance with the provisions of the Data Protection Act.

POSITIVE ABOUT DISABLED PEOPLE

GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is proud to be an equal opportunity employer M/F/DIV
Together we can make life better.

British Antarctic Survey
NATURAL ENVIRONMENT RESEARCH COUNCIL

To survive extreme cold temperatures, the Antarctic Ice Fish has antifreeze in its body.

To protect our biologists, we have central heating and cocoa.

Here at the British Antarctic Survey, we take great care of our people - enabling them to thrive in the world's coldest, most challenging and most unique continent. As part of our team, you'll work in an environment that's like nothing else on earth, enabling us to perform world-class scientific research while sustaining an active and influential presence for the UK in Antarctic affairs.

**Marine Biologist**
Based in Antarctica
33 month contract

You will join a research project examining the seasonal physiology and ecology of a wide range of predators and scavengers. Throughout your work, you will take specific responsibility for animal collection and maintenance.

With a 2.2 or higher in Biology and previous marine biology experience, you must work well in a team and possess the ability to manage your own time effectively. The role also calls for a CMAS 2* diving qualification or equivalent.

On-line application forms and further information are available on our website at [www.antarctica.ac.uk/employment](http://www.antarctica.ac.uk/employment)

These are also available from the Personnel Section, British Antarctic Survey, High Cross, Madingley Road, Cambridge CB3 0ET Tel 01223 221508. Please quote ref BS206. Closing date for receipt of application forms is 19 May 2006. Interviews are scheduled to be held on 13 June 2006.

You must be physically capable and medically fit to work in Antarctic conditions

LIKE NO OTHER JOB IN THE WORLD
**Senior Formulation Development Scientist**  
£Competitive Salary plus benefits - Loughborough, UK

Based in the Product Development and Formulation Technology Group, you will support pMDI project team activity in all aspects of inhalation product development.

You will actively participate in the development and execution of experimental protocols, and interpret scientific data to provide justified positions and strategy to support MDI development programmes.

The position requires science graduates in pharmaceutical sciences, pharmacy or chemistry/biology (BSc and HND/HNC considered), with 5 years' experience within the pharmaceutical development environment. Relevant experience in regulatory environments with respect to submissions and global regulatory guidance are required, and a working knowledge of statistics or advanced data analysis techniques is desirable.

For the post, you will combine good team working skills with the ability to act on your own initiative. Confident and computer literate, you will also be keen to advance your expertise and career within a company where your contribution will be valued and rewarded.

For more information please contact Martin Blake or Georgina Mears on 01737-774100 or email us at Pharma@volteurope.com

Dorothy Hodgkin Postgraduate Award
GlaxoSmithKline is pleased to invite applications for a Dorothy Hodgkin Postgraduate Award with the Babraham Institute on "Molecular mechanisms that regulate innate immunity in health and disease".

This project aims to understand how the expression of a set of genes on natural killer (NK) and T lymphocytes is regulated. These genes are known to regulate important lymphocyte functions in the context of autoimmunity, infections, cell transplantation and reproduction. We have identified a genetic locus that is responsible for a new mechanism of natural resistance to viral infections in the mouse. We want to identify the lymphocyte activation pathways responsible for the anti-viral immunity, by implementing RNAi to knockdown genes potentially involved in lymphocyte responses. The project would suit someone with an interest in molecular immunology, and with skills in molecular biology (siRNA). As the project also involves infections in mouse models, relevant experience is desirable, but not essential.

Applications (CV together with at least two letters of reference) should be sent to Dr Peter Evans (peter.evans@bbsrc.ac.uk), Graduate Tutor, The Babraham Institute; Babraham, Cambridge CB2 4AT, UK as soon as possible, and not later than 16th June 2006. Informal enquiries to Dr Francesco Colucci (francesco.colucci@bbsrc.ac.uk)

Dorothy Hodgkin Postgraduate Awards have been established by the UK government and industry to provide funds for students from the developing world to study for a PhD at a leading British University. The scheme is open only to student nationals from India, China, Hong Kong, Russia and the developing world, as defined by the Development Assistance Committee of the OECD. A full list of countries can be found at the following website, http://www.ost.gov.uk/research/dha.doc Please ensure you are eligible for this award before contacting the Babraham Institute.

Take us where science can’t.

**Environment & Hazards Director**

Keyworth, Nottingham  c.£68,000

The British Geological Survey, part of the Natural Environment Research Council, is the UK’s premier geoscience strategic mapping and research organisation. We are looking to fill the senior role of Environment & Hazards Director within the Executive Committee and to serve on the BGS Board.

As the Environment & Hazards Director, you will be responsible for delivering the BGS’s contribution to the NERC’s key science objectives in the areas of groundwater; soils, environmental risks and hazards; pollution and waste; and global climate change. These programmes develop understanding of the dynamics and impacts of modern geological processes and the interaction between humankind and the onshore/offshore physical environment. This knowledge framework ensures that all levels of government and industry - and the public - have access to strategic information that can optimise decision-making in respect of groundwater, soils, earthquake, geomagnetic and geological risks, pollution and waste management, impacts of mining, and the changing urban environment.

You will also have management responsibility for six programme managers and their associated projects and deliverables, and will contribute to the external representation of the BGS; customer and other stakeholder liaison and networking; and UK applied geoscience marketing efforts, whilst working closely with universities to further high quality collaborative science.

You will be a leader of science business and research, and have a good general knowledge of areas of geoscience in the present, and emerging core missions for the BGS. In addition to knowledge of the management systems employed by the BGS and the NERC, you will have experience of running scientific research programmes, including large external commissions, and co-funded and collaborative programmes across organisations. You will be able to provide evidence of high-level communication and negotiation with stakeholders in your area. Experience of working in stringent Health & Safety environments, understanding the responsibilities and promoting the ethos are also essential for this role.

For further details and an application form, please contact Marion Squires, British Geological Survey, Keyworth, Nottingham NG12 5GG or email masq@bgs.ac.uk quoting reference no. B2/EH/06. (Tel: 01 15 936 3512.) Further details are available on our web page at www.bgs.ac.uk/vacancies. Applications must be returned by 19th May 2006.

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. There is a Guaranteed Interview Scheme for suitable candidates with disabilities.

**INVESTOR IN PEOPLE**

**POSITIVE ABOUT DISABLED PEOPLE**

BGS
1835
British Geological Survey
Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. We are a leader in crop protection and rank third in the high-value commercial seeds market - our sales in 2005 were US$8.1 billion. This is your chance to join a team of more than 19,000 people in over 90 countries, all committed to helping farmers feed the world today and tomorrow. Come and help us grow.

**Graduate Formulation Chemists**  
£20,000 - £27,500 & benefits  
Jealott's Hill, Bracknell, Berkshire

In this largely laboratory-based, experimental role, you'll design novel formulation options, before carrying out experiments at various levels from a laboratory to manufacturing scale, then interpreting and reporting your findings and conclusions. You'll have an analytical approach to problem solving, occasionally liaising with other departments to coordinate work programmes and discuss potential approaches.

You will need a good degree, or equivalent, in a chemistry-related discipline. You could come to us having recently graduated or with a couple of years' lab-based experience, ideally in product development. Either way, you need to be an innovative thinker with great people skills and a flexible, tenacious, results-driven approach.

To apply, please send a full CV to: HR Central Support, Syngenta, Jealott's Hill International Research Centre, Bracknell, Berkshire RG42 GEY, quoting ref. JHFD/8 or email: uk.recruitment@syngenta.com  
Closing date: 19th May 2006.

www.syngenta.com

[2550-027 (2006) : 70]
SEPA
Scottish Environment Protection Agency

Specialist II (Radioactive Contaminated Land)
£26,726 - £33,169 Edinburgh

You will provide specialist, technical and professional advice on the introduction and implementation of the Radioactive Contaminated Land (Scotland) Regulations and respond to all aspects of their provision either directly or through supporting other Environmental Protection and Improvement staff. Responsible for initiating appropriate statutory and remedial action with regard to radioactive contaminated land, you will be a key point of contact for SEPA staff and external stakeholders (including the public) in this sometimes delicate area.

You must possess a degree in physical or natural sciences/engineering or a closely related discipline and three to five years' relevant technical and professional experience. Full corporate membership of a relevant professional body is desirable, as is evidence of CPD, a postgraduate qualification, full driving licence and familiarity with Microsoft applications. Excellent communication skills, both written and verbal, are essential, as extensive liaison (to include report writing and presentations) with internal and external partners is a crucial part of your role.

The closing date is 18th May 2006.

To apply or for specific details on this post, or other opportunities within SEPA please visit www.sepa.org.uk/vacancies

Alternatively you can call 01786 452555 or e-mail recruitment@sepa.org.uk
Please quote reference OPRS2729 in any correspondence.

CVs will not be considered.
[2550-028 (2006) : 70]
**Risk Modellers**

Based at Addlestone, Surrey

- Do you want to put your mathematical modelling and/or quantitative risk assessment skills to good use?
- Are you interested in biological systems, animal health and/or food safety, and would you find the challenge of these complex issues stimulating?
- Are you a team player with excellent communication skills?
- Do you want to help inform Government policy in the area of animal health and food safety?

If you can answer yes to all these questions, and are ready to use your modelling and analysis skills to help inform Government policy in the area of animal health and food safety then why not consider a career as a risk modeller in the internationally recognised Risk Analysis workgroup at the Veterinary Laboratories Agency? Using your existing and newly acquired knowledge you will conduct risk assessments on current topics of interest such as bovine TB, BSE, Salmonella and antibiotic resistance.

You must have a degree in a quantitative subject or a degree which includes a substantial quantitative element. Experience in aspects of risk assessment or mathematical modelling would be valuable.

The posts are in Pay Band D £22,300 - £32,100 per annum. The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs

Veterinary Laboratories Agency

The VLA provides a specialist veterinary resource to the Government and commercial customers and has an international reputation for scientific excellence.

Further details and an application form can be obtained from the VLA website [www.vla.gov.uk](http://www.vla.gov.uk) or by writing to: Personnel (AMK), Veterinary Laboratories Agency, New Haw Addlestone, Surrey KT15 3NB quoting reference ADP 3684.

The closing date for receiving completed application forms is 19\(^{th}\) May 2006.

**INVESTOR IN PEOPLE**

[2550-029 (2006) : 70]
Benthic Taxonomist
£17,000-£23,000 pa + Overtime and Health Insurance Bath - Permanent

Marine Ecological Surveys Limited has a vacancy for a marine biologist with specialist knowledge and a keen interest in benthic taxonomy. The post is based in Bath and the successful applicant will join an enthusiastic team of scientists who are working to merge cutting-edge research with top quality consultancy services. You should hold a degree in Marine Biology or very closely related discipline and have a minimum of one year's postgraduate experience in a related field, specifically including taxonomic identification of benthic macrofauna.

Closing date: 22nd May

To apply please send your CV and a covering letter to Bryony Pearce at the above address or by email to bryony@seasurveyeco.uk.

Alternatively, if you require any further details of the position you can call 01225 442211.

[2550-030 (2006) : 70]
The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (DEFRA). The Agency provides policy advice and technical support underpinned by high quality R&D to help DEFRA and other customers safeguard food supplies, protect consumers and the environment.

Science Serving Agriculture, Food and the Environment

YORK from £21,711 pa
SECRETARIAT CO-ORDINATOR
NON-NATIVE SPECIES
BAND 4 3 Year Fixed Term Appointment
REF: CSP 3029(with the possibility of extension or permanency)
The purpose of this role is to provide administrative and technical support to the head of the Non-native species Secretariat at CSL. Liaising with Government Departments and Agencies, members of the public, industry, etc. You will organise meetings and working groups, draft reports and papers and present at both internal and external meetings and forums.

A higher degree in a relevant subject and a minimum of two years experience is required, or a degree, (or equivalent qualification), in a relevant subject with a minimum of three years postgraduate experience. Candidates without this level of qualification will need at least six years relevant experience. The post requires experience of drafting reports and agendas, planning and arranging meetings and producing presentations for meetings, conferences, seminars etc. Excellent interpersonal and diplomatic skills are essential.
Closing Date 23 May 2006

YORK from £21,711 pa
IRMS SPECIALIST
BAND 4 REF: CSP 3015 PERMANENT
The Food Science Group at CSL co-ordinates the EU "TRACE" project on food traceability. We now require an Isotope Ratio Mass Spectrometry (IRMS) Specialist to undertake research, development and surveillance work. Duties include operation of stable isotope ratio mass spectrometers and associated preparation devices, participation in R&D project work and proficiency testing. Oral and written skills are required for drafting reports for customers and scientific papers for publication and delivering presentations at project meetings.

A degree (or equivalent qualification) in Chemistry, Food Science or a related subject plus one years relevant experience is required. Candidates without this level of qualification will need at least four years relevant experience. In addition to knowledge of Isotope Ratio Mass Spectrometry, you will be well organised, able to analyse problems methodically, be an effective communicator and have experience of Windows based applications.
Closing Date 17 May 2006

GLOUCESTERSHIRE from £21,711 pa
ECOLOGIST
BAND 4 REF: CSP 3005 PERMANENT
An Ecologist is required to carry out and manage research on the management of TB transmission from wildlife to cattle and to undertake applied studies to inform best-practice in cattle TB control. You will prepare reports and make presentations of research findings to customers and peer groups, e.g. at national and international conferences, and ensure that best-practice is promoted to policy makers and the farming community through technology transfer.

A higher degree in a science-based subject, preferably in an ecological discipline and a minimum two years relevant experience is required or a degree (or equivalent qualification) in biological sciences with
a minimum of three years postgraduate experience of ecology. Candidates without this level of qualification will need at least six years relevant experience in a Research Ecologist role. Practical experience in ecology and of handling wild animals is essential. You will also have had articles published in relevant peer-reviewed scientific publications and experience of presenting at scientific symposia. With strong inter-personal and communication skills you must be able to motivate a team and interact positively with members of the farming community.

Closing Date 23 May 2006

YORK from £17,174 pa

PLANT HEALTH CONSULTANT
BAND 3 REF: CSP 3011PERMANENT
The purpose of this role is to assist the Export Advice and Import Licensing Section in the promotion of UK Plant Health interests by providing technical advice on the licensing requirements and quarantine containment of non-indigenous plants and plant pathogens, and overseas countries' requirements for freedom from pests and diseases on plants and plant products.

A degree, (or equivalent professional qualification), in a biology based subject is required. Candidates without this level of qualification will need at least three years relevant experience. A knowledge and understanding of plant pathology is essential. In addition you will be an effective communicator able to liaise with, and provide advice to, internal & external customers. Proficiency in writing accurate and concise scientific reports is also required.

Closing Date 23 May 2006

VACANCIES IN ANALYTICAL CHEMISTRY
YORK from £17,174 pa

For all the vacancies a degree in Chemistry or a related subject, or an equivalent qualification, is required. Candidates without this level of qualification will need at least three years relevant experience. The posts all require the successful candidate to be self-motivated and able to develop positive working relationships with internal and external customers and work as part of a team. Experience of Windows based applications and a flexible approach to work is essential. In addition to these skills, each post has specific requirements:

Analytical Chemist - ICPMS
BAND 3 REF: CSP 3017PERMANENT
The Trace Elements section at CSL supports service and research work for the analysis of heavy isotopes. An Analytical Chemist is required to performing industrial instrumental analysis of samples check data and results, and subsequent entry into the LIMS database. Carrying out standard instrumental maintenance procedures, work with project and product leaders to ensure timely delivery. Drafting scientific reports and participation in the preparation of publications. This post requires recent and relevant knowledge and practical experience of ICPMS.

Analytical Chemist - HPLC/GC-MS
BAND 3 REF: CSP 3016PERMANENT
The purpose of this role is to undertake R&D projects on behalf of Pesticides Safety Directorate and other clients. This will include developing new analytical methods for the determination of pesticides and other contaminants including extraction and clean-up of sample extracts using novel techniques and quantification of analytes using mass spectrometry. Drafting scientific reports and the preparation of publications. The post requires recent and relevant experience of analytical techniques particularly HPLC/GC-MS.

Analytical Chemist - Food Contaminants
BAND 3 REF: CSP 3018PERMANENT
An Analytical Chemist is required in the Food Science Group at CSL to support R&D and service work. The work encompasses food contaminants including migration from packaging, Environmental
Contaminants, Pesticide Residues and Veterinary Medicines. Carrying out analysis of food extracts using techniques such as HPLC, LCMS and GC-MS. Checking of data and reporting results to customers. This post requires experience of analytical procedures and equipment for mass spectrometry plus experience of any of the following; pesticide residue analysis, trace organic analysis and veterinary medicines analysis.

The closing date for all the Analytical Chemistry posts is 17 May 2006.

For an application pack call 01904 462302 or email jobs@csl.gov.uk quoting appropriate reference number. Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk.

CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.

[2550-031 (2006) : 71]
Now, have the impact you deserve on the pipeline that’s driving the industry.

GSK’s approach to drug development is at the forefront of industry thinking. Ours is a business model that allows scientists and engineers within Chemical Development to have real impact on the most robust and promising drug pipeline in the industry. Our Strategic Technologies Department is a rapidly growing function critical to the effective delivery of new technologies and ways of working to support the expanding development pipeline of new drugs within GSK. Our track-record of success in supporting the development portfolio in this way has resulted in significant new investment. We are therefore seeking highly motivated chemists, chemical engineers and analytical scientists who wish to build their career at one of the world's leading research-based pharmaceutical companies.

Solid Form Sciences - Research Triangle Park and Stevenage

Both experienced PhDs and recent chemistry graduates with an interest in crystallization and polymorphism are sought to join our worldwide team which is responsible for discovering, evaluating and selecting appropriate salt and crystal forms of our new drug substances. We have both leadership and team member opportunities available.

Req IDs: 31570 and 33133 (US); 31608 and 31609 (UK)

Particle Sciences - Research Triangle Park, Philadelphia, Stevenage and Tonbridge

Both experienced PhDs and recent graduates are sought to join our worldwide team to provide expertise in crystallization and isolation science; and support project teams, developing new technologies and ways of working.

Req IDs: 31563 and 32313 (US); 30117, 30401 and 30921 (UK)

Process Engineering - Research Triangle Park, Stevenage, Tonbridge and Verona

A number of experienced and recent PhDs and chemical engineering graduates with an interest in development, scale-up and optimization of new chemical processes & technologies are sought to join our worldwide team which is responsible for providing process engineering input into late phase development projects facilitating seamless process transfer within the R&D pilot plant network and to final manufacturing sites. We have both leadership and team member opportunities available.

Req IDs: 30875 and 31212 (US); 29630, 29890, 30946, 31720, 31721 and 32234 (UK); 30284 (Italy)

Laboratory Automation - Research Triangle Park, Philadelphia, Stevenage, Tonbridge and Verona

Experienced graduate or PhD synthetic chemists are sought to join our worldwide team to contribute to the design and optimization of new processes to drug candidates utilizing leading-edge automation platforms and statistical experimental design techniques. We have both team leader and team member opportunities available.

Req IDs: 33376, 31968 and 31969 (US); 31347 and 31348 (UK); 30340 (Italy)

Process Analysis & Chemometrics - Research Triangle Park, Philadelphia and Stevenage

Experienced PhDs and graduates are needed as part of our multifunctional worldwide team to develop in-situ analytical methods and techniques that generate understanding, optimization and control of synthetic chemistry processes in both the laboratory and pilot plant.

Req IDs: 30299 and 30149 (US); 32177 (UK)

Analytical Scientists – Stevenage

PhD analytical scientists are required for the following roles:
1) Investigation of new analytical technology
2) Development of analytical platforms to support laboratory, pilot plant and manufacturing operations

Req IDs: 29964, 29894 and 29893 (UK)
For all these roles, we're looking for innovative thinkers with good problem-solving skills. The ability to work well in a team and liaise effectively with diverse teams across Chemical Development and other areas of Research & Development and Manufacturing will also be very important.

GlaxoSmithKline is dedicated to an innovative workplace and supports you with career-long opportunities and learning. We offer a competitive benefits and compensation package designed to attract and retain the very best. For confidential consideration and efficient processing, please apply online at www.gsk.com/careers referencing the Req ID of the position of interest. Indicating Req ID is essential. Principals only, no agencies please.

POSITIVE ABOUT DISABLED PEOPLE

GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is proud to be an equal opportunity employer M/F/DIV

Together we can make life better

gsk
GlaxoSmithKline
[2550-032 (2006) : 72]
Authentix
Global Leaders in Authentication

Authentix® is the Global Leader in authentication solutions for brand protection and fiscal tax recovery. As the inventor and developer of many of the leading nano-scale authentication solutions in use today, we have a world-class technology portfolio. Moreover, our skills in applying those technologies to solve counterfeit, adulteration and smuggling issues for clients, ensures that we are a trusted partner of leading brand owners and governments. In the last three years we have recovered over $3 billion in last revenues in the petroleum, pharmaceutical and consumer goods industries alone.

Authentix, the Global Leader in Authentication, currently has several positions open in our York, UK office.

Programme Manager (2 Vacancies)
Two opportunities exist to take a leading role in managing implementation programmes, for governments and major brand owners in order to prevent tax evasion and brand abuse. One role will focus on National programmes in the petroleum industry while the other will focus on Brand Protection programmes for blue chip organisations.

You should have a strong technical background, preferably in Chemistry, have demonstrated the ability to convert technology into commercial revenue and have a track record of managing implementation programmes. You are expected to lead by example, have excellent communication skills in order to relate to all stakeholders, be able to work as part of a dynamic team, be highly motivated and have a strong commercial focus.

Experience of working in industry is essential as is embracing change in a fast moving industry. The opening within National petroleum team will include a significant amount of international travel.

Quality Control Leader (1 Vacancy)
An opportunity exists to take on the role of QC Leader ensuring that all of the products leaving our York Facility meet our quality standards. In this key role, you should have a minimum of science A level and HPLC experience would be an advantage. A passion for high standards and a results orientation are important. The successful candidate will be given full training and the opportunity to register for a part-time degree at a local university.

Salaries will depend on applicability and experience. To apply, please send a copy of your CV and covering letter to Mrs. G Bryant Authentix, 7 Chessingham Park, Dunnington, York, Y019 5SE.

www.authentix.com
BioFocus
A Galapagos Company
singular vision

BioFOCUS Discovery Ltd is a leading company working with international pharmaceutical, agrochemical and biotech companies in the discovery area. BioFocus offers a full suite of hit to lead discovery products and services.

Owing to rapid expansion, we have vacancies for high calibre candidates in our Biology and Medicinal Chemistry divisions.

**ADME Scientist** (CRP 115)
We are looking for a scientist to join the *in vitro* ADME group, to help to develop the role of *in vitro* ADME for BioFocus clients. Applicants should have a BSc / PhD in Chemistry or an appropriate biological discipline. A practical working knowledge of *in vitro* ADME assays, and the interpretation of ADME data, is required together with good communication skills and a minimum of 3 years' working experience in the area of *in vitro* ADME. The successful candidate will ideally be experienced in the use of mass spectroscopy to generate ADME data.

**Assay Development and Screening** (CRP 116/117)
We have positions for laboratory based scientists at Research Scientist (CRP 116) and Team leader (CRP 117) level to manage and perform assay development and high throughput screens in the early stages or the drug discovery process. Applicants should have a knowledge and understanding of assays for biological targets or importance to the pharmaceutical industry, ideally including GPCR and nuclear hormone receptors. Experience of working within matrix teams and leadership or scientific projects will be advantageous as would experience of laboratory automation and laboratory data management. Applicants should be life sciences graduates or PhDs with a minimum of 3 years’ practical laboratory experience in a drug discovery environment for research scientists and a minimum of 5 years in Biotech or Pharma companies with experience of line management for Team Leaders.

**Medicinal Chemistry – Scientists and Senior Scientists** (CRP 104)
In the Medicinal Chemistry Division we work with a number of major pharmaceutical and biotech companies on a range of biological targets across multiple therapeutic areas. Projects range from Hit Discovery through to late stage Lead optimisation and require innovative compound design and problem solving skills.
We have positions for experienced chemists who can demonstrate their excellence in synthetic and medicinal chemistry. The role involves working in multidisciplinary teams with close interaction with client companies.
Applicants should have a flair for organic chemistry and enjoy problem solving. Ideally, applicants should hold a PhD in Chemistry, although graduates with relevant experience will also be considered.

We offer a stimulating, varied and open working environment and levels of responsibility few others can match. We believe in our people and reward them accordingly with a competitive benefits package as well as the opportunity to continuously develop themselves and their careers.

Candidates must have the right to work in the UK. The closing date is 20 May 2006 and we would prefer to receive applications by email. Therefore please send your CV and covering letter stating the appropriate reference number and outlining your suitability for the position to **jobs_uk@glpg.com**.

More information about BioFocus can be found on our website [www.biofocus.com](http://www.biofocus.com) [2550-034 (2006) : 73]
Technology Development Co-ordinator
£27,951 - £34,093 Swindon

The work of the Particle Physics and Astronomy Research Council (PPARC) is focused on research into big scientific questions - and you will have a vital role to play in influencing the success of future projects.

You will oversee and maintain a technology development strategy that ensures the essential technologies are in place to sustain and support an active science programme. You will actively work with the research community to identify required technologies, as well as foster strong, collaborative links with academia, industry, other research councils and government agencies.

Educated to graduate Level in a relevant science or technology, you will have a minimum of five years research/technology development experience in academia or industry. You will also have sound leadership, IT and communication skills with the ability to act on your own initiative, build effective partnerships and work well as part of a team.

The benefits include generous holiday entitlement, final salary pension scheme, flexitime and excellent on-site facilities which include a bistro and coffee shop.

For an application form and further details, please contact Fiona Tuck, Joint Recruitment Unit on 01793 444468 (24 hours), fax 01793 444016 or e-mail: jru@researchcouncilshq.jobs quoting the reference number JRU 57/06.

Alternatively all our documents are available on our website www.researchcouncilshq.jobs

Closing date for applications: 12 May 2006.

I want to discover more

Senior Analyst Developer – Scientific Applications
Loughborough

As one of the world's leading pharmaceutical companies, AstraZeneca invests £2 billion a year on discovering products that continue to break new scientific ground. Products that are bringing fresh hope to millions of people worldwide.

Our Discovery Information professionals make a key contribution to this process by enabling scientists to access and use information more effectively. Combine an impressive track record in business analysis or application development with proven experience in delivering scientific research solutions, and you could join this talented team.

Ideally with an understanding of the Drug Discovery process and the information systems that support it, you'll be expected to work in close partnership with our scientific research colleagues looking for opportunities to make improvements, interpreting their business requirements and taking ownership for the delivery of highly effective solutions.

Degree-educated, customer-driven and delivery-focused, you'll ideally be well versed in delivering effective IS solutions in complex scientific research environments. In return, you can look forward to a worthwhile and challenging role with a successful, multinational company that genuinely values and rewards the commitment of its people.

To find out more and apply, please visit our recruitment website: www.careers.astrazeneca.co.uk and search under reference DIS424.

AstraZeneca
life inspiring ideas
[2550-039 (2006) : 75]
In drug discovery you don't wait for the future to happen. You actively shape it – exploring innovative ideas, influencing scientific practice and creating new and better pathways. If you are ready to contribute, it's time to join our in vitro Drug Discovery team at the state-of-the-art research centre in Horsham, West Sussex.

We are looking for Receptor Pharmacologists at either post-doctoral or graduate level to join our G protein-coupled receptor pharmacology laboratory. Your principal responsibilities will include the development and validation of in vitro GPCR assays, profiling of new chemical entities and detailed investigation into the mechanism of action of clinical candidates.

Key to these roles is your desire and enthusiasm to further the fundamental understanding of ligand-receptor interactions. Along with a proven background in quantitative analysis of GPCR ligand pharmacology and/or GPCR assay development, you must demonstrate a commitment to success through multidisciplinary teamwork. Self-motivation and excellent communication skills are essential.

NOVARTIS
NOVARTIS INSTITUTES FOR BIOLOGICAL RESEARCH
The New Pathway to Drug Discovery
The Institute of Cancer Research (University of London)

**Scientific Officer in Cell Biology**
Cancer Research UK Clinical Magnetic Resonance Research Group, Sutton, Surrey

The Institute of Cancer Research is at the forefront of international cancer research and, with the Royal Marsden NHS Foundation Trust, forms the largest comprehensive cancer centre in Europe. The Cancer Research UK Clinical Magnetic Resonance Research Group is internationally recognised for its work in magnetic resonance applied to cancer diagnosis and cancer research. The group is equipped with a range of clinical and experimental MR systems and extensive computing facilities.

A part-time (3 days per week) post of Scientific Officer is available for 3 years following the award of a grant from Cancer Research UK to investigate metabolic biomarkers of inhibition with molecularly targeted anti-cancer agents. The post holder will assist in the day-to-day running of the experiments and data collection. Duties will involve growing and treating cancer cells with various agents, performing growth inhibition assays, extracting cells and preparing samples for metabolic analysis by NMR and analysis of protein expression.

The candidate should be a graduate in molecular cell biology or a related discipline with previous experience in working with mammalian cell systems. Experience in one (or more) of the following would be a particular advantage: cell culture, cell transfection, RNA interference, Western blotting and enzyme activity assays.

The starting salary, based on a 3-day week, will be in the range £9,796 to £15,413 pa inclusive (full-time equivalent £16,327 - £25,688 pa inclusive).

Informal enquiries can be made to Dr Mounia Beloueche-Babari (e-mail: Mouniab@icr.ac.uk).

To apply, please send two copies of your CV including the names and addresses of two referees to the HR Office, The Institute of Cancer Research, 123 Old Brompton Road, London SW7 3RP quoting reference number CLIN52. For a job description and person specification please visit our website at www.icr.ac.uk/jobs.html Alternatively you may call our 24-hour recruitment line on 020 7970 6061.

Closing date: 25th May 2006.

**Engineering Technologist** - Cleanroom & Vacuum coating
ca £30k + benefits

cpi
The Centre for Process Innovation

An opportunity to shape the future of flexible electronics

The Centre for Process Innovation (CPI) is moving forward as the UK's pre-eminent innovation and resource partner for the chemical & electronics industries. It is dedicated to delivering applied research & development with industrial & academic partners.

CPI operates the Flexible Electronics Substrate Facility (FESF) centred on a roll-to-roll coater within a cleanroom together with specialised test & analysis equipment.

We are seeking to recruit an enthusiastic engineer with interests in undertaking industrial research, to lead the engineering operations of the FESF while developing novel flexible electronic components for flexible displays.

The role
Take a lead role in ensuring smooth engineering operations of the FESF in areas covering safety management, maintenance, procurement, planning & facility enhancement.
Maintain, operate and improve the performance of the FESF including the cleanroom & roll-to-roll sputter coater while liaising closely with industrial partners to ensure clear communication of milestones & deliverables.
• undertake broad R&D programmes in conjunction with industrial and academic collaborators from across Europe.
• Develop a technological leadership position in the area of cleanroom technology & thin film coating of substrates.

Requirements
• Minimum of degree level education in engineering or an associated physical science discipline.
• Practical experience in operation of vacuum coating equipment & an understanding of cleanroom techniques.
• Task focused analytical thinker with good interpersonal skills & a desire to develop new technologies.

The role is likely to expand, offering candidates the opportunity to develop broad, technology based project management skills within a growing environment at the cutting edge of science.

Please apply with CV to: Liz Skeritt, Centre for Process Innovation, Wilton Centre, Wilton, Redcar TS10 4RF or email: liz.skeritt@uk-cpi.com
Tel: 01 642 447278

Closing date: 31st May 2006

Scientists & Technologists
Where will the faster, harder, stronger fighting vehicles of the future come from?
Dstl - the Defence Science and Technology Laboratory. We’re defining the Future Rapid Effect System (FRES) - a family of vehicles that will be the backbone of the British Army after 2010. In fact, from transport and weapons procurement to military operations, we’re coming up with ingenious solutions that give our Forces the edge in battle.

If you’re an innovative and inquisitive scientist or technologist keen to push back the frontiers of knowledge in your field within a world-class government organisation, find out more about current openings at www.dstl.gov.uk/careers

[2550-044 (2006) : 77]
Regulatory Affairs Specialist
Rhodia

Oldbury, West Midlands
Circa £35k plus bonus & benefits package

Rhodia is a global speciality chemicals manufacturer with sales of €5.2bn and a workforce of over 20,000 people worldwide. Partnering with major players in the automotive, electronics, oilfield, pharmaceutical, agrochemicals, oilfield, consumer care, tyres, and paints and coatings markets, Rhodia offers tailor-made solutions combining original molecules and technologies to respond to customers' needs.

We are looking to recruit an experienced Regulatory Affairs Specialist to help us to grow our businesses in a world where regulation of the Chemical Industry is increasing dramatically. This role will become very important to Rhodia in Europe with the introduction of REACH in 2007.

Working as part of the Product Stewardship Team, you will help to secure registrations and notifications for new and existing products across the world, but primarily in Europe.

You will be responsible for managing regulatory projects and will be expected to represent Rhodia in consortia formed under REACH or other chemical registration schemes. This requires an understanding of the relevant commercial and technical rationale and management of the registration process from initial request through to approval.

You must understand the commercial and cost implications of projects and must comply with legal requirements.

You will have a good degree in Chemistry and have some understanding of the commercial process. Knowledge of European regulatory requirements is important, and you must be prepared to become an expert in this field. You must also be able to communicate effectively with regulators, customers and consultants.

Excellent project management, organisational and influencing skills are essential for success in this role, as is your attention to detail. You will also be able to work effectively in a team and on your own initiative, and will have the ability to use IT/systems to improve work processes and efficiency.

If you are interested in this position, please send your CV and covering letter to: Sue Sutcliffe, HR, Rhodia UK Limited, PO Box 80, Trinity Street, Oldbury West Midlands B69 4LN or email: sue.sutcliffe@eu.rhodia.com

Closing date: 19th May 2006.

CHALLENGING BOUNDARIES
[2550-045 (2006) : 77]
Research Assistant

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems.

Copy Number Variation in the Human Genome
The Sanger Institute has one position for a Research Assistant to join a team identifying and characterising regions of copy number variation in the human genome. These regions will be identified initially using comparative genomic hybridisation onto DNA microarrays (arrayCGH). The work will involve preparation and labelling of DNA from human cell lines, hybridisation and analysis of DNA microarrays and further detailed studies using fluorescence in situ hybridisation (FISH) and other molecular approaches. The candidate would be educated to degree level or equivalent, and will have some laboratory experience ideally involving DNA microarray technology or FISH.

Benefits include 25 days annual leave, final salary pension scheme, optional private healthcare (on successful completion of a qualifying period), permanent disability insurance, life assurance, childcare voucher scheme, campus bus services from Cambridge and Saffron Walden, car-share scheme, on-site restaurant, café, gym and an active sports and social scene.

To apply for this position please email your CV (including 2 referees) and current salary details, Quoting reference NS1135 to: recruit@sanger.ac.uk

Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge, CB10 1SA

The closing date for applications is Friday 26th May 2006

Unit 1

An exciting opportunity has arisen for a motivated team player to join us. We are a dynamic team of multi-skilled technologists who perform sleep and respiratory investigations in a very busy London teaching hospital.

You should have a biological degree (preferably clinical physiology) or an HNC in MPPM and some experience of sleep and respiratory function tests studies, preferably with a background in lung function, sleep or neurophysiology. If you want to develop your technical skills, work directly with patients and make a significant impact in patient care and management then look no further.

This is an excellent opportunity to develop your professional and technical competencies, receive a good salary with enhanced payment for unsociable hours and get involved in teaching, training and departmental research.

For a visit to the department or more information, please contact Simone de Lacy, Consultant Technologist on 020 7188 3439.

For an application pack please visit http://jobs.gstt.nhs.uk or contact our 24 hour Recruitment Line on 020 7188 8111. Please quote ref: M498.

Closing date: 18 May 2006.

All our vacancies can be viewed on our website.

Our excellent benefits include final salary pension scheme. Please visit our website to find out more. Equality of opportunity is our Policy.

[2550-048 (2006) : 78]
Galapagos is a publicly listed genomics-based discovery company focused on the development of novel drugs for the treatment of bone and joint diseases. Using an innovative high-throughput biology platform, Galapagos has discovered a number of novel, proprietary disease-modifying drug targets and is in the process of developing small molecule compounds for clinical use. The Galapagos group currently employs more than 220 people, including 80 PhDs, and occupies facilities in Mechelen, Belgium; Saffron Walden, UK, and Leiden, The Netherlands.

Rapid expansion has created the following opportunities for creative individuals to join our Mechelen-based research and development team:

**Senior Pharmacologist** (MEC-001)
You will be qualified to PhD level with at least 5 years' industrial experience in pharmacology/ADMET. Experience with animal models in the field of bone and joint disease would be an advantage. Reporting to the SVP Drug Discovery, you will lead a team of pharmacologists within the R&D group and will also act as project leader directing a multidisciplinary team of scientists.

**Senior High-throughput Screener** (MEC-002)
You will be qualified to PhD level and have at least 3 years' HTS experience in an industrial environment. Reporting to the Assay Development and Screening Department Head, you will lead a team of scientists in the coordination and execution of compound screening and validation.

**Protein Production Scientist** (MEC-003)
You will be qualified to BSc level with at least 3 years' relevant experience. Experience with protein production in an industrial environment would be an advantage. Reporting to the Assay Development and Screening Department Head, you will be responsible for the production of target proteins used for screening and in crystallographic studies.

**Computational Chemist** (MEC-004)
Qualified to PhD level with at least 5 years' relevant experience, preferably within industry, you will be responsible for the implementation and management of computational chemistry within Galapagos. Reporting to the Discovery Informatics Department Head, you will also act as project leader directing a multidisciplinary team of scientists.

In addition to the above positions, Galapagos encourages the submission of speculative applications from dynamic individuals with a desire to contribute to the discovery and development of novel therapies for bone and joint diseases and we are particularly seeking Medicinal chemists (PhD) and Biologists (BSc).

We offer a competitive salary and an extra legal benefits package as well as the challenge of working in a stimulating, multicultural, entrepreneurial and innovative research environment.

If you have the right qualifications and wish to be part of these exciting opportunities, please e-mail your application letter and CV, stating the job reference code in the subject heading, to jobs_be@glpg.com

[2550-049 (2006) : 79]
Image Analysis

Wherever you look, whatever you do, wherever you go ... Barco is with you. Often without realizing it Barco's technology touches our lives. Taking a train, attending a concert, undergoing a medical examination, watching a sports game on TV, buying clothes or visiting a museum are just a few examples taken from our daily lives where Barco's know-how can play a significant role.

The Voxar Product Group, based in Edinburgh, Scotland, was founded in 1995 and is a pioneer and market leader in the field of 3D medical imaging and integration with PACS. Our strategic partnerships with over thirty of the world's leading PACS vendors mean that our Voxar 3D software is available as an integrated option on over 50% of the world's PACS workstations.

We are looking for two individuals to join our growing Image Analysis Team, researching, prototyping, validating and delivering software technology components, including interactive and automatic segmentation, rigid and non-rigid registration, tracking and computer aided detection (CAD), in 2D, 3D and 4D medical datasets.

We invite applications from individuals with a broad knowledge of medical image analysis. Be prepared to demonstrate good technical communication skills, and an understanding of the priorities of working in a commercial environment.

The successful applicants will likely have a relevant PhD or other postgraduate qualification, and one to five years experience in a commercial environment. Good software engineering skills are required, including C++. Experience with MATLAB, Insight Toolkit (Itk) or other imaging tools and knowledge of CT MR and ultrasound modalities are desirable. Barco offers dynamic and creative professionals a wealth of opportunities, an autonomous position with broad responsibilities, a competitive salary and additional benefits.

Thrilled by the Barco Challenge? Further information can be found on our jobsite [www.barco.com/jobs](http://www.barco.com/jobs) or please contact Kirsty Summers, HR Assistant and Office Support, on 0131 472 4792 or e-mail [Kirsty.summers@barco.com](mailto:Kirsty.summers@barco.com)

Closing date: 15th May 2006

BARCO

[2550-050 (2006) : 79]
Ecofys is one of the largest, fastest growing environmental consultancies in Europe. The Dutch Econcern Group (www.econcern.com) is the holding company of Ecofys and employs about 300 professionals throughout Europe. We now have ambitious growth targets for the UK, and are looking for the following professionals and colleagues to work initially out of our London offices.

**Senior Consultant**, Energy and Climate Strategy. You will be responsible for our existing portfolio of projects, and for expanding activities in the field of energy and climate policies and markets. You will be expected to work closely with the group management as well as with experts in other Ecofys offices.

**Consultants**, Energy and Climate Strategies and Carbon Management (2 posts). Our ideal candidates will have experience of UK energy and climate policies and/or industrial carbon management, combined with strong analytical and commercial skills. You will preferably have at least 3 years of consultancy experience in these areas.

**Consultants**, Energy In the Built Environment (2 posts). In these roles you will be aiding in the acquisition and delivery of projects in the area of energy efficiency and renewable energy in buildings and in low energy building design or zero carbon strategies. You will have experience in the built environment, possibly with an architectural or engineering background and a minimum of two years of professional experience.

**Senior Consultants**, Bio-energy and Wind energy (2 posts). We are looking for two professionals with at least 5 years of consultancy acquisition experience in these two areas, preferably international. You will already have an excellent network of contacts in these markets.

In addition to a dynamic, international, and pleasant, informal working environment, Ecofys offers good salaries and a competitive benefits package.

Please contact Maria Clerkin on 0207 618 6646 or e-mail: jobs@ecofys.co.uk

[2550-051 (2006) : 79]
influencing the world around us.

**Policy Manager - Industry**
Bristol • £40,000 - £45,500 + benefits

Making decisions that have a direct impact on the environment is a huge responsibility. This is your chance to make a massive contribution to environmental protection - by influencing the regulation of industry across England and Wales and the development of future regulation across Europe.

The Environment Agency's Industry Regulation Policy Team manages and implements a wide range of environmental policies. Within this driving force you will manage a team delivering policies and strategies across a wide range of industries - from chemicals and metals to food and drink. You'll help these industries move towards more sustainable development based strategies through their own initiatives as well as those of the Environment Agency and government.

We'll look to you to provide a strong, long-term link between government departments and industry, driving joint government and industry projects. You'll also be responsible for the co-ordination of the Environment Agency's contribution to COMAH and Joint Competent Body with HSE and SEPA. Such is the importance of this role that you will also play a part in the development of environmental regulation at EU level.

The extensive experience you've already gained in a regulated industry or regulatory body will stand you in good stead for the challenges that this role delivers. As well as strong leadership skills, you'll need to demonstrate experience of industry regulation and the delivery of environmental protection. You will be personally committed to environmental issues.

For more information and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) If you don't have internet access, please call Katie Van Heusen, on 0117 915 6243 for an application pack quoting reference EP0213. Closing date: 19 May 2006.

We are committed to making our organisation as diverse as the environment

[2550-052 (2006) : 80]
**Data Managers Required**
The MRC Epidemiology Unit was set up in October 2003 to study the genetic and environmental determinants of obesity, diabetes and related metabolic disorders. For further information about the Unit, please visit [www.mrc-epid.cam.ac.uk](http://www.mrc-epid.cam.ac.uk)

We are looking to appoint two Data Managers to carry out aspects of the work in an expanding data management team that supports the work of the Unit. Both post holders can expect to be involved in a wide range of computational issues and will be line-managed by a senior data manager who will provide the team's overall direction. Post holders should be strong team players with excellent communication skills at all levels, as they will be responsible for providing expert advice on the management and processing of data contributing towards the dissemination of research results. Both post holders will be expected to contribute to the unit's information and statistical structures.

**Data Manager - Database Specialist** (Ref: EPID/406/8)
Working on data from all of the Unit's programmes of research, your initial emphasis will be on providing expertise to establish new databases whilst maintaining existing ones. In relation to ongoing large studies, work may involve travelling to locations throughout East Anglia to query collaborators, information systems. This is a permanent post.

**Data Manager - Data Harmonisation and Programming** (Ref: EPID/406/9)
Working mainly within the Unit's Physical Activity programme of research, you will be responsible for managing a number of pre-existing datasets and performing associated programming tasks. This post is grant-funded and is available for two years.

Both posts require a B.Sc. (or equivalent) qualification in a Computational, Mathematical or Science related subject, along with at least six months to one year's experience in handling large volumes of data, programming and/or the design of new databases.

The starting salary for both positions will be in the range of £19,048 - £21,941 per annum depending on qualifications and experience. This is supported by a flexible pay and reward scheme and optional MRC final salary Pension Scheme. Working hours will be 36 hours per week.

To apply, please send a covering letter and full CV with the contact details of two professional referees who can be approached prior to interview.

Quoting the relevant job reference, please e-mail your application to: recruit@mrc-centre.cam.ac.uk or post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH.

Closing date: 25th May 2006

POSITIVE ABOUT DISABLED PEOPLE
[2550-056 (2006) : 82]
Post-doctoral Position (2 years)

Plasso Technology is an advanced materials-engineering company, developing novel surface platforms for use in the Life Sciences. Our technologies have important applications in diagnostics, microarray analysis, microfluidics and drug discovery.

Applications are invited for a post-doctoral research post supported by Plasso Technology at the University of Sheffield, tenable for two years. The research project is to develop novel tissue culture surfaces comprising precision-engineered, immobilized fields of intercellular signalling molecules for stem cell manipulation. The project is interdisciplinary, ideally suited to an individual who wishes to work at the interface between chemistry and biomedical science.

Applicants should have a first degree in chemistry or life sciences, and a PhD in molecular or cell biology. Experience in the use of techniques for molecular cloning, cell transfection, and analysis of gene expression is essential. Experience of surface modification techniques (plasma deposition) and of advanced surface analysis (XPS, SIMS) are desirable.

Salary on BBSRC pay scale according to age and experience.

Further information may be obtained by contacting either Dr Vincent Cunliffe (v.t.cunliffe@shef.ac.uk; 0114 222 2389) or Professor Robert Short (r.short@shef.ac.uk; 0114 2225475). Please send applications including a full CV and names and addresses for two references to Prof. Rob Short, Plasso Technology, The Innovation Centre, 217 Portobello, Sheffield S1 4DP by June 1st 2005.

Research Fellow
£20,044 - £30,002 pa

A post is available in St Andrews, for up to three years, developing advanced magnetic resonance instrumentation. The project is part of a major European collaboration led by Frankfurt University into Dynamic Nuclear Polarisation (DNP) in high magnetic fields. The aim of this project is to dramatically improve the sensitivity of NMR measurements by transferring polarisation from electron spins to nuclear spins. The project will involve the design, assembly and testing of a very high field mm-wave ESR spectrometer and the modelling and construction of novel high frequency ESR cavities.

Ideally, you will have knowledge/experience of mm-wave instrumentation, electromagnetic modelling and magnetic resonance techniques, particularly electron spin resonance, and be available to start as soon as possible.

Informal enquiries to Dr Graham Smith, e-mail: gms@st-and.ac.uk or tel: 01334 462669.

Please quote ref: SK184/06. Closing date: 19 May 2006.

Application forms and further particulars are available from Human Resources, University of St Andrews, College Gate, North Street, St Andrews, Fife KY16 9AJ (tel: 01334 462571, by fax: 01334 462570 or by e-mail: jobline@st-andrews.ac.uk). The advertisement and further particulars can be viewed at http://www.st-andrews.ac.uk/hr/recruitment/vacancies

University of St Andrews

The University is committed to equality of opportunity

Imperial College London  
Division of Biomedical Sciences

**Research Positions in Nutritional Systems Biology**

Post 1:
- Salary: £22,870 - £33,330 per annum
- Appointment will be up to three years

A Nestlé-funded postdoctoral position is available in nutritional metabonomics. The overall aim of this project is to apply state-of-the-art metabolic and "omics" technologies to explore the impact of nutrition on health and disease. The successful candidate will hold a first or upper second class degree in a chemical or mathematical science with a PhD in chemometrics or multivariate statistics, preferably with experience in working with "omics" data and/or metabolic pathways. Experience in programming with MATLAB or JAVA would be an advantage.

An application form and job description as well as person specification can be obtained from [www.imperial.ac.uk/employment/academicform.htm](http://www.imperial.ac.uk/employment/academicform.htm)

Post 2:
- A PhD position is available in characterising and predicting the metabolic response to nutritional intervention, and will investigate the role of gene-environment interactions. The project will involve exploring the relationship of pre-intervention metabolic status with response to nutritional intervention (pharmacometabonomics) using NMR spectroscopy and mass spectrometry. Applications are invited from recent graduates or final year undergraduates who hold or expect to gain a first/upper second class honours degree or equivalent. Applications should be made in the form of a curriculum vitae to Ms Nahid Ashby at the below address.

For both posts:
- The successful candidates will join a multidisciplinary team based at Imperial College in London working with an extensive international network of pharmaceutical scientists in this major high-profile project. Dynamic communication skills and the ability to integrate knowledge to solve real-world problems are necessary.

The Biological Chemistry Section, headed by Professor Jeremy Nicholson, has one of the best equipped metabolic spectroscopy laboratories in the world with a multiple NMR (4 x 600 MHz plus 800 MHz LC-cryo-NMR-MS/MAS) and MS (UPLC/LC/GC-TOF/QTOF/ion trap) clusters and extensive high-level computational facilities.

Applications should be sent to: Ms Nahid Ashby, Biological Chemistry Section, Division of Biomedical Sciences, Imperial College London, Faculty of Natural Sciences, Sir Alexander Fleming Building, South Kensington, London SW7 2AZ.

Closing date: 25 May 2006.

Valuing diversity and committed to equality of opportunity

Senior Lecturer In Biomedical Science Cytology/Cellular Pathology
School of Pharmacy and Biomedical Sciences
£30,607 - £37,643

The Division of Biomedical Science consists of eleven academic staff, including a Professor and Reader, and has good technical support. The School achieved an ‘excellent’ rating in all aspects of its teaching provision in the latest QAA Subject Review.

We are seeking to appoint a candidate with a strong track record in research and a genuine interest in undergraduate teaching. Specialist knowledge in the areas of Histology, Cytology and Cellular Pathology is essential. The successful candidate will contribute towards teaching at BSc and MSc level on a variety of courses managed within the Biomedical Science Division, as well as supervision of PhD and Professional Doctorate programs. Previous relevant experience of working in a hospital laboratory environment is desirable as well as experience of undergraduate/ postgraduate teaching. Candidates should have a PGCertEd or be prepared to undertake this qualification in post.

The successful candidate will be expected to carry out high quality research in any relevant area of biomedical science and to contribute to the Institute of Biomedical and Biomolecular Science (RAE grade 5). There are state-of-the-art research facilities and opportunities to collaborate with active research groups across the Institute.

For an informal discussion, please contact Dr Geoff Oliver, Head of Biomedical Science, tel: 023 9284 3559 or email: geoff.oliver@port.ac.uk

For an application pack, please contact us at the number (24-hour answerphone) or address below, quoting ref: ASCI 6018/NS. Closing date: 19\textsuperscript{th} May 2006.

UCL
UCL Department of Biochemical Engineering

Research Fellow
Fermentation position in the Interdisciplinary Manufacturing Research Centre (IMRC) for Bioprocessing, UCL.

We are seeking a talented individual to carry out fundamental and process-related fermentation research and have a supervisory role of fermentation research within the IMRC.

The Interdisciplinary Manufacturing Research Centre for Bioprocessing at UCL is funded by the Engineering and Physical Sciences Research Council (EPSRC) and currently have research themes on protein and plasmid DNA production with hosts such as Escherichia coli, Pichia pastoris and mammalian cells. We have over 80 doctoral students, 10 postdocs and 12 full time staff.

The Department has state-of-the art fermentation and downstream processing facilities housed in the Advanced Centre for Biochemical Engineering. The IMRC collaborates with a significant range of other departments across University College London and beyond.

The applicant would be expected to carry out fundamental research in one or more of the IMRC research areas; to have a supervisory role for other researchers (both PhD and postdoctoral); to liaise with the 12 companies who are partners in the IMRC programme.

Applicants should have a PhD in Biochemical Engineering, Molecular Biology, Biochemistry, Biotechnology or similar subject. Practical experience in fermentation is essential. Some hands on experience of recombinant DNA methods would also be desirable.

For more information about the Centre visit www.biochemeng.ucl.ac.uk

The salary for the position will be in the range of £24,886 - £30,606 per annum (discretionary to £33,445 per annum) (Grade 7), plus £2,400 per annum London Weighting. The salary offered will be commensurate with experience.

Please apply with full CV and names and addresses of three referees to Ms Paula Thomas, Deputy Departmental Administrator, Department of Biochemical Engineering, University College London, Torrington Place, London, WC1E 7JE, UK or email: paula.thomas@ucl.ac.uk

Closing date: 18th May 2006.

UCL Taking Action for Equality

UNIVERSITY OF DUNDEE MEDICAL SCHOOL
Division of Pathology & Neuroscience

PhD Studentships - 2006

A number of prestigious three-year Research Studentships leading to the degree of PhD are available for October 2006 entry. The Division, which was rated 5* at RAE 2001, is the largest in the Medical School, and provides an exceptional environment for research and postgraduate training. Dundee is situated in an area of outstanding natural beauty and combines a high quality of life with some of the lowest living costs in the UK.

MRC-funded Doctoral Training Studentship:
Dr Sheriar Hormuzdi (s.g.hormuzdi@dundee.ac.uk),
Investigations into the Assembly and Specification of Electrical Synapses.

Dr Graham Rena (g.rena@dundee.ac.uk),
Characterisation of Compounds that Mimic Insulin and Leptin Signalling.

Dr Judith Sleeman (j.e.sleeman@dundee.ac.uk),
Proteomic and Dynamic Analyses of the snRNP Maturation Pathway in Mammalian Cells.

BBSRC CASE Studentship:
Professor Michael Coughtrie (m.w.h.coughtrie@dundee.ac.uk),
Molecular Analysis of Veterinary Drug Metabolising Enzymes in Cattle (with Pfizer).

This CASE Studentship carries a stipend enhancement of an additional £3,565 pa, and involves spending up to six months working at the collaborating company.

Tenovus Scotland Studentship:
Dr Frances Fuller-Pace and Dr Jean-Christophe Bourdon (f.v.fullerpace@dundee.ac.uk),
Associations between p53 Isoforms and p68: Implications for Breast Cancer.

For further details, please contact the individual supervisors directly via e-mail, or visit: www.dundee.ac.uk/pathology/2006Studentships

Highly motivated students holding, or expecting to obtain, a first or upper second class honours degree in a relevant subject are invited to apply. There are strict eligibility criteria for these studentships: see www.mrc.ac.uk or www.bbsrc.ac.uk for details. To apply send a covering letter clearly indicating your preferred supervisor(s)/project(s), a full CV, and contact details for two academic referees by e-mail to Liz Faini (e.faini@dundee.ac.uk or telephone 01382 632166).

Closing date: 22 May 2006.

Shortlisted candidates will be invited to a Selection Day in Dundee on 9 June 2006.

Science, work and business
The insider

An environment for career success
Three scientists working to tackle climate change from very different directions reveal what it takes to
Lynn Dicks

Carol Turley
Head of science for biogeochemistry, Plymouth Marine Laboratory

When someone starts a conversation by telling you that climate change is not the full story and there are
other issues to think about in burning fossil fuels, you could be forgiven for expecting a lengthy
argument from a sceptic.
At a major conference in Exeter last year, Carol Turley of the Plymouth Marine Laboratory (PML) stood
up in front of the world's climate change experts and did just that. But Turley is no sceptic. She went on
to explain that there is another global threat posed by rising levels of atmospheric carbon dioxide that is
at least as serious but largely overlooked. "Climate change is only half of the CO₂ problem," she told
the conference.
Two years earlier, while assessing the risks of seepage from CO₂ stored underground, Turley came
across a body of scientists who were concerned about the potentially irreversible damage to marine
ecosystems from rising atmospheric CO₂. The gas dissolves in seawater, which makes it more acidic
and reduces the concentration of carbonate ions. Many marine organisms, such as planktons, corals and
molluscs, use carbonate to make their shells or skeletons, so a rise in CO₂ levels will hamper their ability
to survive (New Scientist, 9 July 2005, p 15). Turley predicts that the construction of coral reefs could
slow by more than a third by 2065.
To make matters worse, because the oceans absorb CO₂, they are buffering the rise in global
temperatures at the moment. The more acidic they become, the less CO₂ they can absorb, thus speeding
up climate change.
Turley was not the first scientist to realise the enormity of this issue, but she has played a key role in
bringing it to the fore and convincing policy-makers. Her philosophy for achieving this is first to put the
hours into the research and second to seize every opportunity. On a recent flight Turley found herself
sitting next to the chairman of the Intergovernmental Panel on Climate Change. Rather than relaxing
with the in-flight magazine, she spent the time explaining the impact of ocean acidification, and followed
that up by sending him the relevant scientific papers. She is now one of the lead authors for the panel's
fourth assessment, due in 2007.
Turley's career so far is impressive by anyone's standards. It has been no easy ride, though. Before
landing a permanent post at PML, she spent 14 years moving from one short-term contract to another,
with periods of unemployment. That time was by no means wasted. She recalls how some of her most
successful research was completed during the jobless periods, including a paper published in Nature
on deep-sea bacteria. She persevered for the love of her science.
Above all, she says, impartiality and integrity are the prerequisites to success. It is vital to base your
answers on actual scientific data, rather than trying to push an agenda. "Admit when you don't know the
answer or where you are uncertain," Turley says. "Avoid spin, and your opinion will be respected."

job market snapshot
The majority of environmental science jobs are in consultancy, especially in areas like contaminated
land and environmental impact assessment, where new legislation is fuelling a booming sector.
Increasingly, manufacturing companies are starting to employ their own waste management and
pollution control specialists, too.
It can be a challenge to get on the ladder, though, says Paul Seeley of recruitment agency Eden
Recruitment, as employers often want people with years of experience under their belt (New Scientist,
3 September 2005, p 52). A basic grounding in the physical sciences and maths is important and often
lacking, he adds.
It's easier to start out working for regulatory bodies or local authorities, but if you want to move to the private sector, do it quickly, Seeley says. Non-commercial experience is not rated as highly by private enterprise.

Ocean ecosystems are under threat from an often overlooked effect of burning fossil fuels

Visit www.newscientistjobs.com/insider for the latest careers news and jobs

“"To a researcher, it’s a bit like being a kid in a sweetshop"

Jeff Kenna
Director, Energy for Sustainable Development

Jeff Kenna shows that it is possible to translate environmental concerns into wealth and jobs. In 1989, he co-founded the consultancy Energy for Sustainable Development (ESD), which advises companies and governments on renewable energy projects and how to cut carbon emissions. Its clients include the European Commission, the UN and the World Bank, as well as multinationals such as Shell. So how did he become one of the UK's most successful environmental entrepreneurs?

Kenna started out as a physicist, but always had an interest in the application of science. Travelling around Africa and Asia after completing his degree in the 1970s, he saw how useful renewable energy technologies could be in places with limited electricity supply but plenty of sun and wind.

Back in the UK, Kenna went to Cardiff University and joined what was then the biggest academic research group working on solar energy, to do a PhD on the design of solar-powered water heaters. He places high value on his academic training. "There are not many people in business with good technical expertise. You can differentiate yourself with a physics or engineering degree," he says.

After completing his doctorate, he helped start a small company delivering renewable energy projects in developing countries, from solar water pumps in Mali to photovoltaics in Romania. It was while working on a biomass project in Ethiopia that he and five colleagues conceived the idea for ESD. "In the 1980s, most renewable energy work was in developing countries," Kenna says. "We began talking about how to get it going in Europe."

The vision became a reality, and in its early days the consultancy grew by up to 30 per cent a year. It now has offices in four countries. Among other accolades, it has won the Queen's Award for Export Achievement and has just been included in the Financial Times list of the 50 best places in the UK to work.

ESD has also spawned a number of successful spin-off ventures, such as a company that was one of the first to allow householders to buy "green" electricity by matching their energy use with renewable power generation.

Another of ESD's daughter companies, Camco International, holds the world's largest portfolio of tradeable carbon credits, which are bought and sold to help companies and governments meet emission-reduction targets. Camco was floated on the stock market at the end of April with a list value of £83 million. "Recognition from financial institutes is the ultimate mark of success," says Kenna. "With access to their monetary muscle, you can really do things."

From his position at the helm, Kenna is able to make his voice heard about how we obtain and use energy. He believes there need not be a conflict between businesses making a profit and a more sustainable society.

"I have much more influence than I would in research," he says. "Government pays attention to industry."

Rob Wilby
Climate change science manager, Environment Agency

Rob Wilby is the Environment Agency's climate change encyclopedia. It is his job to answer the technical questions of 12,000 Environment Agency staff as well as all the organisations that work alongside them.

It's a tall order. He has to keep abreast of a huge range of scientific developments, from complex mathematical models of how the climate will change to the mechanics of flood defence. His advice is
used on the front line of protection of our air, land, water and ecosystems. Wilby also plans and manages the Environment Agency's own research programme on climate change.

Attaining this degree of influence and freedom has taken time and required flexibility. After a degree in physical geography, Wilby started out at a private water company. He has since researched and taught at five universities, finding little trouble hopping between private, public and academic sectors. Scientists shouldn't be afraid to make big career changes along the way, he says. The diverse range of people he has worked with over the years helps him appreciate the needs of different groups.

Along with his advisory role in the regulatory sector, Wilby makes time to continue his own research on how to manage water as the climate changes. Research has always been central to his work: he has a publication record longer than your arm and a professorship at Lancaster University.

He sees involvement in scientific discourse as vital to keeping his understanding fresh. Wilby puts his success down to always choosing work he is passionate about. "In the Environment Agency I am working at the coalface in terms of tackling climate change. I come across a host of interesting questions that need to be answered. To a researcher, it's a bit like being a kid in a sweet shop."

Lynn Dicks is a freelance science writer

Clean water.
1996 – 2006
Environment Agency

The benefits are clear to see.

Fisheries – Senior Technical Specialists - Across England  Up to £35,800

Because a river, lake or stream that’s full of fish means the water’s clean and healthy. So people can feel free to go out and enjoy their environment, whether it’s rural or urban. The local economy benefits too. And we’ll know that we’re succeeding in our aim to ‘create a better place’ for today’s - and tomorrow’s - generations. If you share our passion to achieve this goal, there’s a place for you in our dedicated Fisheries team. As the knowledge on fisheries in your region, everyone will come to you for advice, from fisheries officers to environmental management teams. You’ll need to be a confident speaker and present our strategies to stakeholders - which will mean clearly communicating technical issues and convincing them to get on board. So, it’s important that you’re a graduate member of a professional body, as credibility will be key.

There are flexible hours, a pension and whole host of other benefits on offer. But more importantly, as the largest freshwater fisheries employer in the UK, we’ll give you more influence and opportunities than anyone else.

We also have vacancies for Regional Strategic Specialists. Please visit www.environmentagency.gov.uk/jobs to find out more.

For more information and to apply, please visit www.environment-agency.gov.uk/jobs If you don’t have internet access, call Debbie Woodall on 01925 542355 for an information pack quoting reference 11031. Closing date is 12 June 2006.

We are committed to making our organisation as diverse as the environment

Increase the flow of knowledge

**Head of Knowledge Transfer** £60k

For an application form and further details, please contact: Fiona Tuck, the Joint Recruitment Unit on 01793 444468 (24 hours), fax 01793 444016 or e-mail: jru@researchcouncilshq.jobs quoting the reference number JRU 77/06.

Alternatively, all our documents are available on our website www.researchcouncilshq.jobs

Closing date for applications: 16 June 2006.

**NATURAL ENVIRONMENT RESEARCH COUNCIL**

Supporting the growth of a knowledge-based economy is an essential part of what we do at the Natural Environment Research Council (NERC). To help the economy reap the rewards of our investments in environmental science (around £370m pa), we actively promote the transfer of knowledge generated by supported HE institutions and our institutes - and you can play a new and vital role in maximising the relevancy and benefits of our activities to potential users.

Determined and able to make a significant impact, you will ensure a robust approach to Knowledge Transfer is in place which involves users in the planning, implementation and review of the science and knowledge transfer activities supported by NERC.

As well as assuming leadership for NERC’s corporate knowledge transfer activities, you will also be responsible for our contribution to the Office of Science and Innovation’s target which relates to better exploitation of science base. A self-starter who can operate with a high degree of autonomy and deliver to agreed goals, you will have experience in a senior knowledge management role. This will include broad knowledge of the issues associated with Knowledge Transfer, Commercialisation and Science into Policy and in-depth knowledge of at least one of these areas. You will also have the ability to present, lead, negotiate and influence, as well as interact effectively with a range of different communities and stakeholders.

If you’re ready to transfer your skills to our organisation and take on a new and considerable challenge, then we would like to hear from you.

UNEP
GRID ARENDAL
Environmental Knowledge for Change

The United Nations Environment Programme (UNEP), as the world's leading intergovernmental environmental organization, is the authoritative source of knowledge on the current state of, and trends shaping the global environment. www.unep.org

GRID-Arendal is an international UNEP center located in southern Norway. Established in 1989 as a Norwegian foundation, GRID Arendal's mission is to provide environmental information, communications and capacity building services for information management and assessment. Together with its partners, GRID Arendal's core focus is to support decision-making processes aimed at securing a sustainable future. www.grida.no

GRID-Arendal has an international professional staff of 39, 26 of whom are based in Arendal, and with outposted offices in Geneva (Switzerland), Ottawa (Canada) and Stockholm (Sweden). From October 2006, GRID-Arendal will be re-located to the UN House in the center of Arendal. The UN House will represent eco-efficient solutions for energy, lighting, ventilation, using environmentally-friendly materials.

GRID-Arendal seeks a
Managing Director
The Managing Director is the Chief Executive Officer of the center. The Managing Director heads a small, complex organization with highly qualified staff, specialized in different environmental areas. As Managing Director, you will function in an international context and in an international team. You will have the opportunity to explore new areas of work as well as broaden the current activities of GRID-Arendal. You will use and extend your current international and environmental network actively with partner organizations like UNEP, UNDP, WRI, EEA...

The position is based in Arendal (Norway). Salary is based on Norwegian standards. For more information on this position including job description, benefit package, institutional strategy and UN House presentation, see www.grida.no (vacancy)

Principal responsibilities
• Strategic leadership within the institution's framework;
• Overall management ensuring a sound economic basis for current and future operations;
• Delivery of high-quality services and products that fulfil the organization's mission.

Qualifications:
• Ph.D/M.Sc academic level
• In-depth knowledge of environment and sustainable development issues
• A demonstrated record of creative thinking and innovative approach on issues and projects
• Demonstrated capacity in organizational development and motivation of staff
• Understanding of international political processes and a demonstrated record of international project-based fundraising
• Excellent communications skills, including excellent spoken and written English
• Experience with the UN-system is an advantage

GRID-Arendal practices equal gender opportunity and qualified female candidates are encouraged to apply.

Deadline for application: 1 July 2006

Application to include cover letter highlighting why the applicant is most suitable for the position and CV.
(No specific application form to be filled in.) Application to:
GRID-Arendal Board of Directors Secretary Karen Folgen, karen@grida.no
(phone +47 370 35 710)

For further questions and information about the position, please contact Karen Folgen or Board Chairman Olav Orheim, oo@rcn.no (phone + 47 22037508 or cell phone +47 911 23108.

JOINT NATURE CONSERVATION COMMITTEE

The Joint Nature Conservation Committee (JNCC) was established by the Environmental Protection Act 1990 and advises on UK and international conservation issues.

Climate Change Advisor
Permanent post £26,959 pa

We are looking for someone to join our Habitats team here in city centre Peterborough to act as the primary focus for our climate change work. You will be developing and implementing a relevant work programme and leading on the provision of JNCC advice on climate change work. There will be a need to keep abreast of developments relating to climate change and to liaise effectively with colleagues both internal and external to ensure that any work is both complementary and cost-effective.

You'll possess a relevant degree and relevant post graduate experience, with a general knowledge of UK biodiversity and a sound knowledge of climate change issues and their likely effect on biodiversity locally and globally. Ref 2006/12.

In return we offer a generous holiday allowance, a choice of pension schemes and the chance to work with people seeking solutions.

For full details and the necessary application form visit our website at www.jncc.gov.uk; email recruitment@jncc.gov.uk or leave a message on 01733 866892. Closing date 22 June 2006.

The JNCC welcomes applications from all members of society.
[2554-013 (2006) : 64]
PhD Studentship in Remote Sensing and Climate Change

Applications are invited for a NERC studentship starting in October 2006 that will involve observation and modelling research in one of the fields of:

- Mesoscale convective systems and easterly waves
- New observations to estimate the radiation balance of the atmosphere
- Remote sensing to improve flood prediction
- Radar measurements of deforming volcanoes.

The ESSC is a world-class centre for quantitative research into remote sensing of the Earth, with strong links to the University’s prestigious Meteorology Department and to the mathematics and physics communities. We seek applicants from the UK or EU who hold at least a 2:1 honours degree in a mathematical or physical science.

We offer a stimulating research environment, opportunities for international collaboration, strong links to industry and good employment prospects. The stipend for these positions is at least £12k per year (for UK students only) plus fees. Closing date: 23 June 2006.

Application forms from: The Faculty of Science, The University of Reading, Whiteknights, PO Box 220, Reading RG6 6AF Enquiries in the first instance to Professor G Wadge (01189 318741, gw@mail.nerc-essc.ac.uk). Further details on the topics can be found at www.nerc-essc.ac.uk [2554-014 (2006) : 64]
SEPA
Scottish Environment Protection Agency

**Hydrogeologist** (2 posts) £19,388 - £29,317
East Kilbride    Ref: OPEA3096
Dingwall         Ref: OPEA3095

Working within the Groundwater (Hydrology) team, you will provide expert hydrogeological support to SEPA's regulatory, groundwater monitoring, and River Basin Planning activities. You must hold a degree in a relevant Science discipline while a postgraduate degree in hydrogeology would be desirable.

**Assistant Hydrogeologist**
£15,524 - £21,268
Dingwall         Ref: OPEA3097

Your key duty will be to support and maintain SEPA's groundwater monitoring network; primarily sampling and equipment maintenance. You will also provide a supporting role in the coordination of groundwater sampling efforts by other staff and the review of sampling site suitability and health & safety issues. Additional duties will include supporting the provision of specialist hydrogeological input to the regulatory process, along with data reporting, data compilation and analysis. You must hold a minimum of an HNC or vocational equivalent in a relevant civil engineering, geology or related earth sciences discipline.

The closing date is 16th June 2006.

**Specialist II** (Water Resources)
£26,726 - £33,169
East Kilbride Ref: OPER2410

You will provide specialist, technical and professional advice to SEPA staff and other external bodies to support the introduction and ongoing implementation of the water resources aspects. This will include assessing water resource proposals and their impact and the need for environmental monitoring.

A degree or equivalent in physical or natural sciences or engineering or a closely related discipline is essential, as is three to five years' technical/scientific experience. Evidence of CPD, a postgraduate qualification, a full driving licence and corporate professional affiliation to a relevant professional body are desirable. You must have excellent communication skills, both written and oral, as liaison with both internal and external stakeholders will play a crucial part of your role, and an awareness of current and relevant legislation.

The closing date is 15th June 2006.

To apply or for specific details on these posts, or other opportunities within SEPA please visit [www.sepa.org.uk/vacancies](http://www.sepa.org.uk/vacancies)

Alternatively you can call 01786 452555 or e-mail recruitment@sepa.org.uk Please quote appropriate reference in any correspondence.
CVs will not be considered.

New Scientist Jobs
www.newscientistjobs.com
[2554-016 (2006) : 64]
Forestry Adviser  
East Kilbride  
£35,545 - £47,524 UK taxable  

At DFID, our central focus is on an international commitment to halving the proportion of people in extreme poverty by 2015 - through sustainable development, education, and better management of natural and physical environments. So we're looking for individuals who can bring skills, understanding and patience to even the most complex development activities.

The Africa Equatorial Department works to achieve successful implementation of our plan to deliver coherent policy and practice - aiming to bring about a step-change in Africa and its international profile by promoting African ownership, increased development effectiveness and concentration of resources where they’ll be most effective. There's strong political support for our regional programmes on forest governance and illegal logging.

With extensive travel to London, Cameroon, Ghana and elsewhere in Africa, you'll provide technical and strategic advice on forest governance reforms and embedding these in wider reform processes and policy dialogues. Covering a wide range of policies and programmes including multi-donor forest sector reform, Partnership Agreements to promote forest law enforcement, governance and trade, and pro-poor livelihood initiatives, you'll communicate with and influence our partners at every level.

With excellent French skills - or a willingness to learn - you must have a natural resources or forestry degree or equivalent university qualification, extensive relevant experience, a strong background in natural resources or forestry governance, and knowledge of rural livelihood issues. You will have strong negotiating and communication skills which enable you to influence effectively, work independently and contribute as a member of remote teams. Ideally, you can also bring a network of professional contacts within DFID and experience of working at country level and supporting country programmes.

This appointment is on Home Civil Service terms. DFID is an equal opportunities employer. Applications are welcomed from all parts of the community and we actively encourage interest from women, ethnic minority groups and those with a disability. Selection is on merit. Candidates should be UK nationals, nationals of member states of the European Economic Area (EEA), Swiss nationals or citizens of the Commonwealth who have the right to work in the UK.

For more information on this vacancy, DFID in general, and an electronic application form, visit our website. Alternatively, call 01355 843109 or e-mail DFIDRecruitment10@dfid.gov.uk to request an application pack. Closing date - 15 June 2006.
Forest Research

**Process Modeller**
Starting Salary £29,623 to £36,364 plus benefits
Located at Alice Holt Research Station, Farnham, Surrey.

You will lead the further development of process modelling in the Division, dealing with all aspects of ecosystem components determining the growth dynamics of managed trees and forests, in support of UK forestry and multi-purpose sustainable policies and objectives.

For further information and an application pack see our website: [www.forestry.gov.uk/vacancies](http://www.forestry.gov.uk/vacancies) or write to Shireen West, HR Services, 231 Corstorphine Road, Edinburgh, EH12 7AT quoting Reference number HR67/23.

The closing date for completed applications is Friday 16 June 2006.

INVESTOR IN PEOPLE
The Forestry Commission is committed to equality of opportunity and welcomes applications from all age groups and sectors of the community.

[www.forestry.gov.uk/vacancies](http://www.forestry.gov.uk/vacancies)
JOINT NATURE CONSERVATION COMMITTEE

The Joint Nature Conservation Committee (JNCC) was established by the Environmental Protection Act 1990 and advises on UK and international conservation issues.

**Habitats Adviser**

£21,952 pa  Permanent

We're looking for someone to join our Habitats Advice Team here in city centre Peterborough. You'll be providing support for the coastal lead co-ordination network, accessing and facilitating the use of data and working with the lead co-ordination networks on Common Standards Monitoring.

You'll need a knowledge of the policy and legislative framework for UK nature conservation, plus a sound knowledge of coastal ecology with an experience of surveillance techniques. Ref No 2006/13

We offer a generous holiday allowance and a choice of pension schemes.

For full details and the necessary application form visit our website at [www.jncc.gov.uk](http://www.jncc.gov.uk); email recruitment@jncc.gov.uk or leave a message on 01733 866892.

Closing date is 22 June 2006.

The JNCC welcomes applications from all members of society.

UNIVERSITY OF WALES BANGOR

CONSERVATION ACCESS ENJOYMENT EDUCATION

Nature Conservation Adviser
HIGHLANDS & ISLANDS REGION
£23,156

The National Trust for Scotland

Our properties in the Highlands & Islands include some of the UK's most stunning natural habitats. Based in Inverness, you'll travel throughout the region giving nature conservation advice to our property-based staff, establishing and maintaining ecological monitoring programmes and inputting - as part of a multi-disciplinary team – to holistic management planning.

You'll have a degree (or equivalent knowledge) in ecology/nature conservation/biological or environmental science (or similar), with a proven track record of delivering nature conservation advice, survey and monitoring. Because this is a "hands-on" and an advisory role, you'll have excellent organisational and interpersonal skills, will be self-sufficient in IT and have a current clean driving licence.

For full details and an application pack telephone 0131 243 9417 or email: joinus@nts.org.uk stating where you saw this advert.

Closing date: Friday 16 June 2006.

Charity SC007410
Expert Scientist / Principal Risk Assessor
For the General Chemicals area Boxworth, Cambridgeshire UK
(£26,573 - £38,575, depending on experience and qualifications)

Cambridge Environmental Assessments (CEA) are leaders in regulatory environmental risk assessments for chemicals. We provide problem-solving skills for industry and research capability for government agencies, offering a wide range of services from desk-based investigations to field studies.

In line with our sustained growth we wish to make senior appointments to strengthen our core business and to support new developments in the area of General Chemicals (including REACH). We are keen to recruit individuals with expertise in one or more of the following disciplines:

- Ecological Risk Assessment
- Probabilistic Risk Assessment
- Population Modelling and Statistical Analysis
- Environmental Modelling and Risk Assessment
- Ecotoxicology

Ideally, candidates will have a research degree (or equivalent) with 4-10 years' experience applying the above skills within a regulatory environment. A key element of these positions will be the promotion of CEA and its expertise both nationally and internationally. CEA, as part of the ADAS group of companies, are a flexible and supportive employer.

Interested? Then please send your CV, details of current salary and a letter of application detailing why we should consider you for a position to: Dave Arnold, CEA, Battlegate Road, Boxworth, Cambridge CB3 8NN, UK.

Email: dave.arnold@cea-res.co.uk or telephone: +44 (0) 1954 268 250 for further information.

Closing date 23rd June
[2554-022 (2006) : 66]
SANDBERG

Analytical Chemist

Sandberg LLP is a consultancy providing independent professional and technical services to all concerned with the quality and performance of construction materials.

The chemistry department has a vacancy for an experienced analytical chemist to join our dedicated team based in our laboratories in Clapham, London. Educated to degree level, you will be expected to carry out routine and investigative analyses of a wide range of inorganic and organic materials encountered in the built environment. You will be required to work both individually and as part of the team and would be expected to contribute fully to the efficient running of the laboratory. A willingness to learn new procedures is essential.

Please send a current CV to Mr Philip Tate, Personnel Manager at: Sandberg LLP, 40 Grosvenor Gardens London SW1W 0EB
email: tate@sandberg.co.uk
[2554-023 (2006) : 66]
Research Scientist in DNA Virology
based at Addlestone, Surrey

Working in the Mammalian Virology work group, you will undertake projects to investigate the pathogenesis and control of viral diseases of mammalian livestock. The post has an emphasis on investigation of new and emerging diseases of cattle and pigs, with a strong thread of herpes virology and DNA viruses in general. Working as part of a team employing a range of molecular techniques in pursuit of research objectives, you will be expected to contribute intellectually to other research projects, and provide advice to others within the Department. You will also be encouraged to pursue your own area of specialism and build on existing national and international collaborations.

You will have a science or veterinary degree. A PhD in a virological subject would be an advantage, and you will be an experienced Virologist with a thorough knowledge of molecular biological techniques, including microarray technology and the experience and skills to manage a small team of scientists. Experience in a research environment together with a proven track record in independent research as evidenced by a strong publication record and international collaboration is required.

The post is in Pay Band D £22,300 - £32,100 per annum. The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working in most areas and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs.

Veterinary Laboratories Agency

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (AMK), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP 3709.

The closing date for receiving completed application forms is 9th June 2006.

INVESTOR IN PEOPLE
[2554-024 (2006) : 66]
IN THE FIGHT AGAINST CANCER, JOIN THE FRONT LINE

Competitive salaries & benefits - Slough, Berkshire

The merger between UCB and Celltech has formed a biopharmaceutical company that leads the world in a range of clinical areas. Our oncology group is now one of the UK's largest, and a true centre of excellence.

As we continue to invest heavily in R&D, our innovative pipeline is set to lead the fight against cancer well into the future.

**Group Leader - Translational Biology**

At the heart of our plans is a firm commitment to translational biology. No one is keener to explore the potential of this innovative concept than we are. Allied to our unsurpassed oncology expertise, this has created a unique and fascinating environment in which to fulfil your ambitions.

You will lead our oncology translational biology effort, shaping your own role as you help define and put in place our overall strategy. It's a high-profile role that will see you both coordinate the growth of the discipline internally and lead external collaborations - accessing samples, developing and applying analytical methods to tumours and assessing the impact of pre-clinical compounds.

You must have spent at least five years in oncology in industry, dealing with small molecules and antibodies. Plus you will have the knowledge of translational biology to take charge of all aspects of this crucial new venture, driving forward your team and projects alike. Ref: 2904

**Research Associate - Translational Biology**

It will be your role to offer far-reaching practical support to the Group Leader in areas such as cell biology, molecular biology and immunohistochemistry. From generating samples for analysis to performing high quality assays, you'll have the chance to use and develop a broad range of skills.

You will have gained some lab-based oncology experience in industry, possibly from the sandwich year of your degree with cell or molecular biology components.

Now that you've graduated, you will be keen to make the most of your initiative and team focus. Ref: 2903

**Research Scientist - Antibody Discovery**

Our team of biologists will welcome your ideas to help in our approach to identify novel tumour antigens and characterise tumour-targeted antibodies. What's more, you can expect plenty of interactions across other departments as you work with and develop the latest technologies in the area.

In this varied, creative role, you must have a PhD in cell/molecular immunology, plus up to a couple of years related experience. With your strong technical, IT and organisational skills, you will relish the prospect of interpreting and integrating complex data in such a rapidly evolving environment. Ref: 2926

**Research Scientist - Antibody Projects**

You will join a multi-disciplinary team that uses a broad range of molecular biology and mammalian cell biology techniques to select and characterise antibodies against novel cancer targets. From the generation of new protein constructs and performance of cell-based assays to characterisation and validation studies, you will enjoy exposure along the full lifecycle of your projects.

Since graduating, you will have gained around three years' commercial experience in cell or molecular biology, perhaps from an antibody or immunology background. With a flexible, well-organised approach, you will have a good grounding in the relevant techniques. Ref: 2981
To apply, please email your CV and covering letter, quoting the appropriate reference to: rd-
slh.recruiter@ucb-group.com or send to: HR Advisor, UCB, 208 Bath Road, Slough, Berkshire SL1
3WE. Closing date: 23rd June 2006.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
dstl
Dstl is part of the Ministry of Defence

Why do…?

**Scientists & Technologists**
Why do new battlefield technologies emerge?

It’s thanks to Dstl - the Defence Science and Technology Laboratory. We’re using advanced computer modelling and simulation techniques to predict the battlefield of the future. We’re coming up with next-generation solutions that integrate transport, weapons, equipment, logistics and human behaviour. And we’re taking military thinking to a new level.

If you’re an innovative and inquisitive scientist or technologist keen to push back the frontiers of knowledge in your field within a world-class government organisation, find out more about current openings at [www.dstl.gov.uk/careers](http://www.dstl.gov.uk/careers)

Safeguarding public health
MHRA

The Medicines and Healthcare products Regulatory Agency (MHRA) is the government agency which is responsible for ensuring that medicines and medical devices work, and are acceptably safe.

**Enquiry Point Manager**
London • circa £22,000

The MHRA's Central Enquiry Point (CEP) operates an information service to answer queries on medicines and medical devices for internal and external clients, utilising an in-house database and other resources.

You will manage and develop the CEP services ensuring excellent customer service is maintained and that all CEP staff are adequately trained and supported. In addition to participating in the rota, you will manage the coordination of e-mail enquiries, provide guidance and refer complex queries to senior colleagues. You will be required to liaise with Agency staff at all levels to continually improve this service.

With an honours degree in pharmacy, medicine, toxicology or other appropriate life science, or one year's experience of working in a medicines environment, you will have experience of staff management and proven communication, leadership, customer service and organisational skills.

Please note the full salary range is £19,489 - £28,112.

If these challenges inspire you, you can download further information and apply on-line via our website - [www.mhra.gov.uk](http://www.mhra.gov.uk). Similarly, you can download our application at this address and send your completed form via email to [jobs@mhra.gsi.gov.uk](mailto:jobs@mhra.gsi.gov.uk) or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: Friday 16th June 2006.

**POSITIVE ABOUT DISABLED PEOPLE**
**INVESTOR IN PEOPLE**

As an Equal Opportunities employer, the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

Pharmaceutical R&D is at a crossroads, but would you be able to identify the key issues? Are you keen to learn more?

Thomson Scientific is a market-leading provider of information solutions for the pharmaceutical industry. We now have a number of openings for motivated, resourceful graduates/postgraduates to join the dynamic editorial team responsible for producing our drug information products, in particular the flagship Thomson Pharma database.

**Commissioning Editor** (Ref: TSDI-CE)
You will commission experts to write comprehensive reviews on key drugs, identified and researched by you, for publication electronically and in print. You will edit submitted material for monthly deadlines and ensure that all associated records on our databases are accurate and up to date.

**Quality Editor** (Ref: TSDI-QE)
You will proactively seek and edit the latest information relating to drug R&D programs for daily online publication, and will be expected to take part in ongoing training and quality control initiatives.

**Licensing Editor** (Ref: TSDI-LE)
Working alongside the Quality Editors, you will gather a variety of information on licensing activity in the pharmaceutical industry, using this to update relevant records, and writing news stories for daily and weekly publication.

**Drug Information Editor** (Ref: TSDI-DI)
Working in the Quality team, you will formally support the other drug information teams according to varying deadlines. You will also manage the identification of drug candidates for literature review, and prepare the records accordingly.

Successful candidates will have a good BSc or higher degree in a life science or medicinal chemistry. Excellent written and verbal communication skills are essential, while all positions require a good head for research and impeccable attention to detail. In return we'll provide thorough training, the opportunity to attend international meetings and a competitive benefits package.

To apply send your CV, together with a covering letter and position you are interested in, to ts-ukrecruitment@thomson.com Closing date is Friday 16th June 2006. If you have not received a response from the Company within four weeks, you should assume that your application has been unsuccessful.

Thomson Scientific is part of the Thomson Corporation. Website: www.thomsonscientific.com

I want to deliver results

Alderley Park, Cheshire, South Manchester or Charnwood, near Loughborough, Leics
Highly competitive and flexible rewards

One of the world's leading pharmaceutical companies, AstraZeneca relies on the expertise and energy of our Study Delivery professionals to provide the high-quality clinical trials that are a crucial part of the drug development process. We're currently looking for a number of people to join this dynamic, high-profile and results-driven department. With us, you can enjoy a challenging career and a culture that's designed to inspire and reward exceptional performance.

**Study Delivery Group Manager**
18-24 month contract
We're looking for someone with the wide-ranging knowledge to lead, guide and develop people working in our Study Delivery teams. Contributing project, scientific and operational expertise, you will play a crucial role at every stage of our different clinical study programmes. Throughout your work, you will act as a champion for innovation, creativity and performance so, in addition to at least five years' experience of delivering clinical studies, you will also bring proven team leadership or management skills. Ref: DEV3S4

**Study Delivery Operations Specialists**
You will join a department delivering clinical trials for a number of highly promising new therapies, particularly in oncology. Enjoying unusually broad exposure from Phases I to III, you will manage every stage of the process using e-clinical solutions. At least two years' clinical research experience is essential; so too are the interpersonal skills to build excellent relationships across the business. You will also need a good grasp of e-clinical technologies and the flexibility to travel nationally and internationally. Ref: DEV403

ITOPF
TECHNICAL SUPPORT COORDINATOR
London – circa £30,000 + benefits

An international, non-profit organisation involved in all aspects of combating oil and chemical spills in the marine environment is seeking a Technical Support Coordinator to join its small London-based team. ITOPF's work is varied and challenging. It involves giving advice world-wide on the most effective methods for responding to oil and chemical spills from ships, minimising their impact on economic resources and the environment, and the provision of compensation. Further details of ITOPF’s activities can be found on the web site at www.itopf.com

Our new Technical Support Coordinator will be responsible for the management and interpretation of technical information held on ITOPF databases. They will gather and input data, interact with data providers and deal with technical queries from third parties. They will also work on projects, assist with oil spill claims assessment and provide invaluable office support to our team of Technical Advisers whilst they are attending oil spills.

Candidates should possess a degree in a scientific or technical discipline and be highly computer literate, especially in the use and development of databases. The ability to analyse and present technical data is important, as is previous experience with geographical information systems (GIS). Numeracy and good written and oral presentation skills are also key.

Starting salary would be in the region of £30,000 per annum, plus a generous benefits package including pension scheme and private medical insurance.

If you feel you meet the above criteria and would like further details and an application form, please visit www.itopf.com

Completed applications should be sent by email to: carolremnant@itopf.com

Medical Writers

Do you have a life sciences PhD? Do you have a desire to develop your writing skills and take your career in a new direction? Are you keen to work as part of an accomplished team in a customer-focused company? If so, we are keen to hear from you.

Oxford PharmaGenesis™ offers a complete marketing and medical communications service to the pharmaceutical industry. As a result of winning a major new account and continued growth in existing business, we are seeking Medical Writers (new or experienced). An interest in renal, metabolic, cardiovascular or gastrointestinal disorders would be preferable.

Based in a Grade II listed barn in a country setting on the outskirts of Oxford, we provide an excellent working environment. We also offer on-the-job training, a competitive benefits package and a chance to be part of a professional and enthusiastic team.

If you want to be part of our success, please write, enclosing your CV, to Jeanette Costigan, Oxford PharmaGenesis™ Ltd, 1 Tubney Warren Barns, Tubney, Oxford OX13 5QJ.

OXFORD PHARMA GENESIS™
Generating Lifetime Pharmaceutical Value
[2554-032 (2006) : 70]
ALL THE BEST NAMES, ALL IN ONE PLACE.

At Mars, a family-owned $186bn fmcg organisation, we believe in what we do. Our global brands. Our emphasis on innovation. And the experts who develop our products. From chemists to microbiologists to food safety scientists, we employ some of the best names in the business. Performing high-profile work in the arenas of quality and food safety, their work reaches across the supply chain, influencing product and process innovation through to production. It's incredibly satisfying work - managing projects and making decisions that have a real impact on business performance. If you want to display your skills in a fast-moving manufacturing environment, we'll ensure that your career goes from strength to strength.

**Chemical Food Safety Manager**  £35k - £40k
You'll ensure that we remain at the leading edge of food safety management and product and process development. Working with global counterparts, you'll identify and initiate new research opportunities - and play a pivotal role in the development and delivery of our Food Safety Strategy. Drawing on a proven ability to network across the scientific community - among whom you've gained deserved recognition as an expert in your field - you'll hold a degree in Chemistry Toxicology (or a related subject). Experience-wise, you'll have spent at least five years' in R&D, which may include time completing a PhD, and - ideally - have some knowledge of risk assessment within a business environment.

**Food Safety Management Expert**  £30,000
You'll develop and deploy food safety risk management standards across the European Supply Chain. It's a role that will impact on business growth, and will require you to liaise with R&D, and our Global Quality Team. We'd expect you to have a degree in Food Safety Management and at least three years' manufacturing experience. A proven track record in project management and team-leading is also called for, as is the ability to influence people at all levels of the organisation.

Create a reputation for yourself that's second-to-none. To find out more and apply online, please visit www.rd.mars.com

Mars is committed to equal employment practices.

[2554-033 (2006) : 71]
Research Assistant - Mapping Core Group

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems.

The Mapping Core Group represents a consolidation of existing technologies and clone resources for mapping, as well as introducing novel techniques and methods. The aims of the group are to generate, refine and develop physical maps as required by sequencing projects, and provide mapping support to the Sanger as a whole.

The Pig Project is one focus of the group. We are using the highly continuous BAC map developed at the Sanger as a template for whole genome sequencing. Successive rounds of tilepath BACs are identified using map positions and alignments to the Human genome and pig sequence. The clones are isolated using an automated platform.

We are looking for someone to take responsibility for monitoring the progress of BAC clones through the sequence pipeline and assist in the isolation of clones in the lab when necessary. You will analyse both map and emerging sequence data and use in-house databases to assist in the definition of the most efficient minimum tilepath of BACs across the genome, leading to the assembly of annotated chromosomes. Software packages such as FPC, Oracle based tracking tools and web interfaces will be used and although training will be provided, some experience using tracking databases would be desirable. You will need to be educated to degree level or equivalent, be enthusiastic and well organised and have some laboratory experience ideally involving bacterial clone manipulation and restriction enzyme digestion.

To apply for this position please email your CV (including two referees) and current salary details, Quoting reference NS1141 to: recruit@sanger.ac.uk

Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge CB10 1SA

The closing date for applications is 16th June 2006

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
dstl
Dstl is part of the Ministry of Defence

Make a tangible contribution to world security

**Arms Control Advisor** - Detection Department
Up to £30,000 & benefits - Portion Down, Nr. Salisbury, Wilts

Dstl, the Defence Science and Technology Laboratory, is the centre of scientific excellence on defence and security-related issues. It's here that 3,500 of the country's most talented scientists and engineers ensure that UK government and Armed Forces are supported by world-class advice.

Within the Detection Department, the Non-Proliferation Team focuses on the prevention and control of the proliferation of chemical and biological weapons. As part of this team, you'll work with chemists and microbiologists to provide top-quality advice to government departments such as the MOD, Foreign Office and Dti, as well as to policymakers and implementers.

To contribute to this vital field of work, you'll need a strong scientific background that includes a degree in Chemistry, Chemical Engineering or similar, along with two to three years' relevant lab or industry-based experience. Experience in chemical and biological warfare defence, arms control (especially the Chemical Weapons Convention) or expert controls would naturally be useful, although full training is available.

As well as being a scientific expert, you should be a confident communicator and networker, who can explain scientific ideas to a non-scientific audience and build productive relationships at all levels. The ability to use information effectively and work to deadlines will also be key.

In addition to a stimulating and rewarding career, as a civil servant you'll enjoy a competitive benefits package. This includes a choice of pension schemes, generous holiday allowance, childcare vouchers, relocation assistance where appropriate, good sports and leisure facilities and flexible working hours.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

Dstl is committed to diversity and recruits on the basis of specified competencies and skills. This permanent post is only open to UK Nationals who are willing to satisfy Government / MOD security vetting procedures.

For an application pack, please contact, quoting reference 020920NS, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk
Tel: 020 7553 9120 (9.30am - 5.30pm). If you have a hearing impairment we are happy to accept Typetalk calls. Closing date: Friday 21st July 2006.

*aia is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

"Making world healthcare safer is my goal."

**Drug Safety Associate**

£Competitive + Benefits  
**Welwyn Garden City, Herts**

For high levels of personal responsibility and an international perspective, join Roche's dynamic Drug Safety team in Welwyn Garden City, Herts. Here you can take full ownership of your cases from start to finish by using your medical knowledge and therapeutic expertise to identify Suspected Unexpected Serious Adverse Reactions ("SUSARs"), evaluate adverse events, and provide the company's opinion of the case which will impact on safety issues at a global level.

Drug Safety is becoming a more high profile department within the pharma industry and you will be instrumental in making key decisions to prioritise or escalate cases and you will also liaise with physicians and colleagues worldwide as appropriate. Other wide-ranging responsibilities will include extracting information from adverse event reports, capturing data accurately onto our safety database in strict compliance with global and local SOPs, performing medical assessment on the reports, and ensuring regulatory timelines are met.

We are currently looking for entry level Drug Safety Associates (DSAs). As an entry level DSA, along with high levels of accuracy and attention to detail, you will be a life sciences graduate or possess a nursing, pharmacy or other medical qualification. You will need a good knowledge of medical terms, ideally gained through experience in the medical/pharma field.

In return, Roche offers the opportunity to develop your skills at a global level as well as all the rewards you would expect of a world class organisation.

With continued growth, Roche is looking for ambitious people to join its teams in a wide range of areas. If you have the vision and energy to be part of our future, register in the Roche Talent Pool now. Just visit [http://careers.roche.com/uk](http://careers.roche.com/uk)

We Innovate Healthcare and inspire your career in drug safety

Yesterday Discovering  
Today Achieving

Headquartered in Basel, Switzerland, Roche is one of the world's leading research-focused healthcare groups in the fields of pharmaceuticals and diagnostics. As a supplier of innovative products and services for the early detection, prevention, diagnostics and treatment of disease, the Group contributes on a broad range of fronts to improving people’s health and quality of life. Roche is a world leader in diagnostics, the leading supplier of medicines for cancer and transplantation and a market leader in virology.

APPLICATIONS RESEARCH SCIENTIST

We are looking for an enthusiastic, versatile and knowledgeable molecular modeller to join our Applications and Marketing Group. The successful candidate will carry out original research using the CCDC’s Life-science products, but will be equally at home in providing scientific guidance to our customers in the use of CCDC software, developing applications notes and teaching examples, giving talks and workshops at scientific meetings and contributing to product testing. Ideally, you will have a PhD in chemistry, chemoinformatics or bioinformatics, and will have industrial or academic postdoctoral experience as a molecular modeller in structure-guided drug design and protein-ligand clocking. The position requires a commitment to travel that will be significant but not onerous.

The CCDC is an independent organisation that compiles the Cambridge Structural Database and develops software applications in structural chemistry and molecular modelling. Our products are distributed worldwide to both academic and industrial users. We offer competitive salaries, final salary pension scheme and health insurance benefit, and good career prospects within a lively environment of 50 staff.

Applications should include full educational details, employment history a full publications list and the names of two referees. They should be addressed to Dr S A Salisbury. Business Director, CCDC. 12 Union Road, Cambridge CB2 1 EZ, from whom further particulars may be obtained. Applications should arrive no later than Wednesday 14 June 2006.

Commissioning Editor - Biomedical Publishing

We are seeking a Commissioning Editor to help manage and develop key titles in our rapidly expanding journal portfolio. This key role involves:

- Full responsibility for content acquisition
- Liaison with international opinion leaders
- Management of peer review
- Liaison with internal sales and marketing departments
- Strategic publication development

Applicants should be good team workers who can demonstrate proven organizational and computer literacy skills and who possess a good eye for detail. 1-2 years' experience in biomedical publishing would be advantageous. Salary is negotiable based on experience.

Editorial Trainee

Are you a motivated, enthusiastic graduate seeking to develop an editorial career in the biomedical information industry? Future Science Group is at the forefront of biomedical publishing, and we have exciting opportunities for life sciences graduates to join our expanding editorial team. The ideal candidates will be computer literate team workers who are well-organized, with a good eye for detail and an ability to work to tight deadlines.

The Diploma in Therapeutics is a part-time course aimed at General Practitioners and Pharmacists; Nurses and other Health Professionals wishing to improve their knowledge of therapeutics. The course comprises 12 study days and distance learning over the academic year September 2006 - June 2007. Candidates who complete the course and the final examination successfully within 3 years will be awarded the Diploma in Therapeutics by the University of Newcastle upon Tyne.

The course is designed to have a strong emphasis on the practical application of therapeutics and to yield tangible benefits to the candidate's own practice. The course covers topics of current interest including; drug selection in the main therapeutic areas, formularies, guidelines and protocols, shared care prescribing, disease management, alternatives to prescribing, the drug industry, audit of prescribing, critical reading, and prescribing research.

Sessions will include lectures, workshops, small group work, audit sessions and a small research project, as well as some distance learning packages.

The course is organised by the Regional Drug and Therapeutics Centre and the School of Clinical and Laboratory Sciences, University of Newcastle upon Tyne. Assistance with course fees may be available from individual health authorities; please contact your local Medical or Pharmaceutical Adviser.

Course fee: £1800 (estimated)
Course location: Medical School, University of Newcastle upon Tyne
Course days: Thursdays (all day) x 12
Course dates: September 2006 to June 2007
PGEA accreditation: received for 24 FULL DAYS spread over 2006-2007 (thereby satisfying PGEA requirements for two years 2006 and 2007). The accreditation comprises 8 days in each of the 3 PGEA categories: 1) Prevention of illness, 2) Disease management, 3) Service management.
CPP: Full accreditation

Course places are limited and early application is advised. Application forms and further information can be obtained from:

[2554-039 (2006) : 74]
Unipath is the world's leading women's healthcare diagnostic company. Unipath researches, develops and manufactures its products at a purpose built factory in Bedford, which employs over 500 people.

**Technical Production Manager**
Reporting to the Operations Director, the Technical Production Manager leads a team in support and troubleshooting of all products and processes throughout Technical Production and Assembly. They are the key contact for the introduction of the technical aspects of new products into operations. Specifically the role is to co-ordinate and monitor technical product and process performance such that volume and cost targets are achieved. The job holder will need to ensure that the team responds to manufacturing issues, instigating appropriate investigations to diagnose root cause and prevent future occurrence, changing and validating components, products and procedures within the regulatory framework.

The jobholder will communicate with staff at all levels across the business in particular significant contact with Management and Team leaders within Operations and R&D personnel involved in product development. Contact with external suppliers of critical components is likely in situations of production difficulties.

The successful candidate will be educated to at least degree level in a bio/chemical discipline with a minimum of five years experience in a medical diagnostics manufacturing or development environment. Capacity to apply troubleshooting skills across the bio-reagent and engineering aspects of a manufacturing business are essential. Good people skills, demonstrating ability and comfort in leading multi-disciplinary teams are required.

To apply, please call the recruitment line on 01234 835238 for an application form, post a full CV to, HR Department, Unipath, Priory Business Park, Bedford MK44 3UP, or e-mail it to: human.resources@unipath.com

Please state your current salary and salary expectations on your application. Applicants must be eligible to work in the UK.

Closing date: 19th June 2006
[www.unipath.co.uk](http://www.unipath.co.uk)
The MRC/UVRI Uganda Research Unit on AIDS was established in 1989, based on a bilateral agreement between the Governments of Uganda and the United Kingdom. The overall goal of the Unit is to contribute to an improvement of the health of the people in developing countries, particularly in Uganda and other parts of sub-Saharan Africa. The Unit conducts large-scale epidemiological and intervention studies, clinical trials, virological and immunological research and behavioural studies. The Administrative Section, the Research Laboratories and the Statistical Section of the Unit are based in Entebbe. Major studies are conducted at field stations and in urban centres at various sites within South Uganda. The Unit has an international reputation for excellence in HIV/AIDS related research. Renewed funding for research has recently been secured for the period 2006 - 11.

The Clinical and Epidemiological Research Programme comprises various observational and intervention cohort projects. It is staffed with four senior and six junior epidemiologists and a team of infectious disease physicians, and various field and support staff.

The Statistical Section is currently staffed with two senior and three junior statisticians, six data managers and about thirty data entry officers and other support staff.

The Basic Science Research Programme comprises virological and immunological projects and is currently staffed with two virologists, two immunologists, and about 10 technologists.

The Social Science Project conducts behavioural research. It has its own programme of work and performs investigations that help to understand and interpret the results of clinical and epidemiological studies. It is staffed with one senior social and three junior social scientists and a team of interviewers and field workers.

There is a well staffed and equipped Laboratory Service Section, a Community Development Project and an Administrative Section.

We are interested in receiving applications from suitably qualified candidates for the following positions:

**Senior Immunologist**

The holder of the position provides technical and scientific expertise within the immunology section of the Unit's Basic Science Programme. He/she will provide guidance and support to other scientific staff of the Programme and will conduct research, training and supervision of technical staff and will contribute to the management of the Basic Science Programme. The post holder will be expected to follow a defined programme of work, but to also develop his/her own research agenda within the Unit's disease focus.

The successful candidate will have a background in immunology or a related discipline with a PhD degree, and at least 4 years of post-doctoral experience in immunology, with a focus on HIV/AIDS. He/she will have substantial experience in flow-cytometry. Good interpersonal, organisational and communication skills are essential, as is excellent knowledge of written and spoken English. Previous working experience in Africa and managerial experience will be advantages. Exceptionally, candidates with an excellent research and publication record in immunological research who do not have a relevant PhD will be considered.

The salary for this post will depend on qualifications and experience and will be within the middle or upper range of Band 3 (the salary range for this band is between £34,588 and £42,331 per annum). For
displaced staff the package will also include generous overseas allowances, furnished accommodation, flights and other benefits. The post will be for initially 3 years extendable by mutual agreement.

**Molecular Virologist**
The holder of the position will provide technical and scientific expertise within the virology section of the Unit's Basic Science Programme. He/she will conduct research, train and supervise technical staff and will contribute to the management of the Basic Science Programme. The post holder will be expected to follow a defined programme of work, but to also develop his/her own research agenda within the Unit's disease focus.

The successful candidate will have a background in molecular virology or a related discipline with a PhD degree, and at least 1 year of post-doctoral experience in molecular virology, with a focus on HIV/AIDS. Technical experience in viral sequencing and experience in the analysis and interpretation of sequencing data is essential. Good interpersonal, organisational and communication skills are essential, as is excellent knowledge of written and spoken English. Exceptionally, candidates with an excellent and relevant research and publication record who do not have a PhD degree will be considered.

The salary for this post will depend on qualifications and experience and will be within Band 3 (the salary range for this band is between £34,588 and £42,331 per annum). For displaced staff the package will also include generous overseas allowances, furnished accommodation, flights and other benefits. The post will initially be for 2 years extendable by mutual agreement.

Application forms and further details are available electronically from Samantha.smith@headoffice.mrc.ac.uk Alternatively hard copies are available by leaving a message on 020 7637 6005 or by faxing Samantha Smith on 020 7637 0361. The closing date for applications is Wednesday 28th June 2006. Interviews will be held in London between 25th and 27th July 2006.

MRC
Human Nutrition Research

**Senior Analyst in ICP-MS**

The Micronutrient Status Research Section (MSRS), at the MRC Collaborative Centre for Human Nutrition Research, Cambridge, focuses on dietary minerals and vitamins and their role in public health.

We are looking to appoint a Senior Analyst with ICP-MS expertise, and potentially some ICP-OES/AAS experience, to undertake and oversee trace metal analysis within MSRS.

You will be educated to at least BSc level, and preferably PhD level, in a relevant scientific discipline with at least five years' experience in an appropriate analytical laboratory. Expertise in ICP-MS and knowledge of reaction cell technology is essential. Experience of project management is required, while a working knowledge of other trace metal analytical techniques is desirable. This is a hands-on position requiring the delivery of analytical results in a wide range of research projects while maintaining a well-run laboratory. There is also scope for original analytical research.

This is a permanent position with a starting salary in the range of £24,746 - £30,945 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward policy. We can offer 30 days annual leave in addition to statutory bank holidays, an optional MRC final salary pension scheme, a 36 hour working week, excellent working conditions and free on-site parking facilities.

For an informal visit and discussion about the post, please contact Dr Jonathan Powell (Head of MSRS) on 01223 437587. For further information and a full job description please visit: [www.mrc-hnr.cam.ac.uk](http://www.mrc-hnr.cam.ac.uk)

To apply, please quote reference HNR/506/6 and include a covering letter and full CV with the names and addresses of two professional referees who can be contacted prior to interview.

E-mail your application to [recruit@mrc-centre.cam.ac.uk](mailto:recruit@mrc-centre.cam.ac.uk) or alternatively, post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH.

Closing date: 22nd June 2006

Head, Institute for Environmental Research

The Australian Nuclear Science and Technology Organisation (ANSTO) is Australia's national nuclear R&D organisation and the centre of Australian nuclear expertise. The Institute for Environmental Research is one of four Research Institutes within ANSTO. The Institute applies nuclear tools, techniques and expertise to address Australia's environmental challenges particularly in water resource management and climate change.

THE ROLE

• Reporting to ANSTO’s Chief of Research, the Head of Institute leads scientific effort in generating and fostering innovation and research that adds value to the Institute’s ability to operate as a national facility and become a leader in international R&D.

• Responsible for the management process within the Institute including safety and regulatory compliance, staff performance management, project management and review, financial management and the development of the project portfolio and associated budget bid.

• Act as a full member of the research management team led by the Chief of Research and contribute to the broader management and development of ANSTO through the work of this group.

THE QUALIFICATIONS

• Outstanding record of research accomplishments in a relevant field and a reputation in the relevant external scientific and technological communities commensurate with the position of scientific leader of the Institute.

• Extensive experience in a senior leadership role, in a project driven research environment, and a demonstrated capacity for managing R&D teams.

• Deriving benefit from scientific and technological innovations and the establishment of productive linkages and collaborations with industry, the profession and government funded organisations.

**Technical Services Adviser**  
Based at Cheadle, Cheshire  
Salary circa £33,000

The successful candidate will be responsible for the preparation, collation and evaluation of efficacy data for submission to regulators. A further aspect of the role will involve working with the wider BASF innovation pipeline in the area of crop production.

Role requirements include the preparation of technical literature and product labels to support market introduction and sales, staffing our technical hotline, and the provision of support for our activities in the development of novel crop varieties. The position demands a high level of accuracy and analytical ability, an excellent command of English, and a comprehensive understanding of the technical issues in the market.

Applicants for this role will hold a degree in either Agriculture or Biological Sciences, the BASIS Certificate in Crop Protection or similar, coupled with several years experience in the industry and excellent interpersonal and organisational skills.

In return we offer an excellent remuneration package including 25 days' annual leave, contributory pension scheme, private healthcare, company car, employee share purchase scheme and relocation assistance where appropriate.

If you would like the opportunity to work in our highly successful team then please apply in writing with full CV to the HR Department (Agricultural Products), BASF plc, PO Box 4, Earl Road, Cheadle Hulme, Cheadle, Cheshire SK8 6QG or e-mail hr.plc@basf.com.

Closing date: 16 June 2006.

The Agricultural Products Division of BASF plc is responsible for the development and marketing of crop protection and biocidal products in the UK, Ireland, Nordic and Baltic Region on behalf of the parent company BASF AG, the world's leading chemical company.

Safeguarding public health

The Medicines and Healthcare products Regulatory Agency (MHRA) is the government agency which is responsible for ensuring that medicines and medical devices work, and are acceptably safe.

**MHRA**

**Regulatory Information Advisor** - Licensing Division
London • circa £20,000

In this role you will act as the first point of contact between the Agency and industry stakeholders, answering enquiries received by phone, letter and email from licence holders and their representatives across Europe. These will include enquiries on PLPIs, CTs, Herbals, Homeopathics, Notified Bodies, Consultations, New Licence Applications, Variations, Renewals, and Drug Master Files. You will assess and log all enquiries, and forward complex technical enquiries to the relevant assessment teams and coordinate replies to ensure industry receives a response within the agreed timeframe.

With a Life Science Degree, you will have at least two years experience of working in the pharmaceutical / medical sector, with a clear understanding of the regulation of medicines and the procedural requirements combined with customer service skills and experience. You will have excellent communication skills, verbal and written, including the ability to communicate scientific information and the confidence and ability to work in a pressurised, target driven environment, whilst maintaining high standards of quality.

The full salary range for this role is £19,208 - £23,740.

Please note that all positions in the Agency require a minimum standard of IT literacy, including skills in MS Word and Outlook.

If this challenge inspires you, you can download further information and apply on-line via our website - [www.mhra.gov.uk](http://www.mhra.gov.uk). Similarly, you can download our application at this address and send your completed form via email to [jobs@mhra.gsi.gov.uk](mailto:jobs@mhra.gsi.gov.uk) or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: Friday 16 June 2006.

Research Assistant positions
Starting salary range £18,142 to £20,538 p.a. (full-time equivalent)

Babraham Institute

The Babraham Institute is a charity which is world renowned for its research in life sciences that leads to new medicines and treatments for human diseases.

Research Assistant (Ref. EB/ST)
To join a team studying the roles of axon pathology in Alzheimer's disease and mechanisms of axon degeneration. The projects involve the use of molecular biology, mouse genetics, and modern imaging methods, and build on our identification of a neuroprotective gene that delays axon degeneration (see *Nat. Rev. Neurosci.* 6: 889-98 (2005)). The successful applicant would contribute to several projects within the group and to general laboratory organisation and management. Applicants must have a first degree in a biological discipline as well as good computer and organisational skills and experience in molecular biology, mouse genetics or immunohistochemistry. Funding for this position is available for up to one year and the position would suit part-time working (minimum of 26 hours per week) if appropriate. Please address informal enquiries to michael.coleman@bbsrc.ac.uk

Part-time Research Assistant (Ref. LMB/RA/ST)
To join a group studying the development of B lymphocytes with emphasis on the role of the precursor B and B cell receptors (*EMBO J.* 24: 3895-3905, 1. *Exp. Med.* 199: 1523-1532, *Seminars in Immunol.* 14: 335-342). Applicants must have a BSc, or equivalent, in biology or related discipline. The Research Assistant will mainly be involved in general genotyping, management of the mouse colony and laboratory organisation. Part-time hours (approximately 7.5 per week) would preferably be two half days per week, although there is some flexibility in the hours worked. Informal enquiries are welcome to Dr Lill Martensson (Tel. 44-(0)1223 496469, or e-mail lill.martensson@bbsrc.ac.uk). Funding for this post is available until January 2008.

Further information about the Institute can be found on our website. Application forms and further details are available electronically from our website (www.babraham.ac.uk), or by contacting our 24-hour Recruitment Line on 01223 496365, or e-mail: babraham.personnel@bbsrc.ac.uk. On applying please quote the appropriate reference. Closing date for completed applications is 29 June 2006.

The Babraham Institute is supported by the Biotechnology and Biological Sciences Research Council

Physical Chemist (Ref: 45/05)
We are seeking a physical chemist at the post doctoral level to work on the pathways and kinetics of transport and disassembly of digested colloidal food structures across the mucin-layer and uptake by mucosa (http://www.ifr.ac.uk/science/programme/F1). The work will involve the application of a range of colloidal and interfacial techniques in conjunction with a physicochemical approach to study the behaviour of colloidal structures in the gastrointestinal environment.

Starting salary will be in the range of £23,022 - £26,541 per annum depending on qualifications and experience, plus a final salary pension scheme. This post is initially funded for two years,

NovelQ Biochemist (Ref: 16/06)
A chemist or biochemist with degree level qualifications and three years relevant experience is sought to work on the purification and physicochemical analysis of food allergens. A reasonable level of practical problem solving ability will also be expected. The successful applicant will also look at the affect of novel processing techniques on specific allergenic plant proteins.

Starting salary will be in the range of £18,142 - £20,538 per annum depending on qualifications and experience, plus a final salary pension scheme. This is a limited term post of 34.8 months.

For further details on either post and an application form please mail or telephone the Human Resources office ifr.humanresources@bbsrc.ac.uk; +44 (0)1603 255348, quoting the post reference number,

Closing Date for both posts: 15th June 2006

INVESTOR IN PEOPLE
[2554-057 (2006) : 81]
Australia Government
Geoscience Australia

Geoscience Australia's Risk Research Group develops computational methods, models and decision support tools that investigate natural hazards and assess the risk they pose to Australian communities and infrastructure. We are seeking outstanding applicants for an ongoing role in our severe-wind risk activity.

**Modeller - Computational Scientist**

The successful candidate will contribute to the assessment of severe-wind hazard and risk in Australia. In particular, she/he will build on existing research to lead the development of computational models of cyclonic winds that accurately reflect the spatial occurrence and magnitude of historical tropical cyclones and their impact on communities. Subsequent enhancement will seek to incorporate the likely influence of climate change. The candidate will liaise with a broad stakeholder group to promote national support for natural hazard assessment.

A degree or equivalent qualification in physics, maths or computer science plus several years' relevant experience are required. Numerical modelling, software development and data analysis experience is highly desirable. Experience in a hazard or risk assessment activity would be an advantage. This position attracts a salary in the range A$71,205 - A$80,096 per annum plus superannuation, however, exceptional candidates may be remunerated at a higher level.

Technical enquiries should be directed to Bob Cechet on +61 (0)2 6249 9246 or bob.cechet@ga.gov.au. A detailed role profile, selection criteria and information about Geoscience Australia's recruitment processes can be obtained from www.ga.gov.au/jobs or by phoning +61 (0)2 6249 9562. Applicants should address the selection criteria and quote the position reference number (Ref 16842).

Geoscience Australia prefers electronic applications. Please email your application to recruitment@ga.gov.au or, if necessary, mail it to The Recruitment Officer, Geoscience Australia, GPO Box 378, Canberra ACT 2601, Australia.

Applications close 23 June 2006.

www.ga.gov.au
LUBRIZOL

Enhance your performance with a winning team

Lubrizol Ltd. is an innovative specialty chemical company that produces and supplies technologies that improve the quality and performance of our customers’ products in the global transportation, industrial and consumer markets. These technologies include lubricant additives for engine oils, other transportation-related fluids and industrial lubricants, as well as fuel additives for gasoline and diesel fuel. Due to our continued growth, we are looking to recruit for the following positions:

**Research Chemist - Applied Sciences**
c. £25,000 pa plus excellent benefits
You would be working within an innovative physical chemistry research environment, supporting business units in applying physical chemistry principles to developing test methods to research and evaluate lubricants and lubricant additive performance. You should have, or be working towards, a PhD in Chemistry or related discipline, or equivalent.

A knowledge of formulation science or tribology is desirable. You will have experience of working using your own initiative and developing and applying non-standardised testing within the workplace. The role will include generating, organising and interpreting data in support of technical projects and reporting out as appropriate. You will be expected to interact regularly with other research and marketing departments throughout our organisation, in particular our Applied Sciences group in Wickliffe, Ohio.

**Research Chemist - Chemical Synthesis**
c. £25,000 pa plus excellent benefits
You will be part of a diverse and innovative group of scientists generating new ideas and applications that impact our business worldwide. You will use your creativity and problem solving skills to work on the synthesis and process development of a wide variety of specialty chemicals used as engine oil additives. You will remain intimately involved in the progress of the chemistries you deal with throughout their physical and performance testing, pilot and full-scale production and ultimate commercialisation. You will be expected to interact daily with other divisions throughout our organisation including: our commercial, analytical and performance testing departments in Hazelwood and Wickliffe, Ohio; pilot-plant and production facilities throughout the world. You should have a degree in Chemistry (2.1 or above), or equivalent, and at least three years’ laboratory experience of organic synthesis, or a PhD in Organic Synthesis.

**Customer Programme Manager**
c. £35,000 pa plus excellent benefits
Working within our Fuels team, you will be responsible for providing technical support to Lubrizol clients in a cost effective manner. To succeed in this role, in addition to your technical problem-solving abilities it is essential that you have a proven track record in building and developing long-term relationships with customers and internal stakeholders. Experience of managing several projects simultaneously is also essential as is an ability to understand the commercial aspects of our business. Qualified to BSc level, or equivalent, in a chemistry related discipline, you will also have a minimum of five years’ experience in a chemistry, engineering or customer facing role. This role requires planned but regular travel within the UK and Europe.

In addition to our excellent remuneration package which includes: final salary pension and non-contributory pension scheme, private health insurance, subsidised restaurant, free car parking and a range of other benefits, we also have a fantastic working environment based on the edge of the Peak District.

Interested? To apply, please forward your CV, as an attached word document, to jdlubrizol3@uib.srg.co.uk or call Jennie Dempsey on 0161 868 2200 for a confidential discussion and for further details about these opportunities.
Closing date: Friday 16 June 2006.

No agencies please.

[2554-059 (2006) : 81]
Research Assistant – Cell Electrophysiology

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems.

The Genes to Cognition Programme (G2C) is a joint scientific research programme at Edinburgh University and the Sanger Institute, which aims to establish a framework for studying genes, brain and behaviour in order to link basic molecular research with human clinical studies of cognition. For more information on the programme visit: [www.genes2cognition.org](http://www.genes2cognition.org)

You will prepare and maintain primary culture neurons, principally for multi-electrode array (MEA) recordings, and also assist in the setup and running of MEA experiments. You will be responsible for preparation of solutions and equipment required for neuron cultivation, and ensure smooth operation of culture and electrophysiology facilities. You will assist in MEA data and image handling and analysis.

The successful candidate will have a degree or HNC/D in Science, up to three years' relevant laboratory benchwork experience, will be competent in a laboratory environment and able to work without extensive supervision. An ability to work as part of a team, good attention to detail and good communication skills are required for this position. Experience in a relevant scientific discipline or 3rd year practical project/sandwich year and holding of a personal Home Office licence is desirable.

This contract is fixed term until 31st December 2007. Benefits include 25 days annual leave, final salary pension scheme, optional private healthcare (on successful completion of a qualifying period), permanent disability insurance, life assurance, childcare voucher scheme, campus bus services from Cambridge and Saffron Walden, car-share scheme, on-site restaurant, cafe, gym and an active sports and social scene.

To apply for this position please email your CV (including two referees) and current salary details, Quoting reference NS1150 to: recruit@sanger.ac.uk

Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge CB10 1SA

The closing date for applications is 16th June 2006 [www.sanger.ac.uk](http://www.sanger.ac.uk)

International

International Paint is part of the Akzo Nobel coatings group, one of the world’s largest paint companies with annual sales of €5,500 million and 30,000 people operating from 60 countries.

Akzo Nobel, based in the Netherlands, serves customers throughout the world with healthcare products, coatings and chemicals. The company has activities in more than 80 countries, employs 61,000 people and has annual sales of €13.0 billion.

AKZO NOBEL

NMR Specialist
International Paint Ltd, a business unit of the Akzo Nobel group, is a global provider of high performance products for the marine, yacht and protective coatings markets. As a world leader we operate in a highly competitive market environment that demands continuous product innovation. That means R&D is at the forefront, providing a vital, worldwide contribution to the on-going success of the company.

A vacancy exists for a specialist analyst in NMR (nuclear magnetic resonance) spectroscopy to join the Analytical department based in Felling, Tyne & Wear.

Key responsibilities will include;
• Provide a high quality NMR service to customers throughout the business units and to other members of the Analytical team
• Operation and maintenance of the NMR instrument
• Interpretation of results and method development
• Supervision and training in the use and applications of NMR spectroscopy

Candidates should have extensive practical experience (3-5 years) of NMR spectroscopy, together with a high level of theoretical knowledge. Knowledge of other analytical techniques would be useful. The ability to work accurately and to high standards is critical. A passion for solving problems is highly desirable. Experience of coatings or polymers would be an advantage, but is not essential.

We aim to attract individuals who demonstrate enthusiasm, flexibility, initiative and the ability to apply skills and knowledge to practical problems, whilst also being able to offer new ideas to the group. In addition, the successful candidate is likely to be a strong team player with good communication skills.

To apply please send your CV and a cover letter to The Personnel Department, International Paint Ltd, Stoneygate Lane, Felling, Gateshead NE10 0JY or email recruitment@internationalpaint.com

Please quote job reference 28/06.

Applications are invited to join an Internationally recognised research group to investigate the effects of a novel peptide on the demineralisation of dental hard tissues. The group is part of a unit of assessment awarded a Grade 5 in the last Research Assessment Exercise.

The Biophysics Group consists of an interdisciplinary team of physicists, chemists, engineers and dentists. There are currently 6 PhD students and 2 postdoctoral scientists. Links are also established with Departments of Biomaterials, Materials, Chemistry and Physics within the University and overseas, as well as with several leading commercial companies.

The X-ray laboratories are on the main campus of Queen Mary, University of London at Mile End, located about a mile east of the City of London. The aim of this proof of concept study is to demonstrate that a novel compound developed at QMUL significantly reduces decay of dental hard tissues. These in vitro studies will be carried out using scanning microradiography, a modern highly quantitative X-ray absorptiometry method. This study will provide essential pre-clinical base-line data necessary in order to take the product into a pilot clinical study, and its eventual commercialisation.

The successful postholder should possess a PhD or an equivalent qualification in any area of chemistry, materials, biological science, engineering or dentistry. The appointment is available immediately on a fixed-term contract for 1 year. You must be able to demonstrate your eligibility to work in the UK in accordance with the Asylum and Immigration Act 1999.

Informal enquiries can be made to Dr Paul Anderson - telephone: +44 (0)20 7882 7933, email: p.anderson@qmul.ac.uk For further details about the Biophysics Research Group please see: http://www.smd.qmul.ac.uk/dental/oralgrowdev/biophysics/

For an application form and full particulars, please contact our 24-hour recruitment line on 020 7882 7228 or email: wch-recruit@qmul.ac.uk quoting reference number 06167/FS, or alternatively, please visit the Human Resources website on: http://www.hr.qmul.ac.uk/vacancies/

Your application together with your curriculum vitae should be returned by 17.00 on 12th July 2006 and should be addressed to: Whitechapel Recruitment, Barts and The London, Queen Mary's School of Medicine and Dentistry c/o SMD Management Offices, The Lodge House, Charterhouse Square London EC1M 6BQ.

Promoting excellence in teaching and research
Working towards equal opportunities

UNIVERSITY OF BATH
Department of Pharmacy & Pharmacology

**Biology Support Technician**
(Ref 06/178) This is an opportunity to join a team providing technical support across a broad range of biologically orientated subjects in the Department, working with academic and research staff, postgraduate and undergraduate students to support, lead and develop techniques and equipment. The department is 5* RAE-rated, with an expanding and varied portfolio, providing a stimulating environment for its five distinctive areas of research.

The ideal candidate will have experience in technical support within a biological environment and experience in the use or support of techniques within some of the following areas: molecular biology, tissue culture, pharmacology, microbiology or physiology. Effective time-management skills and a flexible approach to work are desirable.

The starting salary is in the range of £14,372 to £19,622 per annum.

**Instrumentation Technician**
(Ref: 06/177) The instrumentation support post is a key position within the Department's activities. You will provide cover for the maintenance, operation and demonstration of various analytical instruments (LC, HPLC, fraction collectors, GC, LCMS, MS etc) used in the delivery of our teaching and research activities. The successful candidate will also provide more general support to the Medicinal Chemistry group and Department. You will be working with academic and research staff, and postgraduate students to lead and develop first-line instrumentation support. The department is 5* RAE-rated, with an expanding and varied portfolio, providing a stimulating environment for its five distinctive areas of research.

The ideal candidate will have experience in technical support within a biology or chemistry environment, and experience in the use or support of some of the following techniques or equipment: Mass Spectrometry, HPLC, LC and other analytical instrumentation. An interest or knowledge in spectroscopic techniques and in the application of synthetic chemistry to biology would be an advantage. Candidates with a Chemistry background, preferably at degree level are encouraged to apply. Effective time-management skills and a flexible approach to work are desirable.

The starting salary is in the range of £14,372 to £19,622 per annum.

Informal enquiries can be made to Mr Malcolm Holley (email: M.Holley@bath.ac.uk).

The closing date for both positions is 16 June 2006.

To apply, please request an application form from the Human Resources Department, University of Bath, Claverton Down, Bath BA2 7AY (email: jobs@bath.ac.uk). Alternatively, please telephone the 24 hour answerphone service on 01225 386924, textphone 01225 386039, or apply online at [www.bath.ac.uk/jobs](http://www.bath.ac.uk/jobs) quoting the reference number.

An Equal Opportunities Employer

KVL - A UNIVERSITY OF LIFE SCIENCES

PROFESSOR
of "Process Analytical Technology" with emphasis on development of multiway chemometric data models

KVL, Department of Food Science wishes to appoint a professor of Process Analytical Technology from 1 January 2007 or as soon as possible thereafter.

The professor's duties will comprise research and teaching in multiway chemometrics and process analytical technology.

The appointee should have qualifications within the following areas:
• Research qualifications within Advanced Chemometrics, Multiway Analysis, Experimental Design, Process Analytical Technology and Visualization of Data and Algorithms
• Leadership and management of research in the field of advanced chemometrics, with special reference to multiway chemometrics and process analytical technology
• Teaching in the field of advanced chemometrics with special emphasis on multiway chemometrics and process analytical technology

Employment and remuneration will be according to the Agreement between the Danish Ministry of Finance and the Danish Confederation of Professional Associations.

In order to apply for the post you must obtain the complete job advertisement. The advertisement is available at [http://www.kvl.dk/jobs](http://www.kvl.dk/jobs)

The deadline for applications is 3 July 2006 at 12.00 noon.

KVL carries out technically advanced research and education within the veterinary agricultural and human nutrition areas - as well as related fields of natural science. The university has 3,500 students (incl. approx 400 PhD students), 1,700 man years and an annual turnover of DKK 1.2 billion.

In accordance with KVL’s equal opportunities policy, we invite applications from all interested individuals regardless of gender, age, ethnicity or religion.

For more information on KVL see uk.kvl.dk

[2554-069 (2006) : 85]
This exciting new post will play a leading role in the GIS group of the Department of Epidemiology and Public Health and contribute to the EU-funded INTARESE project. INTARESE is a flagship project funded under the sixth Framework Programme, in support of the European Environment and Health Strategy. You will work in close collaboration with Professor David Briggs, the leader of the GIS group and co-ordinator of the INTARESE project, to help advance and lead the work of the GIS group. You will contribute to scientific studies, including projects carried out within the Small Area Health Statistics Unit (SAHSU) and develop an independent research profile in a relevant area of spatial epidemiology.

You will have a relevant PhD and substantial experience of using GIS to analyse large, environment-related databases, preferably in a European context. You will also have a strong inter-disciplinary approach, with the ability to work with others across disciplinary boundaries. Experience of project planning and supervision is essential.

The post is full-time, available for five years and is based at the St Mary's Campus, Paddington.

To obtain an application form and further details go to: www.imperial.ac.uk/employment Alternatively write to the Recruitment Assistant, HR, Faculty of Medicine, Imperial College London, St Mary's Campus, Medical School Building, London W2 1PG, quoting reference: MJ057/06.

Closing date: 15 June 2006.
Interview date: 22 June 2006.

University of Leicester
UT VITAM HABEANT
[2554-071 (2006) : 85]
School of Informatics
Opportunities in Polymer Electronics

**RCUK Academic Fellowship in Organic Nanoelectronics**
The School of Informatics has been awarded a prestigious Research Councils UK Fellowship which is intended to provide a strong career path for outstanding researchers seeking to establish an independent career path in academia. The Fellowship is tenable for 5 years and is directed towards expanding the School’s research in polymer electronics with a specific remit to develop the field of Organic Nanoelectronics. The successful candidate will initially concentrate on building a strong, independent research profile followed by a gradual introduction to teaching and transition to a permanent post subject to successful completion of probation. The successful candidate will already have a promising research profile in either the theoretical or practical aspects of organic nanoelectronic materials and systems.

**Postdoctoral Research Officer in Polymer Electronics**
A highly motivated postdoctoral research officer is sought to work on an EPSRC-funded grant in the field of Polymer Electronics. Specifically the work will be concerned with identifying factors that give rise to threshold voltage instabilities in polymer MIS transistors. The successful candidate will be trained to PhD level in a relevant topic and, ideally, will have experience in one or more of the following areas: device fabrication and characterisation, device physics, surface analysis, microfabrication and clean room practices. The post is for 12 months in the first instance.

For more details of the facilities available to the Polymer Electronics Research Group visit our website at: [http://www.ibmm.informatics.bangor.ac.uk](http://www.ibmm.informatics.bangor.ac.uk)

New Scientist Jobs
www.newscientistjobs.com
A position is available for 3 years within the CR-UK Viral Oncology Group, Wolfson Institute for Biomedical Research, to work on a translational study related to lung cancer.

The candidate must have a PhD and experience in molecular biology and/or genetics. Previous work with tissue collections, RNA and DNA amplification from small paraffin-embedded tumour biopsies, as well as gene expression microarrays, could be an advantage. The candidate will be expected to interact with physicians treating lung cancer, organise the lung cancer tissue bank and database, and plan and conduct genetics studies relevant to clinical trials. Opportunities will be available to attend international meetings and courses relevant to Pharmacogenetics and Genomics.

Salary scale: Grade 7, Pt 29 (£27,286 incl. of London Weighting).

More information on the Wolfson Institute for Biomedical Research can be obtained from www.ucl.ac.uk/wibr, and on the CR-UK Viral Oncology Group from http://www.ucl.ac.uk/WIBR/research/cancer/cb/index.htm

Please send 3 copies of your Application Form (available from: http://www.ucl.ac.uk/hr/docs/download_forms/job_app.doc), with the names of 3 referees to: Mandy Verdon, The Wolfson - Institute for Biomedical Research, University College London, The Cruciform Building, Gower Street, London WC1E 6BT.

Please note CV's sent without a UCL Application Form cannot be processed. You may send your CV in addition to your application form.

Position will start from 1st August 2006.

Closing date: 16th June 2006.

LONDON SOUTH BANK UNIVERSITY
FACULTY OF ENGINEERING, SCIENCE & THE BUILT ENVIRONMENT

LECTURER/SENIOR LECTURER £27,164 - £40,333 PA
CHEMICAL OR PETROLEUM ENGINEERING

We seek a talented individual to join our well-focused and successful team to contribute to classroom and laboratory teaching, and also course management of our newly launched BEng Petroleum Engineering or our established BEng and HND Chemical Engineering.

You will have a good degree in chemical/petroleum engineering or a related subject and demonstrable academic or professional expertise in a relevant aspect of those disciplines. Ideally you will have an area of research or the potential to develop one. Petroleum extraction or process safety are fields of particular interest to us.

For an informal discussion please contact Richard Cadbury on 020 7815 7925 or cadburrg@lsbu.ac.uk

For further details and an application form please visit www.lsbu.ac.uk/humanres or send a stamped addressed envelope to the Human Resources Department, London South Bank University, 103 Borough Road, London SE1 0AA, telephone: 020 7815 6223 (24 hour answering service). Please quote the reference: AS56. Closing date for the receipt of applications: 21 June 2006. Interview date: 4 July 2006.

An Equal Opportunities Employer.
The University of Reading  
School of Psychology  

**Postgraduate Researcher** - Ref. R0646  
Grade 1 B - Starting Salary £20,044 p.a., pro-rata  
Part-time (0.5 FTE), 3 Years Fixed-term

A part-time Postgraduate Research position is now available to work on an EPSRC funded project on the "Effects of reverberation on conversation in rooms". Some familiarity with Hearing Science, Digital Auditory Signal Processing, or Acoustic Measurement would be an advantage. It is hoped that the appointee will register for a part-time research degree on a topic related to the project's work, and pursue this in their other time.

The job requires the ability to run and analyse data from practical schemes of acoustic measurement that involve digital processing of auditory signals. Applicants should possess an Honours degree in a subject that involves laboratory research training at undergraduate level.

For informal enquiries please email Dr A. J. Watkins, email: **syswatkn@rgd.ac.uk**  
Applicants are requested to email electronic (pdf) copies of their application form and CV to Dr Watkins email: **syswatkn@rdg.ac.uk**

Application forms and further particulars are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH. Telephone (0118) 378 6771 (voicemail).  
Application forms are also available in Word/RTF format from [www.reading.ac.uk/Jobs](http://www.reading.ac.uk/Jobs)  
Closing date for applications: 31 July 2006. Interviews will be held on 29 August 2006. Please quote reference number.  
[2554-077 (2006) : 87]
Academic Fellowship in Astronomy
Salary: c£27,000 pa

A 5-year Academic Fellowship in astronomy has been awarded to the University by Research Councils UK. This post guarantees a permanent position at the end of the Fellowship.

You will ideally enhance our existing research programmes, details of which, together with links to the School of Physics, Astronomy and Mathematics, can be found at: http://perseus.herts.ac.uk/uhinfo/research/stri/

Informal enquiries to Professor James Hough, Director of Astronomy Research, Centre for Astrophysics Research (telephone: +44 (0)1707 284500, fax: +44 (0) 1707 284514; e-mail: jhh(@starherts.ac.uk).

Application forms should be accompanied by a full CV and details of research and research plans.

Closing date: 30 June 2006. Quote reference: EN6245NS

The University offers a range of benefits including a final salary pension scheme, professional development, family friendly policies, discounted memberships at the Hertfordshire Sports Village and generous annual leave.

Application packs are available from Personnel on 01707 284802 (24hr voicemail), or from our website at http://recruitment.herts.ac.uk/recruit quoting the appropriate reference number.

[2554-081 (2006) : 88]
Imperial College London  
Department of Electrical and Electronic Engineering

Research Associate in Microengineered Power Sources for Wireless Sensor Networks  
Salary: £22,870 - £33,330  
Fixed-term Appointment for 24 months

This post involves designing, fabricating and testing micro-engineered (MEMS) devices which generate electrical power using ambient sources such as body motion, in order to make self-powered nodes for body sensor networks (BSN). Imperial has been a pioneer in this field, and the project is part of a major BSN collaboration involving a large multi-disciplinary team.

Integration of the power sources in complete sensor nodes will be part of the work, in collaboration with project partners.

The applicant should have a PhD in Electronic Engineering, Physics or a related discipline, and a proven background in device fabrication and the development of processes for micro-fabrication. Experience in basic circuit design and construction would be beneficial.

To apply, please complete an application form, which can be downloaded from:  
http://www.imperial.ac.uk/employment/academicform.htm

Send this form, together with a CV relevant publications, the names of two referees and a covering letter explaining your current interests and relevant background for this project to: Ms Caroline Grange, Department of Electrical and Electronic Engineering, Imperial College London. South Kensington Campus SW7 2AZ, UK.

We encourage application by email, to c.grange@imperial.ac.uk

Closing date for applications: 30th June 2006

Valuing diversity and committed to equality of opportunity  
LECTURESHIP IN EQUINE AND ANIMAL SCIENCES
INSTITUTE OF RURAL SCIENCES
£24,352 - £36,959

As part of an established team at the forefront of Equine and Animal Sciences teaching and research, you will contribute to teaching Equine and Animal Sciences. You will also help further develop the Institute's research profile in relation to the physiological, microbiological, biochemical, nutritional or immunological study of Animal Health and Welfare. Well-motivated and forward-thinking, you should have an established research record, preferably with a higher degree, a desire to further develop your research activities and enthusiasm for contemporary approaches to learning and teaching.

The post will be tenable from September 2006 at the latest. Informal enquiries may be made to Professor Jamie Newbold on 01970 622242 or email cjn@aber.ac.uk.

[2554-087 (2006) : 89]
PhD Studentship
Integrative Systems Biology from Molecules to Life

Systems Biology discovers how living organisms function in health and fail in disease through interactions of their components. With its brand-new Manchester Interdisciplinary BioCentre, the Manchester Centre of Integrative Systems Biology (www.mcisb.org), and the AstraZeneca Chair of Systems Biology, The University of Manchester is becoming a world-wide lead in Systems Biology. The University of Manchester also has one of the few EPSRC / BBSRC funded doctoral training centres for Systems Biology. Students with a physical science / engineering / mathematics background will team up with students from biological and medical backgrounds to engage in training and exciting research in top notch Systems Biology.

Up to 10 fellowships are available for students with a physical science / engineering / mathematics background for 4-year PhD studentships in the Manchester Interdisciplinary BioCentre's Centre for Integrative Systems Biology.

Closing date: 15 June 2006.

New directions in surface mass spectrometry by ToF-SIMS - The development of a powerful new instrument combining ToF-SIMS and infra-red spectroscopy (ATR-IR)
Substantial EPSRC funding will be used to advance the capability of Time-of-Flight Secondary Ion Mass Spectrometry for biological system analysis. Our exciting advances using bucky-ball (C_{60}) and metal cluster beams to enhance analytical efficiency will be exploited. There are two themes. First, to understand how these beams remove molecules from surfaces, so their use can be tailored to the samples to be analysed. Second, in an adventurous instrumental development with a UK company-Ionoptika Ltd, ToF-SIMS will be combined with ATR-IR spectroscopy, enabling the surface and sub-surface chemistry of complex biological, organic and inorganic materials to be studied at the same time. The PhD research student will collaborate with a postdoctoral RA to develop the new instrument and then to prove it in two studies concerned with the environmental chemistry of particulates and the biochemistry of cancer cells.

Closing date: 30 June 2006.

Further details on the above projects, including information on the supervisor, stipend, eligibility criteria and start dates, can be found at: www.ceas.manchester.ac.uk/studyhere/postgraduateresearch/fundedstudentships/ or by contacting Stephanie Gilson at: Stephanie.Gilson@manchester.ac.uk telephone 0161 306 4360.

The University of Reading  
**BBSRC CASE PhD Studentship**  
School of Food Biosciences  
Flavour Chemistry  

This studentship is an Industrial CASE award in conjunction with WCPN, a Division of Mars Inc. The research will investigate chemical mechanisms and kinetics of flavour formation in meat and meat-like model systems during thermal processing. The aim is to determine how flavour precursors interact with each other and with the food matrix. Techniques used will include chromatography, mass spectrometry and related analytical methods.

Applications are invited from graduates or final year students in the UK who have or expect to gain a First or Upper Second Class Honours degree in Chemistry, Biochemistry, Food Science or a related subject. Funding is for 3 years at BBSRC studentship rates, plus a top-up from the industrial sponsor, providing a minimum tax-free stipend of £15,500 per annum. The BBSRC eligibility criteria limit the studentship to UK residents (or EU nationals who have studied in the UK for the past 3 years).

Informal enquiries to Professor Don Mottram (d.s.mottram@reading.ac.uk). Applicants should send a CV and names of two academic referees to Yvonne Harewood (y.harewood@reading.ac.uk), School of Food Biosciences, The University of Reading, PO Box 226, Whiteknights, Reading RG6 6AP.

MSc/MRes in Bioinformatics
MSc in Medical Informatics
One-year full-time programmes for science and numerate non-science graduates. Students will have access to a dedicated Bioinformatics computer suite and e-learning support with online and CD-Rom materials.

MSc/MRes in Bioinformatics
This popular MSc programme started in 1999 and was one of the first Bioinformatics MSc programmes in the country. The programme has been recognised and supported by both the EPSRC and BBSRC, and includes industry-based practical placements with companies such as GSK, decode and Organon. A substantial research project in a chosen area of study is undertaken during the last six months of the programme.

MSc Medical Informatics
Biomedical informatics is becoming increasingly important to medical researchers and pharmaceutical companies. This new programme is a variant of our successful Bioinformatics degree and addresses the applications of bioinformatics techniques to biomedicine. Two of the modules and a student research project are undertaken in collaboration with the Peninsula Medical School and the Biocatalysis Centre.

A limited number of EPSRC funded bursaries are available.

PhD Studentship Opportunities
Environmental Engineering Research Centre

A number of exciting research opportunities are available at the Queen’s University that will take advantage of new research investment. The EERC include state-of-the-art facilities in: Environmental Tracers, Environmental Geotechnics, Environmental Forensics, Hydrogeology, Shallow Geophysics and Isotope Biogeochemistry and Mass Spectrometry.

Applications are currently being accepted for the following RCUK PhD research opportunities:

1. Stable Isotope Profiling of Physical Evidence (Royal Society of Chemistry – EPSRC funded studentship).
2. Nano-iron for remediation in deep groundwater (EPSRC CASE funded).
3. Landfill and Waste Management (EPSRC CASE funded)
4. Ex-Situ Bioremediation (EPSRC CASE funded)
5. Environmental Geotechnical Solutions (EPSRC CASE funded)

Applications are currently being accepted for the following PhD research opportunities:

1. Regional water resource management in India.
2. Field tracing of groundwater with ‘intelligent’ tracers.
3. Microbial tracers in groundwater.
4. Hazardous waste biogeochemistry
5. Inverse modelling of regional scale systems for the EU Water Framework Directive
6. Biogeochemical and isotopic evidence for Environmental Forensics.
7. Biochemistry and bioremediation of TBT.

Applicants must have, or expect to obtain a 2.1 honours degree (or its equivalent). Applications are accepted for UK, EU and international students, though restrictions may apply to one or more of the projects.

For more information and application forms contact: Mrs Angela Brady, EERC, David Keir Building, Stranmillis Road, Belfast BT9 5AG (Fax: +44 2890663754) or email a.brady@qub.ac.uk

Valuing diversity and committed to equality of opportunity
If someone says environment, what springs to mind?

Do you see a tree? At Veolia we see an industrial challenge. Today it is essential that we combine both the services that people require and the protection the environment needs. Each and every year, Veolia Environnement purifies and supplies water to 108 million people across the world, finds innovative answers for treating 57 million tonnes of waste, provides energy solutions that avoid the emission of over 5 million tonnes of CO$_2$, and offers transportation services to over 2.5 billion people.

Tyler Prize

The late John and Alice Tyler established the Tyler Prize in 1973 as an international award honoring achievements in environmental science, policy, energy and health of worldwide importance conferring great benefit on humanity. The Tyler Prize consists of a cash award of $200,000 and a gold Tyler Prize medallion.

The Tyler Prize Executive Committee announces the awarding of the 2006 Tyler Prize for Environmental Achievement on its thirty-third anniversary to Dr. David W. Schindler, and Prof. Dr. Igor A. Shiklomanov. Drs. Schindler and Shiklomanov have each made fundamental contributions to understanding and protecting aquatic resources through research, education and the influence of their work on national and global environmental policy.

David W. Schindler is recognized for his discoveries, made through interdisciplinary experimental research and ecological hypothesis testing, that contribute to understanding how anthropogenic stressors affect the health of freshwater ecosystems. Insights from his work have provided guidance for mitigation of these adverse affects. He has been a leader in documenting the impacts of global climate change on aquatic ecosystems and their resources.

Igor A. Shiklomanov is recognized worldwide as an international authority in the field of hydrology and water resources and for the development of methods for the assessment and forecasting of human impacts on river runoff, the dynamics of water use and water availability and the linkages between humanity and the world’s freshwater resources. His work has affected the way in which we think about water usage worldwide, and the way in which international water projects are designed.

Recent Laureates
2000 John Holdren, for Energy and Environmental Security Policy
2001 Jared Diamond and Thomas Lovejoy, for Conservation Biology
2002 Wallace Broecker, for Ocean Chemistry and Tungsheng Liu, for Paleoclimatology
2003 Sir Richard Doll, Hans Herren, and Yoel Margalith, for Environmental Medicine and Public Health
2004 The Barefoot College, and Red Latino Americana de Botanica (RLB) for Environmental Education
2005 Charles David Keeling and Lonnie Thompson, for Atmospheric Chemistry and Glaciology related to Climate Change

Members of the Tyler Prize Executive Committee
Dr. Owen T. Lind, Chair, Baylor University
Dr. Rosina M. Bierbaum, University of Michigan
If there’s a ‘Cooks Street’ and a ‘Mechanics Alley’, why can’t we have a road called ‘Salesperson Street’?

Who said cooks and mechanics were more important than salespeople? Certainly not us. In fact, we would be first to recognise the essential contribution that salespeople make to UK business.

Which is why we have created www.salestarget.co.uk. With 10,794* top sales jobs currently advertised, it is the UK’s leading SALES-ONLY recruitment site.

Dedicated to those who prefer the road to the garage.

SALES target.co.uk – sales jobs for sales people

Science, work and business
The insider UK research

Just how healthy is British science?
Despite relatively meagre resources, the UK still punches above its weight. Richard Fisher reports

THERE is no denying that scientists in the US leave a pretty big footprint. If you doubt it, take a look at how their research effort compares with that of their competitors from other countries (see "World research footprints", below). The US indisputably outperforms all other nations across a range of measures showing the vigour of its science base, and if this were a marathon, the UK would probably finish several hours behind.

The UK would, nonetheless, often be a valiant runner-up. Look at the share of global academic citations, for example, and the UK has held second place after the US for over a decade. In fact, by this measure the UK is ranked in the top three in the world for seven out of nine fields of research.

Whether it will still hold its place a decade from now is open to question. The UK fares poorly compared with other nations, notably Japan and Germany, on the depth of its research workforce. For example, on a useful measure of a nation's human resources in science - the number of researchers per 1000 people in the workforce - it has consistently ranked around 15th in the world in recent years. Sometimes it seems as if a chemistry department is boarding up its lab windows every other week, and the figures for students choosing science at university can be depressing too. University applications for some subjects have dropped by as much as 30 per cent in recent years, the Higher Education Funding Council says.

It's not all bleak, though. This year, the number of students applying for many of the core sciences rose by a small but encouraging amount. Maths was up 12 per cent, chemistry up 6 per cent and physics up 2 per cent. At the opposite end of the pipeline, the number of science graduates being churned out by universities over the past five years has shot up for some subjects, as have PhD numbers (see "Out of the Pipeline", left).

In the 2006 budget, the government highlighted its targets for getting more students into science. It aims to encourage up to 30,000 extra pupils to study physics, chemistry and maths at A-level by 2014, for example, by offering financial incentives to science teachers. Also in the budget was a plan to shake up the way publicly funded science is organised. The first potential change, which has been well received, is the creation of a single health research fund of over £1 billion a year, which will bundle together funding now split between the Medical Research Council and National Health Service R&D.

Proving less popular, especially with physicists and astronomers, is the proposed creation of a Large Facilities Council to manage the UK's investment in projects such as particle accelerators and space programmes. If the change goes ahead, it would likely signal the demise of the Particle Physics and Astronomy Research Council (PPARC), which spends a large chunk of its budget on facilities of this kind. The remainder of its responsibilities - the funding of physics and astronomy projects - would be brought under the enlarged umbrella of the Engineering and Physical Sciences Research Council (EPSRC).

Physics is arguably one area in which the UK and its European neighbours have stolen a march on the US, thanks to projects such as the Large Hadron Collider, due to power up in Geneva, Switzerland, next year. Relatively little well-placed funding can leave a big footprint.

Distribution of the UK’s “highly cited” researchers, who are among the 250 most cited in their field over the past 20 years
Number of highly cited researchers 1 10 40 95
A unique opportunity is presented by a £22M investment from the Scottish Funding Council and nine participating universities in SAGES, the Scottish Alliance for Geoscience, Environment and Society. SAGES is a major research partnership involving the Universities of Aberdeen, Abertay, Dundee, Edinburgh, Glasgow, Paisley, St Andrews, Stirling, and SAMS UHI. SAGES creates a long-term collaborative programme with significant investment in infrastructure and people, focused on answering some of the pressing questions in climate and environmental change research.

The SAGES partners will appoint 6 full Professorial Chairs (to include the position of Director), 18 Lectureships and 6 Research Fellows to address the challenges of understanding and modelling global environmental and climate change. Research will be enhanced by the appointment of 5 Technical and Computing Officers and 16 fully-funded PhD studentships.

Chair and Director of SAGES (Ref: 3006027)
The Director will lead the long-term development and vision for SAGES. The Director will be a professorial appointment who will provide academic leadership and will represent SAGES internationally. The main challenge for the Director will be to work with the partner institutions to develop SAGES into a sustainable, world-leading programme and to ensure that it uses its leverage to build research capacity over the longer term. To achieve this goal, you will have a track record in developing and sustaining research networks, enthusiasm for promoting multi-disciplinary research and international credibility in geoscience and environmental research.

The post is a full Chair appointment and will be hosted in the School of GeoSciences at the University of Edinburgh.

Research Theme on Landscape Dynamics
This research Theme will characterise landscape sensitivity to climate, tectonics and anthropogenic activity over various temporal and spatial scales, including understanding landscape responses to past climate change and human activity.

Chair in Quantitative Modelling of Landscape Dynamics (University of Edinburgh, Ref: 3008026)
You will be an outstanding researcher into the dynamics and modelling of landscapes, who will provide leadership for modelling research within this Theme.

Lectureship in Landscape Dynamics (University of Edinburgh, Ref: 3006025)
You will be a numerical model developer with the skills and experience to draw on the quantitative data on landscape dynamics provided by other SAGES members.

Lectureship in Model Upscaling (University of Aberdeen, Ref: FGG006AX)
You will address the upscaling of experimental and numerical modelling approaches in catchment hydrology.

Lectureship in Earth Surface Dynamics/Environmental Modelling (University of St Andrews, Ref: PS218108)
Your interests will lie in one or more of vegetation dynamics, geomorphic processes, catchment dynamics and/or modelling environmental change over decadal to centennial timescales.

Lectureship in Quantitative Geomorphology (University of Glasgow)
You will work on rates of surface processes and sediment flux over a range of time-scales, employing the full range of analytical and dating techniques.

Postdoctoral researcher: Quantitative Geomorphology (University of Glasgow)
You will assist and complement SAGES research in quantitative geomorphology and model parameterisation.

Postdoctoral researcher: Geosciences and Society (University of Glasgow)
You will develop our understandings of the interrelationships between (geo)science and its constituencies.

Technician: data generation for landscape dynamics (Scottish Universities Environmental Research Centre/University of Glasgow)
You will support the provision of data essential for model parameterisation in the quantification of Earth surface dynamics

Research Theme on the Terrestrial Carbon Cycle
In this Theme we will extend current work and develop new directions in characterising carbon sinks and sources through field, laboratory and remotely-sensed studies, contributing to predictive models at global, regional and local scale.

Chair in Carbon Dynamics (University of Abertay, Ref: CSE/06/09)
The field of specialisation for this Chair is biophysical modelling, specifically in soil microhabitats. You will complement and enhance the leading research group in the SIMBIOS Centre.

Readership/Senior Lectureship in Biophysics of Terrestrial Ecosystems
(University of Abertay, Ref: CSE/06/11)
Working within the SIMBIOS Centre, you will develop research in relation to physical and biological interactions in heterogeneous media.

Lectureship in Soil Carbon Dynamics (University of Stirling, Ref: 12417)
You will have expertise in soil micromorphology and microanalysis, and develop collaborative work on soil carbon distribution and the influence of land use change on microstructure and decomposition processes.

Lectureship in Remote Sensing and Modelling (University of Edinburgh, Ref: 3006024)
With a talent for numeric modelling, you will develop approaches to assimilating observations from satellites into global models of the carbon cycle.

Lectureship in Environmental Modelling and Land Management (University of St Andrews, Ref: PS219106)
A focus of your research will be to translate understanding of the physical processes governing the carbon cycle into policy-relevant models and recommendations.

Lectureship in Biogeochemical Tracers (University of Glasgow/Scottish Universities Environmental Research Centre)
You will have expertise in developing novel approaches to tracing biogeochemical pathways to develop understanding of the role of soil microbes in the carbon cycle.

Research Fellow: Biogeochemistry of Soils (University of Edinburgh, Ref: 3006023)
You will study the environmental controls on soil organic matter decomposition, and interactions with carbon cycling at the ecosystem scale.

Technical Officer: Field Measurement of Carbon Fluxes (University of Edinburgh, Ref: 3006018)
You will contribute to new work on the carbon cycle, using ground-based and airborne platforms equipped with novel sensors at locations in the UK and beyond.

Research Theme on Atmosphere, Oceans and Climate
Research into the operation of the coupled ocean-atmosphere-climate system will build on existing areas of research excellence in process studies, palaeo-environmental reconstruction, modelling and hazard assessment to create an exceptional and distinctive capability in understanding and predicting the causes and consequences of climate variability and change on local to global scales.

**Chair in Earth System Dynamics** (University of Edinburgh, Ref: 3008022)
With a track record of excellence in large scale modelling of the Earth's climate system, you will help lead the development of a multidisciplinary Centre of Earth System Dynamics.

**Chair in Flood Science** (University of Dundee, Ref: ASS/1323)
With a strong background in flood risk modelling, you will lead an interdisciplinary team focussing on the estimation of flood risk and its impacts as climate changes.

**Lectureship in Socio-Environmental Vulnerability** (University of Dundee, Ref: ASS/1322)
You will have expertise in researching vulnerable populations to complement and enhance the interdisciplinary team working on the social impacts of flooding.

**Lectureship in Climate Dynamics and Modelling** (University of Edinburgh, Ref: 3008020)
A climate dynamicist and modeller, you will apply your skills to understanding the mechanisms and drivers of past climate and environmental change.

**Lectureship in High-Resolution Atmospheric Modelling** (University of Edinburgh, Ref: 3006021)
As a mesoscale modeller you will have a strong background in modelling the atmosphere, and will wish to develop collaborations at the interfaces of the Earth System.

**Lectureship in High-Resolution Palaeoclimatology** (University of Glasgow)
Your interests will lie in constructing high resolution proxy-based records of past climates to test numerical models of rapid climate change.

**Lectureship in Palaeoceanography** (Scottish Association for Marine Science - UNI, Ref: D02.06/TMS/SAGES)
You will be an authority on the interpretation of palaeo-proxy records from marine sediment cores with knowledge of physical oceanographic circulation and water mass changes.

**Senior Research Fellow: Ocean Circulation, Biogeochemical Cycles and Climate** (Scottish Association for Marine Science - UHI, Ref: D03.081TMS/SAGES and University of Edinburgh, Ref: 3006072)
You will have an established track record of innovative research modelling the linkages between ocean circulation, biogeochemical cycles and climate. The post can be held at either institution.

**Research Fellow: Palaeoceanography/Palaeoclimatology** (University of Edinburgh, Ref: 3006019)
You will develop your own research programme in the area of high-resolution palaeoceanography/palaeoclimatology and/or novel ocean tracers of past environmental change.

Integrative programme: Knowledge Transfer, Policy and Society
A central aim of SAGES is to facilitate links between scientists seeking a better understanding of the natural environment and people developing policy. Key posts in each Theme above will link our research in environmental science with the development, testing and application of policy and with economic development through knowledge transfer. This programme will be led by the Michie Chair of Rural Economy and Environmental Sustainability (recently appointed through SAGES at the University of Edinburgh); we also seek a lectureship to contribute to this cross-cutting programme through links with all three Themes:

**Lectureship in Environmental Decision Support** (University of Paisley, Ref: 06/068)
Working at the interface between natural science and policy, you will develop numerical modelling approaches to environmental decision making.

**Integrative programme: Modelling Earth System Dynamics**

A Centre for Earth System Dynamics will use and develop modelling approaches to understand and predict the behaviour of the coupled ocean-atmosphere-biosphere-cryosphere-geosphere system. This forms an overarching integrative activity for SAGES. The Centre will bring together modellers and dynamicists from across SAGES' three research Themes, with a central hub based in the School of GeoSciences at the University of Edinburgh with dedicated computing hardware and support. Many of the new academic and research positions noted above, including the Chair of Earth System Dynamics, will make a major contribution to this new Centre.

For further information and to apply for any of these positions visit [www.sages.ac.uk](http://www.sages.ac.uk)

[2558-005 (2006) : 60-61]
Call for research proposals
Alzheimer’s Society Dementia care and research

The Alzheimer's Society is the leading charity for care and research into all types of dementia. We fund research prioritised by consumers, which falls under the three themes of cause, cure and care through the Quality Research in Dementia (QRD) funding programme.
We are currently calling for research proposals for 2006-2007. The expected funding budget for response mode funding is approx. £1.2 million.
We are offering the following grants in the coming year:

**PhD studentships.** Applications are invited from prospective supervisors for 3-year PhD projects. Deadline: 28 July 2006.

**Research Fellowships.** Applications are invited from scientists who have completed their research training or medically qualified individuals who wish to pursue an academic career for a two or three year period to develop their own research interest. Deadline: 27 Oct 2006.

**Project grants.** Applications are invited from established researchers for support for periods between one to three years. Deadline: 26 Jan 2007.

**Dissemination grants.** Applications are invited from health professionals or scientists who wish to disseminate a research outcome or an evidence-based health message beyond the standard peer reviewed journal channels. Deadline: 24 Nov 2006.

For more specific consumer determined research priorities, submission information and to download application forms please see the QRD website: [www.qrd.alzheimers.org.uk](http://www.qrd.alzheimers.org.uk)

Alzheimer's Society is a registered charity no 296645 and a member of the AMRC.
University of Aberdeen
College of Life Sciences & Medicine Graduate School

Postgraduate Research Studentships for October 2006

College of Life Sciences Graduate School are now inviting applications for the following studentships for October 2006:

Soils and Global Warming: New Processes and New Approaches Dr E Baggs
PhD in Organic Chemistry/Chemical Biology Professor Ian Booth / Dr Stuart Conway (University of St Andrews)

Contributions of Benthic Biodiversity to Ecosystem Processes in the Marine Benthos Dr Martin Solan / Dr Ruth Parker (CEFAS)

Alzheimer's Disease: New Experimental Models and Treatment Strategies Dr Bettina Platt
Functional and Ultrastructural Studies Osteoclast Diseases Dr Miep Helfrich

Search for Interactions Between the Muscle Growth Pathways Dr Henning Wackerhage / Dr Aivaras Ratkevicius

RNAi to Determine the Role of Specific Hepatic Transporters in Drug Disposition Prof G M Hawksworth / Dr R Weaver (Servier)

For further details on the projects and application process please contact: Tel: + 44 (0)1224 559679
Email: graduateschool-clsm@abdn.ac.uk

1495
UNIVERSITY OF ABERDEEN
St George's
University of London
Medicine, Biomedical Sciences, Health and Social Care Sciences

Division of Basic Medical Sciences
Centre for Molecular and Metabolic Signalling

Research Technician
Two Posts
Ref: 110/06 Fixed term for 3 years
We are seeking two motivated research technicians to work in the Molecular Genetics Group on a BBSRC-funded project studying the mechanisms of daughter chromosome segregation in bacteria. The project will focus on complementary aspects of topo IV, an essential enzyme that mediates chromosome separation via a DNA 'gate'. The work will establish how DNA gates are recognised, opened and stabilised, and has relevance to antimicrobial drug action and mammalian systems. Experience of using molecular biology techniques, especially DNA manipulation, site-directed mutagenesis, protein expression or protein-DNA interactions would be advantageous, but training can be provided. The posts would suit science graduates with a BSc in molecular biology, biochemistry or a related subject, with research experience. Both posts are available immediately.

Salary will be in the range £19,339 -£20,371 pa inclusive.

Informal enquiries can be made to, Prof Mark Fisher, Director, Molecular and Metabolic Signalling Centre (tel: 020 8725 5782; email: Ifisher@sgul.ac.uk).

To apply, visit www.sgul.ac.uk/jobs or contact the Personnel Office on 020 8725 5020 (24-hour answerphone) or email: personnel@sgul.ac.uk

Closing date: 13 July 2006. Please quote reference 110/06.

St George's is an Equal Opportunities Employer
[2558-008 (2006) : 62]
POST-DOCTORAL RESEARCH SCIENTIST
Applications are invited for the post of Post-Doctoral Research Scientist to work within the Maternal-Fetal Physiology group (part of our Vascular Health Division) in a post supported by the European Union EARNEST integrated project. The successful applicant will have graduated with a first degree in Biological Sciences and have attained a PhD. They will also be expected to demonstrate; previous experience at the post-doctoral level, working independently and also of finking well within a large grouping. The successful applicant will ideally have skills in molecular biology and ideally transcriptomics.

The post holder will act as the link between NuGO (The European Nutrigenomics Organisation) and the EARNEST networks, and as such will be expected to develop collaborations with members of the latter group.

For informal discussions please contact Professor H. J. McArdle on (01224) 716628 or e-mail H.McArdle@rowett.ac.uk - however to apply for the position please use the contact details below.

Salary will be within the BBSRC Band 6PD range of £23,022.00 to £26,541.00 depending on experience. The post is for a period of 2 years.

Application Forms and further information may be had by telephoning 01224 716669 at the Rowett Research Institute, Greenburn Road, Aberdeen AB21 9SB or e-mail personnel@rowett.ac.uk. The closing date is 7th July 2006, and completed application forms may be supported by a CV.

The Rowett Research Institute is an Equal Opportunities Employer.
SAGES
UNIVERSITY of ABERTAY DUNDEE

Senior Research Positions in Ecology/Environmental Research
As part of the University's Strategic Plan, significant investment in new posts within the SIMBIOS Centre is planned. SIMBIOS is a Centre of Excellence in the area of biophysics of terrestrial ecosystems. Backed by a large portfolio of external grants and a recent £4M investment in new laboratories and facilities, SIMBIOS is now planning four new positions (with associated PhD studentships). Posts will link with the new £22M SAGES (http://www.sages.ac.uk) initiative with Scottish universities in the area of Environmental Research.

Chair in Modelling Soil Ecosystems
Developing spatio-temporal models of carbon utilisation in heterogeneous soil. (Ref: CSE/06/09).

Reader/Senior Lecturer in Microbial Ecology
Research will initially concentrate on developing work in relation to the ecology and evolution of soil microbes. Experience in molecular techniques would be an advantage. (Ref: CSE/06/10).

Reader/Senior Lecturer in Biophysics
You will develop research in relation to physical and biological interactions in heterogeneous media, with particular emphasis on carbon dynamics. (Ref: CSE/06/11).

Lecturer/Senior Lecturer in Modelling & Visualising Biophysical Processes
You will develop a range of tools that aid in quantifying and visualising dynamic relations in heterogeneous media. This post will be linked to the new 3D-Cave currently under construction at Abertay. (Ref: CSE/06/12).

As an ambitious group, we require highly motivated individuals who are able to work across disciplines. All posts will be predominately research, although some teaching at both undergraduate and postgraduate levels will be required. We offer a multidisciplinary environment that encourages freedom of thought and expression, in an area of Scotland with exceptional natural beauty and high quality of life.

Informal enquiries to Professor Iain Young (tel: 01382 308646 or e-mail: imy@tay.ac.uk).

For further details and an application form please contact Human Resources, University of Abertay Dundee, Bell Street, Dundee DD1 1HG (tel: 01382 308030) or visit our website www.abertay.ac.uk Completed applications and a current cv should be returned to this address by 21 July 2006 quoting the appropriate reference number(s).

Committed to Equal Opportunities

breaking barriers
[2558-010 (2006) : 63]
Post-Doctoral Immunologist
The Laboratory of Molecular Biology is an internationally renowned centre for fundamental biomedical research located in Cambridge.

We wish to appoint a Post-Doctoral Career Development Fellowship to join the group of Dr Andrew McKenzie. You will undertake a project to investigate the molecular regulation of allergic asthma responses. Experience in immunology, molecular biology, primary cell culture, experimental models and transgenesis would be advantageous. Applicants should hold a PhD degree in an appropriate scientific discipline.

This is a three year appointment funded by Asthma UK. The starting salary will be in the range of £24,746 - £26,292 per annum depending on qualifications and experience. This is supported by a flexible pay and reward policy and optional MRC final salary pension scheme. We can offer 30 days annual leave entitlement, plus 2.5 privilege days and public holidays and excellent on-site sports and social facilities.

To apply, please send a covering letter and CV with the names and addresses of two professional referees who can be contacted prior to interview.

Quoting job reference PNAC/606/4, email your application to: recruit@mrc-centre.cam.ac.uk or post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH.

Closing date: 21st July 2006.

This is a No Smoking site

For further information about MRC visit www.mrc.ac.uk

The Medical Research Council is an Equal Opportunities Employer.
'Leading Science for Better Health'
A molecular biologist is required, initially for one year, to assist a post doctoral research scientist working on a BBSRC funded project to study the molecular genetic basis of non-host resistance to the obligate plant root parasite and virus vector, Polymyxa. This will be based on the interaction between Polymyxa betae and Hordeum and Beta species and is expected to lead to the identification of genes and promoters that can be exploited for crop improvement by conferring resistance to Polymyxa and its associated viruses. The work will be carried out at Broom's Barn Research Station (near Bury St. Edmunds, Suffolk), the centre for sugar beet research in the UK.

Candidates should have a degree in molecular biology and experience in basic molecular techniques. An interest in molecular plant pathology and genetics would be desirable.

Appointment will be at Band 7 Senior Scientific Assistant level, with a salary range normally between £18,142 and £20,538 p.a.

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or Mrs Christine Hobart, Broom's Barn Research Station, Higham, Bury St Edmunds, Suffolk, IP28 6NP, Tel: 0 1284 812202 (direct line), e-mail: christine.hobart@bbsrc.ac.uk.

Please quote ref: 924.

Closing date: 14 July 2006.

ROTHAMSTED RESEARCH
[2558-012 (2006) : 63]
At which university are the researchers as important as the research?

Researchers
If you're looking for an unrivalled range of research projects, a top-rated university, great professional and lifestyle benefits and a vibrant, exciting city, then your search is at an end. Bristol is one of the UK's premier and most sought after universities with an international reputation for ground-breaking research across a diverse range of disciplines. Researchers make up around one third of the academic staff and a huge part of our world class status. That's why we take extra care to create a positive working environment for you. Here you will find a support, training and development network created specifically for you, all in one of the UK's most attractive and dynamic cities.

www.findingtheanswers.co.uk
The Royal Society Research Professorships
The Royal Society is seeking applications for four Royal Society Research Professorships. These posts are designed to enable individuals of the highest ability and achievement to undertake independent, original research at a UK university or not-for-profit organisation into any of the natural and applied sciences including medical and engineering science.

Research Professorships provide long-term support for world-class scientists of outstanding achievement and promise, allowing them to focus on research and collaboration. Previous holders include five Nobel Laureates.

Applications are particularly welcomed from scientists currently resident outside the UK. The Professorships are available for scientists of any nationality.

The closing date for applications is Friday 8 September.

The Royal Society is the independent scientific academy of the UK. It is dedicated to promoting excellence in science, by supporting many of the UK's top scientists, engineers and technologists, by influencing science policy and by debating scientific issues with the public.

Further information is available from the Royal Society website: www.royalsoc.ac.uk or via email: ukgrants@royalsoc.ac.uk

[2558-014 (2006) : 64]
We are looking for a technician to join an enthusiastic and successful team investigating the genetics of stroke. This post offers an excellent introduction to research for a science graduate with experience in genetics. You will assist in a variety of projects investigating the molecular genetic basis of both monogenic and sporadic stroke.

The funding for this post comes from a Welcome Trust Functional Genomics Award to establish a UK wide DNA resource for a particular type of stroke, lacuna or small vessel disease stroke. We are collecting cases from about 30 centres throughout the UK as part of the UK Stroke Genetics Group. You will assist in processing these samples and excluding monogenic causes of stroke such as CADASIL. You will also assist in a variety of other stroke genetics posts within the department. The department has an excellent record in training young researchers in stroke genetics work. You must have a BSc or similar with experience in genetics, together with experience in laboratory genetic techniques.

Salary will be in the range £19,339 - £22,038 pa inclusive.

The appointment is fixed term for 2 years 3 months.

For further information, visit www.sgul.ac.uk/jobs or contact the Personnel Office on 020 8725 5020 (24hour answerphone) or email: personnel@sgul.ac.uk Please quote reference 419/06.

Closing date: 9th July 2006.

St George's is an Equal Opportunities Employer
POST-DOCTORAL RESEARCH SCIENTIST

Applications are invited for an immediate vacancy within our Maternal-Fetal Physiology Group (part of our Vascular Health Division) for a Post Doctoral Research Scientist. This opportunity is for 1 year initially and is externally funded by the International Copper Association. The primary aim of the successful applicant will be to investigate and identify biomarkers of copper status in pregnancy. This post, which will use high throughput technologies such as SELDI-ToF, may suit a Scientist in biological sciences, though this opportunity may appeal to a Scientist who has an interest in developments in functional genomics.

The successful applicant will have attained a PhD in a relevant biological science. Although full training will be given, previous experience in cellular physiology would be a distinct advantage.

For informal discussions please contact Professor H.J. McArdle on (01224) 716628 or e-mail H.McArdle@rowett.ac.uk - however to apply for the position please use the contact details below.

Salary will be within the BBSRC Band 6PD range of £23,022 to £26,541 depending on experience.

Further details and an information pack can be obtained by telephoning (01224) 716669 or e-mail personnel@rowett.ac.uk. The closing date is 14 July 2006, and completed application forms may be supported by a CV.

The Rowett Research Institute is an Equal Opportunities Employer.

[2558-016 (2006) : 64]
Research positions: Argumentation as a foundation for the Grid

Applications are invited for two fully funded research positions to work on the ArguGRID project ([http://www.argugrid.org](http://www.argugrid.org)). This project is funded by the European Union and aims to address the development of an agent-based approach to the configuration and orchestration of resources and services in Grid environments. The work relies on logic-based argumentation to provide a new model for programming the Grid at a semantic, knowledge-based level of abstraction. Validation of the intended models will be undertaken against e-business application scenarios. The proposal employs virtual organisation representation, utility maximisation, web services, and agent architectures.

**Research Assistant** (Reference: KB/4577)
You should have a BSc/MSc in Computer Science, Mathematics, Electrical Engineering, or a cognate discipline, and you should ideally have some previous experience in programming software agents, agent platforms/environments, distributed systems or web-services.

The contract will be for a period of up to 33 months. The starting salary will be in the range of £22,178 - £24,423 per annum including London Allowance. The successful applicant will be able to work up to 20 hours per week and is expected to register for an MPhil/PhD degree. A fee-waiver (50%) will be given for a postgraduate degree.

**Postdoctoral Research Assistant** (Reference: KB/4578)
You should have a PhD or equivalent research experience in Computer Science, Mathematics, Electrical Engineering, or a cognate discipline, and should ideally have some background in agent-based virtual organisations, knowledge representation, logic-based argumentation, web-services and programming.

The contract will be for a period of up to 24 months. The starting salary will be in the range of £24,423 - £28,604 per annum including London Allowance. Applicants are invited to send a CV and the names (plus full contact details) of two academic referees to Dr Kostas Stathis, Department of Computer Science, Royal Holloway, Egham, Surrey, TW20 0EX, UK. For further information please contact Dr. Stathis (tel: +44 (0)1784 443698; email kostas.stathis@cs.rhul.ac.uk).

The closing date for applications is midday Friday 14 July 2006.

We positively welcome applications from all sections of the community. [2558-017 (2006) : 65]
UCL EAR INSTITUTE
MRC DISCIPLINE HOPPING RESEARCH ASSISTANTSHIP

The UCL Ear Institute is a multi-disciplinary facility which opened in January 2005. We wish to recruit a suitably qualified person to act as a Research Assistant on a one year MRC Discipline Hopping project. The subject of the project is research and development into the possibility of allowing a blind person to build up a useful perception of their surrounding environment using sound cues derived from live video images. The successful candidate will be expected to possess knowledge of the processing capabilities of the auditory system and to be able to write computer programs for the analysis and transformation of images into sound cues.

Individuals who wish to work in a multi-disciplinary environment are particularly encouraged to apply.

To apply, please send, by email if possible, a curriculum vitae, an overview of your current research interests, and the names of at least two referees by 31st July 2006 to: Ms Edwina Turner, UCL Ear Institute 332-336 Gray's Inn Road, London WC1X 8EE Tel. +44 (0)20 7679 8908 Email: e.turner@ucl.ac.uk

Informal email enquiries may be made to the Institute Director, Professor David McAlpine, on d.mcalpine@ucl.ac.uk

Research Assistant in Neurobiology

The Laboratory of Molecular Biology is an internationally renowned centre for fundamental biomedical research located in Cambridge.

Applications are invited for a Research Assistant position in the new group of Dr Anne Bertolotti to work on the abnormal filamentous deposits that characterise many neurodegenerative disorders, including Huntington's disease, Alzheimer's disease and Parkinson's disease. You should have a degree in either Biochemistry or Cell Biology or a related field, and experience in molecular biology, biochemistry and cell biology (at least three years), with an interest in the molecular mechanisms underlying neurodegeneration and cellular responses to abnormal protein accumulation. Experience in fluorescent microscopic techniques would be an advantage. The Laboratory of Molecular Biology provides a thriving environment for research in neuroscience and has state-of-the-art equipment. For more information about the Neurobiology Division and the Laboratory as a whole, visit http://www.mrc-lmb.cam.ac.uk

Further information about the position may be obtained from Dr Anne Bertolotti (email: aberto@mrc-lmb.cam.ac.uk)

This is an open-ended position and is available from September 2006. The starting salary is likely to be in the range of £25,000 - £28,000 per annum, depending upon qualifications and experience. This is supported by a flexible pay and reward policy and optional MRC final salary pension Scheme. We can also offer 30 days annual leave entitlement and excellent on-site sports and social facilities.

To apply, please quote reference NB/606/7 and include a covering letter and CV, with the names and addresses of two professional referees who can be contacted prior to interview. E-mail your application to recruit@mrc-centre.cam.ac.uk or post to Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH.

Closing date: 15th August 2006.

This is a No Smoking site

The Medical Research Council is an Equal Opportunities Employer. 'Leading Science for Better Health'

MRC Medical Research Council  
MRC Molecular Haematology Unit,  
Weatherall Institute of Molecular Medicine, Oxford.

**Research Technician**  
Salary from £19,048 pa (ref RP/01)  
Applications are invited for the post of Research Technician to support a large, active group studying the molecular programming of blood stem cells and the cardiovascular system using zebrafish and Xenopus models. The successful applicant should have at least three years' experience of molecular biology techniques and preferably some knowledge of developmental biology. Excellent organisational skills are required in order to oversee the running of the laboratory, ensure smooth links with its associated aquarium and to contribute to research under supervision.  
For more information regarding Professor Patient's research see:  
[www.imm.ox.ac.uk/pages/research/molecular_haematology/roger.htm](http://www.imm.ox.ac.uk/pages/research/molecular_haematology/roger.htm).

For further information/application form, please contact Human Resources, MRC Centre Oxfordshire, Harwell, Didcot, Oxon OX11 0RD. Tel 01235 841069 or email: [personnel@har.mrc.ac.uk](mailto:personnel@har.mrc.ac.uk).

Closing date for applications: 21st July 2006.

The Medical Research Council is an Equal Opportunities Employer.

The sanofi-aventis Group is Europe's largest pharmaceutical company and the 3rd largest in the world. Backed by world-class research and development, sanofi-aventis is committed to developing both personnel and products through innovation and challenging the norm. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products and is helping develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. So if you want your career to develop in a varied and stimulating environment that sets very high standards, here's your opportunity.

**Research Scientist**

An exciting opportunity has arisen to join a high performance team in the Metabolism Section of the Global Metabolism and Pharmacokinetics Department at Alnwick. As a member of the Drug Metabolism Team, you will be responsible for the conduct of in vitro and in vivo metabolism and plasma protein binding studies, contributing to key decisions in all phases of drug development.

As a Study Director, you will be responsible for preparing protocols, conducting and directing experimental work and writing reports for non-clinical studies according to the principles of GLP. You will also participate in the conduct of clinical metabolism studies involved in metabolic aspects of clinical trials, which may include protocol compilation, study plans, conduct of metabolism work and report preparation. You will be expected to maintain an up-to-date knowledge of the field of drug metabolism, particularly technical aspects, taking charge of the selection, installation and running of laboratory equipment or computer systems.

You will be educated to degree level (or equivalent) in biomedical sciences, chemistry, biochemistry or a related field, with about three years' experience of drug metabolism and pharmacokinetics, ideally gained in a GLP environment, performing HPLC, radio-analysis and LC-MS, and applying this experience to help in drug development. It is essential that you have strong organisational skills, good verbal and written communication skills and an aptitude for analytical thinking. In this demanding role, you will need the ability to work well in a team and to plan in a rapidly changing environment.

In return, we offer an excellent remuneration package, including pension scheme, a range of health care initiatives including private medical insurance and dental care scheme, share incentive plan, annual performance incentive scheme and flexible working hours.

We are located only 30 minutes from the vibrant city of Newcastle upon Tyne and yet close to the majestic Northumbrian coastline and countryside.

To request an application pack, please contact Human Resources Department, Alnwick Research Centre, Willowburn Avenue, Alnwick, Northumberland NE66 2JH, telephone (01665) 608358, or email alnwick.recruit@sanofi-aventis.com quoting reference ALN05/062 on all correspondence. Closing date: 14th July 2006.

[2558-021 (2006) : 66]
**Laboratory Assistant/Report Writer**

An opportunity exists to join a small and friendly team of chemists engaged in herbicide formulation analysis. The ideal candidate will have a degree in Chemistry. Recent graduates are welcomed and full training in both wet chemistry and chromatography is provided. We offer a competitive salary with additional benefits.

Please write enclosing full CV details to:
David Norris Analytical Laboratories Ltd, Sandpit Road, Swan Business Park, Dartford, Kent DA1 5ED.

[2558-023 (2006) : 66]
Crawley, West Sussex

Ready to join a world leader?

As a world leading pharmaceutical company GSK employs over 100,000 people in 116 countries. Within easy reach of main transport links, our Crawley site is situated in West Sussex, South England and is one of 8 sites within the New Product and Global Supply division, ensuring the efficient supply of quality GSK products to over 160 markets.

The Crawley site has recently become a key launch site for many of GSK's new products and is well positioned within the secondary manufacturing supply network in terms of technologies, the diversity of products and product type. It is for this reason that we are experiencing rapid growth and as well as developing our current staff, we are also recruiting for the following:

**NPI Process Group Leader**

Working in the New Product Introduction department, you will organise, develop and lead the Process Technology team to ensure that NPI activities are appropriately resourced. With an understanding of secondary processing methods, you will have a minimum of 4 years' working in a technical or manufacturing environment. Experience of managing people and leading project activities are essential and knowledge and application of Six/Lean Sigma methodologies will put applicants at a distinct advantage.

**Quality Manager**

Providing an effective product release service for the site, you will have responsibility for the provision of certificates of analysis and conformance, co-ordinate, assess, investigate and approve product/process quality investigations. You will have a minimum of five years' experience within the pharmaceutical industry and be either recently qualified or approaching Qualified Person (QP) status.

**Team Leader - Computer Validation Systems**

In this stimulating role, you will ensure that the site's current, new and upgraded computer systems comply with cGMP. You will provide a focus for contact with Business/Process Units and manage validation resource to meet project or supply timelines. You will have at least five years' validation experience, with three of these relating to computer/control systems validation within the pharmaceutical or related industry. Experience of having directly managed a team is essential.

**Analysts**

Your work in this role will help sustain new product introduction and ongoing manufacturing support. With a minimum of one year's relevant pharmaceutical experience, you will have hands-on exposure to HPLC, dissolution testing and a working knowledge of GMP/GLP. Having graduated with a good degree in a chemistry-related discipline, you will have the drive required to support change in moving the business forward.

**Packaging Technologist**

In this key role, you will implement the packaging strategy for Crawley focusing on delivering new solutions and technology. Being responsible for innovative and technical projects, you will support the introduction and development of the packaging processes throughout the product lifecycle. You will have previous experience working in a packaging environment with knowledge and understanding of regulatory processes and requirements involved in New Product Introduction.

**Process Technologists**

Working on a number of exciting projects, you will manage activities required to ensure robust processing methods are transferred into the site. You will be accountable for process design, scale-up and validation which will require you to have natural leadership skills, an ability to communicate effectively at all levels and a passion for work. You will have a good degree in a science-based subject and have the ability to resolve technical issues and drive process improvements.
Validation Officers
Key responsibilities will include the preparation and execution of validation activities to ensure that the site's new and upgraded systems, equipment, facilities, utilities and processes comply with current regulatory expectations and GSK's Quality Management System. At various levels, you will have pharmaceutical validation experience where you will be able to provide expertise and advice within manufacturing processes.

As with all our opportunities, we offer a competitive salary and extensive benefits package including share schemes, pension and healthcare schemes.

For more details or to apply for these exciting roles, please email your CV, with a covering letter, to gsk@uib.srg.co.uk or call our retained agent Asia Khan of SRG on 09753 589635.

Closing date: 21st July 2006

POSITIVE ABOUT DISABLED PEOPLE

GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is proud to be an equal opportunity employer.

Together we can make life better
gsk
GlaxoSmithKline
I want to develop

If you’re looking for an environment where you can develop cutting-edge scientific skills, welcome to AstraZeneca. One of the world’s leading pharmaceutical companies, we invest heavily in the training and development of our people - and offer a supportive professional culture that’s designed to help your career aspirations become a reality.

EARLY DEVELOPMENT
The Early Development (ED) section within our Pharmaceutical and Analytical Research and Development (PAR&D) function is responsible for contributing to later stage discovery activities, continuing through to all PAR&D activities which result in delivering initial clinical studies. Evaluating discovery candidates from a development perspective and conducting risk analysis, analytical and formulation development and preparing regulatory submissions for clinical trials, form the main framework of activities for these challenging - and highly rewarding - roles.

Team Manager
Alderley Park, Cheshire - South Manchester
As the Line Manager for an 8-12-strong team, you’ll have primary responsibility for both individual and team performance management processes, including agreeing and refreshing the team’s objectives and conducting annual and interim performance reviews. With extensive technical experience in a drug development environment (typically five years +), you’ll also have strong interpersonal and leadership skills, exceptional customer focus - and, above all, will enjoy the challenges and scope to innovate in a dynamic, constantly changing and high profile environment. Ref: PARD0044

Senior Scientist
Material Science
Charnwood, Loughborough
Working closely with multi-disciplinary scientists from all areas of discovery and development, you will provide expert technical input to the selection of developable materials for candidate drugs used in pre-clinical and early clinical studies. This will involve applying toolbox techniques such as thermal methods, diffraction and spectroscopy. In addition to an enthusiastic approach to laboratory work and problem solving, you’ll have either a PhD with two years’ relevant experience or a degree coupled with five years experience in Chemistry, Material Science or another related discipline. Ref: PARD0033

Senior Scientist
Experimental Formulations
(Inhalation)
Charnwood, Loughborough
With a particular focus on inhalation delivery, you’ll provide technical input to the innovative development of experimental formulations for use in both pre-clinical and early clinical studies. You will also interpret results and prepare technical reports that strategically support each project. With either a PhD and two years’ experience in pharmaceuticals, or a degree and five years’ experience, you’ll be able to meet tight deadlines while working both under your own initiative and as part of a multi-skilled team. Ref: PARD0034

ANALYTICAL DEVELOPMENT
Vacancies in US & UK, all regions
Analytical Development within PAR&D plays a major role in the development of new pharmaceuticals, combining the expertise of analytical chemists, organic chemists and spectroscopists in multi-disciplinary teams. The group is pivotal as the interface between process chemistry, formulation science and clinical trials. For all roles within this group, a PhD/BSc anti a minimum of five years’ relevant pharmaceutical experience will be essential.

Associate Principal Scientist
Solid State NMR
Applying your expertise to make a major contribution in drug development projects and developing new research methodologies, your in-depth and up-to-date knowledge of Solid State NMR applications will be vital in engaging others across all skill groups. With strong problem solving and interpersonal skills, your creative outlook and passion will inspire, influence and motivate others, both internally and externally. Above all, you’ll be looking for a role with more autonomy and more scope to deliver far-reaching results. Ref: PARDW4040

**Associate Principal Scientist**
Liquids NMR
An NMR Spectroscopist with expertise in Liquids NMR, here you’ll lead and support technological developments within this area as part of our Research and Technology strategy, contributing to both internal and external research programmes. Innovative, prepared to challenge existing practices with strong problem solving skills, you’ll be looking to extend your influence and demonstrate just what you can achieve. Ref: PARDW4039

**Associate Principal Scientist**
Automation/Robotics
With in-depth technical and scientific knowledge of automation/robotics in drug development projects, you’ll relish the opportunity here to drive the establishment and implementation of new methods, practices and ways of working in this field. Collaborative in your approach and capable of networking with others at all levels and gaining their support for your activities, you’ll be keen to demonstrate where new technologies can be exploited to further our strategic objectives. Ref: PARDW4048

**Associate Principal Scientist**
Separation Science
Working within the Analytical Development group, your extensive knowledge and practical experience of HPLC and other analytical separation technologies mean you’ll be highly influential in shaping our processes and procedures in this area. Results-focused and able to build effective relationships within the wider organisation and beyond, you’ll be quick to identify new opportunities to apply separation technologies and will enjoy acting as the focal point for all activities in this area. Ref: PARDW4047

**Associate Principal Scientist**
Mass Spectrometry
Supporting colleagues within PAR&D across the region, your wide-ranging experience and up-to-date knowledge of mass spectrometry techniques will be vital in identifying where we can exploit technological advances in order to improve our drive for results. Challenging the status quo and promoting the establishment and implementation of new mass spectrometry techniques, above all you’ll be a tenacious problem solver who enjoys pushing frontiers within the field. Ref: PARDW4042

**PRODUCT DEVELOPMENT**
The Product Development team occupies a core scientific role within our Pharmaceutical and Analytical Research and Development (PAR&D) function. We focus on the overall formulation and delivery system design, manufacturing process development and the subsequent transfer to commercial production. Our work covers the full spectrum, from the end of Phase I to commercialisation and includes both small molecules and an emerging portfolio of larger biopharmaceutical molecules.

**Team Manager**
Aseptic Manufacturing
Charnwood, Loughborough
Leading a team of scientists responsible for the validation, compliance and aseptic manufacturing processes for NCEs, biopharmaceuticals and line extensions manufactured within the Pharmaceutical Development Facility (PDF) aseptic processing areas, here you’ll develop parenteral formulations to support clinical trials and scale-up and development trials to establish commercial formulations for the global market. Managing a team of up to 20 people, proven leadership qualities, people management skills, professional credibility and at least five years’ post-qualification (PhD/BSc) experience in a related environment will be essential. Ref: PARD0050

Team Manager
Material Science
Charnwood, Loughborough/Macclesfield
Managing the Material Science team within our Process Engineering section, your main remit here will be to provide expert characterisation of pharmaceutical materials in support of new product developments. As the Line Manager for a 6-10 strong team, you’ll have primary responsibility for both individual and team performance management processes, including agreeing and refreshing the team’s objectives and conducting annual and interim performance reviews. With extensive technical experience in a drug development environment (typically five years +), you’ll also have strong interpersonal and leadership skills, exceptional customer focus and above all, will enjoy the challenges and scope to innovate in a dynamic, constantly changing and high profile environment. Ref: PARD0049

Senior Project Engineer
Packaging & Devices
Charnwood, Loughborough
Responsible for the design and development of drug delivery devices, you’ll be an efficient and highly effective project engineer with a strong technical background and be capable of working in close collaboration with a wide range of both internal and external partners. With a thorough understanding of design control procedures such as risk analysis and design reviews, you’ll need at least five years’ experience developing medical devices (ideally within a pharmaceutical environment) and two years’ project management experience. A graduate in Mechanical Engineering, experience developing pressurised Metered Dose Inhalers will also be a real advantage. Ref: PARD0057

Senior Scientist
Material Science
Charnwood, Loughborough
With experience in the characterisation of particle, surface and bulk properties, your key focus will be how the variability of these can affect pharmaceutical products and their manufacturing processes. You will collaborate with other AZ scientists to ensure the delivery of late stage development projects and will also develop further technical expertise within this area. A PhD or degree with experience in Pharmaceutical Sciences, Material Science, Chemistry or Physics, is essential. Ref: PARD0039

Senior Project Scientists
Charnwood, Loughborough
Inhalation Dosage Forms - Ref: PARD0052
Solid Dosage Forms - Ref: PARD0053
Macclesfield
Solid Dosage Forms (two roles) - Ref: PARD0055
With experience in either inhalation or solid dosage form development, your key focus will be on delivering the product development contribution to one of our major late stage development projects. With a proven track record in formulation design, manufacturing process development, technology transfer and regulatory documentation, you’ll ensure appropriate expertise is available to project teams, providing the appropriate utilisation of resource and co-ordinating the activities within the function in order to meet our time, quality and cost objectives. As such, at least five years’ post qualification (PhD/BSc) specialist experience in either area will be essential.
Senior Scientists
Anticipated vacancies at Charnwood, Loughborough/Macclesfield
With a proven track record in formulation design and manufacturing process development for oral, parenteral or inhalation dosage forms, you’ll enjoy the opportunity to contribute to a variety of projects at different stages of development. Collaborative working with colleagues in Product Development and the wider AZ community will be essential to delivering high quality, robust and innovative dosage forms. As such, you’ll need to be educated to degree level with a minimum of four years’ product development experience (or educated to PhD level with two years’ industrial experience). Ref: PAR00058

Associate Principal Scientist
Biopharmaceutics
Charnwood, Loughborough/Macclesfield or Wilmington USA
At AstraZeneca we recognise the importance of understanding the biopharmaceutics properties of dosage forms and the impact these have on product development. Leading the biopharmaceutics input and strategy for assigned projects, your wide-ranging expertise in this area will be crucial, both in supporting specific projects and in coaching other scientists in this area. A PhD with a well-established reputation in at least one area of biopharmaceutics - absorption pharmacokinetics, in vivo relevant dissolution, permeability or delivery route/system specific biopharmaceutics - you’ll enjoy the scope to advance new thinking in this area. Ref: PARD0056

Senior Scientist
Biopharmaceutics
Charnwood, Loughborough
Providing biopharmaceutics expertise to a number of projects at different stages of development - both oral and inhaled - you’ll make a significant contribution to our PAR&D biopharmaceutics network and will help identify and establish new technologies and approaches for future projects. With wide ranging experience in this field, both technical and scientific, you’ll initiate and lead investigations in collaboration with PAR&D colleagues and other AZ functions. Educated to degree level with at least four years’ related experience - or with a PhD and at least two years experience - you’ll be looking to extend your influence in this exciting field. Ref: PARD0059

PRODUCT DEVELOPMENT - BIOTECHNOLOGY
At AstraZeneca we are actively growing our pipeline of biopharmaceutical molecules - through internal research projects, alliances with established biopharmaceutical companies and acquisition and licensing opportunities. This is an exciting new area for AZ and a multi-skilled team with responsibility for formulation design and development of these projects has recently been established. The nature of the projects and the composition of this team provide an exceptionally dynamic and progressive environment for those wishing to develop their careers in this area. For the Senior Scientist roles, either a degree with at least four years’ relevant experience or a PhD with at least two years’ industrial experience will be essential. For the Scientist roles a degree with some post-graduate experience would be desirable.

Biopharmaceutical Parenteral Dosage
Macclesfield
Senior Scientist - Ref: PARD0036
Scientist - Ref: PARD0035 (two roles)
Working in our newly-established Parenterals and Biopharmaceuticals Product Development team, you’ll be responsible for providing specialist formulation input to a number of biopharmaceutical projects at varying stages of the development process. Liaising with AZ discovery projects and alliance partners to ensure candidate drug criteria are met - and agreeing and delivering the long-term formulation strategy including packaging and devices - you’ll be keen to apply your expertise in identifying and introducing new technologies and processes.

Senior Scientist - Analytical Protein Chemist
Macclesfield

Utilising your knowledge of protein stability and its associated analytical techniques, you’ll work on a wide range of projects to ensure the delivery of high quality, robust and innovative dosage forms. Contributing to the design, implementation and interpretation of formulation development investigations, you’ll use, and develop, a range of analytical methods including pH, SDS-PAGE, SEC-HPLC, IEX-HPLC and particulate investigation. Ref: PAR00037

In return for your talents and commitment to getting results, we offer a generous benefits package including an annual bonus scheme, healthcare, pension, generous holiday allowance and relocation assistance where appropriate. We also have a number of other opportunities available in these departments, both currently, and coming up in the future, so please check our recruitment website for more information and vacancies.

OPEN TO INNOVATION

Overcoming barriers, challenging conventional wisdom, exploring new ideas - these strengths have already made Novartis into one of the world's leading research environments. Indeed, our teams are actively reshaping the process of drug discovery by using new technologies to understand the science of human biology and disease. Isn't it time you joined our state-of-the-art research facility in Horsham?

As part of our Laboratory Services Support team, you will play a pivotal role in supporting scientific staff at a time of significant re-engineering and change at the site. This will include everything from monitoring lab supplies and organising documentation to coordinating routine lab maintenance work. Educated to HNC, HND or degree level in a scientific subject, you will be an experienced hands-on laboratory professional with a good understanding of relevant regulatory and Health & Safety requirements. The ongoing development of our research facility means that as well as a competitive salary and benefits package, we can also offer you tremendous career prospects - including the possibility of early managerial responsibility if that's where your ambitions lie.

To find out more, view descriptions of all open positions and to apply online, visit www.novartis.com quoting the reference number 16190BR. Closing date: Friday 21st July.

**Purification Scientist**  
Salary Circa £18,500 per annum plus benefits.

We are looking for an individual to purify and analyse proteins to defined and agreed specifications. You will be working on a variety of products from both mammalian and bacterial sources. You will carry out quality control of all purified material, during and after completion of purification, using a range of analytical techniques (ELISA, SDS-PAGE, IEF and RID). You will also assist in the investigation and troubleshooting of production or process failures, as required as well as the optimisation of new purification processes.

The candidate would be expected to become a key member of a small and expert purification team and to make a significant contribution to the group's output.

The job holder should be educated to degree level or equivalent in a relevant biological discipline and be able to demonstrate a sound understanding of protein purification and characterisation techniques. You should have a minimum of one-two years laboratory experience and be able to communicate effectively at all levels.

To apply, please call the recruitment line on 01234 835238 for an application form, post a full CV to, HR Department, Unipath, Priory Business Park, Bedford MK44 3UP, or e-mail it to: human.resources@unipath.com

Please state your current salary and salary expectations on your application. Applicants must be eligible to work in the UK.

Closing Date: 12th July 2006

DEVELOPMENT MANAGER

£Attractive N. Wales

SENIOR SCIENTISTS AND SCIENTISTS

Revolymer Ltd is a new polymer company focusing on developing non-stick chewing gum, new formulations of drugs using gum and new cosmetics, paints and other front our new proprietary polymers. The Company is expanding into its own technical centre in N. Wales and we are looking to establish a high class technical team which will interact closely with polymer chemists at Bristol University. We are seeking initially seven new scientists but plan to expand to 20 within 18 months. We are seeking experienced high quality candidates for the following positions

Development Manager

You will be an experienced polymer chemist ideally with a background in polymer synthesis and formulation and will be in charge of the new centre. The successful applicant will report directly to the Chief Executive and must have hands on approach to develop products.

Development Senior Scientists and Scientists

We are looking for 3 PhD and 3 BSc development chemists with a track record in polymer synthesis, formulation or polymer science. The candidates will develop new products and new formulations and will require experience of making and designing new polymers to obtain a performance product. The remuneration packages will include a competitive salary, stock options and a relocation package where appropriate. The starring date will be September 2006. Please forward a resume to careers@revolymer.com

[2558-028 (2006) : 72]
Napp Pharmaceuticals Research Limited, based on the Cambridge Science Park, is part of a worldwide association of independent pharmaceutical companies, with a reputation for innovative research and development, particularly in pain management.

**Pharmaceutical Analysts**
Ref: PA1 Cambridge Competitive salary package

We are seeking high-calibre Scientists looking to launch or develop their career in our Pharmaceutical Analysis team. Working on all aspects of method development and validation, you will analyse a wide range of pharmaceutical products and raw materials using a variety of analytical techniques and state-of-the-art separation science techniques, including High Pressure Liquid Chromatography (HPLC).

If you are a recent graduate in chemistry or a related subject, ideally with some experience from an industrial placement, are enthusiastic, innovative and looking to work in a busy and challenging environment, then this might be the role for you. In return we will offer you the training and career development to achieve your highest potential.

**Clinical Supplies Scientist**
Ref: CS1 Cambridge Competitive salary package

We are also looking for an ambitious and practical pharmacist or life-sciences graduate, who has industry experience of working in Clinical Trial Supplies or Clinical Operations.

This role, as part of the Labelling and Planning team within our Clinical Supplies department, will give you the opportunity to attend and have input to protocol development meetings for Phase I to IV clinical studies, ensuring a clear understanding of the supplies requirement. The successful candidate will then plan, co-ordinate and supervise the interpretation of the protocol requirements into drug orders, packaging and label designs, including translations, before handing over to the Operations team.

Whilst your technical skills will be very much in demand, your ability and willingness to get involved in the packaging and despatch of clinical studies will also be a requirement of the role. You will have the ability to communicate across many departments, both in the UK and Europe, proven experience of organising clinical supplies and a keen eye for detail. Naturally, you will also have excellent communication and team skills.

In return for your contribution to our continued success, we offer a competitive salary package, including pension, discretionary annual bonus, medical insurance and relocation where applicable.

To apply please send your CV and covering letter, stating current salary and which vacancy you are applying for, to Vanessa McHaffie, Napp Pharmaceuticals Research Limited, Cambridge Science Park, Milton Road, Cambridge, CB4 0GW or email vacancies@napp.co.uk

Closing date: Friday 7th July.

Napp Pharmaceuticals Research Limited
How do you watch for something you can’t see?
And other big questions for big thinkers.

We’re the people asking the big questions about how best to protect the nation’s health and well being. An independent public sector body, our remit covers the entire spectrum of health protection issues, from predicting the spread of infectious diseases to minimising the effects of chemical, poisonous and radioactive hazards, as well as preparing for potential incidents such as a bio-terrorist attack.

**G x P Auditor**

£24,770 - £28,979 pa
Porton Down, Salisbury
You will be required to support internal and external audit programmes, assist with the closure of corrective actions and the development of compliant protocols, procedures and reports.

You will be part of the QA team and be responsible for ensuring that our expanding business complies with regulatory standards and our over-arching ISO 9000 quality management system.

Closing date: 13th July 2006.

This post is subject to a terms and conditions review (Agenda for Change).

The HPA promotes diversity in the workplace and is an equal opportunities employer.

So the really big question is “Do you see yourself here?” Find out more and apply at [www.hpa.org.uk/careers](http://www.hpa.org.uk/careers)

[2558-031 (2006) : 74]
Norbrook Laboratories Limited is one of the world's leading Companies within the Pharmaceutical Industry with a reputation for achieving results within a competitive market place. Due to continued expansion the following vacancies have arisen:

**SITE TECHNICAL MANAGERS** (REF: TD970506)
Applications are invited for the positions of Site Technical Manager. He/she will be experienced in facility design, manufacturing, quality control/assurance and worldwide regulatory requirements for primary and secondary pharmaceutical product manufacture. Considerable experience in participating in inspections and the maintenance of professional relationships for site inspections particularly with the UK Medicines Inspectorate, the US Food and Drug Administration and toll-manufacturing customers is essential.

Reporting to the Company's Director of Environmental and Regulatory Compliance (Production) and located at our factory sites in Newry, the successful candidates will have a minimum of 5 years experience at Management level. Candidates should possess a degree in either of the following: Chemistry, Biological Science or Pharmacy. Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous.

**VALIDATION MANAGER** (Ref: TD980506)
Applications are invited for the position of Validations Manager. Reporting to the Director of Environmental and Regulatory Compliance, the Validations Manager will be responsible for the implementation of the Company Validation programme for production and related laboratory facilities and maintenance of these facilities in a state of regulatory compliance. Prospective applicants must possess a degree in chemistry, biological science or pharmacy; previous experience in the Pharmaceutical Technical, QA or Validation role would be advantageous. Candidates must possess previous supervisory experience.

The Company offers an excellent benefits package, including competitive salary and pension scheme.

If you are interested in the above position and feel you have the necessary qualifications and experience, please telephone or email for an application form: Tel: +44 (0) 28 3026 4435; E-mail: human.resources@norbrook.co.uk

Application forms can be downloaded from the jobs section of our website on www.norbrook.co.uk

The closing date for receipt of completed application forms is Friday 21st July 2006.
Ocean Science Services
Ocean Science Services underpins marine research programmes by providing efficient and cost effective services, which facilitates and adds value to marine research activities. We have an interesting and challenging opportunity for an experienced person to join our team.

Advanced Mapping Services - **Survey System Technician** (Grade: Laboratory Technician)
Ref: STO/AMS/MAY06
This challenging position involves working with various teams on multidisciplinary projects and surveys. You will primarily be responsible for the mobilisation, maintenance and support of survey equipment used on board the vessels participating in the research surveys.

The successful candidate will be a self-motivated individual who possesses a diploma, HNC or equivalent experience in electronics, engineering or a related discipline.

Ideally you will have at least 12 months' relevant operational sea-going experience as an Acoustic or Systems Engineer in a geophysical or hydrographic survey team. Hardware fault troubleshooting, programming, and data management experience will be an advantage.

Please send an up to date Curriculum Vitae and cover letter by post or email to: Human Resources, Marine Institute, Rinville, Oranmore, Co. Galway.
T: (00353 91) 387200

Email applications will only be accepted to recruitment@marine.ie and are not valid until you have received acknowledgement from the Marine Institute.

The closing date for receipt of all applications is 4.00pm Friday 28th July 2006.

Further information and detailed job descriptions can be obtained from Human Resources in Galway or our web site [www.marine.ie](http://www.marine.ie)

The Marine Institute is an equal opportunities employer.
In drug discovery you don't wait for the future to happen. You actively shape it - exploring innovative ideas, influencing scientific practice and creating new and better pathways. If you are ready to contribute, it's time to join our state-of-the-art research facility in Horsham, UK. Join us as a Scientific Associate at our Gastrointestinal Disease Area, dedicated to the discovery of new therapies for the treatment of functional and inflammatory bowel disorders.

We are looking for an in vitro Cell Biologist or Pharmacologist to support our target identification and drug development activities. You will have a relevant BSc or MSc and at least three years' experience ideally in an industrial environment. As a hard working member of our team you should have demonstrated practical skills in the development of a range of in vitro screening assays for the study of G protein-coupled receptors, ion channels and/or enzymes. Experience of molecular cloning and the generation of stable mammalian cell lines is an advantage.

We are also looking for a highly motivated in vivo Pharmacologist to join our model development group. Ideally with experience in in vivo models of disease, you will play an essential role in our drug discovery efforts establishing animal models of visceral disorders, including colitis, hypersensitivity and motility. You should have a relevant BSc or MSc and at least three years' experience in the use of CNS, gastrointestinal or inflammatory models to support biological research.

In vitro Cell Biologist/Pharmacologist - 17227BR
In vivo Pharmacologist - 12475BR

SEPA
Scottish Environment Protection Agency

Ecotoxicologist £19,388 - £29,317
East Kilbride
You will be required to culture marine and freshwater algae and to develop their use in toxicity tests for marine and fresh waters, and effluent testing. This will involve undertaking environmental monitoring, assessment and reporting work relevant to an Environmental Science function. You will also undertake scientific survey and analysis of environmental samples, reporting analytical data and providing advice and information on its environmental significance. Participating in investigative studies, assessing environmental quality and liaising with internal and external customers.

You must be computer literate, as you will enter survey results into a Laboratory Information Management System. It is desirable that you have a degree in ecotoxicology or similar (e.g. environmental biology), or have taken modules in ecotoxicology, while it would be highly advantageous that you have experience of working in an ecotoxicity laboratory. Knowledge of the marine environment and an understanding of the processes taking place in the marine environment would be helpful. Experience of working with a LIMS system is desirable.

The closing date is 13th July 2006.

To apply or for specific details on this post, or other opportunities within SEPA please visit www.sepa.org.uk/vacancies

Alternatively you can call 01786 452555 or e-mail recruitment@sepa.org.uk

Please quote reference OPEA3526 in any correspondence.

CV’s will not be considered.

[2558-035 (2006) : 76]
COMPUTATIONAL BIOLOGIST

Applications are invited for a Computational Biologist, required to carry out a project which forms part of the EU Framework VI-funded Grain Legumes Integrated Project (http://www.eugrainlegumes.org/). The post holder will work within the Evolutionary Dynamics group led by Dr Jo Dicks (http://cbr.jic.ac.uk/dicks/).

The aims of this project are:
1) Develop a new probabilistic model to represent the processes of retrotransposon insertion and introgression within plant genomes
2) Design and develop a computer program, NETWORK, to implement the new model
3) Apply the model to key plant datasets

Candidates should have a PhD or equivalent experience in a numerical/computational science with good programming skills in C/C++ or Java. Good organisational skills, with the ability to handle complex ideas are also required. A background in statistics with previous experience in genetics or genomics is desirable.

This is a limited term contract where the appointment is funded until 9th Feb 2008. Salary on appointment will be within the range £23,022 to £26,541 per annum. The post attracts an additional retention and recruitment allowance of £3,800 to £6,000 per annum depending on starting salary; this is currently in place until 31 Dec 2006 and will be negotiated after that date. JIC offers a choice of a final salary and stakeholder pensions.

Application forms can be obtained by writing to the Human Resources Department, John Innes Centre, Norwich Research Park, Colney, Norwich, Norfolk, NR4 7UH, or from our web site http://www.iic.ac.uk/corporate/opportunities/vacancies/index.htm

Please quote reference number 15 58 on all correspondence.

The closing date for completed application forms will be 14 July 2006. The John Innes Centre is a registered charity (No 223852) grant-aided by the Biotechnology and Biological Sciences Research Council and is an Equal Opportunities Employer.

[2558-038 (2006) : 76]
QUALITY ASSURANCE MANAGER

Four Square, the drinks vending division of Mars, Incorporated, has a formidable global presence and is the fastest growing business in Mars, Incorporated.

In fact, our pioneering KLIX® and FLAVIA® brands now lead the world in integrated drinks vending solutions, selling over 1 billion drinks in Europe, Japan and North America each year.

In order to strengthen an already talented team we are looking to recruit a Quality Assurance Manager who will be the champion and guardian of product quality across the KLIX® and FLAVIA® brands. Working hand-in-hand with manufacturing, you'll develop and apply robust, yet efficient, quality systems within the drinks factory, assuring the safety, legality and consistent quality of our products at the optimum cost to the business. You will also be the key contact for the R&D teams, working together to build quality into new products from concept to launch. This role is key in facilitating successful, fast, flexible innovation and finding creative ways of ensuring a swift, smooth transition through the development process.

You should have a successful track record within a quality role, preferably within an FMCG environment, and possess a strong drive for results. Energetic and self-motivated, you will need a strong customer focus and the ability to effectively solve complex problems.

If you're looking for an opportunity where you can take ownership for your work, where the pace is fast and success is dependent on your contribution, we want to hear from you. Please apply at www.mars.com/careers searching under the Research and Development section and Ref: HAM000012.

Closing date: Friday 14th July 2006.

Mars is committed to equal employment practices. ®Registered Trademark
Think what’s possible

Are you looking to work in a global growth company where you can make a real difference? With about 91,000 associates around the globe in our affiliates in over 140 countries, we share a vision of a better today and tomorrow for patients - a vision that drives our growth and success. Our greatest job satisfaction is knowing that we improve lives, we extend lives, and we save lives—and we do it with increasing precision and efficiency through breakthrough science and innovation.

Vaccines & Diagnostics Division, Liverpool
Novartis is a company committed to the discovery and development of medicines in areas of unmet clinical need. Our product pipeline is one of the strongest in the pharmaceutical industry and in the UK alone we spend around £1 million per week on research and development.

Novartis is the fifth largest producer of vaccines worldwide, protecting millions of people from contracting potentially fatal diseases. The Liverpool facility is one of the largest biopharmaceutical manufacturing operations in Europe, specialising in the production of influenza vaccine.

Currently employing around 800 people, we are now seeking to recruit additional personnel for the following vacancies:
Team Manager External Quality Operations
MQA Compliance Advisor
Technology Development Project Manager
Technical Specialist
Technical Support Technologist
Senior Validation Specialists
Validation Specialists

All roles offer attractive salaries and benefits.

Defra
Department for Environment, Food and Rural Affairs

Defra (Department for Environment, Food and Rural Affairs) was created in June 2001 to drive forward the Government's programmes on the environment, food and rural affairs.

We work for the essentials of life - food, air, land, water, people, animals and plants. Our remit is the pursuit of sustainable development - weaving together economic, social and environmental concerns.

**Senior Scientific Officer**
From £33,728 per annum  Based in London

The Royal Commission on Environmental Pollution (RCEP) is an independent body charged with advising government on environmental issues. It produces high-profile reports that make policy and scientific recommendations to government.

You will be a vital part of a small and enthusiastic team supporting the Chairman and Members of the RCEP. You will have a major role in researching and writing parts of reports on key environmental issues. For the first six months you will concentrate on a study examining ways of reducing the environmental impact of towns and cities, after which you will be part of the team working on our project on Novel Materials and Nanotechnology.

This is a challenging and rewarding opportunity to take an independent and wide-ranging look at environmental policy across government, and will help you gain the broader perspective envisaged by Professional Skills in Government. You will have the opportunity to interact with: experts in a wide range of disciplines; government departments, and stakeholders in businesses and NGOs. You will also be in charge of organising presentations, seminars and evidence sessions. You will have the ability to write rigorously and readably, analyse complex scientific issues, interact persuasively with policy and academic organisations and work well within a team. You will also have a strong interest and experience in environmental problems, plus the ability to use standard office software such as Word, PowerPoint and Excel. It is desirable that you have knowledge of one or more of the areas being studied such as materials science and nanotechnology or urban/environmental subjects. You will have a relevant first degree in a scientific subject, ideally with a post graduate qualification such as a Masters or PhD, and several years’ relevant experience in research or policy. Some IT experience would be useful.

For further information, please contact Diana Wilkins, Assistant Secretary to the Commission, on 020 7799 8980. More information about the Royal Commission can be found at [www.rcep.org.uk](http://www.rcep.org.uk).

To find out more, please visit our website [www.defra.gov.uk](http://www.defra.gov.uk).

If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WR5 2LQ. Tel: 01905768818 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting reference RCRE411.

Closing date: 14 July 2006.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion, or sexual orientation.
We operate a family-friendly policy including flexible working patterns.
The posts are open to British, Commonwealth and EU Nationals.

HONNI SOIT QUI MAL Y PENSE
DIEU ET MON DROIT
POSITIVE ABOUT DISABLED PEOPLE
Bristol-Myers Squibb is among the world’s leading health-care companies with annual sales of £10.5 billion and operations in over 30 countries. Pharmaceutical products account for around 80% of the business, and the Company is a world leader in cardiovascular and metabolic disease, anti-infectives, neurosciences and anti-cancer agents with a significant number of new compounds in a range of therapeutic areas.

The Moreton site in the United Kingdom is the focus of significant facility development and is a strategic part of the Bristol-Myers Squibb Pharmaceutical Research Institute. The operation has close links with R&D centres in the USA and undertakes all aspects of formulation development and clinical supply operations for a range of new and existing drug products. Moreton is located on the Wirral peninsula some 20 miles north of Chester and conveniently situated to access the recreational facilities of Liverpool, North Wales and the Lake District.

To support the development of new pharmaceutical products we currently have the following opportunity for an enthusiastic, highly motivated individual to join the Analytical R&D group within the Bristol-Myers Squibb Pharmaceutical Research Institute at Moreton.

**ANALYTICAL SCIENTIST** (North West England)
With practical experience in Analytical Techniques

A new position exists within the Pharmaceutical Research Institute at Bristol-Myers Squibb, UK, for an analytical scientist to work within the Stability Group.

The group undertakes the testing of novel candidate formulations as part of stability evaluation and shelf-life prediction. The laboratories employ a variety of modern analytical methodologies and are committed to a high-level of automation, using computerised instrumentation and state-of-the-art laboratory robotics.

You will primarily be involved in a technical role supporting the evaluation and implementation of new technologies for the group, software systems for scientific applications, data generation and validation activities for the stability studies conducted in the group.

You will be expected to demonstrate a broad-based knowledge, depth and experience in a wide range of analytical techniques with hands-on chromatographic techniques including LC-MS, as well as knowledge of spectroscopy, and possibly X-ray crystallography together with a good understanding of software systems and scientific applications for data generation, acquisition and evaluation. You should demonstrate strong analytical and technical problem solving skills, use of sound scientific judgement together with a good understanding of GMP and equipment/systems qualification requirements. The ability to organise, plan and schedule work is essential. Excellent oral and written communication skills and the ability to form strong working relationships with colleagues, including those at other international sites will be essential.

You should have a degree in Chemistry or a related discipline with a minimum of five years experience within the pharmaceutical or related industries. A competitive salary and benefits package including a non-contributory pension and private medical cover are provided.

Applicants should send their CV including details of spectroscopic experience, with a covering letter to the Human Resources Department, Bristol-Myers Squibb, Pharmaceutical Research Institute, Reeds Lane, Moreton, Wirral, Merseyside, CH46 1QW, quoting reference number 308.

Closing date for applications is Friday 7th July 2006.

AWE

**NMR Spectroscopist**

£35,000+ plus excellent benefits Nr Reading, Berkshire

Tasked with maintaining the UK's nuclear deterrent, the Atomic Weapons Establishment is unlike any other organisation. One of the nation's largest high technology research and development facilities, our manufacturing capabilities are second-to-none. And the same uncompromising standards apply to everything we do. With considerable investment from the government, we're embarking on an exciting period of growth. So for talented individuals like you, there's never been a better time to join us.

Working within our Organic Materials Team you will utilise our two new Varian VNMR-S DirectDrive 400MHz systems to develop techniques that will enhance our capabilities in liquid and solid state NMR, and NMR microscopy. You will help to develop lifetime prediction models for current materials and, where appropriate, work on the development of replacement materials. As part of your remit of keeping us at the forefront of NMR spectroscopy, you will also represent AWE as part of domestic and international technical collaboration programmes.

Degree-qualified in Chemistry Physics or Materials Science, and preferably with a PhD, you will be expected to have significant experience in the application of NMR to materials characterisation. With substantial experience in a research environment, you will be well informed of the latest developments in the field and will strive to keep yourself up-to-date at all times. In addition to your practical and technical skills, you will also be an enthusiastic team player with excellent interpersonal and reporting skills.

As well as the opportunity to continually develop your abilities, you'll enjoy a superb benefits package. One that includes 28 days' holiday in addition to statutory bank holidays and a final salary pension scheme.

To find out more about this role, visit [www.awe.co.uk](http://www.awe.co.uk). Alternatively, you can call us on 0118 982 9009 for an application form. AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age or responsibility for dependants. The normal contractual retirement age at AWE is 65. Successful candidates will be selected solely on their ability to carry out the duties of the post. Because of the nature of the work associated with this post, it is subject to special nationality rules and is open only to British Citizens.

All selected candidates will be required to undergo security clearance.

British Energy is a FTSE 100 Company and is the UK's largest generator of electricity, supplying 20% of the UK's electricity.

Based in the central engineering function opportunities exist for people with a strong background in Materials Science/Metallurgy, Mechanical Engineering, Nuclear Engineering or Physics. We're offering challenging technical roles in the assessment of the potential performance and safety implications of changes in the design of nuclear fuel assemblies and related components, or in the production technologies and materials used in their manufacture.

We're specifically looking for a Metallurgical Engineer (BWD/99197), Fuel Design Engineer (BWD/99200) and a Fuel Performance Engineer (BWD/99203). Further details for these roles is available at www.british-energy.com/careers

You'll be self motivated with plenty of initiative and good judgement to drive projects to timely completion. You should be a team player with excellent written and verbal communication skills. Equally important are your organisational skills and analytical ability to allow you to direct your technical expertise to the business needs of the company.

You should be educated to degree level or equivalent in a materials science, engineering or physics discipline and have proven relevant experience. Previous experience in nuclear or other safety-critical engineering disciplines, particularly in-reactor materials performance, is advantageous but not essential. In return we can offer the opportunity for personal and career development, and a commitment to professional development.

To apply, email an application form or CV (with completed Equal Opportunities form) to recruitment@british-energy.com quoting the appropriate reference number. Forms and further information can be found at www.british-energy.com or if you do not have internet access, please call (01452) 653740. Closing date for applications: 26th July 2006, successful candidates will be contacted within 4 weeks.

British Energy is committed to equality of opportunity. We aim to reflect the diversity of the community and encourage applications from minority ethnic and disabled groups and women, as they are under-represented amongst our staff.

EXPERIMENTAL SCIENTIST (FBU008)

With the new Gemini High Power laser system coming on-line in 2007 an experimental scientist is required to develop and grow its laser matter interactions scientific programme. Visiting teams of scientists from the UK and abroad carry out plasma physics experiments of the highest calibre using the facilities at the Central Laser Facility and there is a new permanent position in the Experimental Science Group, which manages and facilitates these activities. The new researcher would be expected to conduct their own research activities in the field of short pulse interactions and develop new and novel science in collaboration with our user community in this rapidly expanding field. Applicants should have a Ph.D. or three years equivalent experience with laser plasma experiments and preferably a minimum of two years experience at Research assistant level. For appointment at the top of the range, applicants should have about five years post doctoral experience, demonstrating their ability to lead independent research activities. There is the potential to be appointed to a visiting Research Fellowship in Physics at Oxford University.

For further information about this post, please contact David Neely +44 (0)1235 446150 or email d.neely@rl.ac.uk For more detailed information about the CCLRC please visit www.cclrc.ac.uk.

Salary is in the range £24,638 to £35,543 dependent on experience. An excellent index-linked final salary pension scheme and generous leave allowance are also on offer.

Application forms can be obtained from: FBR HR, CCLRC, Chilton, Didcot, Oxfordshire, OX11 0QX. Telephone +44 (0)1235 446677 (answer phone) or email recruitment-FBU@rl.ac.uk quoting reference number FBU008.

All applications must be returned by 21 August 2006.

Interviews will be held on 19 September 2006.

CCLRC operates a no-smoking policy and is committed to Equal Opportunities.

BTO

DATABASE OFFICER
(£19,692 - £21,879 p.a.)
The British Trust for Ornithology (a charity undertaking independent ornithological research) is seeking applications for a Database Officer to be responsible for the maintenance and development of its membership database (SQL Server). The postholder will also assist with the maintenance and development of the Trust’s scientific databases (Oracle) both internally and on the web. This is a permanent position and candidates should have previous experience of relevant computer programming with a background in either ecology or computing. Specialist training will be given as needed. A keen interest in natural history would be advantageous. Closing date for receipt of applications is 12:00 Thursday 6 July 2006. Further details and application forms are available from Sophie Foulger, BTO, The Nunnery, Thetford, Norfolk IP24 2PU (tel: 01842  768247; email: jobs@bto.org) or from our website: www.bto.org Please quote reference NS/06-2.

Opportunities available at
itm
POWER

The future shape of the energy industry is being driven predominantly by the growth in the global demand for energy, the diminishing reserves of oil and the environmental impact of burning fossil fuels. Hydrogen is the most abundant element in the universe and has the potential to be used as a totally "clean" fuel. This has given rise to the concept of the "hydrogen economy" and the development of hydrogen fuel cell technology.

ITM Power is a leading technical innovator of fuel cell technologies for the hydrogen economy, making both hydrogen cells and electrolysers more efficient and cost effective. Through the use of patented materials, system architecture and processing methods, ITM Power is working towards the development of low cost systems which can be used in a whole host of applications.

ITM is moving into the next phase of the company's development and is seeking to strengthen its technical team to bring its technology to market. This has created the following exciting positions:

**Graduate and Experienced Chemists** £20k+
**Graduate and Experienced Physicists** £20k+
**Graduate Engineers** £20k+
**Graduate Material scientists** £20k+
**Experienced Electrical/Electronic Engineer** £30k+
**Experienced Product Development Engineer** £30k+
**Graduate and Experienced Mechanical/production Design Engineers** £20k+

Salaries are dependant on experience and ability.

You will work at our custom built laboratories on the outskirts of Sheffield. Your work will be theoretical and practical, so hands-on experience in a laboratory environment is a necessity. Excellent presentation and report writing skills are also essential.

All of the roles will be broad, though there will be particular focus on the continued development of novel materials and processes, the build and testing of prototype systems and product planning. We expect the right candidates will have a broad understanding of the practical application of science and engineering, be eager to learn and capable of making a real contribution from day one.

It is important that you are able to fit in with the existing small but expanding team, as it is imperative that you will be capable of working effectively with other group members. ITM has the opportunity to become a key contributor to future energy storage, power system management, energy distribution and use within the hydrogen economy, and can offer rapid career progression for the right people.

ITM are committed to fostering an equal opportunity environment in which diverse people are included and supported.

Application by post, please include your CV and a cover letter with salary expectations to: HR Department, ITM Power Plc, Unit H, Sheffield Business Park, Europe Link, Sheffield, S9 1XU
Closing Date for applications 12th July 2006 More information is available about ITM power on our website www.itm-power.com

Can you influence everyday brands with extraordinary science?

We've many world-leading brands under our umbrella at Unilever - like Lynx, Cif, Dove, Liptons and Knorr, for example. And our Safety and Environmental Assurance Centre (SEAC) work with them all, to ensure the safety of our consumers, employees and the environment. For you, that could prove very exciting indeed: after all, it will give you the chance to use novel approaches to risk assessment on a variety of complex projects, for a number of global products. What's more, the fast pace of the market means you'll see the result of your work on the shelf quicker than in almost any other industry. We're looking to build our team with two key roles:

**TOXICOLOGIST**
With your experience of safety and risk assessments in an industrial or regulatory context, you'll be perfectly placed to provide our business with specialist advice on toxicology and any risks related to ingredients, products or processes.

**PROBABILISTIC RISK ASSESSMENT MODELLER**
Using your expertise you'll apply quantitative and probabilistic techniques to model exposure and hazard data from a variety of sources to help assess the risks associated with our products.

To find out more about Unilever and SEAC and view details on these and other roles, please visit [www.unilever.co.uk/seac](http://www.unilever.co.uk/seac)

Microbiology. Macro responsibility.

Senior Microbiologist - Sandwich, Kent

At our European R&D headquarters in Sandwich, we invest over £10 million a week in R&D to support a global pipeline of potential new medicines. Bring your microbiology expertise to our Analytical R&D Group and you’ll enjoy the chance to influence our microbiological strategies for Active Pharmaceutical Ingredients (APIs), drug products and devices.

In this new role, you’ll ensure regulatory compliance and best scientific practice, including specification, methodology, validation, testing strategies, investigations and practical work at vendors. As the lead microbiologist in the Group, you’ll need to be proactive and influential, as you’ll be liaising closely with clinical research organisations and working with a variety of project teams across all therapeutic areas at Sandwich. Using your knowledge, experience and strong negotiation skills, you’ll oversee microbiological methods and procedures and ensure products’ safety, quality and effectiveness.

Naturally, you’ll need a degree in microbiology, together with extensive experience of relevant testing and strategies in a pharmaceutical environment. This will include knowledge of devices or sterile products, as well as tablets and APIs, and an understanding of relevant regulatory requirements. Just as important, you’ll have the presence to influence people from a wide range of scientific backgrounds, and will be a proven leader with experience of working in a matrix environment.

To find out more and to apply, please visit www.pfizer.co.uk quoting requisition number 056061.

Closing date: 14\textsuperscript{th} July 2006
**Senior Fluid Flow Modeller**  
c.£30,000  Buxton, Derbyshire

**Fluid Flow Modeller**  
c.£24,000  Buxton, Derbyshire

The Health and Safety Laboratory (HSL) is a unique multidisciplinary organisation with an international reputation as the UK's leading health and safety facility.

Our Computational Modelling Section delivers research projects and provides support and technical advice to HSE and external customers. As part of a multidisciplinary team, you will use fluid flow analysis as a tool to help improve workplace health and safety in fields such as occupational hygiene, biological and chemical exposure and major hazards. The section applies a range of tools to the analysis of fluid flow problems, including Computational Fluid Dynamics (CFD), dispersion models and ventilation models.

You will need:
A good degree and at least two years' relevant experience (which could include a PhD) -for the senior position you will need at least four years' relevant experience.

An in-depth understanding of fluid flow behaviour and experience of at least one of the modelling techniques listed above.

Good communication skills.

To be able to work with scientists from a range of disciplines. Experience in planning, managing and delivering projects to customers.

As a growing laboratory with a secure and expanding customer base we can offer a first class range of benefits including good support for professional development, the opportunity to publish your work where appropriate and the choice between an excellent public sector final salary pension scheme and a stakeholder pension.

For an application pack (quoting ref ET01) contact Lisa Randall, Personnel Section, Health and Safety Laboratory, Harpur Hill, Buxton, Derbyshire SK17 9JN, tel: 01298 218622, email Lisa.Randall@hsl.gov.uk or visit our website.

Closing date: 21 July 2006.

British Antarctic Survey
NATURAL ENVIRONMENT RESEARCH COUNCIL

You won’t change the world.
Just the way people see it.

**Radar Geophysicist**
£21,780 - £26,900 pa
Cambridge with at least one four month field season in Antarctica

Climate changes and global warming are altering the face of the planet as we know it - and here at the British Antarctic Survey, with our world-class programme of scientific research, we're working to discover its causes and effects within this truly unique continent.

You will be involved in the planning, execution and data processing of ground-based and airborne radar surveys of ice sheets and ice streams, and modelling the results using our inhouse programs. You'll also maintain and operate in-house ground-based ice-penetrating radars; use and develop filtering and image processing algorithms; and infer ice flow patterns from the results by using ice flow models.

With fieldwork experience in geophysics or glaciology, you'll be qualified to PhD level in Earth Science, a physical science or mathematics. You will also have knowledge of programming and data visualisation.

Professional development is excellent and you will be expected to become an autonomous research scientist within the project lifespan.

We offer a generous benefits package including a final salary pension scheme, free car-parking, flexible working hours and 30 days annual leave.

On-line application forms and further information are available on our website at [www.antarctica.ac.uk/employment](http://www.antarctica.ac.uk/employment)

These are also available from the Personnel Section, British Antarctic Survey, High Cross, Madingley Road, Cambridge, CB3 0ET. Tel: (01223) 221508. Please quote reference: BAS 32/06.

Closing date for receipt of application forms is 12th July 2006. Interviews are scheduled to be held on 1st August 2006.
Please include a CV and full publications list with your application. We welcome applications from all sections of the community. People from ethnic minorities are currently under-represented and their applications are particularly welcome.

You will need to be physically capable and medically fit to work in Antarctic conditions.

RESEARCH WITH INNOVATION
PET CARE WITH PASSION.

Animal Behaviourist
£23,324 - £25,241 Waltham on the Wolds, Leicestershire

At Waltham, we provide the science behind global brands such as Pedigree®, Whiskas® and Royal Canin®. As a member of our Research Team, you’ll be responsible for devising inventive training and habituation methodologies for our animals, bringing in new techniques in this area, and acting as ambassadors for our ways of working externally. You will act as key liaison between other scientists to ensure our research is delivered in the best way and the physical and mental health of our animals is optimised.

You will, then, need to be someone who can communicate well with others, both in writing and when presenting your results in person. As a research scientist who’s working towards an MSc or PhD – and who already holds a first level degree in Animal Science – you should be adept at this. We’d like you to add several years’ experience of managing research projects, plus a commitment to publishing your work while at Waltham.

Interlace Global Group is the leading independent UK-based global medical communications agency, which has been responsible for delivering innovative and award-winning communications for over 24 years.

Interlace global
weaving science, medicine and strategy

CURRENT VACANCIES

We have exciting opportunities for Medical Writers, Regulatory Writers, a Manager, Client Services and a Managing Editor to join our friendly office in Tunbridge Wells, Kent. We offer an attractive work location that is within easy commuting distance from London, Surrey and Sussex.

Wells Healthcare Communications - Part of the Interlace Global Group
As a Medical Writer, you will have a strong life sciences background, ideally to PhD level, outstanding writing, creative and editorial skills, with superb attention to detail and the ability to work within a team environment. Experience in post-doctoral research or scientific writing is valuable but not essential. You will be responsible for writing and editing documents, such as manuscripts, newsletters and congress materials, across a broad range of therapeutic areas.

Quantum Medical Communications - Part of the Interlace Global Group
As a Regulatory Writer, you will have a strong life sciences background, ideally to PhD level, outstanding writing and editorial skills, with superb attention to detail and the ability to work within a team environment. Experience in post-doctoral research or scientific writing is valuable but not essential. You will be responsible for writing and editing documents, such as clinical study reports, protocols and investigator brochures, across a broad range of therapeutic areas.

As a Managing Editor, you will have a strong life sciences background, ideally to PhD level. You should have at least 4-5 years' successful writing experience in a pharmaceutical company or CRO, and have experience in line management and the training of writers. You will be responsible for managing and planning writing projects, and ensuring that they are delivered on time and within budget to the highest possible standards. You will also train in-house writers and manage external contractors.

As a Manager, Client Services, you will be part of the interface between our writing teams and our clients, and you will be responsible for ensuring that projects are managed and delivered effectively. You will also manage a portfolio of accounts and take responsibility for their growth.

In return, we offer a competitive salary, excellent benefits and exciting opportunities for career and personal development.

To apply:

TECHNOLOGIST/SCIENTIST

GORE
Creative Technologies Worldwide

W L Gore & Associates is famous for creating GORE-TEX® Fabric which is used in a range of commercial, industrial and military applications. We also provide many unique and high quality fluoropolymer solutions to the electronics, industrial and medical markets. Our 50-year success story rests on creativity and product innovation combined with a culture based on individual freedom.

At our Livingston facility, our high-performance fabrics division applies our core membrane technology to the development of customer solutions to create new standards in performance fabrics.

Continued growth has lead to a superb opportunity for an experienced Technologist /Scientist to join our team within our fabrics division in Livingston. This is a key scientific role requiring you to make a significant contribution to the development of future products. You will bring state of the art knowledge on adsorption and desorption, or the transportation of molecules across membrane structures. Ideally PhD qualified, you will also have relevant industry experience of commercial product development and be able to relate fundamental properties to functional performance. You will be innovative, investigative and a first class communicator who is able to apply technical ability in a practical, hands-on way to deliver successful solutions.

In return, you have a real opportunity to contribute to the company's future and to join an employer of choice, ranked first in 'Best Companies to Work For' 2004, 2005 and 2006.

To apply or discuss further, please contact our retained consultant, Lisa Johnston on 01506 517204 or e-mail to wg@go-escape.com

Diamond Light Source is currently building the largest scientific research facility to be built in the UK for 30 years. The Diamond synchrotron will produce extremely intense light beams, mainly as X-rays, that can penetrate deep inside all kinds of matter from proteins to plastics to support world class research. The synchrotron is being built 10 miles south of Oxford and the first beamlines will be operational in early 2007.

**Biological Safety Officer**

Salary: c.£31 k

We are seeking a highly motivated Biological Safety Officer to ensure compliance with statutory requirements (COSHH, GMO etc) for activities carried out at Diamond relating to biological risks. You will prepare procedures, advise on and implement best practice in a cost effective manner, undertake safety assessment of research proposals and carry out project work.

You should possess a degree in Life Science and have successfully completed an examined course in Biological Safety from a University or other recognised body. With a minimum of 2 years experience in a biological safety role, you will have strong IT and communication skills, the ability to work under pressure, adaptability, a strong team ethic and flexible approach.

We offer a competitive salary (dependant upon qualifications and experience), comprehensive benefits, a final salary pension scheme and flexible working hours.

Please visit [www.diamond.ac.uk](http://www.diamond.ac.uk) for further information about our vacancies. Electronic application forms are preferred. These are available from our website and should be submitted to [recruitment@diamond.ac.uk](mailto:recruitment@diamond.ac.uk). Application forms are also available by telephoning our recruitment line on 01235 778218 (answerphone) or by faxing 01235 778171, quoting the appropriate reference number.

Closing date: 21 July 2006.

Bodycote Food and Consumer Products

Attractive Salary Plus Excellent Pension Scheme

Bodycote LawLabs, part of Bodycote Testing Ltd, is one of the largest independent consultancy and laboratory businesses, addressing the safety and legality of food and consumer products. We currently have the following vacancies in our West Midlands head office offering the opportunity to develop your career and professional skills.

**SENIOR MICROBIOLOGIST**

Applicants will be involved in the day-to-day running of our Water and Food Microbiological laboratories which undertakes testing for major Food Manufacturers and Retailers. There will also be an opportunity to train as a LabCred Auditor, Bodycote's Laboratory Compliance Scheme that involves the assessment of the competence of laboratories as defined in ISO/IEC 17025, an internationally recognised standard.

**SENIOR ANALYST**

Applicants will be involved in the day to day running of our Nutritional and Analytical laboratories. This post will also provide an opportunity to train as a LabCred Auditor. A knowledge of Food Legislation and an interest in pursuing the MChemA qualification would be an advantage.

At least three years' supervisory experience at a contract laboratory or a Public Analyst would be required for either position

**SALARY SCALE £21,195 - £24,528**

Please send your CV to:

Scientific Copy Editors
Required for maternity leave cover

The Company of Biologists Ltd. is a highly successful not-for-profit publisher dedicated to the advancement of research in biology.

We currently have vacancies for two Scientific Copy Editors to cover maternity leave on the journal Development. This is an ideal opportunity to join the editorial team of one of CoB's leading journals.

The positions involve copy-editing and proofing scientific articles to a high standard and to strict deadlines, and liaising with authors, editors and production staff.

One position is available for an immediate start, for an initial period of up to 12 months. The other position will commence in early September 2006, for an initial period of up to 7 months. It is likely that one permanent full-time position will be made available at the end of the maternity leave cover period.

Candidates should have a degree in a relevant area of the life sciences, and previous copy editing experience is essential. Additional requirements include excellent literacy skills, high attention to detail, good interpersonal skills, a flexible approach and the ability to work to tight deadlines.

The positions will be based in The Company of Biologists' offices in Cambridge, UK.

To apply please send your CV with details of your current position and salary to: Miriam Ganczakowski, Human Resources Officer, The Company of Biologists, Bidder Building, 140 Cowley Road, Cambridge, CB4 0DL, UK or email: Miriam@thecob.demon.co.uk [2558-061 (2006) : 84]
GERARD LABORATORIES

MERCK generics

Gerard Laboratories, a wholly owned subsidiary of Merck KGaA, is the principal European manufacturing and supply facility for the Merck Generics Group, one of the top three Generic Pharmaceutical Companies worldwide.

Founded in 1986, Gerard Laboratories products cover a wide range of therapeutic areas including gastrointestinal and cardiovascular medicines and currently employs in excess of 320 staff. Due to increased business demand and significant new product development activity, we are now seeking to recruit the following high calibre candidates within Research and Development area:

**Formulation Development Manager**
Provide technical leadership and management to the Formulation and Process Development groups across multiple projects. Duties include:
- Plan and monitor the development of new solid-dose drug products, from initial formulation development through to pilot plant manufacture
- Oversee the manufacture of drug products in the Pilot Plant for pre-clinical/clinical purposes
- Oversee the technical transfer of new products into the commercial manufacturing network
- Ensure that all activities and the facilities are compliant with relevant regulatory standards
- Support the submission process through the provision of documentation to regulatory submissions

Degree qualified in Chemistry or Pharmacy, you will possess at least 5 years supervisory experience in a GMP pharmaceutical development laboratory.

**Formulation Scientist**
Formulation scientists are required to develop solid-dose drug products. Duties include performing and reporting lab scale experimental work, conducting scale-up activities and clinical manufacturing in the pilot plant, and facilitating the technology transfer of new products into the commercial manufacturing network.

Degree qualified in Chemistry, Pharmacy or relevant discipline, applicants should have at least 2 years experience in development of solid-dose products.

**Analytical Scientist**
Analytical scientists are required to provide analytical support during the development of solid dose drug products. Duties are varied and include methods development and validation, provision of analytical support during formulation development and manufacture of drug products, release testing and conducting stability studies. You will have experience of working to GMP standards and will have a good practical knowledge of HPLC, GC, Dissolution and UV.

Degree qualified in Chemistry or relevant discipline, applicants should have at least 2 years experience in pharmaceutical analytical development.

For more information on these roles please call Seona Ramsay on 0161 868 2200 and forward a CV in word document format to gerard@uib.srg.co.uk

Environmental Consultants – Asbestos

Already a world leader in conformity assessment and performance evaluation, Bureau Veritas is one of the UK's leading environmental consultancies in the asbestos related field.

As awareness of the dangers of asbestos increases, more emphasis is made of corporate responsibility. Individual directors, property owners, managers and controllers face personal liability in the event of litigation, so there is fast rising demand for our long established and growing expertise in risk and asbestos management.

You will advise on the full suite of asbestos related services including testing, surveying, sampling and analysis to ISO17025 and Inspection Body standards. In addition, you'll acquire the specialist skills and knowledge to conduct consultancy in a UKAS accredited environment.

Experienced Consultants  London, Midlands, North, Scotland
You will carry out vital asbestos surveys and air monitoring and, ideally, will have P401/P402/P404 or S301/CCP qualifications. These are great opportunities to work at the forefront of the industry in a renowned team with a reputation for excellence.

Trainee Consultants  London & Home Counties
These are fantastic training opportunities if you have been educated to at least A-level or equivalent standard. You should have some experience, or a keen interest in, environmental control, particularly related to hazardous materials, dust and fibres.

In either case, you must have excellent communication skills and the ability to work both alone and as part of a team.

Please send your full CV to Natalie Crafts, Human Resources, Bureau Veritas UK, Tower Bridge Court, 224-226 Tower Bridge Road, London SE1 2TX. Email: natalie.crafts@uk.bureauveritas.com

A post-doctoral scientist with around 7 yrs experience of non-radiometric assay development. Expert knowledge of enzyme kinetics and principles of HTS assay design with demonstrated team leader skills.

SNR PURIFICATION / EXPRESSION SCIENTIST
A post-doctoral scientist with around 5 years experience gained within academic or industrial R&D. The successful applicant will be highly accomplished in all aspects of Protein Purification.

DRUG DISCOVERY TECHNICAL SERVICES ASSOCIATE
A post-doctoral scientist with industry experience gained from within a signalling lab coupled with practical experience of working with signalling enzymes. The role will involve the provision of technical support and report dispatch to clients.

BIOINFORMATICS SCIENTIST / PROJECT MANAGER
Undergraduate science or computing degree coupled with a postgraduate degree/diploma in IT and 1-2 years relevant work experience. Manage the IT software package Activity Base and reporting for a large custom Screening project.

Excellent Salary & Benefits package. Where applicable relocation assistance is available.

Please email your CV and covering letter marked for the attention of Helen Craig to h CRAIG@KELLYSERVICES.co.uk or call 0141 331 9070.

KELLY Talent at work
[2558-068 (2006) : 87]
DANIOLABS
AQUARIUM MANAGER (REF DNL004)

Applications are invited for the key position of Aquarium Manager of DanioLabs, an ambitious, rapidly growing, successful biotechnology company based in Cambridge, UK. DanioLabs utilises a zebrafish technology platform for neurology and ophthalmology drug discovery.

The successful candidate will be expected to have experience of breeding and maintenance of zebrafish, of aquatic system monitoring and supervision/training of staff. Flexibility, good communication and organisational qualities as well as team leadership skills are essential for this key role within DanioLabs. Previous experience as a NACWO would be an advantage.

RESEARCH ASSISTANT (Ref DNL005)
A high calibre, motivated scientist is now sought to join our team. The position available offers a unique career opportunity in disease modeling and drug discovery. Honours degree in biology, biochemistry or equivalent is essential, as are flexibility and team working skills, attention to detail, good organizational skills and excellent record keeping. Previous laboratory experience in industry or in using zebrafish as a model organism would be an advantage but is not essential.

DanioLabs offer a competitive salary and benefits package. Applicants should send their curriculum vitae together with a covering letter and names of two referees by 31st July 2006 by e-mail to recruitment@daniolabs.com or directly to DanioLabs Ltd, 7330 Cambridge Research Park, Cambridge, CB5 9TN, U.K.

PACE yourself  
Pioneering. Achieving. Caring. Enduring

**Senior Chemist** Kent Excellent Package  
API Products, Manufacturing Sciences and Technology

The four values that dictate our approach, our focus, and our goals. It is through these ideals we ensure our commitment to translating science into lasting contributions to health.

This is an excellent opportunity to utilise your talents gained through a PhD degree in Organic Chemistry and at least five years' work experience in this field, to contribute to our success.

Happy to work independently in the laboratory - synthesising active pharmaceutical ingredients, conducting laboratory and pilot process justification and range finding experiments - you're adept at managing multiple projects and processes simultaneously and effectively. You'll be analysing process data, using statistical tools to identify production problems and giving your recommendations for corrective action. Conceiving, planning and conducting advanced independent research in process development, using well-known analytical techniques, will also be part of your remit. With your credibility, you'll be comfortable representing your department internally and externally on varied projects with specific groups.

Uniquely, you'll be working on multifunctional product teams, so your strategic planning, excellent interpersonal and communication skills will come to the fore. Your team will include organic chemists, analytical chemists, engineers, PAT technologists and pharmacists. If you've got experience in technical transfers, physical chemistry and modelling of processes, so much the better. A willingness to travel approximately 20% of the time will be essential.

Abbott is a global, diversified company dedicated to the discovery, development, manufacturing and marketing of healthcare products and services. Abbott is one of the world's largest and most successful companies with a presence in 130 countries, employing in excess of 60,000 employees worldwide.

To take advantage of this interesting challenge, please send a CV and covering letter to Les Muggeridge, HR Director, Human Resources, Abbott, North Road, Queenborough, Kent ME11 5EL. Email: ukqueenboroughhr@abbott.com

Abbott  
A Promise for Life  
[2558-070 (2006) : 88]
Applications are invited from enthusiastic, well-motivated and organised individuals who would like to fill one of these key posts and join a specialist laboratory supporting one of the largest haematopoietic stem cell transplant and immunotherapy programmes in the country.

The laboratory has recently relocated into a new purpose built facility and is seeking approval against a number of regulatory standards.

Stem cells are our speciality.

The post holders will be involved in all aspects of processing (including immunoselection protocols), cryopreservation, flow cytometry and other quality testing. Post holders will additionally be involved in service developments such as validation, introduction of new techniques into the laboratory, quality system development, training, data management and assisting in translational research bringing new cytotherapies into clinical practice.

Applicants must hold HPC Registration and an appropriate MSc and/or FIBMS. Ideally applicants should have direct experience in this field or in a related area such as Haematology, Blood Transfusion or Immunology. In order to meet the needs of a high quality clinical service the post holder will be expected to be flexible in their working arrangements and be able to demonstrate the ability to work consistently to the highest standards.

To obtain further details and to discuss the positions, or to arrange an informal visit to the laboratory, please contact Sandra Loaiza or Penny Elsey on 020 8383 2076.

For an application form please call our Recruitment Line on 0870 7702363 quoting reference number HJF/P/149. Or you can apply online at www.healthjobfinder.com

Closing date for applications is Thursday 20th July.
KVL
A UNIVERSITY OF LIFE SCIENCES

ASSOCIATE PROFESSOR in Biophysics

KVL, Department of Natural Sciences wishes to appoint an associate professor in biophysics from September 1st 2006 or as soon as possible thereafter.

The associate professor's duties will include research and research-based teaching in biophysics, in particular molecular biophysics. The appointee should have qualifications within the following areas:

Biophysical characterisation of biological structures and macromolecular aggregates in solution e.g. using scattering techniques (SANS, SAXS, SLS, DLS).

Structural and dynamical studies of self-organisation and self-organisation processes for biological macromolecules, in particular self-organisation of amphifiles/lipids, (bio)polymers and proteins in solution.

Employment and remuneration will be according to the Agreement between the Danish Ministry of Finance and the Danish Confederation of Professional Associations.

The full job advertisement with further information on job description, qualification requirements and formal requirements for the application is available at www.kvl.dk/jobs.

The closing date for applications is July 14th 2006 at 12.00 noon.

KVL carries out technically advanced research and education within the veterinary, agricultural and human nutrition areas - as well as related fields of natural science. The university has 3,500 students (incl. approx 400 PhD students), 1,700 man-years and an annual turnover of DKK 7.2 billion.

In accordance with KVL's equal opportunities policy, we invite applications from all interested individuals regardless of gender, age, ethnicity or religion.

For more information on KVL see uk.kvl.dk

Studying at the University of Ulster

Research Studentship in Marine Ecology

Applications are invited for a research studentship in Marine Ecology, investigating monitoring methods for assessing change in seabed habitats. Candidates should hold, or expect to hold by 15 August 2006, a first or upper second class honours degree in a Biological Science or Marine Science or a cognate area. Successful candidates will enrol as of October 2006, on a full-time programme of research studies leading to the award of the degree of Doctor of Philosophy.

The studentship will comprise fees (at the Home and EU rate only) and an annual stipend of £12,300. The studentship will be awarded for a period of up to three years subject to satisfactory progress. The studentship is tenable in the Faculty of Life and Health Sciences at the Coleraine campus.

The closing date for receipt of completed applications is 14 July 2006.

Interviews will be held during 15 August 2006.

Measuring change in seabed habitats in marine Special Areas of Conservation (SACs) is necessary to determine if the conservation status of a particular area is changing. This research project is funded through Environment and Heritage Service and will focus on assessing and developing monitoring methods for measuring changes in benthic habitats in SACs. The Research project will assess the utility of a range of survey methods (e.g. underwater video mosaics, acoustic surveys, grab sampling) and will involve a mixture of field- and lab-based studies. Scuba diving experience would be beneficial but not essential.

If you wish to discuss the project please contact:
Dr. Rory Quinn (rj.quinn@ulster.ac.uk) or Dr. Craig Brown (c.brown@ulster.ac.uk).

Application materials may be obtained from:
Hazel Campbell, Research Office, University of Ulster, Cromore Road, Coleraine, Co. Antrim BT52 1SA, T: 028 7032 4729, E: hj.campbell@ulster.ac.uk or visit website http://ulster.ac.uk/researchstudy

UU
UNIVERSITY of ULSTER
[2558-073 (2006) : 89]
BioComposites Centre

**Head of Materials**
Starting salary: £23,182 - £27,929 (on ALC Grade 2) p.a.

BioComposites Centre is a self-financing unit at the University of Wales, Bangor with well-regarded, unique and long-standing capability in the processing and utilisation of natural products for industrial uses. As well as occupying recently refurbished laboratories, it is now completing the establishment of pilot scale facilities for high capacity fibre handling and processing. The development of new industrial materials and products from natural resources is a strategic priority for BioComposites Centre.

We currently have a vacancy for a self-motivated, enthusiastic and innovative person. You will head a team of 7 scientists and technicians and assume responsibility for the natural materials research programme, commercialisation strategies and income generation. This is an excellent opportunity for an ambitious self-starter to develop applied research programmes and consultancy services in the area of natural materials.

You will have an excellent academic background, excellent communication and organisational skills and be skilled in information technology.

Application forms and further particulars should be obtained by contacting Human Resources, University of Wales, Bangor; tel: (01248) 382926/388132; e-mail: personnel@bangor.ac.uk; web: http://www.bangor.ac.uk

Please quote reference number 06-5/218 when applying.

For further details and an informal discussion about the post, potential applicants are encouraged to contact Paul Fowler, Director, tel: (01248) 383041.

The Leibniz Institute for Natural Product Research and Infection Biology - Hans Knoell Institute - and the Friedrich-Schiller-University Jena, Institute of Microbiology, plan to establish a joint Junior Research Group in the field of Microbiology and invite applications for the Group leader position.

The successful candidate should be an excellent, highly motivated postdoctoral scientist with proven leadership abilities. Applicants should work with modern genomic technologies on microbial, preferentially fungal interactions mediated by secondary metabolites, or the pathogenicity of human-pathogenic fungi.

A longer stay in a laboratory outside of Germany after obtaining the PhD is advantageous. The position includes a five-year grant (3 PhD student positions, 1 technician, generous supply budget, investments) and will be hosted at the Dept, of Molecular and Applied Microbiology (Head Prof. Axel A. Brakhage) of the Hans Knoell Institute.

The junior research group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. (www.hki-jena.de, www.beutenberg.de)

Successful applicants will have demonstrated the ability to perform top international research in Microbiology / Molecular Biology. Participation in teaching is expected.

The Hans Knoell Institute is an equal opportunity employer.

Complete applications should include a research plan, a list of three potential references and should be submitted referring to HKI job posting No. 03/2006 by July 31, 2006 to: jobs@hki-jena.de

or to:
Leibniz Institute for Natural Product Research and Infection Biology - Hans Knoell Institute - Personnel Department Beutenbergstrasse 11a, 07745 Jena, Germany
[2558-075 (2006) : 90]
Data manager
Salary: £22,870 - £26,120 per annum

We are seeking someone with excellent organisation skills to join the coordinating data centre of a global, inter-cooperative group, randomised clinical trial designed to test a new hormonal treatment for post-menopausal patients with early breast cancer.

You will join an established team of data managers working at Imperial College's International Collaborative Cancer Group based at Charing Cross Hospital in Hammersmith, West London. You will be responsible for day-to-day liaison with several globally-located collaborative trials groups so good written and verbal communication skills are essential. Data management responsibilities are mainly administrative and include the entry of patient data into a clinical database, the review of patient data listings and the preparation of data queries where errors or inconsistencies are found.

Meticulous attention to detail and excellent organisational skills are vital for this role.

This office based role would suit a biology graduate keen to pursue a career in clinical trials. No previous experience of data management is necessary.

The post is for 12 months in the first instance.

For an application form and job description please visit http://www.imperial.ac.uk/employment/administrative or write to the address below.

Please send your application form, which should cover your response to the Person Specification to the Recruitment Assistant, Imperial College London, Faculty of Medicine, HR, Charing Cross Campus, Reynolds Building, St Dunstan's Road, London W6 8RP quoting reference CJ 49 06. Please note that a completed application form must accompany all applications. Previous applicants need not apply.

Closing date: Midday, 13 July 2006.

[2558-077 (2006) : 90]
Faculty of Medical and Human Sciences  
Division of Medicine and Neurosciences – Hope Project Manager (IIDII Study)  
Ref: MHS/237/06 £31,525 - £38,772 p.a.  
The second infectious intestinal disease study (IIDII Study) will determine the burden of infectious intestinal disease in the community and to calibrate national surveillance systems in the United Kingdom.  
The study involves a prospective cohort study and a telephone survey of self reported illness.  
You will have a leading role in co-ordinating and monitoring the project and are required to have excellent communication and presentation skills and a strong ability to motivate and lead others. When faced with challenges, you will show enthusiasm, initiative, innovation and leadership. Clear planning and problem-solving skills, a fine attention to detail, the ability to multi-task and the flexibility to work to short deadlines are required. Experience of project management is essential and experience of multi-centre research project management is desirable but not essential.  
The post is based in Manchester but will also require travel to practices and research meetings.  
Informal enquiries can be made to Sarah O'Brien on +44 (0) 161206 1883 or email: sarah.o'brien@manchester.ac.uk  
Application forms and further particulars are available from our website. If necessary, you can obtain them from +44 (0) 161 275 8835 or email: mhs-hr@manchester.ac.uk  
Closing date: 14 July 2006. Interview date: 25 July 2006.  
Faculty of Life Sciences  
Research Technician  
Salary £15,508 - £20,235 p.a.  
Ref: LS/097/06  
This post is tenable for up to three years to assist with investigating antigen presenting cell-mediated regulation of autoimmunity. You will be associated with a highly active immunology research group, working under the direction of Dr. Douglas Millar in state-of-the-art research facilities. You will work in a multi-disciplinary team of postgraduate scientists and students, within a larger multi-user research lab.  
You must be educated to at least ONC level (or equivalent) in any biological science discipline. You must be able to work independently, have an interest in learning new techniques and possess excellent communication skills. Work will involve molecular biology, mammalian cell culture, protein purification, histology, and examining in vivo models of immune function. Practical experience of these, along with experience of working in a research environment, would be advantageous.  
Application forms and further particulars are available from our website. If necessary, you can obtain them from Gary Porteous on +44 (0) 161275 3909 or email: gary.porteous@manchester.ac.uk  
Closing date: 15 July 2006.  
School of Chemistry and School of Materials  
Postdoctoral Research Associate in Chemometrics  
Ref: EPS/213/06
A Research Associate is required to work as part of a large UK Home Office funded project entitled "Surface enhanced Raman spectroscopy-based probabilistic biological agent detector". This interdisciplinary project involves a consortium of six academic groups from the University of Manchester and aims to develop a Raman spectroscopic approach for the rapid unequivocal identification of microorganisms. The consortium includes chemists, analytical scientists and informatics experts and will be primarily based in the Manchester Interdisciplinary Biocentre.

The signals from SERS and leaky waveguides arrays will need to be matched against spectral data previously collected and held in a database. You will develop the software to analyse these signals so that robust probabilistic library matching can be achieved. Primarily, you will be based in the Laboratory for Bioanalytical Spectroscopy of the School of Chemistry.

If prospective applicants would like to discuss the post informally, please contact Professor Goodacre via email: roy.goodacre@manchester.ac.uk

Closing date: 13 July 2006.

School of Chemical Engineering and Analytical Sciences and Manchester Interdisciplinary Biocentre
For the Manchester EPSRC/BBSRC Doctoral Training Centre: Integrative Systems Biology from Molecules to Life

Using modern mathematics and bioinformatics to make computer models of what functional genomics reveals of living organisms and by engaging in the corresponding quantitative experimentation, Systems Biology seeks to understand how molecules are guided to self-organise into complex processes. These include the cell cycle, reproduction, adaptation to a variety of challenges, robust fluxes and the formation of complex structures www.systemsbiology.net

Following substantial investments in the brand-new Manchester Interdisciplinary Biocentre-MIB www.mib.ac.uk/ the Manchester Centre for Integrative Systems Biology - MCISB www.mcisb.org/ and the AstraZeneca Chair of Systems Biology, The University of Manchester is now becoming unique world-wide by also having a Doctoral Training Centre for Systems Biology funded by EPSRC and BBSRC. Inspired by the research of many top scientists in Systems Biology, students with biological and medical backgrounds will be teamed up with students from a physical science/engineering/mathematics background to engage in extensive experimental and theoretical training in Systems Biology in the MIB and in partner groups all over the world.

Lecturer/Deputy Director Ref: EPS/180/06
Salary range £31,525 - £38,772 p.a.
You will organise the teaching of the courses, teach some of them, coach the doctoral students and manage the centre on a day-to-day basis with assistance of a personal assistant, an administrator and two experimental officers. You should also engage in top level Systems Biology research in the MCISB, with some of the doctoral students and with others.

With extensive and excellent research and academic teaching experience in an area related to Systems Biology, you will also have sufficient background knowledge of the areas to serve as a basis for teaching diverse aspects thereof.

Experimental Officers (2 posts) Ref: EPS/179/06
Salary £24,886 p.a.
Required for a period of four years, one for 'wet' and one for 'dry' Systems Biology, you will assist the Deputy Director in defining and organising training courses, teaching experimental and numerical techniques, ensuring that experiments and computation run smoothly for the students and providing further assistance to the students during their research projects. Requirements include extensive research experience with either biochemistry/functional genomics or in computer use, proven ability to teach
techniques to students, ability to continue to interact with the research community of the MCISB ensuring an optimal immersion of the doctoral students into top notch systems biology.

Both posts are tenable for a period of four years.

Closing date: 16 July 2006.

Application forms and further particulars for the above three posts are available from our website. If necessary, you can obtain them from +44 (0) 161 275 8837; Fax: +44 (0) 161 306 4037 or email: eps-hr@manchester.ac.uk

For all posts, please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

[2558-078 (2006) : 91]
Faculty of Science
School of Life Sciences

Lecturer in Forensic Science
£29,850 - £32,448 pa inc.

The School of Life Sciences at Kingston University is recognised for its excellent teaching quality and has recently expanded its portfolio of courses to include a new BSc (Hons) in Forensic Biology. This new course will join our already established BSc (Hons) In Forensic Science and Investigative Analysis.

We are therefore seeking to appoint a Lecturer in Forensic Science who will complement our current teaching team and contribute to the teaching and administration of our courses. You would be expected to support developments in the Field which would allow the courses to diversify particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations. We would welcome applications from individuals with professional experience or with an academic/research background in forensic science.

In particular we would welcome applications from individuals who have experience in forensic applications of DNA.

You will be expected to contribute to teaching and to the development of research in your particular area of expertise.

For an informal discussion please contact the Acting Head of School, Dr Alan Seddon on 020 8547 2000 or, email A.Seddon@kingston.ac.uk

For further information or to apply online, visit our website www.kingston.ac.uk/jobs If you need to apply in an alternative format, please call the recruitment line on 020 8547 7153 quoting reference 06/201. If you are a minicom user, please phone 020 8547 7169.

Closing date: 12 noon on 10th July 2006.
Interview date: 20th July 2006.

We investigate the pathobiology of human-pathogenic fungi and identify targets for the development of novel natural product-based antibiotics. To get a better understanding of fungal infection mechanisms and for the study of drug distribution in animal models the Junior Research Group Innovative Imaging Techniques will be established. We are seeking an excellent, highly motivated Postdoctoral scientist for the

**Group leader position**

The successful candidate should be graduated in physics with proven leadership abilities. Alternatively, applying biologists, veterinarians or pharmacologists should have a comprehensive technical background.

The objective is *in vivo* study of functional processes in small animals using a newly to establish high resolution computer tomography / positron emission tomography system (CT/PET). Metabolic reactions, drug delivery as well as fungal infection mechanisms should be investigated real-time in the living animal at the cellular level.

The position includes a five-year grant, (2 PhD student positions, 1 technician, generous supply budget, investments) and will be hosted at the Dept. of Cellular and Molecular Biology (Head Prof. Hans Peter Saluz).

The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. ([www.hki-jena.de](http://www.hki-jena.de), [www.beutenberg.de](http://www.beutenberg.de))

Ideally, applicants should link superior operation of the CT/PET system with excellent skills in animal handling.

The Hans Knoell Institute is an equal opportunity employer.

Complete applications should include a research plan, a list of three potential references and should be submitted referring in HKI job posting No. 04/2006 by August 31, 2006 to:

`jobs@hki-jena.de` or to:

Leibniz Institute for Natural Product Research and Infection Biology - Hans Knoell Institute - Personnel Department Beutenbergstrasse 11a, 07745 Jena, Germany

[2558-081 (2006):92]
Postdoctoral Research Associate in Nutritional Biochemistry Ref. RA291
£20,044 to £30,002 per annum increasing to £26,402 to £31,525 per annum (from 01/08/06)
This is a new fixed-term, full time post for up to 3 years within the Diet and Health Research team, located within the Population Health Group of the School of Medicine, Health Policy and Practice at UEA, to complement the growing research interest in Diet and Health within the School and drive forward a collaborative research programme with other partners at UEA and the BBSRC-funded Institute of Food Research. UEA's new state of the art BioMedical Research Centre provides an attractive and academically stimulating environment for building research programmes of international standing.

You must possess a PhD degree (or evidence of several years postgraduate research) in nutrition/biological sciences or related area, and relevant research experience. Research experience in conducting human intervention studies, analytical/laboratory skills (including -omics technologies), systematic reviewing and an interest in translational research to complement the current expertise would be an advantage.

Closing date: 7 July 2006.

Further particulars and an application form should be obtained from the University’s web page at: http://www.uea.ac.uk/jobs/ or by e-mail at: hr@uea.ac.uk or by calling the answerphone on 01603 593493 or by mail to the Human Resources Division, University of East Anglia, Norwich NR4 7TJ.

POSITIVE ABOUT DISABLED PEOPLE
[2558-082 (2006) : 92]
You will work on a collaborative project on the structures of protein folding catalysts and their interaction with partly-folded substrates.

**Post Doctoral Researcher** - based at University of Warwick
Department of Biological Sciences Structural Biology
£20,044 - £30,002 p.a.
Reference number: 53164-066
Fixed Term Contract for 2 years
You will generate catalysts and substrates and characterise their interaction using a range of chemical and biophysical methods. You will require a first degree in biological or physical science and a PhD in biochemistry, biophysics or equivalent. You will have experience with a range of physical methods for protein characterization, preferably including high field NMR.

See background information at [www.warwick.ac.uk](http://www.warwick.ac.uk) and apply to University of Warwick.

Informal enquiries: Professor Robert Freedman, +44 (0) 2476 523516 ([r.b.freedman@warwick.ac.uk](mailto:r.b.freedman@warwick.ac.uk))

Closing date for both posts: 7 July 2006
The Leeds Institute of Molecular Medicine
UNIVERSITY OF LEEDS
Faculty of Medicine and Health

Research Technicians
Chromosomal Translocations, Cancer Therapy
Targets and Chemical Cancer Biology

The Leeds Institute of Molecular Medicine (LIMM) is a new institute within the Faculty of Medicine and Health dedicated to translational medical research.

The Section of Experimental Therapeutics is headed by Professor Terence Rabbitts (Director of LIMM) and based in a new building at St James's University Hospital site. It is one of 11 Sections within LIMM and comprises research groups investigating the causes of cancer and other human diseases and developing novel therapies.

The programme "Chromosomal translocations, cancer therapy targets and chemical cancer biology" combines a multifaceted approach to understanding the role of chromosomal translocations in cancer initiating cells and the development of novel therapeutics designed to affect the interactome of the cancer cell. Various approaches include gene cloning at translocation junctions, structural biology of translocation-proteins, transgenic models and development of new macromolecular drugs (macrodugs) to interfere with protein-protein or protein-nucleic acid interactions.

Candidates must have a BSc in a biological subject and relevant research experience would be an advantage. All posts are available immediately.

Genetic engineering of cancer-associated mutant genes
You will take a lead role in the parts of the programme involving genetic manipulation of cancer genes and DNA cloning to generate recombinant DNA vectors for protein expression in mammalian cells. In addition protein expression in bacteria will be undertaken to prepare material for structural studies. You will work with others in the group to study gene expression and cell differentiation in the presence or absence of macrodrugs to define pathways of gene control and assess therapeutic potential. Job ref 124009

Chromosome engineering of cancer genes in ES cells
You will take a lead role in the parts of the programme involving chromosome engineering mainly in mouse embryonic stem (ES) cells. The work will include use of genetic manipulation of ES cells as well as growth, maintenance and generation of new ES cell lines. In addition, studies of gene expression in differentiating ES cell in culture will be required as well as comparing the effects of gene targeted mutations. Job ref 124010

Cancer genes and chromosomal translocation models
You will take a lead role in the parts of the programmes involving transgenic models. The work will include generation of transgenic constructs by genetic engineering, microinjection of pronuclei and blastocysts, genotype and phenotype analysis of transgenic lines and analyse gene expression in transgenic lines. Possible therapeutic effects of macrodrugs will also be studied. Job ref 124011

University Grade 6 (£20,235 - £24,886 p.a.) depending on qualifications and relevant experience

Informal enquiries to Professor Terence Rabbitts email t.rabbitts@leeds.ac.uk To apply online please visit http://www.leeds.ac.uk and click on 'Jobs'.

Alternatively application packs are available from Jennifer Flowerdew, Leeds Institute of Molecular Medicine, Wellcome Trust, Brenner Building, St James's University Hospital, Leeds LS9 7TF tel 0113 343 8441
email j.h.flowerdew@leeds.ac.uk

Closing date for all posts 20 July 2006

We welcome applications from all sections of the community. Textphone for deaf applicants only 0113 343 4353. All information is available in alternative formats please contact 0113 343 4146.

WORKING TOWARDS EQUALITY AND DIVERSITY

www.leeds.ac.uk
Faculty of Science  
School of Life Sciences

Kingston University has recently been actively developing its Sports and Exercise Science courses. In the 2001 QAA teaching quality subject review, Sports Science at Kingston was awarded an excellent 22/24 points. Since then, we have started a new exercise focused course and extensive new laboratory facilities have been built.

All staff are actively involved in research and consultancy. For more information about the course and course team, please visit our website: www.kingston.ac.uk/sportex

**Lecturer in Exercise and Health**  
£29,850 - £32,448 pa inc.  
Appointment effective from 1st September 2006 Ref: 06/203  
We are seeking a highly motivated individual to play an important role in the delivery of our Exercise, Nutrition and Health Courses. Specifically, you should be able to contribute to teaching of Growth and Development, Physical Activity and Health Promotion, Exercise Prescription and Research Methods within the Sports and Exercise field.

Applications would be particularly welcomed from candidates who are BASES accredited. You will be expected to contribute to course administration and to pursue research and consultancy activities. Professional experience, and/or experience in degree level teaching would be desirable but not essential and candidates with a PhD would be preferred.

**Lecturer in Sports and Health Psychology**  
£29,850 - £32,448 pa inc.  
Appointment effective from 1st September 2006 Ref: 06/202  
We are seeking a highly motivated individual to contribute to the delivery of our Sports Science courses. Specifically, you will be expected to teach Sports Psychology, Health Psychology, Psychological aspects of organisational behaviour and research methods.

You will also be expected to contribute to course administration and to pursue research and consultancy activities. Candidates with a PhD and experience in degree level teaching would be preferred. BASES accreditation would also be welcomed, but is not essential.

For an informal discussion regarding either post, please contact Dr Alan Seddon, School of Life Sciences, on 020 8547 2000 or email: A.Seddon@kingston.ac.uk

Closing date: 12 noon on 10th July 2006.

Interview date: 18th July 2006.

For further information or to apply online, visit our website www.kingston.ac.uk/jobs If you need to apply in an alternative format, please call the recruitment line on 020 8547 7153 quoting the relevant reference. If you are a minicom user, please phone 020 8547 7169.

[2558-086 (2006) : 94]
UCL
UCL Department of Biochemical Engineering
The Advanced Centre for Biochemical Engineering (ACBE)

Manager, Bioprocess Leadership Activities
University College London (UCL) is a leading international provider of research and training in the field of bioprocessing especially in collaboration with the industrial sector. Over 160 national and international biopharmaceutical and biotechnology companies have sent delegates to the internationally-renowned MBI® training programmes offered by a team of academic and industrial experts. Similarly more than 50 companies have key research linkages with the ACBE for the purpose of creating new bioprocessing skills. In particular these training and research activities relate to new ways to make available advanced healthcare materials including next generation bio/pharmaceuticals and regenerative medicines.

We are seeking a highly motivated Scientist/Engineer offering a skill base in the marketing and enabling of the collaborations which underpin such research and training activity. In particular the successful applicant will be keen to act as a manager of the interface between the academic staff, the industrial experts and the researchers and delegates benefiting from our bioprocess leadership initiatives. Where appropriate the Manager will be given control of a wider range of activities as overall Director of Bioprocess Leadership Activities.

The salary for the position will be in the range of £31,525 - £44,947 with £2,400 London Weighting in addition. The salary and position offered will be commensurate with experience.

Further information on the ACBE activities can be gained from www.ucl.ac.uk/biochemeng

Interested applicants should obtain an application pack from Miss Paula Thomas, Department of Biochemical Engineering, University College London, Torrington Place, WC1E 7JE (Tel: 020 7679 7031 or email: paula.thomas@ucl.ac.uk). Applications quoting Manager/Director should be sent to that address.

Closing date for receipt of applications: 17 July 2006.

We particularly welcome female applicants and those from an ethnic minority as they are under-represented within UCL at this level.

[2558-087 (2006) : 95]
The University of Edinburgh
THE UNIVERSITY OF EDINBURGH

The University of Edinburgh is an exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow's world.

Temporary Lectureship in Physical Chemistry
£24,352 - £27,929

You must be prepared to teach Physical Chemistry at all levels. You will be encouraged to take the opportunity to conduct research independently or in collaboration with others in the School. This post is fixed-term for three years and the start date will be 1 September 2006.

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131 650 2511. Ref: 3005924NS. Closing date: 7 July 2006.

Committed to Equality of Opportunity

[2558-088 (2006) : 95]
We investigate the pathobiology of human-pathogenic fungi and identify targets for the development of novel natural product-based antibiotics. In a joint research project between the Hans Knoell Institute, the Friedrich-Schiller-University Jena and the Leibniz Institute for Age Research - Fritz Lipmann Institute, the research area Dermatophytic Fungi will be established. The project is funded by the governmental Pact for Research and Innovation. We invite applications for a

**Postdoctoral position**

Successful candidates should be excellent, highly motivated scientists. The Post Doc should have coordinative abilities.

The objective is fungal genome analysis combined with molecular typing and diagnostics of clinical isolates, investigation of pathomechanisms and immune evasion processes, and bioinformatics.

The group leader will be hosted at the Dept. of Molecular and Applied Microbiology (Head Prof. Brakhage) of the HKI.

The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. ([www.hki-jena.de](http://www.hki-jena.de), [www.beutenberg.de](http://www.beutenberg.de))

Applicants should have an excellent knowledge of molecular biology and English communication skills.

The Hans Knoell Institute is an equal opportunity employer.

Complete applications should include a list of three potential references and should be submitted referring to HKI job posting No. 05/2006 by July 31, 2006 to: jobs@hki-jena.de or to:

Leibniz Institute for Natural Product Research and Infection Biology - Hans Knoell Institute - Personnel Department Beutenbergstrasse 11a, 07745 Jena, Germany

**Postdoctoral position**

We are searching a highly motivated Ph.D. trained in molecular biology and/or biochemistry. The position is available immediately for a period of 3 years initially and will be hosted at the Department of Cell- and Molecular Biology (Prof. Hans Peter Saluz). An internationally competitive income will be provided.

Research is devoted to the study of stress-related mammalian host cell/tissue-response reactions, arising naturally by interactions with pathogenic microorganisms, preferentially fungi or intracellular bacteria. To that end we are seeking a scientist specialized in one of the following fields of pathogen/host-interactions: FISH (cell/tissue), immunohistochemistry, apoptosis, necrosis; or of gene expression: ChIP, siRNA libraries.

The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups (www.hki-jena.de, www.beutenberg.de).

The Hans Knoell Institute is an equal opportunity employer.

Complete applications should include a CV, list of publications, brief statement of research experiences and a list of three potential references, and should be submitted referring to HKI job posting No. 06/2006 by August 31, 2006 to:

jobs@hki-jena.de or to:

[2558-090 (2006) : 95]
**PhD studentship**: Application of full-scale aerobic treatment technology for achieving landfill stabilisation

Up to £45,000 over 3 years, plus tuition fees available to suitably qualified candidates

Conventional landfill disposal encourages waste decomposition processes that operate anaerobically. Such processes typically take many decades to complete. This project will characterise the performance of an aerobic landfill treatment process installed at a closed landfill site in the UK. Both technical and economic appraisal will be required, underpinned by a comprehensive sampling and analytical programme to identify benefits, disbenefits, risks and constraints.

Applicants should preferably be a process engineer or chemist and should have, or expect to gain, a First or Second class UK Honours degree or equivalent. The ability to work on-site is required.

If you are interested in this studentship please ensure you refer to the eligibility criteria on our website at: [www.cranfield.ac.uk/sims/studentships/139.htm](http://www.cranfield.ac.uk/sims/studentships/139.htm) before applying.

For further details and an application form please contact SIMS Enquiries, quoting ref: NS30/06. Closing date: 31st August 2006.

T +44 (0) 1234 754086
E: sims.enquiries@cranfield.ac.uk
W: [www.cranfield.ac.uk/sims/studentships](http://www.cranfield.ac.uk/sims/studentships)

From the summer of 2006 we will be known as the School of Applied Sciences.

Cranfield UNIVERSITY
[2558-091 (2006) : 96]
UNIVERSITY OF BRISTOL

Ph.D STUDENTSHIP
A fully funded three year Ph.D. studentship is available within the Centre for Chemometrics for the computational analysis of process reaction data obtained by on-line HPLC, in collaboration with industry. Candidates must be EU (including UK) citizens, and have confidence in numerical computational analysis of data, preferably with a background in chemical engineering, analytical or physical chemistry. Experience in Matlab and/or an appreciation of chromatography an advantage but not a requirement. Willingness to learn about the statistical analysis of analytical data essential. More details about the group on the website http://www.chm.bris.ac.uk/org/chemometrics/

Applicants should send a cv to Prof Richard Brereton, Centre for Chemometrics, School of Chemistry, University of Bristol, Cantocks Close, BRISTOL BS8 1TS, e-mail r.g.brereton@bris.ac.uk, phone +44-117-9287858.
[2558-092 (2006) : 96]
The Centre for Biomimetics of the University of Reading seeks a well-qualified, enthusiastic person to fill a PhD position to work in the area of insect hair mechanosensors. The studentship is fully-funded by the EU as part of the FP6-FET CILIA project in which the centre is a partner (http://www.cilia-bionics.org/). The studentship is for 3 years and is available from 1st October 2006. You should have a strong motivation for interdisciplinary research and the ability to work independently.

The research involves the experimental and numerical study of air-flow sensing hair arrays in crickets. The main aspect of the research is to characterise and quantify the mechanical and vibrational response of sensory hairs subjected to air-flow excitation. You will gain expertise in the use of various experimental (microscopy, laser vibrometry, high speed camera, micromechanical testing) and microscopy (confocal, SEM, ESAM) techniques and use them to characterise and quantify the biomechanical response of the sensing system.

You should have an Honours Degree (2.1 or above) in Mechanical Engineering, Biomechanics or Physics/Biophysics and have an understanding of vibrations, acoustics, etc. Expertise in numerical modelling, such as Finite Elements and/or Computational Fluid Dynamics, would be an advantage.

Additional information can be obtained from Prof. George Jeronimidis (g.jeronimidis@reading.ac.uk) or Dr. Richard Bonser (r.h.bonser@reading.ac.uk).

Cardiff's new MSc in Biophotonics is a unique programme offering innovative training at the interface between laser optics, cell biology and medicine. Whether you are an emerging researcher or plan a future in a biophotonics-related industry, we can provide the fundamental understanding and hands-on experience necessary for work in this rapidly developing inter-disciplinary field. The programme is jointly taught by expert scientists in the School of Physics and Astronomy and the School of Biosciences at Cardiff University.

Subject areas in this one-year full-time MSc include: Multiphoton Laser Microscopy; Cell and Tissue Imaging; Optical Biosensors; Quantum Dots as Bio-labels; Optical Tweezers; Ablation and Laser Surgery; Photo-activation of drugs and Optical Bio-chips.

A limited number of EPSRC studentships are available for excellent candidates.

For further information please contact:
Tel: 029 2057 0172 Email: mscbiophotonics@cardiff.ac.uk

[2558-094 (2006) : 96]
PHD STUDENTSHIPS

The Peninsula Medical School and the Postgraduate Peninsula Health Institute with their parent institutions, the Universities of Exeter and Plymouth, are seeking to attract PhD candidates of outstanding ability to join their exciting, and rapidly expanding, programme of internationally rated research.

As part of our new developments and our commitment to research excellence, applications are invited from potential and recent, suitably qualified graduates, 2:1 or above, for 16 full-time PhD studentships.

Stipends vary slightly (see website [www.pms.ac.uk/pms/school/jobs.php](http://www.pms.ac.uk/pms/school/jobs.php)) but will be at least the MRC current rates of £12,300 for 2006. Tuition fees will be paid at the home rate. Candidates from countries outside the European Union will be liable for the difference between 'home student fees' and 'foreign student fees'.

1. 'The role of mRNA processing in the determination of MODY phenotype'
   Messenger RNA processing can produce divergent phenotypes even for genes that are very similar at the sequence level. In this project, the effect of alternate mRNA processing of the related HNF1A and HNF1 beta genes on maturity-onset diabetes of the young (MODY) phenotype will be explored. For informal enquiries, please contact Dr Lorna Harries on 01392 406779, or email lorna.harries@pms.ac.uk  Ref: PPHI 001

2. 'Genetic Epidemiology of Common Age Related Conditions'
   Funded by US National Institute of Health this project will use epidemiological/ statistical skills to explore the effects of candidate genes on diseases of middle aged and older people. Analyses will include gene-environment interactions. For informal enquires, please contact Professor David Melzer on 01392 406751 or email david.melzer@pms.ac.uk or Dr Anna Murray on 01392 262925 or email anna.murray@pms.ac.uk  Ref: PPHI 002

3. 'The actions of insulin in the human microcirculation: an in vivo study'
   An exciting project for students interested in working with people, this project examines the function of the smallest blood vessels in man to define the mechanisms underlying the vascular actions of insulin, and whether these are altered in people who are at risk of diabetes. For informal enquiries, please contact Dr Kim Gooding on 01392 403081, or email kim.gooding@pms.ac.uk or Professor Angela Shore by email angela.shore@pms.ac.uk  Ref: PPHI 003

4. Involvement of mental health service users planning process: bridges and barriers'
   This project offers an outstanding opportunity to gain experience of working with a vibrant user-led project group, exploring ways in which mental health service users and their carers can become more central to the care process. For informal enquires, please contact Dr Christabel Owens on 01392 403462. Ref: PPHI 004

5. 'Human neutrophil-endothelial interactions in the presence of hyperbaric oxygen'
   This project investigates the mechanisms underlying the treatment of hyperbaric oxygen to heal chronic persistent wounds. It will employ molecular, cell biology and immunological techniques to explore the role of the pro and anti-inflammatory function of leucocytes, while under various pressure conditions and in contact with endothelial cells. For informal enquiries, please contact Dr Paul Eggleton on 01392 262940, or email paul.eggleton@pms.ac.uk  Ref: PPHI 005

6. ‘Structural and functional studies of the peroxiredoxin-sulfiredoxin enzyme system: do inhibitors of this system induce apoptosis in inflammatory cells’
   The PhD project will use protein structural information from the peroxiredoxin-sulfiredoxin (antioxidant) complex, in combination with whole cell experiments. The aim is to design and monitor the inhibition of this complex formation as a possible new approach to inducing the controlled death of cells involved in the inflammatory response in the rheumatoid arthritis joint. For informal enquiries,
please contact Professor Paul Winyard on 01392 262919, or email paul.winyard@pms.ac.uk

Ref: PPHI 006

7. ‘Podocyte-associated molecules and pathogenesis of diabetic nephropathy in man’
The aim of this project is to determine (a) What role do podocyte associated molecules play in the pathogenesis of diabetic kidney disease in man; (b) Is this different to their role in non-diabetic proteinuric diseases? For informal enquiries, please contact Professor Andy Demaine on 01752 437410 or email andy.demaine@pms.ac.uk or Julie Austen (Secretary) on 01752 437413. Ref: PPHI 007

8. ‘Characterisation of the role of SMN in microtubule transportation of B-Actin in mRNA’
This project seeks to explore the mechanisms underlying the debilitating disease of spinal muscular atrophy. Using an insect model, Notonecta glauca, to examine the role of SMN in B-actin mRNA transport, the student will isolate SMN-associated transport granules, and identify component proteins using molecular biology, protein biochemistry and immunohistochemistry. For informal enquiries, please contact Dr Philip Young on 01392 262939, or email philip.young@pms.ac.uk

Ref: PPHI 008

9. ‘The impact of hydrostatic pressure on metabolic pathways in human microvascular endothelial cells’
High pressure in the smallest blood vessels in patients with diabetes is accompanied by the development of diabetic kidney problems. This project aims to understand why. It uses a unique experimental model and isolated human endothelial cells to explore the effects of pressure and stretch on cell metabolism of glucose and fatty acids in healthy and diabetic conditions. For informal enquiries, please contact Dr Kim Gooding on 01392 403081, or email kim.gooding@pms.ac.uk

Ref: PPHI 009

10. ‘Cannabinoid influence on microglial activation’ Professor John Zajicek
You will join an expanding team of neuroscientists and have the advantage of being closely involved with clinical applications of laboratory science. Techniques will include cell culture (of both cell lines and human cells), immunochemistry, molecular biology as well as light, confocal and electron microscopy. For informal enquiries, please contact Professor John Zajicek on 01752 315252, or email john.zajicek@phnt.swest.nhs.uk

Ref: PPHI 010

11. ‘Cannabinoid influence on neuronal cell survival’ Professor John Zajicek
You will join an expanding team of neuroscientists to concentrate on the role of cannabinoid influence cell death/cell survival decisions in the central nervous system. For informal enquiries, please contact Professor John Zajicek on 01752 315252, or email john.zajicek@phnt.swest.nhs.uk

Ref: PPHI 011

12. ‘The Value of Health Panel: using the internet to obtain ‘societal’ utility values for policy decision making’
This studentship will build on work carried out to establish and maintain a panel of members of the public who provide preferences using the standard gamble in relation to written descriptions of specific health states via the internet. A range of hypothesis will be developed and tested in relation to the presentation of health state descriptions. For informal enquiries, please contact Dr Ken Stein by email to ken.stein@exeter.ac.uk

Ref: PPHI 012

13. ‘Defining the Role of Information Visualisation in Health Technology Assessment’
This applied and innovative research project will investigate information visualisation in the area of health technology assessment. Key aspects will be the development of prototype visualisation tools evaluated against the specified needs of relevant user-groups in the decision-making context of healthcare policy. For informal enquiries, please contact Dr Martin Pitt on 01392 406965 or email m.pitt@exeter.ac.uk

Ref: PPHI 013

14. ‘A real-time investigation of the essential components of clinical dermatological photodynamic therapy’
Skin cancer treatment by photodynamic therapy is effective but may be improved if the mechanisms responsible for successful treatment were better understood. This project examines the roles of fluorescent photo-sensitisers and intracellular oxygen concentrations in the effectiveness of this

3932
treatment. It is funded by the Duchy Health Charity. For informal enquiries, please contact Dr Alison Curnow on 01872 256432, or email alison.curnow@pms.ac.uk Ref: PPHI 014

15. ‘Comparative analysis of microtubules in Schwann cells and schwannomas’
This project will examine the regulation of Schwann cell microtubules, particularly by small GTPases, and how this is altered in schwannomas. Assessment will use cell culture and transfection techniques in conjunction with immunocytochemistry and high-resolution, fluorescent, live cell imaging of native and transfected cells. On the basis of these studies, various compounds will be tested for their ability to restore schwannomas to normal Schwann cells. For informal enquiries, please contact Professor Oliver Hanemann on 01752 437418, or email oliver.hanemann@pms.ac.uk or Dr John Chilton on 01752 437414, or email john.chilton@pms.ac.uk Ref: PPHI 015

16. ‘Molecular analysis of a cGMP-dependent mechanism involved in the regulation of pancreatic beta-cell viability’
You will employ a range of pharmacological and molecular biological approaches to identify and define the roles of the molecular components involved in a cGMP-dependent pathway that regulates pancreatic beta-cell viability. For informal enquiries, please contact Professor Noel Morgan on 01782 437412, or email noel.morgan@pms.ac.uk Ref: PPHI 016

Closing date for all posts: 12 Noon, Thursday 6 July 2006.

How to apply: Please request an application pack, quoting the relevant reference number, via: Telephone 01752437300, or email info@pphi.ac.uk or by post to: Peninsula Postgraduate Health Institute, Postgraduate Office, John Bull Building, Tamar Science Park, Plymouth PL6 8BU.

Promoting equal opportunities

PENINSULA
POSTGRADUATE HEALTH INSTITUTE
[2558-095 (2006) : 97]
PhD Studentships

Two BBSRC-funded PhD studentships are available within the internationally acclaimed Animal Behaviour and Welfare group at the School of Veterinary Science, University of Bristol, to start in October 2006. Applications are invited from graduates or final year students in the UK who have or expect to gain at least an Upper Second Class Honours degree in biological or behavioural sciences incorporating a strong component of animal behaviour.

1) BBSRC studentship (ref SCH/06/04) in the priority area of Animal Welfare

The student will examine whether farm animals are affected by the transient or mild distress or alarm of their companions. The work, based at Langford, will progress to examine whether farm animals are capable of empathic responses. The student will be supervised by Professor Christine Nicol and Dr Elizabeth Paul. Informal enquiries to christine.nicol@bristol.ac.uk

Stipend: £14,000 p.a.

2) BBSRC Industrial CASE Studentship (ref SCH/06/05), in partnership with the WALTHAM Centre for Pet Nutrition, on comparisons of ways of enriching the kennel environment for domestic dogs, including the development of novel welfare indicators for this species. Several months each year will be spent working at the Waltham Centre in Leicestershire. The student will be supervised by Dr John Bradshaw. Informal enquiries to j.w.s.bradshaw@bristol.ac.uk

Stipend: £12,000 p.a. plus £3,500 for Industrial CASE.

Website: http://www.vetschool.bris.ac.uk/research/abw

Application forms and further details (quoting SCH/06/04 or SCH/06/05) are available from: Alison Foxwell, Head of Department's Office, School of Clinical Veterinary Science, Langford House, Langford, Bristol BS40 5DU, or by telephone: 01 17 928 9401, or email: cvs-hod-office@bristol.ac.uk

Closing date: 13th July 2006.

UCL
“Life at the cutting edge”

Opportunities for Postgraduate Study at the Advanced Centre for Biochemical Engineering
BBSRC & EPSRC Masters studentships

UCL, one of the top UK multifaculty research universities, hosts The Advanced Centre for Biochemical Engineering. The Centre is examining fundamental issues related to bioprocessing of materials for human therapy such as genes, cells and tissue, vaccines, recombinant antibodies, and complex chiral pharmaceuticals. Aspects especially crucial to the new bioindustry are delivered to postgraduate students alongside participants already working in it.

The UCL Department of Biochemical Engineering holds studentship awards from the BBSRC and EPSRC to support students on its MSc Biochemical Engineering programme. Fully funded studentships are available for suitably qualified home students with backgrounds in biological science, process engineering and related disciplines.

For further details please send your CV to: Mrs P Markey, The Advanced Centre for Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE, UK or e-mail to: p.markey@ucl.ac.uk
Web: www.ucl.ac.uk/biochemeng
EPSRC
KING'S COLLEGE LONDON
DEPARTMENT OF PHYSICS
KING'S College LONDON
University of London

Masters by Research in Bio, Nano and X-Ray Photonics
Applications are invited for the above course for entry in September 2006. EPSRC funding, covering tuition fees and living costs, is available for UK residents; partial funding may also be available for EC applicants.

The MRes programme provides experience of real research in the rapidly developing interdisciplinary areas of Biophotonics, Nanomaterials, Nanophotonics and X-Ray Physics. Topics include the application of fluorescence techniques and nanoparticles in biophysics; nanoscale optical imaging of nanomaterials and biological cells; and x-ray sources, detectors and optics for x-ray microscopy, studies of radiation damage mechanisms related to cancer, and lithography. The programme is run by the Department of Physics in conjunction with the Randall Division of Cell and Molecular Biophysics at King's College London.

A major part of the programme takes the form of a research project, which may be done in collaboration with national or international research institutes or with industry. Courses are taught through tutorials/seminars backed up with essays, literature reviews and project work. Assessment is through coursework. The course also provides the background knowledge and many of the generic and transferable skills, including planning and dissemination, necessary to carry out a career in research.

Applicants should have, or expect to obtain, at least a second-class honours degree in Physics or a related subject.

For further information please see http://www.kcl.ac.uk/physics or contact the course co-ordinator Professor Alan Michette (alan.michette@kcl.ac.uk or +44 (0)20 7848-2811) or the departmental administrator Julie Burke physics-admin@kcl.ac.uk or +44 (0)20 7848 2155).
School of Engineering Sciences

**Funded PhD/EngD opportunities**

The School of Engineering Sciences (SES), at the University of Southampton is a leading 5* rated research School with cutting-edge projects, strong industrial links and state-of-the-art facilities.

Research projects are available in the broad fields of
- Aerodynamic and Flight Mechanics
- Astronautics
- Bioengineering Sciences
- Computational Engineering Design
- Electro-mechanical Engineering
- Engineering Materials and Surface Engineering
- Fluid Structure Interactions
- Thermal Fluids and Superconductivity

Many of the PhD and EngD studentships provide a generous tax-free bursary and fully cover University tuition fees (at EU/UK level).

SERIOUS ABOUT JOBS
[2563-001 (2006) : 22]
Cognis UK Ltd, as part of The Cognis Group, ranks among the world's leading speciality chemical companies.

With approximately 8,000 employees world-wide in more than 100 countries, Cognis offers excellent opportunities based on know-how, trust and reliability.

cognis
we know how

**Development Chemist**
Salary Range: £22,000 - £32,000 p.a.

What can Cognis offer you and your future professional career? Well, a combination of an innovative environment with development opportunities, decisiveness and creativity—we call this "good chemistry".

Your role within our UK R&D team will principally involve development of both existing and new chemical processes which underpin new product and technology innovations within our business. The spectrum of process development work will range from laboratory scale synthesis to pilot plant scale-up and commercial manufacturing plant support.

Your profile:
You must be a proactive graduate chemist with a good honours degree as a minimum requirement. Previous experience within a laboratory-based, or chemical manufacturing role with the speciality chemicals sector would also be an advantage: Excellent verbal and written communication skills are essential, together with the ability to work effectively and contribute to a multi-discipline team environment.

Closing date: 31 August 2006

**Development Laboratory Technician**
Salary Range: £17,000 - £21,000 p.a.

Due to internal promotion, a further opportunity has arisen to join our UK R&D team of Hythe. Providing technical support under the guidance of a Development Chemist, you will undertake development work for the Polymers, Coatings and Inks (PCI) business. Whilst you will primarily be undertaking laboratory bench-work using small to medium size glassware, you will also be responsible for basic analytical testing and reporting.

Your profile:
You will be qualified to A Level standard in Chemistry or equivalent, or will have relevant experience. A practical aptitude and a good command of written English and Mathematics are also required and, as a key member of a small team, good interpersonal skills. You will have a methodical and precise approach to your work and will ensure records are accurate and Health & Safety requirements are adhered to.

Closing date: 23 August 2006

Let your innovation shine through!

In return for your skills and commitment, you can expect to receive an excellent range of benefits including access to comprehensive training and development opportunities.

The positions are based at Cognis' Hythe site, situated on the eastern edge of the New Forest, near Southampton.
If you wish to build a career with a dynamic chemical company, please send your CV to Gemma Lees, Cognis UK Ltd, Charleston Road, Hardley, Hythe, Southampton SO45 3ZG.

E-mail: recruitment.uk@cognis.com

INVESTOR IN PEOPLE
[2563-002 (2006) : 50]
If the following attracts you:
Direct interaction with healthcare professionals to provide high quality researched and balanced product information
Playing an important role in the continual development of an exceptional service for healthcare and professionals
Working within a dynamic team and with a range of colleagues across Pfizer
Communicating customer insights and needs for aligned POMs to the wider Pfizer business

then this role could be for you!

The ideal candidate will have a Life Sciences, Pharmacy or Nursing degree. Previous Medical Information or related experience would be an advantage. Excellent verbal communication and written skills, and some experience of summarising information are essential. You should also have good time management and organisational skills and the ability to work effectively within a busy team environment.

In addition, you should have basic database search skills, ideally Medline and Embase, and be fully computer literate with MS Office and keyboard skills.

Talent, skill and drive for achievement are always very well rewarded at Pfizer. In addition to unrivalled career development opportunities, you will also receive an excellent salary and full benefits package.

If you are interested in this role, please apply online to job requisition number 055956, attaching your CV and covering letter detailing your current role and remuneration package.

Closing date for all applications is Monday 21st August 2006.

Medical Information Executive
An exciting opportunity for a new Medical Information Executive (MIE) has arisen within the Pfizer Medical Information Team based at our UK Headquarters near Tadworth in Surrey. This comes at an exciting time, both for the department and Pfizer as a whole, with several new product launches on the horizon.

The MIE role is to provide a Medical Information enquiry service of value to Pfizer’s customers, aiding their decision making and ensuring safe, ethical and effective use of Pfizer’s prescription only products (POMs).

[2563-003 (2006) : 51]
Be our leading light.

**Team Leader - Photonics**
£30,500 - £38,000 (dependent on experience) + excellent benefits Nr Reading, Berkshire

Tasked with maintaining the UK's nuclear deterrent, the Atomic Weapons Establishment is without equal. Not only are we one of the nation's largest high technology research, development and production facilities, no other organisation in the UK does what we do. With the nature of our remit, we're continually striving to improve the way we work. A challenge you'll be at the heart of.

Providing technical leadership to a team of eight, you'll maintain and develop our ability to deliver innovative photonic diagnostics. From resource management and recruitment to developing both your team's abilities and the hydrodynamic function's overall strategic direction, it's a broad remit. One that will also see you forge strong relations with an array of academic and industrial research institutions to further our understanding.

While ideally you'll be PhD-qualified in an appropriate physical discipline, a strong track record of research is a must. However, you could have gained this experience in an academic or commercial environment. What's more important is that you have proven ability in a technical management role and the interpersonal skills to inspire your team.

As well as the opportunity to continually develop your abilities, you'll enjoy a superb benefits package. One that includes 28 days' holiday in addition to statutory bank holidays and a final salary pension scheme.

To find out more and to apply online visit www.awe.co.uk. Alternatively, you can call us 0118 982 9009 for an application form.

AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age or responsibility for dependents. The normal contractual retirement age at AWE is 65. Successful candidates will be selected solely on their ability to carry out the duties of the post.

Because of the nature of the work associated with this post, it is subject to special nationality rules and is open only to British Citizens. All selected candidates will be required to undergo security clearance.

LABORATORY MANAGERS
Good Packages
Billingham - Downstream & Petrochemicals - Ref: 05/10706BIL
Aberdeen - Upstream Oil, Gas & Chemicals - Ref: 06/10706ABE

Operating in over 140 countries and employing in excess of 40,000 people worldwide, SGS is the world's leading verification, testing and certification company, recognised as the global benchmark for quality and integrity. Our Oil, Gas & Chemical business (OGC) is at the forefront of its sector - providing a comprehensive range of technical, analytical and operational services to the oil, gas, petrochemical and related-industries.

Serving many key international customers, you'll be responsible for the day to day running of the laboratory facilities. This will encompass the effective management of the team, maintaining sound customer relationships and ensuring safety standards are upheld, as well as maximising the capability of the laboratory and proactively developing new business opportunities.

Educated to degree level or equivalent in a science subject, ideally chemistry, you should possess 5-10 years' laboratory experience, with at least 2 years' at a supervisory/management level. This should include a sound working knowledge of oil and gas operations, experience of auditing procedures and analytical techniques, plus the ability to prepare detailed laboratory procedures and documentation.

In addition, we're seeking a commercially aware, results driven approach, coupled with strong leadership and change management skills and a commitment to customer service.

Please apply in writing with CV, indicating current salary and quoting the appropriate reference, to:
Kathryn Morgan, HR Co-ordinator, SGS United Kingdom Limited, Rossmore Business Park, Ellesmere Port, Cheshire CH65 3EN.
Email: kathryn.morgan@sgs.com

The African Laser Centre (ALC) has a challenging position available for: **Director: African Laser Centre**

The ALC, with its Head Office in South Africa, is a registered company focusing on research and development (R&D) work in laser-based science and technology and its applications for the African continent. The ALC is currently hosted by the CSIR National Laser Centre (at its Scientia campus in Pretoria).

The ALC's main objective is the funding, management and facilitation of laser-based science and technology, including research, development, technology transfer, education and training on the African continent.

The successful incumbent will account fully for all ALC activities. The Director will report to a Board of Directors, appointed by the ALC membership.

Responsibilities:
The incumbent will be expected to contribute towards developing the ALC into a successful entity, with special reference to:
- Developing funding opportunities to support the programmes of the ALC;
- Facilitating research collaborations supported by the ALC; and
- Developing suitable opportunities for Human Capital Development initiatives.

Personal attributes:
- A natural leader who has an established track record in the development of strategic research collaborations, as well as negotiating funding support is required.
- Excellent knowledge of and network within the African education, research and industrial environment;

Qualification and Experience:
- An advanced degree in laser related sciences or engineering.
- At least 15 years experience in the management of research programs; and
- A good track record in the development of business opportunities in high technology areas.

Conditions:
- This is a senior management position on a 3 year appointment, subject to a performance agreement.

Correspondence:
Kindly e-mail a comprehensive CV to Deirdre van Rooyen at: dvrooven@csir.co.za.

Please note that no faxed or posted CVs will be accepted. Closing date: 16 August 2006.

The Fisheries Department of the Falkland Islands Government invites applications for the post of Fisheries Scientist (stock assessment). This position is vital for the continued development of assessment capabilities of squid and fish stocks within the Department.

Candidates should have the ability to apply standard fish stock assessment techniques and develop new approaches. The successful applicant will be expected to contribute to the development of fishing management policy on the basis of the assessments. Candidates should be able of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises.

Candidates should ideally be qualified to PhD level in an appropriate biological, fisheries or mathematical discipline with at least two year's experience of fisheries stock assessment or other relevant discipline, such as population dynamics. A high level of competence with computers and modern statistical methods is essential. Experience in one or more of the following areas would be advantageous; mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design.

The contract package includes:
- fares to and from the Falklands at the beginning and end of contract;
- mid contract leave return passage;
- end of contract gratuity of 25% of salary;
- generous relocation grant; and
- education allowance, if applicable.

For further information, a full job description and an application form please contact: Recruitment Officer, Falkland Islands Government Office Falkland House, 14 Broadway House Westminster, London SW1H 0BH
Tel: 020 7222 2542 Fax: 020 7222 2375 E-mail recruitment@falklands.gov.uk Completed application forms should be returned to the above address no later than Thursday 7th September 2006. www.falklandislands.com

DESIRE THE RIGHT
[2563-007 (2006) : 52]
Senior Scientist, Toxicology/Metabolism Studies
£ NEG Hampshire, UK. Excellent Benefits

Our client is at the forefront of scientific developments in a competitive, commercial market. Their state of the art research and development centre provides technology and knowledge driven solutions for an international network operating across the globe.

To drive understanding of both product and markets, our client seeks an experienced scientist to join their team in supporting the development and testing of novel products, ultimately improving understanding of the metabolism of toxicants.

Leading projects incorporating both in-house and external research, this is a dynamic and challenging strategic role.

Key Responsibilities:
• To develop a team and work programme to investigate the metabolism of toxicants by working together with the biomarkers group.
• To develop strategies for the toxicological assessment of novel products including metabolism studies.
• To manage large, cross-functional and international investigative toxicology projects including planning, costing, scheduling and monitoring of work performed by R&D functions and contract research laboratories.
• To report on project outcomes internally and globally, and to provide information, advice and guidance to scientific & regulatory affairs groups.

Qualifications & Experience:
• BSc in Biological Sciences (or related subject), plus MSc or PhD (ideally).
• 5 years post-qualification experience in toxicology and metabolism studies.
• Strong project management skills.
• Ability to lead large cross-functional project teams.

For more information or to apply, please contact Alison Fisher at Hudson Shribman Scientific Recruitment on 020 7421 5200, or via email: toxicologist@hs-scientific.co.uk.

Closing date is Friday 18th August.
[2563-008 (2006) : 52]
Chief Scientific Adviser

The Irish Government wishes to recruit a Chief Scientific Adviser (CSA). This is a senior advisory appointment within the national oversight and review structures for Science Technology and Innovation (STI).

The Position
The key responsibilities of the position are as follows:
Providing high level advice on scientific issues of concern to Government across the spectrum of disciplines;
Providing scientific input to the development and review of the Government's recently published Strategy for Science, Technology and Innovation (SSTI 2006-2013);
The CSA will report, via an Interdepartmental Committee on STI to the Cabinet Sub-Committee on STI and will work with the range of implementation and oversight structures being established to advance the Strategy;
In this context, in addition to the general advisory responsibilities of the post, a detailed annual work programme will be agreed between the CSA and the Cabinet Sub-Committee on STI.

The Individual
The post requires an individual with proven scientific expertise, supported by a significant track record of research and publications. The successful candidate must have a demonstrable overview of issues across the spectrum of modern science in the context of national and global systems of innovation. They must be capable of accessing a network of national and international contacts whose detailed expertise can be drawn upon as required.
Equally important, the successful candidate must have the ability to operate convincingly at the most senior levels of Government, academia and enterprise, and possess the personal and professional stature required to communicate with the many organisations and communities of interest which impact on science, technology and innovation developments in Ireland.

Forfas will provide administrative support to the Chief Scientific Adviser and, in this context, Forfas is managing the administration of the recruitment process for this senior position. Interviews will be conducted by an independent panel of national and international experts. Appropriate terms and conditions will be discussed with the successful candidate.

Applications for the position should be submitted in confidence to:
Michael O'Leary, Secretary, Forfas, Wilton Park House, Wilton Place, Dublin 2 or email: michael.oleary@forfas.ie

Closing date for receipt of applications is: Friday, 11th August 2006.

A policy of equal opportunity will apply to this appointment.
We are looking to recruit an experienced Clinical Scientist to join the Human Physiology R&D team at our Wound Therapeutics Global Development Centre site in Deeside, North Wales.

Ideally you will be scientifically qualified to PhD level or will hold an equivalent Clinical Physiology Qualification, with at least 3 years practical experience. You should have advanced and thorough theoretical knowledge of the function and physiology of the human venous system, together with knowledge of its diseased states. Requisites are a sound background in practical clinical assessment of vascular function, a thorough understanding of methods for interpretation of clinical data and a thorough understanding of clinical ethics.

You should possess excellent understanding of vascular treatment and assessment products, and have the ability to plan, co-ordinate and report on clinical research projects. A team player attitude is essential, as is the ability to communicate at all levels.

This is an exciting and demanding key position in a truly global organisation, where ability and commitment are highly rewarded.

We would positively welcome early applications from suitable qualified individuals
Please send full CV to: The HR Manager, ConvaTec Ltd. Unit 20, Deeside Industrial Park, Flintshire CH5 2NU. Closing date: 1st September 2006.
Rolls-Royce Fuel Cell Systems Ltd.
£Competitive Salaries + Benefits

Rolls-Royce is a world-class organisation, providing innovative power solutions to our customers across the world. We have an enviable broad-based business portfolio, with leading positions in each of the global markets in which we operate.

Rolls-Royce Fuel Cell Systems Ltd. is a majority owned subsidiary of Rolls-Royce plc, and is positioning itself to be a global leader in the next generation of power systems. The fuel cell system's business plans to produce a one megawatt stationary power generation system, based on a novel 'hybrid' configuration, integrating high temperature solid oxide fuel cells with turbine and related systems. As the technology evolves, we plan to participate in broader power system applications, such as transport and portable fuel cell initiatives. We are located in the UK in Loughborough and Derby, with strong links to Singapore and USA.

Due to the growth of this dynamic, developing organisation we have a number of exciting opportunities for:
• Design Engineers
• Development Engineers
• Fuel Cell Scientists
• Methods and Instrumentation Engineers
• Test Engineers
• Manufacturing Engineers
• Project Engineers
• Computational Fluid Dynamics Engineers
• Stress Engineers
• Controls Engineers

For all roles you will need to be educated to at least degree level in a relevant discipline. In addition, you will be highly motivated, a good team player, a strong communicator and self-organised. The ability to work across organisational boundaries is also essential.

In return, we offer excellent development prospects, coupled with the salary and benefits you would expect of an internationally renowned and successful organisation.

To find out more information and to apply online, please go to: www.rolls-royce.com/careers

Closing date: Friday 15th September 2006. We are an equal opportunities employer.

**GRADUATE TRAINEE PHARMACY TECHNICIANS**

£16,798 inc.

If you have a science degree and want to do something really worthwhile with it, we have the ideal prescription.

As a pharmacy technician in a major hospital trust like ours you'll have an extremely varied and interesting job, which can involve anything from aseptic manufacturing or preparing for new drug trials to direct contact with patients.

Join us now as a graduate trainee and we'll fund a NVQ3 distance learning course, or weekly college day release which in 2 years will make you a fully qualified pharmacy technician.

It shouldn't be too tough, especially as we'll help with in house tutoring and your degree studies could earn you exemptions. Once you are qualified, you'll find yourself in considerable demand, with excellent opportunities for further career development and promotion.

If you want to know more about the job, our department or the training, please contact by e-mail either Ann Mounsey, Principal Pharmacist at Amounsey@hhnt.nhs.uk or Lynn Walsh, Chief Technician Education and Training at Lwalsh@hhnt.nhs.uk
Or call our Recruitment Line on 0870 7702363 quoting reference number HJF/PH/60. You can apply online at www.healthjobfinder.com

Closing date for applications will be Monday 21st August.

Science Systems Manager
An exciting opportunity to work at the forefront of marine research has arisen within the National Marine Facilities Division (NMFD) of the National Oceanography Centre, Southampton (NOCS). A seagoing Deck Engineer Officer is required to fill a key role in a new Science Department being created aboard our research vessels James Cook and Discovery.

As Department head you will be responsible to the Master for the management and operational support of all vessel mounted science systems. In addition to your department staff you will also manage the embarked technical support team and the interface with the scientific party.

Your department will be responsible for equipment ranging from basic to state of the art, including computing and networking, acoustic instrumentation, communications, navigational systems, ocean/atmosphere sampling/measurement and oceanographic cables, winches and handling systems.

Tours of duty are normally in the order of two to three months in length. In between tours of duty, following accrued leave, you will spend significant periods working at NOCS with shore based technical support staff.

Candidates should be qualified to at least HND level or equivalent in a relevant electronics/computing discipline and be highly motivated, capable team members. Strong practical and theoretical computing skills are required, allied to an innovative approach to problem solving. An ability to contribute to the development of new NMFD seagoing equipment capability is also expected. Medical fitness to ENG1 standard is a prerequisite.

Candidates possessing an enthusiasm for advancing our understanding of environment are particularly encouraged to apply.

In return NERC offers a fully consolidated starting salary of £34,836 Leave is accrued at 18.5 days per month served.

For further information about the post and to download an application form please visit: http://www.noc.soton.ac.uk/nmf.php

All application forms to be forwarded to: sxb@noc.soton.ac.uk.

Closing date for applications is 24th August 2006.

RESEARCHER EXCHANGE PROGRAMME
New Funding Opportunity

The British Council is announcing a first call for proposals under a new initiative aimed at supporting new links between early stage researchers in the UK and in other countries.

The Researcher Exchange Programme (RXP) is a £500,000 initiative that provides individual researchers with awards covering travel and subsistence costs, and some consumables costs, needed to develop new scientific collaborations and contacts through exchange visits of between one week and three months' duration.

The research link can be in any area of science, engineering and technology, including social sciences and humanities.

The term "early stage" refers to researchers at the beginning of their research careers, with less than ten years active research experience since the completion of a doctoral degree, or those in the last year of their PhD.

The maximum award that can be applied for is £5,000.

Please note that more than one researcher from the same sending or receiving research group can apply for an award, but each must submit a separate application.

For full details and an online application form see www.britishcouncil.org/science-rxp

Senior Analyst, Nutritional Biochemistry Laboratory (NBL)

The NBL provides analytical support to HNR and its many collaborators, both national and international. It comprises two sections: Clinical Chemistry and Chromatography.

A vacancy has arisen for a Senior Analyst to assist in the management of a Nutritional Biochemistry laboratory with an emphasis on HPLC and GC-FID Chromatography, ICPMS and ICP OES.

You will be educated to at least BSc in a relevant scientific discipline and have at least five years experience in an appropriate analytical laboratory. Experience of project and staff management is required. An appreciation of the mission and objectives of HNR would be desirable.

This is a full time (36 hours per week) permanent position. The starting salary will be in the range of £24,746 - £28,000 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward policy. We offer 30 days annual leave in addition to statutory Bank Holidays, an MRC pension scheme, excellent working conditions and free on-site parking facilities.

For further information and a full job description please visit our website www.mrc-hnr.cam.ac.uk. For an informal discussion about the post please contact Dr Jonathan Powell (Head of Micronutrient Status), on 01223 426356. An informal visit is encouraged.

To apply, please quote reference HNR/706/6 and include a covering letter and CV with the contact details of two professional referees who can be approached prior to interview.

E-mail your application to, recruit@mrc-centre.cam.ac.uk or post to Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH.

Closing date: 1st September 2006

'Leading Science for Better Health'
[2563-020 (2006) : 57]
Environment Agency

It’s a rewarding job creating a rewarding environment.

It's our job to make sure that air, land and water are looked after by everyone in today's society, so that tomorrow's generations inherit a cleaner, healthier world.

**Technical Specialist - Hydrogeologist** £22,800 - £27,400 (more may be available for exceptional candidates) + benefits
Reading, Berks & Wallingford, Oxon
As an experienced hydrogeologist, you'll help to provide regional leadership and technical advice on hydrogeology, particularly with respect to strategic abstraction licensing, our Catchment Abstraction Management Strategies and Habitats Directive as well as the technical management of projects and numerical groundwater modelling. You'll need significant experience in groundwater resources and a good understanding of relevant legislation. Ref: TWEM263/NS

**Technical Officer - Hydrogeologist** £19,800 - £23,800 + benefits
Reading, Berks & Wallingford, Oxon
We need an experienced hydrogeologist, who will be involved in a range of projects and activities, from abstraction licensing to assessment of water resources and contaminated land studies, and who will also provide hydrogeological advice. Two years' relevant experience will be desirable. Ref: TWEM267/NS

**Ecological Appraisal Officer** £19,800 - £23,800 + benefits + Lease Car
Frimley, Surrey
Helping to protect our aquatic environment, you'll be developing your own knowledge through field based studies. You'll also be involved in a variety of indoor activities from sorting samples in the laboratory to interpreting biological data and writing reports. Whilst a relevant degree supported with ecological experience would be beneficial, this could also be substituted with substantial freshwater ecological experience.

You'll bring technical expertise in freshwater ecology issues along with proven experience and participation in macrophyte and fisheries surveys and strong freshwater macroinvertebrate and macrophyte identification skills. You'll also need a driving licence and be able to swim. Ref: TSEM513s/NS.

In return we offer an attractive benefits package including contributory final salary pension scheme (with life cover), excellent training and development opportunities, generous holidays, flexible working hours, family friendly policies and pay award pending. Relocation assistance may be available for the Hydrogeologist roles.

For a full information pack and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs)

Advance ENVIRONMENTAL

Consultants (South East UK)

Advance Environmental Ltd work in the built environment. Our core business is the prevention of Legionnaires' disease and the control of Asbestos. Our reputation for a quality service is key to the success of the company and has brought us strong contracts with many major NHS Trusts and blue-chip companies that have led us to be a leading light in our industry. We require consultants who will train to be multi-skilled in both of the fields below but ideally you will fit into one category already

Consultant in legionella control
The majority of your work will be carrying out legionella risk assessments and associated monitoring. It will be your responsibility to produce the reports that will include details of your inspections of water storage tanks, hot water boilers and air conditioning systems, with schematics of the piperuns. You should be a science graduate or similar and ideally have some experience in building water systems and/or some knowledge in the control of legionella bacteria.

Consultant in asbestos surveys
The majority of your work will be carrying out Type 2 asbestos surveys. It will be your responsibility to produce the reports and risk assessments that will include details of your inspections and findings. Your will be P402 qualified as a minimum.

For either position you will work from home and travel to our customer sites in the South East. Some travel and occasional overnight stays may be expected. These are permanent and full time positions with an excellent starting salary dependent on experience. You will have a company car and access to our pension scheme.

This is an opportunity to join a team where you count as an individual, your effort is recognised and the work you do matters.

If interested please forward a CV and a hand written letter with expected salary to: Dr J. Tinkler, Advance Environmental Ltd, Unit 1 New Rookery Farm, Silverstone, Northamptonshire NN12 8UP
[2563-022 (2006) : 58]
Research Officer STRI

The STRI is a research and technology organisation based on the edge of the Yorkshire Dales that provides independent R&D for sports and amenity turf.

Applications are invited for a research officer to work in the Turfgrass Biology team. A degree and experience of working in a research environment is desirable. Knowledge of plant biology/taxonomy and experience of fieldwork would also be advantageous.

Applications to and further details from: Mrs P M Reynard STRI, St Ives Estate, Bingley BD16 lAU

[2563-023 (2006) : 58]
POST-DOCTORAL RESEARCH SCIENTIST (EARNEST)

Applications are invited for a post-doctoral research scientist to work on a project supported by the European Union Integrated project EARNEST. The post will involve using transcriptomics and proteomics to investigate the mechanisms involved in "fetal programming". An important part of the role will also be to develop interactions with other members of the EARNEST consortium and with partners in the NuGO Network of Excellence (www.nugo.org). The successful applicant will have attained a PhD in a relevant area, will be expected to demonstrate the capacity to work independently and will be able to link well within a larger grouping. Ideally, the successful applicant will have skills in molecular biology and transcriptomics or proteomics but training will be given where necessary. There will be also be opportunities for further training and for international travel. The post is for a period of 2 years.

POST-DOCTORAL RESEARCH SCIENTIST (ICA)

Applications are invited for a post-doctoral research scientist, sponsored by International Copper Association, to undertake a project investigating copper metabolism during pregnancy. This project, which will run for 1 year initially, will use proteomics technologies, such as SELDI ToF and 2D gel electrophoresis, to identify markers of copper status in humans and animals. The position will suit a PhD graduate in biological sciences, but may also appeal to a candidate wishing to branch out from chemistry or physics into functional genomics. Full training will be given where necessary, but previous experience in protein chemistry or physiology would be a distinct advantage.

Salary for both positions will be within the range of £23,022.00 to £26,541.00 depending on experience.

These posts are in the Maternal-Fetal Physiology group, part of the Vascular Health Division. We are a well-funded group, equipped with new and highly sophisticated equipment. The Institute also has a very good analytical services division, which provides excellent support to our scientists.

For informal discussions please contact Professor H. J. McArdle on (01224) 716628 or e-mail H.McArdle@rowett.ac.uk - however to apply for the position please use the contact details below.

Application Forms and further information may be had by telephoning 01224 716669 at the Rowett Research Institute, Greenburn Road, Aberdeen AB21 95B or e-mail personnel@rowett.ac.uk.

Please indicate clearly which post you are interested in. The closing date is 18 August 2006, and completed application forms may be supported by a CV.

The Rowett Research Institute is an Equal Opportunities Employer.

Cambridge Science Park

Smart Holograms is pioneering a new patented technology (Sensor Holograms) for diagnostic applications. The Company can engineer holograms to alter their colour, brightness, image or position in response to a wide range of physical, biological and chemical stimuli. The technology is label-free, miniaturisable, mass manufacturable, can be incorporated into many novel formats and can be used for a wide variety of applications, e.g. diabetes monitoring, immuno diagnostics, biological/chemical threat detection, packaging and analytical testing. We are currently looking to recruit a number of talented individuals to strengthen our team and accelerate product development.

**Senior Scientists - 5 positions** (Ref: SH018)
(Research and Development)
Salary range £30,000 - £38,750 per annum - depending on skills and level of experience
To design, characterize and optimise sensor holograms for use in diagnostic products.
Candidate Profile:
• BSc/MSc/PhD in chemistry/biochemistry
• Previous experience with biosensors an advantage
• Knowledge of immunoassays/surface chemistry
• Strong analytical skills and experience of working in multi-disciplinary teams
• Industrial experience an advantage

**Research Scientists - 5 positions** (Ref: SH019)
(Research and Development)
Salary range £18,000-£24,000
Candidate Profile:
Adaptable, practical Technicians/Scientists with:
• BSc/MSc in Chemistry/Biochemistry/Biotechnology
• Interest/previous experience in the biosensors field
• Strong analytical skills
• Experience working with biological samples and aseptic techniques an advantage

**Principal Duties**
• To produce, test and optimise analyte-responsive holographic biosensors
• To obtain, analyse, record and act on experimental data which may subsequently be used for regulatory approvals
• To maintain supply of existing holographic-based sensors and contribute to the day to day running of the lab

Smart Holograms offers a competitive salary Company Group Pension scheme, Healthcare, Permanent Health Insurance, Life Assurance cover, bonus scheme, share options for all staff and subsidised gym membership.

Please email your CV and covering letter for above positions to:- Mrs Julie Lakin, Director of HR at human.resources@smartholograms.com

Smart Holograms is an Equal Opportunities employer.

INTERNATIONAL AUTHORITY IN NUCLEAR SAFETY, TECHNOLOGY AND VERIFICATION SEEKS

Mass Spectrometry Specialist
The International Atomic Energy Agency (IAEA), an independent United Nations organization headquartered in Vienna, Austria, with 140 Member States and a staff of 2200, serving as the global focal point for international co-operation in the sale and peaceful use of nuclear energy, is seeking a Mass Spectrometry Specialist for its Safeguards Analytical Laboratory (SAL), which is a Section of the Agency's Laboratories at Seibersdorf, Department of Nuclear Sciences and Applications. This individual will be responsible for maintaining and operating SAL's secondary ion mass spectrometer (SIMS)

If you are keen to work in a multicultural environment and have at least:
• University (or equivalent) degree in analytical chemistry, physics, or electronics;
• At least five years' working experience with SIMS.
• Extensive experience in the precise measurement of isotope ratios by magnetic sector instruments.
• Fluency in English.

you may wish to apply for this position. To do so, please submit an online application at http://www.iaea.org/About/Jobs before 5 September 2006, quoting the vacancy notice no. 2006/036.

Benefits: The IAEA offers a stimulating multicultural working environment in the beautiful and culturally rich city of Vienna, Austria, with easy access to Europe-wide attractions. The post offers: tax free remuneration; rental subsidy; 6 weeks annual vacation; medical insurance coverage; a staff retirement plan; full coverage of removal expenses for staff member, family, and personal effects; additional allowance for installation expenses; assistance with finding housing and schools in Vienna; financial assistance with the education of dependent children; and paid travel to the home country for the staff member and family every other year.

INTERNATIONAL ATOMIC ENERGY AGENCY

Our Goal: to facilitate the safe contribution of nuclear technologies to peace, health and prosperity throughout the world while ensuring that no technology or material under our oversight or provided with our assistance is used to further any military purpose.

POST DOCTORAL RESEARCH SCIENTIST
CROP PERFORMANCE AND IMPROVEMENT DIVISION

A Post-Doctoral Molecular Biologist is required for a 3 year BBSRC-funded research grant to investigate the role of gibberellins in wheat grain development. The appointee will be required to undertake a broad range of tasks, including plasmid construction, transcript analysis, reverse genetics through TILLING in wheat and light microscopy including laser capture microdissection.

Candidates will need a PhD in biology, biochemistry or related subject and ideally 2-3 years post-doctoral experience. Experience with appropriate molecular biology techniques is essential and skills in microscopy and/or plant genetics would be an advantage. The ability to work independently within the constraints of the project is essential.

A full time appointment will be made at Band 6-PD level with a salary range normally between £23,022 and £26,541 per annum (pay award pending).

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ.

Please quote reference 925.

How can you help us prepare to respond?
The answer might surprise you.

We're the people asking the big questions about how we can best protect the nation's health and well being - and there's no other agency better placed to answer them. An independent public sector body, our remit covers the entire spectrum of health issues, from infectious diseases, chemical, poisonous and radioactive hazards to potential threats such as bio-terrorism or new strains of pathogens. And all of our staff have a key role to play. Join us as either a Health Protection Scientist or Environmental Scientist, and your commitment and support will have an enormous impact on our work.

Health Protection Scientist
circa £27,500 pa
(depending on experience and qualifications)
Cardiff
Health Protection Scientist
Fixed Term 3 years

Based in the WHO Centre, you will primarily focus on the delivery of the Children’s Environmental Health programme and will also contribute to an International programme of work which includes the development of guidance, early warning and surveillance systems.

You’ll need a first degree and PhD in a Public Health related discipline or equivalent academic experience, as well as knowledge of chemical and other environmental hazards.

For an informal discussion about this role, you may wish to contact Dr Raquel Duarte-Davidson on 01235 822895.
Please quote ref: 41/05

Environmental Scientist
circa £27,500 pa (depending on experience and qualifications)
Chilton
Fixed Term 3 years

Based at the divisional HQ in Chilton you will be part of a team providing a national environmental health public tracking service including preparing and responding to acute and chronic environmental and chemical incidents.

You will need a minimum of an MSc in environmental science or equivalent and have two years' post-graduate experience.

For informal discussions about this role, you may wish to contact Dr Brett Jeffrey on 01235 824852.
Please quote ref: 34/06

Closing date for both posts: 30th August 2006.

These posts are subject to a terms and conditions review (Agenda for Change).

The HPA promotes diversity in the workplace and is an equal opportunities employer.

Defra (the Department for Environment, Food and Rural Affairs) was created in June 2001 to drive forward the Government's programmes on the environment, food and rural affairs.

We work for the essentials of life - food, air, land, water, people, animals and plants. Our remit is the pursuit of sustainable development – weaving together economic, social and environmental concerns.

**Higher Scientific Officer (HSO)**

£28,901 - £33,352 per annum  Based in London

The Sustainable Farming and Food Science (SFFS) Division provides scientific evidence and advice to a range of policy customers to support sustainable farming and food policy and manages a research budget of approximately £35 million.

You will work as part of a small flexible team to provide scientific analysis and advice to a range of policy interests and have the ability to develop and communicate results to non-specialists. You will manage and develop a portfolio of research projects in a variety of areas relevant to sustainable farming and food, tailored to your scientific knowledge and expertise, for example, we undertake work on climate change, water quality, biodiversity, livestock systems and food.

With appropriate scientific training to at least postgraduate level, or relevant experience, you will have a good understanding of, or the ability to develop skills in, a range of the above areas.

An excellent communicator with a strong team working ability, you will have good leadership skills and the ability to contribute significantly to the development of agricultural and food research.

For further information, please contact Zoe Davies on 020 7238 1535.

To find out more, please visit our website [www.defra.gov.uk](http://www.defra.gov.uk)

If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WR5 2LQ. Tel: 01905 768818 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting reference RCRE420.

Closing date: 24 August 2006.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion, or sexual orientation. We operate a family-friendly policy including flexible working patterns. The posts are open to British, Commonwealth and EU Nationals.

IGER
INSTITUTE OF GRASSLAND AND ENVIRONMENTAL RESEARCH

Principal Statistician

The Institute of Grassland and Environmental Research (IGER) is one of the Institutes of the Biotechnology and Biological Sciences Research Council. IGER is the major centre for independent research aimed at improving the efficiency, potential and sustainability of grassland-related agriculture.

A Principal Statistician is needed to meet Institute-wide requirements for statistical consultancy and innovative data analysis. You will provide specialised and general statistical support and training as well as innovation in statistical approaches and data analysis methods.

You must possess a degree in an appropriate discipline and a recognised statistical qualification with a minimum of 3 years’ relevant postgraduate experience in statistical research and/or consultancy, more than 5 years’ experience is desirable. A record in statistical innovation and of dealing with colleagues on a consultancy basis is essential. Familiarity with the role of the statistician in QA and ethical review would be beneficial. A proven track record in the presentation and publication of research data is essential.

Appointment will be at Band 4 depending upon the professional experience and publication record of the successful candidate. Salary: £34,692 - £40,547.

Application forms and further particulars for the individual posts are available from Mrs Auriel Evans, Personnel Office, IGER, Plas Gogerddan, Aberystwyth, Ceredigion SY23 3EB (Tel: 01970 823023 or e-mail: auriel.evans@bbsrc.ac.uk or http://www.iger.bbsrc.ac.uk). Ref: 2006/13.

Closing date: 18 August 2006

MOLECULAR BIOLOGIST
BAND 4  REF: CSP 3053 PERMANENT
A Molecular Biologist is required to support a range of research & development projects at CSL into plant virology/pathology and invertebrate identification. Duties include the development of appropriate methods in molecular diagnostics and taxonomy and ensuring that they are used to international quality standards. You will also propose and conduct research into molecular diagnostics, molecular methods for invertebrate identification, microarray methods, DNA barcoding and recombinant antibodies.

A higher degree in a biology subject or a related subject, preferably incorporating molecular biology (or an equivalent qualification), is required plus a minimum two years relevant experience. Alternatively a degree in a biology subject with a minimum of three years post graduate experience. Candidates without this level of qualification will need at least six years relevant experience. In addition you will have previous experience of diagnostic techniques for pathogens. A good communicator, you will have experience of working in a team, speaking at international conferences and the ability to develop, draft, and write research proposals.

RESEARCH ASSISTANT
BAND 3  REF: CSP 3057 PERMANENT
The purpose of this role is to assist in research into animal welfare and wildlife management with particular emphasis on the use of non-invasive measures. Duties include investigating the use of physiological and biological measures for wildlife management (e.g. assessment of salivary cortisol levels). You will also develop novel assays for the measurement of animal physiology and analyse and interpret physiological data gained from the assays used. This research includes working with wild, laboratory, farm and/or zoo animals.

A degree in a biological science (or equivalent professional qualification) is required. Candidates without this level of qualification should have at least three years relevant experience. Knowledge of animal physiology and/or zoology and experience of quantitative ELISA’s is essential. You will also have effective laboratory skills with the ability to work to a high level of accuracy, the ability to develop new biochemical methodology, plus good team working and communication skills.

For an application pack call 01904 462302 or email jobs@csl.gov.uk. Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk.

CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.

Closing date for applications is 16 August 2006.

The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra). The Agency provides policy advice and technical support underpinned by high quality R&D to help Defra and other customers safeguard food supplies, protect consumers and the environment.

POSITIVE ABOUT DISABLED PEOPLE

The Luton and Dunstable Hospital NHS
NHS Trust
Directorate of Medicine, Neurophysiology Department

TRAINEE IN CLINICAL PHYSIOLOGY (NEUROPHYSIOLOGY)
Salary dependant upon qualifications (minimum starting salary for 4 year training course £14,881 pa rising yearly thereafter)
37.5 hours per week + study

The Neurophysiology Department has a vacancy for a trainee to join our team of Clinical Physiologists. You will work, under supervision, with patients of all ages and abilities and have the advantage of working within the field of Clinical Neurophysiology and studying for a science degree in Clinical Physiology (Neurophysiology).

Initiative, people skills and an ability to assimilate practical and academic information are essential. Entry qualifications are either 2 science ‘A’ levels (or equivalent) or a science degree with a biological science component. The length of training depends on your entry qualification; the maximum is 4 years.

School leavers/undergraduates awaiting exam results are invited to apply.
Job Ref: TP0169

Interviews to be held 7th September 2006 and the successful candidate will commence the training programme the following week. For further information on this and other roles at the L&D, and to apply online please log onto www.ldh.nhs.uk/workatld If you do not have internet access, you can request an information pack by telephoning the Recruitment 24 hour answerphone: 01582 497284. Please quote the job reference, job title and your name and address for dispatch of application pack. If you are hard of hearing, please use our minicom 01582 497405.

If you are applying for a post involving access to persons in receipt of health services, your offer of employment may be subject to a disclosure certificate (Police Check) from the Criminal Records Bureau. The possession of a criminal record does not automatically preclude applicants from applying for posts at the L&D. All cases will be judged on an individual basis according to the nature of the post applied for.

Closing date: 17th August 2006.

The Trust operates a no smoking policy.

HQS accredited by the Health Quality Service
RESOLUTION CHEMICALS LTD

REGULATORY AFFAIRS OFFICER
Based in Hertfordshire

Part of an international group of companies, Resolution develops generic pharmaceutical actives and intermediates. This vacancy is the ideal opportunity to develop a career in Regulatory Affairs.

The position will provide you with comprehensive training in all aspects of Drug Master Files and other regulatory documents. As part of a small team you will quickly be able to make a positive contribution, reviewing, updating and submitting applications. The successful applicant will have a good first or postgraduate Chemistry degree, be committed to a career in Regulatory Affairs and be enthusiastic about detail and quality. You will receive a competitive salary, annual bonus, BUPA, contributory pension scheme and c23 days holiday.

Please contact Resolution Chemicals on 01438 743900, or email applications@resochem.com, to request an application form.

Website: www.micropathology.com E-mail: info@micropathology.com

LABORATORY POSITIONS IN MOLECULAR DIAGNOSTICS

Micropathology Ltd provides a specialist molecular diagnostic service. Two positions are currently available for suitably motivated individuals to work within our team of laboratory/clinical scientists.

The first appointee will work with our state registered molecular geneticist, where they will be expected to develop extensive specialist skills, eventually operating with minimal or no supervision. A second appointee will work with our state registered microbiologist and virologist. Daily duties will include nucleic acid extraction, PCR, documentation and reporting of assay results.

Candidates for both posts will possess a first degree in life science, significant postgraduate experience (preferably in a clinical laboratory), have good literacy/IT skills and particular mathematical aptitude. A higher degree and/or state registration is desirable, although a solid general scientific knowledge combined with a logical and enquiring mind is considered most essential.

The successful applicants will initially be appointed for a one-year probationary period. Pay will be competitive and commensurate with age/experience.

Applications (by CV and covering letter) or requests for more information should be made to Dr Phil Bennett. The closing date for applications is August 31st 2006.

[2563-047 (2006) : 64]
If there’s a ‘Cooks Street’ and a ‘Mechanics Alley’, why can’t we have a road called ‘Salesperson Street’?

Who said cooks and mechanics were more important than salespeople? Certainly not us. In fact, we would be first to recognise the essential contribution that salespeople make to UK business.

Which is why we have created www.salestarget.co.uk. With 10,794* top sales jobs currently advertised, it is the UK’s leading SALES-ONLY recruitment site.

Dedicated to those who prefer the road to the garage.

SALES target.co.uk – sales jobs for sales people

we’re creating a better environment in our laboratory as well as outside.

**Dioxin Scientist • Leeds • £19,700 to £22,400 + benefits**

Part of our responsibilities for managing the environment includes monitoring what's discharged into it. The uncontrolled release of dioxins is a serious health hazard and it's our job to ensure that they stay within safe levels.

We've amassed an impressive expertise in dioxin science and our advice is now sought actively by commercial businesses and other organisations. Now we're looking for an experienced and highly competent analyst to prepare samples for analysis and run them through our High Resolution GC-MS systems, working as part of a dedicated team in an advanced laboratory environment with an excellent work/life balance.

With a degree or equivalent and at least 5 years' laboratory background, you'll need experience of analysing dioxins and associated compounds, sound knowledge of laboratory quality standards and clear focus on customer service.

For more information and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) If you do not have internet access call Kelvin Taaffe on 01925 542224 for an application pack quoting reference 11345. Closing date: 10 August 2006.

We are committed to making our organisation as diverse as the environment

New Scientist Jobs
CELEBRATING 50 YEARS OF NEW SCIENTIST
50 1956 - 2006
[2563-050 (2006) : 66]
JOINT NATURE CONSERVATION COMMITTEE

The Joint Nature Conservation Committee (JNCC) was established by the Environmental Protection Act 1990 and advises on UK and international conservation issues.

Marine Species Advisor
£10,976 pa Aberdeen Part time (18 hrs per week), permanent
You will work with JNCC and the country agencies to develop policy and provide advice on issues relating to the conservation of marine turtles and on fisheries. This will include co-ordinating and representing the JNCC in relevant working groups and assisting with the development of work in other relevant areas.
You will have scientific and policy knowledge of either turtles or marine fisheries and will be a strong communicator with the ability to develop good working relationships and co-ordinate and facilitate meetings and workshops. Ref No 2006/17

Marine Mammal Advisor
£13,480 pa Aberdeen Part time (18 hrs per week), maternity leave cover for 6 months
In this position, you will lead on the development of UK Nature conservation advice on marine mammals to Government. This will include developing and producing relevant influencing material, including the JNCC fisheries and marine mammal web pages, and co-ordinating and participating in relevant working groups and meetings. You will have scientific and policy knowledge of marine mammals and will possess strong communication, networking and IT skills. You will be self-motivated, with the ability to work independently and to organise and manage meetings. It is anticipated that this post will be required from November 2006. Ref No 2006/18

Offshore Industries Advisor
£21,952 pa Aberdeen Fixed term appointment for 3 years
As an Offshore industries Advisor, you will contribute to the provision of advice to various government departments and offshore industry, including reviewing and commenting on environmental impact assessments (EIAs) in relation to oil, gas and aggregate developments. Ideally the successful candidate will have a working knowledge of offshore oil and gas operations and experience with environmental impact assessment. You will possess good communication skills and the ability to organise and manage relevant information to provide sound advice. Ref No. 2006/19

Marine Support Officer
£18,253 pa Peterborough Permanent
Working within the Marine Habitats team, you will initially support the MESH project (Mapping European Seabed Habitats for north-west Europe) through the management and processing of marine mapping datasets (mostly in ArcGIS). Other aspects of your work will include managing the image library and maintaining; reference manager database, marine recorder database (national benthic marine database) and the pool of marine survey equipment.
You will need a degree in marine biology or a relevant subject, be able to organise and manage data, have sound computer skills and be capable of organising your own work. A good working knowledge of Excel and Access would be advantageous. Ref No 2006/20

We offer a competitive benefits package, including a generous holiday allowance and a choice of pension schemes. For full details and application form (a CV alone is not sufficient) please visit our website at www.jncc.gov.uk; email recruitment@jncc.gov.uk or leave a message on our answerphone on 01733 866892.

Closing date for all the above posts is 17 August 2006.

The JNCC welcomes applications from all members of society [2563-051 (2006) : 67]
Radiation safety.
Your future starts here.

**Radiology Higher Scientific Officer**
£25,406 pa Central London

Here at the FSA, we're an independent organisation with two key goals - enabling consumers to make informed decisions regarding the food they eat, and making it easier for them to choose a healthy diet. If you'd like to develop your professional skills, think about joining us specialising in the interesting and challenging field of radiation safety.

Looking at the radiological safety of the food chain, you will combine technical expertise with policy responsibility-the role will involve dealing with research co-ordination and liaising with a wide range of stakeholders. Qualified to degree level in a scientific or technical discipline, you must have excellent communication skills and the ability to work well in a team.

For an application pack, please contact the Food Standards Agency Recruitment Team on 020 7276 8197 (24 hour answerphone) or email: recruitment@foodstandards.gsi.gov.uk quoting reference 00073. Completed applications must be returned by 17th August 2006.

Further information can be found on our website: [www.food.gov.uk](http://www.food.gov.uk)

As an IIP accredited employer, we offer excellent staff benefits. These include 30 days' annual holiday and a final salary pension scheme, as well as flexible working and flexi-time.

The Food Standards Agency is an equal opportunities employer and we are committed to recruit a more diverse workforce that reflects the people we serve. We operate a Guaranteed Interview Scheme for people with disabilities who meet the minimum published criteria.

**FOOD STANDARDS AGENCY**

[www.food.gov.uk](http://www.food.gov.uk)
OPEN TO INNOVATION

In drug discovery you don't wait for the future to happen. You actively shape it - exploring innovative ideas, influencing scientific practice and creating new and better pathways. If you are ready to contribute, it's time to join Novartis Institutes for Biomedical Research.

The recently formed Gastrointestinal Disease Area based in Horsham, UK and Basel, Switzerland is dedicated to the discovery of new medicines to treat functional bowel disorders and inflammatory bowel disease. We are currently looking for high performing, motivated individuals with PhD and postdoctoral experience to join our team as a Laboratory Head at our research facilities in the UK. With a strong background in inflammation and gastroenterology you will head a group establishing in vivo models of inflammatory bowel disease. Forming part of a large multidisciplinary team, you will carry out basic research to identify and validate new targets for GI disease, and to provide key animal model data to support our drug discovery projects.

For more details about this role and other opportunities, please visit www.novartis.com quoting job reference 17737BR.

Please include details of your current remuneration package. Closing date: 18th August 2006.

NOVARTIS INSTITUTES FOR BIOMEDICAL RESEARCH
The New Pathway to Drug Discovery
[2563-053 (2006) : 68]
THE RIGHT CHEMISTRY

WILEY-VCH, a subsidiary of the distinguished publishers John Wiley & Sons Inc. New Jersey, is an international science publisher based in Germany with 80 years experience of producing high-quality professional magazines, scientific journals, books, and electronic media in Chemistry, Physics, and Life Sciences.

As part of the expansion of the editorial department of our book programme we are offering the position of a

Commissioning Editor Life Sciences

Applicants should be innovative, self-motivated, and have the desire to contribute to the further development of one of the world's top scientific book programmes. You will be responsible for ensuring effective management of our international chemistry book programme, including the acquisition and development of books, book series, reference work and products in other delivery formats. In addition you will be responsible for the development and implementation of the strategic publishing plan for designated market/subject categories. The successful applicant will also attend meetings and conferences, visit laboratories and maintain contact with the international science community.

A broad interest in science, excellent organizational and communication skills (written and verbal), diplomacy, and flexibility are needed. You have strong negotiation skills to deal with authors and you are motivated as well as results-oriented. You have excellent analytical skills and judgement to identify opportunities and projects with high potential for success. You possess a broad education in life sciences (preferably PhD/Postdoc) and have the ability to work independently as well as closely with others. Your native tongue should be either English whilst having very good knowledge in German as well or German with excellent knowledge in English (both written and verbal).

The Editorial Office is based at WILEY-VCH in Weinheim, a pleasant small town near Heidelberg in southwest Germany. Applicants should send their full CV with a covering letter describing their suitability for the post to:
Wiley-VCH Verlag GmbH & Co. KGaA Human Resources
Christiane Rabe Boschstraße 12
69469 Weinheim Germany

E-Mail: CRabe@wiley-vch.de

A FANTASTIC OPPORTUNITY, 25 YEARS IN THE MAKING

A global partner to the pharmaceutical, biotechnology and medical device industries, we're one of the world's largest and most comprehensive drug development organisations. Now, AAIPharma is coming to the UK. We're expanding our operations to Edinburgh - we need talented people to help make our new office a success.

**Biostatistics Team Leader**, Ref: AAIBST
Driving the design and development of Phase I clinical trials, you will take a key role both in the leadership of your Biometrics team and in the delivery of vital input to support our clients' objectives. You will explore the relationship between pharmacokinetic and pharmacodynamic data with statistical models. You will have a role in the development of methodologies, protocols and, most importantly, people. As such, your management skills are as vital to the role as your scientific abilities. You should be educated to post-graduate level, including a statistical qualification, while considerable experience in clinical statistical analysis is essential. You should generate enthusiasm and confidence in equal measure, and have excellent communication skills.

**Pharmacokineticists**, Ref: AAIPKS
As a key member of our new Biometrics team, you will support Phase I clinical trials with analyses and reporting. While the main focus of your analysis will be pharmacokinetic data, you will also look at its relationship with pharmacodynamic data, in addition to managing quality control across the team and providing input into the design of protocols. With a BSc in Life Sciences and around four years' pre-clinical or Phase I experience, you should have a good knowledge of WinNonlin, while experience of a GLP/GCP environment and SAS would be beneficial. You should bring good communication skills to the role, helping you build effective working relationships with colleagues and external stakeholders alike, and it's vital that you share our ambition.

**Regulatory Affairs Specialist**, Ref: AAIRAS
Working in partnership with our clients to support their products through the drug development process, you will provide advice and expertise from pre-IND through to NDA approval - and beyond. As such, you'll make applications for the investigation and marketing of new drugs, prepare regulatory submissions for the USA, Canada and European Union, and provide representation at regulatory agencies and committees. That means your project management and client interaction skills are just as vital to the role as a degree in pharmacy, medicine or chemistry and substantial experience in clinical research in international fields. You should also have a good knowledge of EMEA, plus excellent organisational skills.

While you'll earn a competitive salary, pension scheme, private healthcare and relocation package (where appropriate), we also offer the opportunity for real personal and professional progression. As one of the first to join our Edinburgh operation, you'll have the chance to shape our future - and yours.

To find out more and apply, call 01506 882875 or email info@enhancepeople.co.uk quoting the appropriate reference (no agencies please). As we continue to grow, we will continue to seek out the best talent for our Edinburgh office - so if your skills belong in an organisation like ours, please get in touch.

AAIPHARMA
Enhance PEOPLE CONSULTANTS
Research Assistant - INDOX: Cancer Research in India
Part-time (60%) for 1 year in the first instance
Salary in the range: £24,886 - £30,607 p.a. (pro rata)

The INDOX Cancer Research Collaboration was established in July 2005 to undertake clinical research into the aetiology and treatment of cancer in India and is a partnership between the University of Oxford and India's top 6 cancer centres. Additionally, the INDOX fellowship scheme provides training and research opportunities to scientists and clinicians from India.

We are seeking a research assistant to work with the INDOX Clinical Director, Dr Raghib Ali, on the research arising from the collaboration and fellowship programme through clinical trials, epidemiological and other types of clinical research. The main role will be to assist in the design of clinical studies and the analysis and presentation of subsequent data. Candidates should have experience of investigative research and possess good organisation skills along with an interest in cancer and statistics.

To obtain a full job description and application form e-mail admin@clinpharm.ox.ac.uk or tel. (01865) 224990, quoting the reference HD/06/007. The closing date for applications is 18th August 2006. Interviews will be held on 30th August 2006.

The University is an Equal Opportunities Employer.

MAGDALEN COLLEGE OXFORD

Fellowship by Examination
2006-2007

The College proposes to elect, in February 2007, one or two Fellows by Examination. Candidates should have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. They will already have demonstrated outstanding promise in their chosen field. In any event the candidate must not have completed more than four years' graduate study by 1st October 2006. There is no restriction on the number of times an applicant may apply for this post.

Each Fellowship is tenable for three years at a stipend starting at £16,352 per annum rising annually on 1st October. The Fellow is a member of the Governing Body of the College and is entitled to free lunches and dinners, to a research allowance, and either to free single accommodation, or to a discretionary housing allowance, currently set at £9,000 p.a. It is likely that successful candidates will be required to live within a certain radius of Oxford during the period of their appointment.

Application forms and further particulars can be obtained from the administrative Secretary, Magdalen College, Oxford, OX1 4AU (tel. +44 (0) 1865 276060, email: elizabeth.martin@magd.ox.ac.uk) or at www.magd.ox.ac.uk/vacancies/ The closing date is 16th October 2006.

The College exists to promote excellence in education and research, and is an Equal Opportunities Employer.
[2563-061 (2006) : 71]
Based in Dublin City University (DCU), the Biomedical Diagnostics Institute was established in 2005 through a Science Foundation Ireland Centre for Science, Engineering & Technology award, and industry funding. The Biomedical Diagnostics Institute (BDI) carries out cutting-edge research focused on the development of next-generation biomedical diagnostic devices measuring indicators of disease. Opportunities now exist for ambitious, highly motivated researchers, at both post-graduate and post-doctoral levels, to join a world-class research team of scientists from our industry partners (Analog Devices, Âmic, Enfer, Hospira, Becton Dickinson & Inverness Medical Innovations) and partner academic institutions [Royal College of Surgeons Ireland (RCSI) in Dublin, National Centre for Biomedical Engineering Science (NCBES) at NUI, Galway, and the Tyndall National Institute (TNI) in Cork], along with the core research team at Dublin City University (DCU).

**Post-doctoral Researchers**
Biomolecular Recognition: Generation of specific antibodies to cardiac markers using genetic engineering
Expertise: Molecular biology/immunoassay/genetic engineering of proteins

Bio-interface Characterisation & Engineering Use of surface characterisation techniques to optimise the immobilisation and orientation strategies for antibody assay formats
Expertise: Scanning Probe Microscopies (SPM), surface analysis techniques

Biofunctional Surfaces: Development and characterisation of nanopatterned bioactive chip surfaces
Expertise: Biosurface science, nanopatterning

Transduction Science: Development of enhanced electrochemical, electrochemiluminescence and surface enhanced Raman detection platforms
Expertise: Nanoscience, monolayer and polymer film formation and characterisation, transient photophysical measurements/spectroscopy, electrochemistry, Raman spectroscopy, fluorescence correlation spectroscopy and single photon counting

Coagulation Monitoring: Development of advanced coagulation monitoring devices for chronic and critical care applications
Expertise: Rheological, viscoelastic and haemostatic properties of blood / Polymer MEMS & microfluidics / Biodevice interfacial modification

Location: All positions will be based in Dublin City University, with the exception of the Biofunctional Surfaces post-doctoral researcher who will based in the Tyndall National Institute, Cork.

For more information visit: www.dcu.ie/vacancies/current.shtml

Applications: A completed application form (available from www.dcu.ie/vacancies/current.shtml) & Curriculum vitae should be submitted to: Human Resources Department, Dublin City University, Dublin 9, Ireland, E-mail: hr.applications@dcu.ie
Tel: +353 (0)1 700 5149 Fax: +353 (0)1 700 5500

Closing date: Friday 25th August

**Postgraduate Research Opportunities**
Funded postgraduate research studentships are also available in the following programmes: Biomolecular Recognition; Platelet Biology; Transduction Science; Signal Amplification Science; Coagulation Monitoring; Bovine Mastitis Chip and Education & Outreach in Biomedical Diagnostics.

Postgraduate applicants should have a good honours degree (2.1 or better) in a relevant subject area. Please visit www.bdi.ie for more information on these positions and topic areas.

Dublin City University, Ollscoil Chathair Bhaile Àtha Cliath
[2563-062 (2006) : 71]
University of Dundee Medical School  
Division of Pathology & Neuroscience

**Research Councils UK Fellowship in Cancer Biology**  
Initial appointment will be on the RA1A or RA2 scale dependent on qualifications and experience

The Medical School has been awarded an RCUK Fellowship in Cancer Biology and wishes to make a strategic appointment to build on and add value to existing research activities. The University of Dundee has an internationally renowned portfolio of cancer research, covering a diverse range of activities from fundamental molecular cell biology and genetics through to population screening, surgical and clinical treatment strategies and new drug discovery. Cancer Research (5* RAE 2001) is a major research theme in the Medical School and we will be seeking applications from scientists with an excellent record of research achievement able to secure substantial external funding to develop and maintain an independent internationally competitive research group. We are particularly keen to attract a scientist to work collaboratively in developing research in the area of aetiological and/or therapeutic aspects of the tumour cell and its microenvironment but outstanding applicants from any relevant area of cancer biology will be considered.

RCUK Fellowships (www.rcuk.ac.uk/acfellow/) provide experienced postdoctoral researchers with the opportunity to establish a permanent career path. The Fellowships are funded for a fixed term period of five years after which, subject to the successful completion of the University’s probationary period, the post would normally be fully established as a University lectureship. Applicants should have sufficient postdoctoral experience to demonstrate their outstanding research potential and must not currently have a permanent lectureship position. The funding provided by RCUK is flexible enough to accommodate researchers who may have their own funding initially through an existing Fellowship.

Informal enquiries may be directed to The Research Dean, Prof Eric Wright, e.mail: e.g.wright@dundee.ac.uk, tel: (01382) 632169. We regret that we are unable to accept applications by email.

Further details and an application pack are available from our website www.jobs.dundee.ac.uk  
Alternatively, contact Personnel Services, University of Dundee, Dundee DD1 4HN, tel: (01382) 344817 (answering machine). Please quote reference number: MD/1406/NS.

Closing date: 17 August 2006.

Applicants will only be contacted if invited for interview.

As part of the recruitment process, the University requires that a Disclosure Scotland check is undertaken for this position.

The University is committed to equal opportunities and welcomes applications from all sections of the community.

DEPARTMENT OF PHYSICAL SCIENCES

Lectureships in Chemistry and RCUK Academic Fellowship in Colloidal Nanotechnology

Chemistry at Hull (see www.hull.ac.uk/chemistry) is an attractive Department with record numbers of students, newly refurbished teaching and research laboratories and distinctive research strengths. As part of the Department's strategic development of its three research themes, Nanotechnology & Materials, Miniaturizing Chemistry and Molecules for Health, we are recruiting three talented academics seeking a good first post in which to build their independent research.

- **Lecturer** (ref. EM421) to teach in Inorganic Chemistry and to develop experimental research in either Nanotechnology & Materials or Molecules for Health.
- **Lecturer** (ref. EM422) to teach in Physical Chemistry and to develop experimental research as part of the Surfactant & Colloid Group in either Nanotechnology & Materials or Molecules for Health.
- **5 year Academic Fellowship** (ref. EM420) in Colloidal Nanotechnology leading to a guaranteed lectureship in Physical Chemistry. This post is intended for candidates who are not currently employed on a continuing contract.

All new appointees will get significant start-up support including direct funding, a PhD studentship, full access to shared instrumentation and facilities and a light initial teaching load. We aim to fill these posts by 1 January 2007.

For informal enquiries please contact Professor Paul Fletcher, Head of Department (tel: 01482 465433, email: p.d.fletcher@hull.ac.uk).

For further information and details of how to apply, tel: (01482) 465557 (textphone for applicants with a hearing/speech impairment: 01482 466851), fax: (01482) 466660, or email: science-recruitment@hull.ac.uk (quoting the post reference).

Closing date: 4 September 2006.

For online information see WWW http://www.hull.ac.uk/

We promote diversity in employment and welcome applications from all sectors of the community.

THE UNIVERSITY OF HULL
[2563-065 (2006) : 72]
Queen Mary
University of London
Department of Materials

Postdoctoral Research Assistant - Instrumentation or Real-Time Process Logic Control Ref: 06272/AB

We currently have a position available for PDRA to work on a large innovative project based on high throughput materials processing. You should possess a PhD or an equivalent qualification in science or engineering subjects with relevant practical experience in real-time process logic control or programming and computing. Experience of using Matlab, Labview or C/C++ is also desirable.

The appointment is available immediately on a fixed-term contract for 3 years (including an initial probation year). Salary will be up to £27,156 inclusive.

Informal enquiries can be made to Dr Jawwad A. Darr by email: j.a.darr@qmul.ac.uk

For further details and an application form contact v.g.wells@qmul.ac.uk or from the website: http://www.hr.qmul.ac.uk/vacancies Information about the Department of Materials can be found on http://www.materials.qmul.ac.uk

Completed applications along with a covering letter, CV and contact details for two referees should be returned to: Miss Victoria Wells (v.g.wells@qmul.ac.uk), Department of Materials, Queen Mary, University of London, Mile End Road, London E1 4NS.

Closing date for completed applications: 17th August 2006.

[2563-066 (2006) : 73]
RESEARCH CO-ORDINATOR FOR ENERGY

Salary: £27,929 - £36,959 p.a. (discretionary range to £43,580) (under review)

The Mathematical, Physical and Life Sciences Division seeks to appoint a divisional Research Co-ordinator for Energy for a period of 4 years in the first instance. Working with University partners and external collaborators, the co-ordinator will play a key role in the development of a large-scale energy research programme designed to address national and global needs. You will identify funding sources in the UK and abroad, initiate and promote research proposals from University science departments across the spectrum of energy research, and act as contact point and co-ordinator for new and existing activities at Oxford.

You will have a PhD or equivalent experience in a relevant field and excellent organisational, communication and team-working skills. Familiarity with energy research, acquired as a researcher or in another capacity, is desirable.

Further particulars are available at http://www.admin.ox.ac.uk/fo/ and from Mr Paull Hammond, MPLS Division, 9 Parks Road, Oxford OX1 3PD (paull.hammond@mpls.ox.ac.uk), to whom written applications should be made, enclosing your CV and the contact details of 3 referees. Closing date is 1st September 2006.

The University is an Equal Opportunities Employer.

Lecturers
Animal Studies/HE Tutor £20,240 - £27,327
Animal Studies/FE Tutor £20,240 - £23,279

At Sparsholt College, we're making it a reality. Building strong partnerships with businesses, the community and other like-minded colleges across the UK, our goal is to deliver excellence in everything we do.

Joining our Animal Studies team, you'll use your industry experience in the field of Animal Management and behaviour to lecture and lead practical activities. As HE Tutor you'll need a MSC/PHD level qualification in Animal Behaviour, your research and dissertation work experience will also be key. Alternatively, as FE Tutor you'll have a HND/FD in Animal Management/Science.

As well as final salary pension scheme, free parking, subsidised dining, and an on-site gym, we offer fantastic staff development.

Visit www.creatingexcellence.me.uk or tel: 01962 797438 (24hr) or 01962 797309. Email: recruitment@sparsholt.ac.uk

Closing date: 8th August 2006,

**RCUK Academic Fellowship in Neuroscience**

£25,633 to £30,607 P.a. (Pay Award Pending)

Aston University has recently been awarded an RCUK Academic fellowship.

Accordingly, applications are invited from ambitious, self-motivated neuroscientists with expertise that complements the current in vitro (cellular neurophysiology) and neuroimaging projects in the School. The post is a 5-year research post, after which consideration will be given to offering a suitable permanent academic appointment. The successful applicant will be expected to take up the post on or soon after 1 October 2006. Criminal records bureau clearance will be required for this post.

Application forms and further particulars are available on our web site: http://www.aston.ac.uk/jobs, or by telephoning: 0121 359 0870 (24 hour answerphone), or by email: b.a.power@aston.ac.uk, quoting reference number R06/143/4.

Closing date: 11th August 2006.

Marie Curie PhD Fellowship in Antarctic Air-Sea-Ice Science (FAASIS)

The School of Environmental Sciences at the University of East Anglia, UK, together with the British Antarctic Survey, invite applications for two 3-year PhD Fellowships funded by the European Commission ‘Marie Curie Actions’. The award is open to recently graduated nationals and residents of the European Union and Associated States. Certain eligibility criteria apply (e.g. current and former residents of the UK are not normally eligible). Applicants will undertake original independent research, and associated training, leading to the award of a PhD. Candidates select from a number of research projects related to physical and chemical processes in the Antarctic atmosphere, ocean, and cryosphere. Opportunities for Antarctic travel may arise but are not guaranteed.

The deadline for applications in 28 August 2006

Full details, an application form, and a list of research projects are available on the following web site: http://www.uea.ac.uk/env/studentships/faasis/faasis.htm

If you would like details posted to you please contact: The Faculty of Science Postgraduate Research Office, University of East Anglia, Norwich NR4 7TJ. Telephone (01603) 593002; Fax (01603) 593035; Email scipg@uea.ac.uk
Research Fellow in Molecular Microbial Soil Ecology
Scale £33,465 - £38,772pa
4 year fixed term contract

Research will focus on understanding the consequences of root senescence, root exudation and arbuscular mycorrhizal fungi (AMF) on the structure and function of soil microbial communities. Applicants should have experience of applying molecular techniques to study microbial diversity and/or function.

A relevant PhD and at least 12 months’ postdoctoral experience is essential. Experience of working with mycorrhizal fungi would be welcomed but is not essential.

For an informal discussion about the post please contact Professor John Hooker on Tel 0161 247 1600, j.hooker@mmu.ac.uk For an application form and further particulars, returnable by 17th August 2006, please contact Personnel Services on 0161 247 6464 quoting reference JW533 or email k.daniels@mmu.ac.uk Alternatively download these documents from our website http://www.mmu.ac.uk/jobs

[2563-072 (2006) : 74]
Department of Chemistry

**Experimental Officer**

*(X-Ray Structure Analysis)*

£22,774 - £26,402 pa

You will carry out single crystal X-ray structure determinations and will be responsible for the maintenance of single crystal and powder X-ray diffractometers and the computer network in the X-ray laboratory.

You should have a Masters degree in either chemistry or physics. A strong background in crystallography and experience in diffraction techniques, crystal structure refinement and computer networking are essential.

Quote Ref: B/804/NS

Closing Date: 25 August 2006

Department of Mathematical Sciences

**Postdoctoral Researcher**

£27,193 pa

To work on an EPSRC-funded project, “Swimming phytoplankton in a turbulent environment. The project involves analytical modelling and numerical simulation of the spatial-temporal distribution of phytoplankton in turbulent flow fields.

The mathematical analysis will be complemented by experimental results obtained during a 3 month visit to the University of Washington, Seattle.

You should have a PhD in applied mathematics or related discipline.

Experience in fluid dynamics, PDEs and scientific programming is desirable. Enthusiasm for mathematical biology is expected, but laboratory experience is not required.

The post is available for two years.

Quote Ref: B/816/NS

Closing Date: 25 August 2006

School of Biological Sciences

**Two University Teachers in Biological Sciences**

(0.8 fte)

£27,193 - £31,525 pa (pro rata)

The School (rated 5 in RAE 2001) is the largest department in the University, with 63 academic staff covering the full range of biological sub-disciplines ([http://www.liv.ac.uk/biosciences](http://www.liv.ac.uk/biosciences)). The School has recently moved into a new Biosciences Research Building, which provides state-of-the-art laboratories.

You will have a teaching, research or publication record in any one of the following areas: Biochemistry/Molecular Biology, Environmental Biology, Evolutionary Psychology, Genetics, Microbiology or Zoology and will make a major contribution to the teaching of first and second year undergraduates.

The posts are available for one year.

Quote Ref: B/806/NS

Closing Date: 25 August 2006

School of Infection & Host Defence

Division of Immunology
Lecturer/Senior Lecturer in Immunology
£27,193-52,107pa
We are looking for an outstanding individual with a proven research track record to join the School, which encompasses the Divisions of Immunology and Medical Microbiology. You will be based in the Division of Immunology and preferably have research interests in Innate Immunity or another area which complements interests in the Division or Faculty of Medicine.

You will be expected to undertake teaching on the MSc in Human Immunity course and also be encouraged to support the MBChB programme, particularly by contributing to short modules run by the Division.

The post is available for five years initially.

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY
[2563-073 (2006) : 75]
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
The Clinical Trial Service Unit and Epidemiological Studies Unit (“CTSU”)

**Study Administrator for SHARP**
Academic-Related Staff Grade 6: £22,111 - £26,401 p.a. (under review)

The Clinical Trial Service Unit and Epidemiological Studies Unit (“CTSU”) is one of the world’s leading centres for research into the causes, prevention and treatment of chronic diseases, in particular, cancer and heart disease. CTSU is currently conducting the Study of Heart and Renal Protection (SHARP), a randomised trial to assess the effects on mortality and major morbidity of a novel cholesterol-lowering drug treatment in patients with chronic kidney disease. Over 9000 participants have been recruited in 380 Local Clinical Centres in 18 countries. The local centres are managed by 7 Regional Co-ordinating Centres that are in turn overseen by the International Co-ordinating Centre at CTSU. Advanced technological systems, including laptop and web-based applications, are used for efficient data collection and study management.

We are looking for an experienced and well-organised individual to join the multi-disciplinary research team responsible for supporting the regional centres and ensuring data quality. You will gain experience in many aspects of managing a large-scale clinical trial. You must have a degree (or equivalent experience) with at least two years’ administrative experience. You should demonstrate excellent attention to detail and a logical and analytical approach. The ability to communicate clearly is essential for this post as are excellent organisational skills and the ability to work effectively both independently and as part of a busy team. You must also computer literate and proficient in the use of Microsoft Office.

The appointment will be for two years in the first instance. For further information please see [http://www.ctsu.ox.ac.uk/jobs](http://www.ctsu.ox.ac.uk/jobs) or contact the Admin Office on (01865) 743867 or e-mail: recruit@ctsu.ox.ac.uk The closing date for applications is the 4th September 2006. Please quote reference 06/23/CB.

The University is an Equal Opportunities Employer.

[www.ox.ac.uk/jobs](http://www.ox.ac.uk/jobs) [2563-074 (2006) : 76]
Research Technician £ 16,946 - £20.235

The Division of Child Dental Health at Bristol Dental Hospital & School is looking to appoint a research technician to support the research of a number of clinical and academic staff, and to facilitate an ongoing collaboration with academic oral microbiologists.

Our research aims to utilise contemporary molecular biology and standard microbiology techniques, to understand the role of dental plaque microorganisms in clinical problems associated with orthodontic treatment.

You should have significant experience in research as a laboratory technician and possess a university degree in the biological/biomedical sciences and/or have completed appropriate technical qualifications. Experience of molecular biology techniques is essential and some knowledge of general microbiology methodologies is desirable. You will be expected to interact with a broad group of personnel, and will be required to manage general laboratory work.

For informal enquiries please contact Dr D Dymock on (0117) 920 4168 or e-mail d.dymock@bristol.ac.uk

Further details and an application form can be found at www.bristol.ac.uk/vacancies Alternatively you can telephone (0117) 954 6947 or e-mail recruitment@bristol.ac.uk (stating postal address ONLY), quoting reference number 12305.

The closing date for applications is 9.00am, 18th August 2006.

LEARNING • DISCOVERY • ENTERPRISE

[2563-079 (2006) : 77]
A collaborative BBSRC CASE funded PhD Studentship is available to study the function of the LKB1-AMPK signalling pathway in cancer. The work will be performed in the group of Professor Dario Alessi in Dundee and Dr Darren Cross in AstraZeneca and will build upon exciting recent work in this area (J. Biol. 2003, 2:28; EMBO J. 2003 22, 5102-5114, Cancer Cell. 2004 6: 91-9; Nat Genet. 2005 Jan; 37: 19-24). Most of the research will be performed in the MRC Unit in Dundee, but it is envisaged that the student will spend a minimum of 3 months at AstraZeneca located at Alderley Park in Cheshire, probably in the second year of study. The position is from 1st October 2006. The MRC Unit and AstraZeneca have outstanding facilities and are major centres for signal transduction and cancer research. The MRC Unit has an excellent record for training PhD students. This project would suit a student with a strong interest in protein kinases, signal transduction and cancer biology. Applicants should hold or expect to hold a 1st or upper 2nd Class Honours in Biochemistry, Molecular Biology or a related subject.

Applications in the form of a CV and supplying the contact details of three referees should be sent by email to Mrs Judith Hare (j.l.n.hare@dundee.ac.uk) before 18th August 2006. Informal enquiries can be made to Dario Alessi (d.r.alessi@dundee.ac.uk) or Darren Cross (Darren.Cross@AstraZeneca.com). The studentship is open to any highly motivated student who holds UK nationality.

Applicants will only be contacted if invited for interview.

Further information on the laboratory of Dario Alessi can be found on (www.dundee.ac.uk/lifesciences/mrcppu). Further information on the Dundee School of Life Sciences complex and AstraZeneca can be found on (http://www.dundee.ac.uk/biocentre/ and http://www.astrazeneca.com).

Imperial College London

PhD Studentship
Mathematical/computational modelling applied to sustainable nuclear power technology

‘Keeping the Nuclear Option Open’ is a major EPSRC funded initiative, with the involvement of Imperial College and several other universities. It supports a wide range of research addressing different aspects of nuclear power production. From this autumn onward Imperial College, as part of this programme, will be seeking to appoint a PhD student in the linked computational, mathematical and engineering physics modelling of the safety performance of ‘Generation IV’ nuclear power plant. This research will be linked with UK industry in the context of the international Gen IV programme. The studentship (offering transferable skills in finite elements, CFD, radiation and large scale computation) will be tenable in the Applied Modelling and Computation Group of the Department of Earth Science and Engineering. The Group offers an exciting multidisciplinary environment with research in progress applicable to energy, waste, oceanography, earth imaging and numerical mathematics.

Applicants must be UK students as defined by the EPSRC in order to be eligible for both bursary and fee support (this definition now includes EU citizens who have been resident in the UK for a period of 3 years for any purpose, including undergraduate studies).

If you think you may be interested please email a CV and covering letter as attachments to c.pain@imperial.ac.uk These emails will be screened electronically, so the email must include the text KNOO in the subject line and attachments must be in the form of pdf files, and named in the form YOURNAME_CV.pdf and YOURNAME_COVER.pdf.

Closing date: 15 September 2006.

Valuing diversity and committed to equality of opportunity

[2563-082 (2006) : 78]
**Ph.D. studentship on the World of Uncertainty**

The World of Uncertainty will be an educational computer game. In it decision-makers will learn how to manage scientific uncertainty. No longer will they be forced to make decisions based on simple certain narratives that fit into a TV debate on global warming. In a computer game, players can explore alternatives as they wander through a world of uncertainty. They will practice until they are as good as a bookmaker at estimating uncertainty. The EPSRC is funding QUB, UCL and Brunel University to develop and evaluate this game.

The School of Management and Economics in Queen's University Belfast is now offering a postgraduate research studentship to work as part of the project team and complete a Ph.D evaluating the educational effects of the game. Full details of the post, studentship and requirements are online at [http://is.mgt.qub.ac.uk/research/uncertainty/phdadvert.html](http://is.mgt.qub.ac.uk/research/uncertainty/phdadvert.html).

Or contact Dr. Brian Webb (e-mail: b.webb@qub.ac.uk or tel: +44 (0)28 90 27 3592) for further particulars.

UNIVERSITY OF WESTMINSTER

Expand your horizons

We offer a range of courses that can help you become a great scientist and secure a satisfying career, ready to meet the challenges of providing new services in the ever-changing technologically driven world of science, working alongside professionals from other disciplines.

Our MSc degree programmes include:

• Bioinformatics
• Medical Biotechnology
• Broadband and High-Speed Communications Networks
• Computer Forensics
• Data Mining
• Complementary Medicine
• Interprofessional Health and Social Care

Full-time and part-time study options are available. Professional short courses and individual modules can be taken to target specific skills or to get a taste of our degrees.

Visit our central London location and find out more about our full range of courses at our Information Evening on Wednesday 6 September 4.30-7.30pm (115 New Cavendish Street, W1).

For more information, phase contact Admissions Enquiries Office Tel +44 (0)20 7911 5000 Email admissions@wmin.ac.uk www.wmin.ac.uk

UNIVERSITY OF BIRMINGHAM

The Centre for Formulation Engineering, in Chemical Engineering

**Engineering Doctorates**
- A 4 year postgraduate qualification carrying out industrially relevant research.
- Based in a pharmaceutical company not in the University.
- Includes taught modules in science, engineering, pharmaceutical production, business and management
- Open to UK / certain EU nationals with a good first degree in (Bio) Chemical Engineering, Chemistry, or Physics (upper second or better)
- Existing employees with relevant industrial work experience may also be considered,
- Tax free bursaries of over £18,200 p.a. plus fees paid by the EPSRC
- Projects available with:
  - Gsk (Ware) - Production of dry powder inhalable formulations.
  - Cardinal Health (Swindon) - Freeze drying and stabilisation of pharmaceutical dosage forms

If you meet the EPSRC entry requirements please e mail your c.v. to r.w.greenwood@bham.ac.uk

A University of Fairness and Diversity.

POSITIVE ABOUT DISABLED PEOPLE

Career-enhancing

**MSc degrees for the health and pharmaceutical sector**

Our courses are developed hand-in-hand with employers, thus ensuring that our graduates are in demand - 97% gain employment almost immediately. Financial awards and flexible payment plans are available.

PhD opportunities are also available in areas listed

- MSc Applied Bioinformatics
- MSc Clinical Research (p/t only)
- MSc Medical Diagnostics
- MSc Molecular Medicine
- MSc Medical Technology Regulatory Affairs (p/t only)
- MSc Translational Medicine

Register for the next Cranfield Open Day. [www.cranfield.ac.uk/openday](http://www.cranfield.ac.uk/openday)

All students have the opportunity of carrying out a research project in industry.

All full-time courses are also available on a part-time basis.

Contact Sue O'Neill for an information pack and to arrange for a member of the appropriate course team to contact you to discuss your career.

For all enquiries please quote ref no: NS05/08.

Welcome to the 21st century...

The Wellcome Trust has shed not only its old building but also its stuffy, insular ways. Phyllida Brown talks to its director and the man presiding over this metamorphosis, Mark Walport

High above a roaring central London, Mark Walport's calm, glass-walled office feels like an eyrie, designed for serious, uncluttered thinking. Behind him are treasures from the collection of Sir Henry Wellcome, founder of the charity that Walport now directs. But it's the view of the city, across a tangle of rooftops and glinting high-rises, that dominates.
The office seems to symbolise the fresh approach he's bringing to the 70-year-old trust, one of the world's biggest funding charities, with more than £400 million to spend on bioscience research each year.
Not long ago, the trust had a reputation for being inscrutable and high-handed, and it seemed to have no need to justify its decisions to the outside world. Under Walport, the trust is fast becoming more open and accountable: "The world has changed completely, we are much more transparent than in the past." His enthusiasm for his role, which includes running the trust and engaging in high-profile public debates, is obvious. "I suppose I like managing quite complicated things," he says. He has the relaxed but energetic air of someone who relishes difficult questions and the yellow shirt and blue-and-red spotted braces show a sense of fun, too.

Back in 1992, when New Scientist interviewed a previous incumbent, Bridget Ogilvie, in the old building, it was like being sent to the headmistress. This is worlds away. Part of the change is the architecture of the new headquarters. Opened in 2004, the Gibbs Building is all open space and cathedral-like proportions. Its centrepiece is a seven-storey-high sculpture based on a falling drop of molten metal by the British sculptor Thomas Heatherwick, which he calls Bleigiessen, or "lead-pouring", after a New Year's Eve fortune-telling activity in central Europe.
Another part of the change is about coming of age. "As people become more confident they tend to become more transparent," says Walport, who stresses that change had begun before he took over in 2003. Just five years ago, for example, Sir Henry's will was transformed into a modern constitution, in line with UK charities law. The trust, Walport believes, had to deal with the impact of its own growth in the early 1990s, after it sold its shares in the pharmaceuticals company Wellcome and doubled its research budget overnight (New Scientist, 1 August 1992, p 12). Only then could it become more outward-looking.

As director, Walport must answer to the governing board. This formerly exclusive group is now "very strong, properly structured and very challenging", he explains. Governors must apply for their posts, which are publicly advertised, with headhunters also involved in seeking high-calibre candidates. All governors post their biographies and photos on the trust's website. "The executive running a fairly big organisation needs to be challenged, to be asked very difficult questions," says Walport, adding that some government departments would benefit from such accountability.

Walport's career was not planned. He read medicine at the University of Cambridge and the Middlesex Hospital Medical School in London. After working as a junior doctor in London, he returned to Cambridge to do a PhD under immunologist Peter Lachmann, who proved a great mentor. Lachmann invited him to stay in his group, but Walport felt like branching out, and took a senior lectureship at the Royal Postgraduate Medical School (RPMS) in London's Hammersmith Hospital. There, Walport pursued immunology and rheumatology, becoming professor of medicine and then head of research for RPMS. By 1994, he had been appointed vice-dean, and three years later, chair of the division of medicine. During his time as chair, he managed the complex merger of the RPMS with Imperial College, London. He also had a spell as a governor of the Wellcome Trust, which taught him about the charity. So when the Wellcome Trust's previous director, Mike Dexter, left, Walport decided to apply. His enthusiasm is driven in part by the same fascination with science that motivated him since boyhood. "I was interested in bugs, beetles and birdwatching as a child. I have always liked discovering things by doing experiments." Now he delights in reading applicants' ideas: "It's fun. It's a continuous free education looking at the creative thoughts of people from right across science.'

Beyond the fun, Walport has a firm grip on a restructured budget. In the past, funding was driven by process. He argued instead for a science-led framework, and in 2004 the trust set up six funding streams:
one in medical humanities and five in biomedicine. Each stream has a committee of leading external scientists who advise on how best to develop areas of research and training, and at least one funding committee that awards grants. The governors make major funding decisions.

Good returns
Walport is also trying to change how the trust evaluates the returns. At present, most funding bodies focus on the quality of grant applications when they decide which work to support. Increasingly, he believes, funding bodies should review work afterwards too. Making this happen is not straightforward. Should research funding bodies be more like businesses? After all, the world's biggest health-research charity, the Bill and Melinda Gates Foundation, makes clear that it expects applicants to deliver, and that it will require

“The world has changed completely, we are much more transparent than in the past”.

Next week: where are the big ideas in chemistry? The Insider asks some of the leading players in the field

A new openness – literally and metaphorically – for the Wellcome Trust under its director, Mark Walport

CV- MARK WALPORT

• 1974: BA in medical science and natural sciences (pathology) from the University of Cambridge
• 1977: qualified as a doctor at the Middlesex Hospital Medical School, London
• 1980: Member of the Royal College of Physicians
• 1982: Medical Research Council training fellow in the MRC Mechanisms in Tumour Immunity Unit, Cambridge
• 1986: PhD in immunology, University of Cambridge
• 1985: Head of rheumatology section, Royal Postgraduate Medical School of London
• 1990: Fellow of the Royal College of Physicians
• 1991: Professor of medicine, head of rheumatology, Royal Postgraduate Medical School of London
• 1994: Director of research and development, The Hammersmith Hospitals NHS Trust
• 1994: Vice-dean (research), Royal Postgraduate Medical School of London
• 1997: Professor of medicine, chairman of the division of medicine, Hammersmith Hospital, Imperial College, London
• 2000-2003: Governor, the Wellcome Trust
• 2003: Director, the Wellcome Trust

answers to its questions. Walport is open to ideas, though he warns against simplistic measures. He rejects, for example, the “mindless use” of bibliometric techniques, where applicants' publications are simply counted and weighted for the journal's impact factor without regard to subtleties. For instance, he says that many papers in the highest-impact journals are never cited, while other papers have impact by influencing clinical practice but yet are not cited.

What's more, the benefits of a scientific discovery are not always immediately apparent. Walport cites the use of ultrasound as a tool in antenatal medicine. One of its pioneers, Scottish obstetrician Ian Donald, had developed an interest from his knowledge of sonar in submarines and shipbuilding. "You could do any citation analysis you like," says Walport, "and not discover that."

Walport believes that his time as a doctor has influenced his leadership style. He was attracted to rheumatology because of its complexity. "The critical thing about being a good doctor is to work out the important problems so you can analyse the causes and find solutions." This also applies to managing a large organisation, he believes.

Equally, he feels his time as a scientist gives him insight into the researchers they fund. He knows well the effort that goes into grant applications, for example, and feels that researchers should always be able to find out why they failed. Back in 1992, Wellcome did not explain why it rejected applications. He also thinks that the trust has a vital role to play in the public arena. Recently, Walport pushed hard for scientists to regulate their own work so they can continue studying the pathogens and toxins terrorists might abuse. Without self-regulation, he fears, key research could be shut down. Walport is also a big player in helping create free online access to scientific papers. The trust must speak out, he says, because it is seen as independent and essentially benevolent.
The pace of activity shows no sign of letting up. At the end of July, the trust announced plans for a £10 million centre for stem cell research in Cambridge, funded with the Medical Research Council and the Wolfson Institute for Biomedical Research. Such partnerships, once unheard of, are becoming normal: openness, it seems, is now for real.

FOOD STANDARDS AGENCY

ADVISORY COMMITTEE ON THE MICROBIOLOGICAL SAFETY OF FOOD

Recruitment of Chair
The Chair of the Food Standards Agency invites applications for the post of Chair of the Advisory Committee on the Microbiological Safety of Food (ACMSF) which became vacant on 1 February 2006. The ACMSF is the statutory expert committee which advises the Agency on the microbiological safety of food.

Vacancy for ACMSF Chair
The post of Chair of the ACMSF will require a person of national or, ideally, international standing, preferably in the field of medicine or science. The successful candidate will contribute to the formulation and delivery of advice on the microbiological safety of food to the Food Standards Agency.

The Chair of the ACMSF has a vital role in guiding and communicating the Committee's discussion and his or her independence must be beyond question. The Food Standards Agency has therefore decided that the Chair of the ACMSF (and similar committees advising the Agency) should not be employed by, or receive personal remuneration from, industrial organisations or pressure groups during his or her term of appointment.

Candidates must be strong team players with common sense and good analytical skills. Putting consumers first and being able to recognise the impact of ACMSF advice on the public are extremely important requirements.

General
Appointments to the ACMSF are made strictly on merit, in accordance with the Code of Practice for Ministerial Appointments to Public Bodies issued by the Office of the Commissioner for Public Appointments. Selection will also reflect the Government's Equal Opportunities policy.

If you are interested in being considered for this post, an information pack and application form may be obtained from:

Miss Sarah Butler, ACMSF Secretariat, Room 808C Aviation House, 125 Kingsway, London WC2B 6NH Tel: 020 7276 8947 Fax: 020 7276 8907 E-mail: sarah.butler@foodstandards.gsl.gov.uk

The closing date for receipt of completed applications is 22 September 2006.

Information about the ACMSF can be found on the Food Standards Agency's website at: www.food.gov.uk/science/ouradvisors/microbiogsafety
[2567-003 (2006) : 52]
The College Council intend to elect a number of Research Fellowships, open to men and women, tenable for four years from 1st October 2007. Fellowships are restricted to graduates of, or research students in, a University of the British Isles who will have completed not more than four years of full-time research (or part-time equivalent) by 1st October 2006.

Full particulars can be obtained by writing to: The Research Fellowship Competition, Gonville and Caius College, Cambridge CB2 1TA email: rfc@cai.cam.ac.uk fax 01223 332336 or via http://www.cai.cam.ac.uk

Telephone enquiries cannot be taken. Completed applications (12 copies) must be received by Friday 27th October 2006. Interviews will be held in January 2007.

[2567-004 (2006) : 52]
distance lab
Forres, Morayshire

As the world changes at an increasingly rapid rate, the development of new technology can bring both individuals and communities across the globe closer together. By creating a new breed of technologies, Distance Lab is a research centre that will help people deal with distance in different ways and break down the everyday barriers of space, time, society and culture.

The goal is an influential presence at the very forefront of digital media and communications inquiry and innovation. Our remit of research, education and commercialisation will create a knowledge base in the Highlands and Islands of Scotland that is a respected global leader in these fields.

**Chief Executive**

Ref: DL001

£70,000 + Bonus

In short, you'll lead us to this - combining an overarching vision with a grounded operational focus - overseeing research and commercial activities and networking with academics and business partners, locally, nationally and internationally. We're looking for an individual of significant presence, a well respected, connected and influential figure - commercially astute and well versed in ICT issues and the technology marketplace. You'll also need a PhD level qualification and convincing leadership skills.

**Chairperson**

Ref: DL002

£12,000

Clear direction, focus, strategic leadership are your watchwords. As the part-time non-executive chair of Distance Lab, you'll act on behalf of its board, making sure we follow good practice in our corporate governance. In our dealings with stakeholders, partners and customers, you'll be a confident advocate and champion for our activities. Entrepreneurial, visionary and creative, you'll bring strong skills and significant intellectual capacity, possibly even a postgraduate qualification in business strategy, technology management or ICT.

Distance Lab has been set up and funded by Highlands and Islands Enterprise and these first two posts will ensure you are involved in this exciting new project from the start.

Visit our website to find out more about what we do and explore the diverse network of services we provide. And to apply, email recruitment@hient.co.uk or call 01463 244289 for an application pack, quoting appropriate reference.

Closing date - 11 September 2006.

www.hie.co.uk/job-vacancies.html

Highlands & Islands ENTERPRISE

[2567-005 (2006) : 52]
The School of Statistics and Actuarial Science has major programmes in Statistics and Actuarial Science, teaches a number of Statistics service courses to other Faculties and has a well established postgraduate programme.

The School wishes to appoint a Professor in Statistics who will provide leadership in the School's teaching and research activities.

MINIMUM REQUIREMENTS:
PhD in Statistics.
Current substantial and sustained research record evidenced by publications in international peer-reviewed journals.
Academic leadership in research including the successful supervision of postgraduate students at doctoral level.
Experience in curriculum development and teaching at tertiary level.

ADVANTAGE:
A record of securing research funding.

The selection process will commence on 18 September 2006 and will continue until a suitable candidate is appointed or a decision is taken not to fill the post. The remuneration package offered includes benefits and will be dependent on the qualifications and experience of the successful applicant.

Applicants are required to submit a covering letter highlighting their experience in, and providing evidence for, each of the minimum requirements as listed above, together with a detailed CV including the names, full addresses, fax numbers and e-mail addresses of three referees, to: Mrs N Maharaj, Human Resources Administration, University of KwaZulu-Natal, Westville Campus, Private Bag X54001, Durban, 4000. Fax +27 (0) 31 260-7315 or e-mail: Maharajna@ukzn.ac.za

Assistant Director, Research
Starting salary range £41,524 to £43,709 per annum London, EC2A

asthma UK

An exciting opportunity has arisen within Asthma UK's research team, leading work to support our research strategy and manage the considerable scientific research spend undertaken by the charity. With the support of trustees and advisors from the research community we are able to ensure that our portfolio of projects maintains the charity's reputation as an organisation that supports excellence and is a leader in innovation. We are seeking to recruit an individual who will support our work in maintaining a detailed knowledge of asthma ensuring we fulfil our research aspirations in what is a changing and pressurised research environment.

Leading the research team and reporting to the Executive Director of Research and Policy, you will take an active role in the ongoing development, implementation and evaluation of the charity's research strategy. You will be responsible for the continued development and promotion of the profile of our research portfolio, ensuring we retain our reputation for excellence. You should have demonstrable experience of research administration at a senior level and will be able to evidence leadership qualities and strong interpersonal skills. Working with a wide range of stakeholders both within and outside the charity you will have exceptional communication skills and will be confident both in providing senior level administrative support to the charity whilst at the same time managing your team with creativity and vision.

For further details and an application form, please visit our website or contact
People Media Response, 2nd Floor, New Penderel House, 283-288 High Holborn, London W14 7HG.
Tel: 020 7420 2071, email: asthma@peoplemedia.co.uk Fax: 020 7420 2071, quoting reference number 72286.

Closing date for applications: 15 September 2006

Asthma UK's vision is 'control over asthma today, freedom from asthma tomorrow'. Our mission is to improve the health and well-being of people with asthma by building and sharing expertise about asthma.

Asthma UK came fifth in the Financial Times Best Workplaces in the UK list and was voted one of the top 100 Best Workplaces in Europe in 2005. In 2006 Asthma UK retained its presence on the Best Workplace list at 19th place and continues to be recognised as the top 'not for profit' employer in the UK.

We are passionate about what we do, not only for people with asthma, but also for our staff. In return for your commitment we offer an excellent employment package, which includes generous financial benefits, excellent training and development opportunities, family-friendly policies and flexible working practices to help you balance your life.

FISHERIES RESEARCH SERVICES

DIRECTOR
FRS FRESHWATER LABORATORY

We are seeking a Director to lead our Freshwater Programme in our mission to provide science that is ‘respected, relevant and responsive’ to the needs of the people of Scotland. You will be an active scientist able to lead the strategic direction of research and monitoring programmes concerned with the populations of migratory and freshwater fish species in Scotland. Working in partnership with other scientific organisations, customers and stakeholders you will also be the lead scientific advisor to the Scottish Executive and other resource management agencies.

Based in Pitlochry, the Freshwater Laboratory is internationally renowned for its work on freshwater fisheries with unique experimental facilities at its three field stations around Scotland. It has strong links with a number of universities in the fields of population modelling and fish ecology. The successful candidate will be responsible for the efficient operation of the Laboratory and strengthening its collaborative links.

You should be able to demonstrate
• A proven track record of excellence in a related scientific field, with a PhD or other post graduate degree and a strong publication record;
• An understanding of the role of science in the formulation of advice to government;
• Proven management experience, preferably leading scientific projects;
• An ability to lead and motivate project teams;
• Excellent interpersonal and communication skills and in particular ability to communicate complex issues to a wide audience.

You will be analytically adept, self directed and thrive on challenge.

The salary will be in the range (£40,441) to (£58,887) with the possibility of performance related bonuses. The Civil Service offers a choice of final salary or stakeholder pension, giving you the flexibility to choose the pension that suits you best.

For further information and an application pack contact the Human Resources Team on 01224 295689 or email HR@marlab.ac.uk. Information about Fisheries Research Services can be found at http://www.frs-scotland.gov.uk

Applications should reach the HR Team no later than 22nd September 2006.

Fisheries Research Services is an Agency of the Scottish Executive. We welcome applications from all suitably qualified individuals and aim to employ a diverse workforce which reflects the people of Scotland.

St George’s
University of London

Medicine, Biomedical Sciences, Health and Social Care Sciences
Division of Cardiac and Vascular Sciences

Professor of Cardiovascular Biology
St George's, University of London, wishes to appoint an outstanding individual to this newly created nonclinical post. Candidates must have an appropriate background and a strong record of research. The person appointed will provide a focus for leadership in the subject of cardiovascular disease relating to the mechanisms of ischaemic injury with particular emphasis on directing basic science and the provision of translational research.

For further information, visit www.sgul.ac.uk/jobs or contact the Personnel Office on 020 8725 5020 (24 hour answerphone) or email: personnel@sgul.ac.uk

Please quote reference 423/06.

Closing date: 19 September 2006.

St George's is an Equal Opportunities Employer
Forensic Science Laboratory - Aberdeen
£21,222 - £31,956

Based in Aberdeen, Grampian Police Laboratory provides a forensic science service for Grampian and Highlands and Islands, and is staffed and managed by Police Support Staff.

Two new posts have been created in the Biology and Chemistry teams. These are exciting opportunities for bright and able graduates, perhaps already working in forensic science, to develop rapidly in a small, busy laboratory.

Our methods of close supervision and emphasis on training and opportunities for learning mean that you will be dealing with a very wide variety of cases. In this challenging environment, you will soon gain reporting experience and should be aiming to achieve CRFP registration within five years of appointment.

**Forensic Scientist - Biology - General Biology** (1 post - Ref CID 3.6)
£21,222 to £31,956 (pay award pending) (permanent appointment)

**Forensic Scientist - Chemistry - Drugs Analyst** (1 post - Ref CID 3.7A)
£21,222 to £31,956 (pay award pending) (permanent appointment)

Both posts require at least a 2nd Class honours degree, or equivalent, in a relevant science subject. Placing on the salary scale will be determined by qualifications and experience.

We are looking for individuals with relevant laboratory experience, excellent observational and analytical skills, good communication skills in oral and written work - especially in presentations to a lay audience - and who are able to cope with pressure, are highly self-motivated but also good team players. Experience in a forensic laboratory in the area of forensic biology, forensic chemistry or drugs analysis, report writing and giving evidence in Court is particularly desirable.

Closing date for applications is Friday 22 September 2006.

Interviews and aptitude tests will be held during the week of 13th November 2006.

An application form and further information can be obtained by telephoning 0845 6005700 quoting the appropriate reference number or, alternatively, by visiting [www.grampian.police.uk/careers](http://www.grampian.police.uk/careers).

**GRAMPIAN POLICE**

Keeping our communities safe
[www.grampian.police.uk](http://www.grampian.police.uk)
SAFC Pharma is one of the leading chemistry services and development companies in the UK, providing rapid chemistry scale-up and development solutions to the worldwide pharmaceutical and Life science industries. Our expertise includes route and process design, scale-up and manufacture of material to cGMP including analytical method development and validation services. Our impressive growth in recent years is due in no small part to the quality of our people working closely with our clients as an extension of their in-house teams.

SIGMA-ALDRICH

**Principal Chemist**
Based in Manchester

An opportunity has arisen for a skilled Synthetic Organic Chemist to join our SAFC Pharma team as a Principal Chemist. The main responsibility is to carry out custom synthesis, process research and development and technical transfer to our global manufacturing sites.

The successful candidate will have a minimum of 3 years relevant experience in the pharmaceutical/fine chemical industry. They will have breadth and depth of knowledge in synthetic chemistry, educated to PhD Level and have experience in developing processes for scale up. They will have excellent interpersonal skills being able to communicate effectively with suppliers and customers and also have the ability to deliver to tight project deadlines.

**Project Leader**
Based in Manchester

We are also looking for a Project Leader to carry out process research and development, manage projects and co-ordinate resource in order to ensure projects run smoothly and to timely completion. The Project Leader’s main responsibility is to ensure liaison with customers is professional and effective.

The successful candidate will lead the technical direction and co-ordinate the resource of projects. They will be able to demonstrate at least 5 years industrial experience, perhaps as a Principal Chemist or a Project Leader, with a PhD in Chemistry. They will be excellent communicators, able to report effectively on progress and project issues with the customers. They will be able to work to tight deadlines and complete technical assessments.

In return for your commitment and expertise, we offer an attractive salary and benefits package including a Stakeholder Pension Scheme and HSA healthcare. Our offer also includes relocation assistance if required.

SAFC Pharma is located in the heart of Manchester, an exciting, vibrant city enjoying a spectacular renaissance and within a short drive from some of the UK’s most breathtaking countryside in the Peak District, Snowdonia and Lake District.

If either role appeals to you please send your current CV and a covering letter to: Manchester Recruitment at Sigma-Aldrich Co. Ltd, The Old Brickyard, New Road, Gillingham, Dorset SP8 4XT.

Kew
PLANTS PEOPLE POSSIBILITIES

The Latin American Plants Initiative (LAPI) is an exciting new digitisation project, aiming to provide botanists and other scholars with online access to key information about Latin American plants.

**LAPI Project Co-ordinator**
You will be responsible for managing two team leaders, whose responsibilities are outlined below. You will steer the work of the two digitisation teams in order to ensure maximum productivity and be responsible for ensuring the successful achievement of overall project targets.

You will be the primary source of information about the LAPI to interested parties, both internal and external to Kew. In particular, you will be responsible for providing advice and guidance to Latin American, European and American members of the LAPI partnership, supervising training and equipment needs and providing technical advice where necessary. You will also act as the key liaison point with the not-for-profit organisation Aluka who will create the collaborative end-product - an online database of Latin American plants. The post may involve some limited travel to partner meetings.

With a degree or equivalent in Botany/Biology or other relevant discipline, you will have advanced computer skills, particularly Microsoft Office, databases and digital imaging software: Knowledge of plant taxonomy and nomenclature and a relevant postgraduate qualification would be an advantage. You will have proven experience of managing and leading a team and preferably project management experience, including managing budgets and engagement with funding bodies: You will demonstrate excellent communication skills at all levels, and the ability to communicate effectively in Spanish or Portuguese would be highly desirable. Ref: LAPI1
Salary will be £21,308 per annum.
Interview date: w/c 25 September 2006.

**LAPI Team Leaders x 2**
Supporting the Project Co-ordinator, you will be part of a team dedicated to capturing data and images of Latin American plant specimens from the Kew herbarium collections. You will lead a team of four or five digitisation officers, taking responsibility for quality control of digital information produced for the project by your team. You will also contribute to the export of data and images to an external collaborator. The post will involve some contribution to training of international project partners.

You will hold a degree or equivalent in Botany/Biology or related discipline and have knowledge of the full Microsoft Office suite, databases and imaging software. Experience of handling herbarium specimens, taxonomy of plants and nomenclature would be an advantage. With good communication skills, you will be a highly motivated and customer-focused individual, with proven experience of team management responsibilities in a diverse environment. Knowledge of foreign languages, particularly Spanish or Portuguese would be an advantage. You should demonstrate strong attention to detail and accuracy, along with excellent planning and organisational skills and the ability to make decisions in the absence of the Project Co-ordinator. Ref: LAPI2
Salary will be £18,030 per annum.

**LAPI Digitisation Officers x 9**
You will be producing content for an online database of Latin American plant type specimens. Your main duties will be to improve access to baseline information for targeted Latin American plants by scanning specimens and databasing herbarium label data from Latin American specimens (mainly types). You will be expected to fully digitise (collect, database, scan and replace) a minimum of 4,000 specimen records per year (pro rata).
With five GCSEs or equivalent at Grade C and above, including Biology/Botany, Maths and English, you will have excellent IT skills and a keen eye for accuracy and detail. With clear and concise communication skills and the ability to prioritise your workload, you will have an analytical mind and experience of fact finding and providing alternative solutions. Experience with imaging software would be an advantage. Ref: LAPI3
Salary will be £14,714 per annum.

All posts are three year fixed term contracts and benefits include a choice of final salary or stakeholder pension, generous annual leave and a stunning work environment.

Application packs are available from our website www.kew.org (click on the 'about us' icon). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184/5150 (24 hour answerphone). Please quote the appropriate Ref in all correspondence.
Closing date: 15 September 2006.

INVESTOR IN PEOPLE
[2567-012 (2006) : 55]
With 7.8 million customers we must be doing everything right

At Avon, we take pride in delighting over 7.8 million customers throughout the UK with a fantastic range of high quality, beauty related products. As a world leader, we continue to set new standards of innovation.

We now have two exciting roles for people with drive and initiative to help us move forward in this competitive marketplace. These roles may include some international travel.

**Regulatory Affairs Analyst - Northampton**
You'll play a strategic role in tracking products, providing regulatory input and advice - including copy approval on packaging and labelling as well as being involved in claims substantiation and European legislation associated within product promotion in magazines and TV advertising.
A technical graduate with experience in assessment of technical/formulation aspects of cosmetic products - you will be able to prioritise and be flexible in your approach.

**Technical Manager, Regulatory Affairs - Northampton**
You'll be responsible for monitoring and developing legislation and providing regularity advice to marketing and R & D on the use of cosmetic ingredients - you will manage a team within the Regulatory Affairs Department on a day to day basis and represent Avon on committees at CTPA, Colipa and Wastepack.
A graduate in Chemistry, Biology or Toxicology with at least 4 years experience - you will have worked in a Regulatory environment and have proven managerial experience.

To apply, send your CV and covering letter to Jane.Kenyon@avon.com or by post to Jane Kenyon, Avon Cosmetics, Nunn Mills Road, Northampton NN1 5PA. Closing Date 14th September 2006.

www.avon.uk.com

AVON
**Postdoctoral Position** (Fixed-term) in Molecular Modelling/Synthetic Chemistry in the Cancer Research UK Gene Targeted Drug Design Research Group at The School of Pharmacy University of London.

A postdoctoral scientist with experience in both molecular modelling and synthetic chemistry is required to work on the discovery and development of novel "molecularly targeted" anticancer agents working through the inhibition of protein-protein interactions in tumour-relevant signalling pathways.

The ideal candidate would be a highly motivated synthetic organic chemist with expertise in small molecule and protein modeling. In addition to the modeling studies (to be co-supervised by Professor Stephen Neidle), the successful candidate will be expected to carry out his/her own programme of synthetic chemistry research.

Candidates should possess excellent communication and presentational skills and enjoy working in a multi-team multidisciplinary environment.

A covering letter and a full CV should be sent to Professor David Thurston at The School of Pharmacy, 29-39 Brunswick Square, London WC1N 1AX, or e-mailed to ruth.pickering@pharmacy.ac.uk

Note: Although current funding expires in September 2007, subject to a successful review by CR-UK, it is anticipated that the post will continue beyond this.

Could you think of 101 new things to do with eggs and oil?

Hellmann's is one of Unilever's oldest brands having been popular for over 100 years. If you too share a passion for discovery and innovation we will give you the tools and opportunities to provide you with a challenging career. Are you a great scientist who would like to be at the forefront of scientific innovations and developments? Then you will enjoy a career within Unilever Research & Development. For challenging job opportunities, please visit www.unilever.com/rdjobs.
Assuring the quality of biological medicines
NIBSC

Scientist - Standardization Science

The National Institute for Biological Standards and Control has a key role in safeguarding and enhancing public health by standardizing and controlling biological substances used in medicine. NIBSC has a leading international role in preparing, evaluating and distributing International Biological Standards and other biological reference materials.

We are seeking to recruit a scientist to join a team working on freeze drying and formulation development for a wide range of biological reference materials.

Applicants should have a degree in biological or chemical science. They should have good attention to detail, good communication skills and be well motivated in a bench science role. Previous experience in freeze drying or thermal analysis methods would be an advantage, together with knowledge of protein chemistry and/or formulation, however, training can be provided.

Salary will be on a scale from £19,728 up to £22,220 per annum, dependent on experience.

For a full job description please see our website www.nibsc.ac.uk

To apply, please submit a full CV (2 copies), including the names and addresses of two referees, to the HR Department, NIBSC, Blanche Lane, South Mimms, Potters Bar, Hertfordshire, EN6 3QG, or email HR@nibsc.ac.uk

Closing date for applications is 15th September 2006

Please quote reference TDL552 clearly on your application.

Commissioning Editor, Pharmacogenomics
Are you a motivated, enthusiastic individual committed to developing your editorial career? The Future Science Group is a dynamic organization at the forefront of biomedical publishing. We have an exciting opportunity for a Commissioning Editor to manage our cutting-edge title, Pharmacogenomics. The journal delivers expert commentary and analysis from international opinion leaders from the pharmacogenomics community.

This is an exciting role with overall responsibility for the journal's content and coverage of the field. This key role involves:
- Full responsibility for content acquisition
- An ability to work to deadlines
- A strong ability to communicate with leading scientists
- Strategic planning of special focus issues and supplements
- Liaison with internal departments, such as sales and marketing

The ideal candidate will have a PhD in a relevant topic, combined with a broad interest in genetic medicine. Applicants should be excellent team workers with proven organizational and computer literacy skills and should possess an acute eye for detail. Salary is negotiable based on experience.

Closing date: 22nd September 2006
Please submit a CV with cover letter explaining your interest in the position and salary expectations to: recruit@futuremedicine.com

Forum for Global Health Protection

The Forum for Global Health Protection (FGHP) is an independent, not-for-profit association set up with support from the Health Protection Agency. Its mission is to provide research-based information for scientists and public health administrators on emerging health threats. The FGHP is launching an open-access online service that will include news, reviews and peer-reviewed research about emerging health threats which professionals in the discipline can contribute to and use.

The FGHP is now seeking an outstanding Reviews Editor to share in the creation and development of this ambitious new service. The successful candidate will take responsibility for compiling, commissioning, writing and editing news, reviews, commentaries and other articles published and linked to by the FGHP service.

The ideal candidate will have a strong background in the practice and communication of science with proven journalistic expertise and recent experience of:
• Developing scientific content for online and print formats
• Interacting with an international scientific and/or clinical community
• A new publication or online service launch

Excellent communication skills, and willingness and ability to learn new fields are essential. This exciting position is located in Central London and includes an attractive remuneration and benefits package.

To apply, write a short news article (maximum 400 words) aimed at a professional audience about a recently published research article on a global health threat topic you consider interesting. Send the article with your CV and a letter of application by email to applications@fghp.org by 22nd September 2006.

RESEARCH SUPPORT OPPORTUNITIES

MRC National Institute for Medical Research

DIVISION OF DEVELOPMENTAL NEUROBIOLOGY
http://www.nimr.mrc.ac.uk/devneo

CONFOCAL MICROSCOPY AND IMAGE ANALYSIS FACILITY MANAGER - Ref: GDNB/19574/FM

The facility currently comprises of three scanning confocal microscopes, one spinning disc confocal microscope, and three DeltaVision deconvolution microscopes. The manager will be responsible for the running of the facility, and for the maintenance and upgrade of the microscopes, computer equipment and software for image acquisition and analysis. The postholder will supervise colleagues in the Facility and interact with a wide range of researchers of the Institute interested in diverse areas of biology (immunology, infectious disease, developmental biology, neurobiology, structural biology). The successful candidate will actively follow the latest developments in the field of microscopy and image analysis and will be responsible for ensuring that the facility remains at the cutting-edge.

Applicants should hold a BSc or PhD in a relevant discipline and have experience and enthusiasm.

MRC Band 3 salary: From £35,972 to £43,715

RESEARCH TECHNICIAN - Ref: GDNB/19578/RT

Position to join a lab investigating vertebrate embryogenesis, molecular mechanisms of Wnt signalling and crosstalk of multiple signalling pathways in neural development and carcinogenesis. You will provide research support and carry out scientific research projects under supervision. The post will also include the shared responsibility for maintenance of communal facilities in the division.

You should possess a Degree or higher qualification in a relevant scientific discipline (biology, biochemistry, molecular biology, developmental biology, medical science etc). Experience in basic DNA handling, protein analysis and cell culture would be advantageous.

MRC Band 5 salary: From £20,432 to £23,325

DIVISION OF MYCOBACTERIAL RESEARCH
http://www.nimr.mrc.ac.uk/mycobact/

RESEARCH ASSISTANT

Position to work in a team studying the pathogenesis of Mycobacterium tuberculosis using a molecular genetic approach. You will provide a direct contribution to the scientific output of the group, participating in the design and execution of experiments investigating transcriptional regulation and the role of DNA repair in the pathogenesis of M. tuberculosis. In addition, you will be jointly responsible for the maintenance of a Category 3 containment laboratory.

You will possess a degree in Microbiology/Molecular Biology, possibly a higher qualification, and have several years experience in the application of a range of relevant molecular techniques to the study of bacterial systems. In particular, experience in the analysis of gene expression and/or protein interactions is desired. Training can be provided in working under Category 3 containment conditions.

MRC Band 4 salary: From £26,130 to £31,670

RESEARCH TECHNICIAN - Ref IMR/19569/RT

Position to work in a team studying the pathogenesis of Mycobacterium tuberculosis using a molecular genetic approach. The types of studies being undertaken include investigating the control of gene expression in mycobacteria as well as creating mutant strains and analysing their phenotypes in vitro.
and in infection models. In addition, the postholder will have shared responsibility for the maintenance of Category 3 containment facilities.

You should possess a degree in Microbiology/Molecular Biology, and have relevant experience with bacteria. Excellent technical and organisational abilities are essential. Familiarity with phenotypic or expression analysis is desired, and experience of working under containment conditions would be an advantage.

MRC Band 5 salary: From £20,432 to £23,325

Good interpersonal and communications skills, and the ability to work well within a team environment, are essential for these positions. Specialist training to support the development of skills will be given where necessary.

Salaries are inclusive of London Allowance

Final salary pension scheme available

Application forms and full job descriptions can be downloaded from the Institute web site at: www.nimr.mrc.ac.uk/jobs Alternatively, call 020 8816 2530, or write to Human Resources, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA quoting the appropriate reference number.

The closing date for completed applications is 22nd September 2006

The MRC is an Equal Opportunities Employer

[2567-022 (2006) : 59]
MRC PhD studentships 2006

The MRC Epidemiology Unit invites applications for the following Studentships:

1. A 4-year external grant funded PhD studentship in Genetic Epidemiology of Obesity. The project will focus on a genome-wide association study for weight gain in large population-based cohorts. Genome-wide association is a promising, hypothesis-free approach to identify common genetic variants that predispose to human disease. This study will identify new gene variants, previously unanticipated, that will contribute to a better understanding of the aetiology of weight gain and obesity. Understanding of the biology and underlying mechanisms of obesity will be a distinct advantage for this PhD post. Non EU applicants are welcome to apply.

2. A 3-year MRC funded PhD studentship for those who already have a Masters in an appropriate scientific discipline. Opportunities exist for a 4 year studentship for those wishing to undertake the MPhil in Epidemiology course before proceeding to the PhD programme. PhD projects are available in the following fields: genetic epidemiology, dietary and nutritional epidemiology, physical activity epidemiology, the genetic or environmental determinants of infancy and childhood growth and the determinants of type 2 diabetes, screening and prevention. Funding for this position is only available to those in the European Economic area (EEA) or UK residents.

Please refer to: http://www.mrc.ac.uk/hei_dta_handbook_05-2.doc for eligibility criteria and further information.

The minimum academic requirement for entry is an upper second class degree or equivalent. Graduate students register for their PhD with the University of Cambridge and belong to one of its Colleges. Both studentships will commence in October 2006.

Potential PhD students should send a full CV, a covering letter, and the contact details of two referees to Dr Ruth Loos, MRC Epidemiology Unit, Strangeways Research Laboratory, Worts Causeway, Cambridge CB I 8RN, United Kingdom or email: rifl@medschl.cam.ac.uk For enquiries about the post please email Dr Loos

Closing date: 8th September 2006

For further information about the Unit please visit www.mrc-epid.cam.ac.uk

For further information about MRC visit www.mrc.ac.uk

LABORATORY MANAGER
The BRI analytical laboratory provides routine analysis for the international alcoholic beverages industry. We are seeking a laboratory manager who has experience of team management in a UKAS accredited laboratory, maintaining quality systems and who is committed to implementing continuous improvement. The manager will also be commercially aware and have a strong drive to deliver customer satisfaction.

Applicants are asked to view full details of the position on our web site: www.brewingresearch.co.uk

Deadline: 20th September
[2567-025 (2006) : 60]
**Graduate Research Technician in Bacteriology**

The Animal Health Trust is a registered charity and is an internationally recognised centre of excellence for veterinary research. Situated close to Newmarket, the Trust employs over 220 staff comprising scientists, clinicians and support staff in a variety of disciplines. Research is directed towards improved understanding, diagnosis and treatment of animal diseases, primarily those of horses, dogs and cats.

We have an immediate vacancy for an enthusiastic biochemical science graduate to work alongside our dedicated research team. Funded by the Home of Rest for Horses, our aim is to develop a new diagnostic ELISA blood test for the identification of horses infected with Streptococcus equi. Experience of ELISAs, PCR and microbiology would be advantageous.

Application forms are available from the Director of Human Resources, Animal Health Trust, Lanwades Park, Kentford, Newmarket CBS 7UU, email: rosemary.london@aht.org.uk or telephone 08700 509176.

[2567-026 (2006) : 60]
I want to discover

Opportunities at Alderley Park, Cheshire, South Manchester and Charnwood, near Loughborough, Leics.

As one of the world’s leading pharmaceutical companies, we know the crucial role Discovery Medicine plays in bringing our innovative therapies to important areas of need. That’s why we’re expanding our capabilities in this area, and are looking for a number of Scientists to join us at this exciting time.

Research Scientist / Senior Research Scientist, Epidemiology
Ref: KC-DEV462
Helping to optimise the discovery, development and commercialisation of our emerging therapies, you’ll design, manage and evaluate epidemiological research projects and develop RA/TA and project-specific epidemiology strategies. You will also present your findings to a range of internal and external audiences and deal with questions from regulatory authorities. With a PhD in Epidemiology (or a closely-related field), or a Masters and five years’ experience, you’ll have a thorough knowledge of epidemiology methodology in relation to pharmaceuticals. For the more senior role, you will also need evidence of sustained productivity in epidemiological research.

Research Clinical Scientist - Imaging (Respiratory and Inflammation therapy areas) Ref: KC-DEV474

Research Clinical Scientists - Imaging (Oncology and Infection therapy areas)
Ref: KC-DEV475
Getting involved primarily in the early phases of drug development, you’ll provide strategic and operational advice that helps our project teams optimise the use of imaging modalities such as MRI, CT and PET. This will involve contributing to the development of innovative imaging biomarkers, and working with Informatics to analyse and integrate imaging data with other information. For both roles we’re looking for an MSc or PhD in an imaging field or extensive experience of using imaging in clinical trials.

Research Clinical Scientist - Inflammation Biology
Ref: KC-DEV477
Working with project teams to gain a good understanding of Respiratory and Inflammation projects in our late Discovery portfolio, you’ll identify key translational issues that will be relevant to the early development process. You’ll also take responsibility for developing the Discovery Medicine plan for each of your designated projects, and contribute to biomarker strategies and human exploratory studies. With a PhD and at least three years’ relevant post-doctoral experience, you’ll have a thorough knowledge of the Respiratory or Inflammation disease area, as well as immunology.

Research Clinical Scientists - Informatics
Ref: KC-DEV476
Lending your expertise primarily in the early phases of drug development, you’ll analyse the needs of the drug projects and propose informatics solutions that meet them. You will also propose and supervise internal and externally-commissioned informatics development projects and provide computational expertise and tactical input into cross-project initiatives. As well as a first degree in Life Sciences or a related subject and an MSc/PhD in an applicable informatics field, you’ll have at least three years’ experience in a pharmaceutical or biotechnology organisation.

Closing date: 22nd September 2006.

[2567-027 (2006) : 61]
Examine the evidence.

At Strathclyde Police, it’s the individual skills our people bring that make us the successful organisation we are today. We’re Scotland’s largest police force, and our 3,000 support staff help us look after nearly 23 million people - from Glasgow’s lively urban centre to the rural remoteness of the Inner Hebrides. In fact, almost one in three of our team is in force support.

Pitt Street, Glasgow

DEPUTY HEAD OF FORENSIC SUPPORT
£51,105 - £54,702
You will bring your experience to bear on all aspects of our Forensic Service - from Chemistry to Biology, Scene Examination and Admin. You will manage a service based on quality, responsiveness and accountability so you must offer a significant commitment to leading, developing and championing these values across the service. Planning, personnel, technical management, health and safety, and IT also come under your remit, as does information security within the department. As a department, we are undergoing change, and you will understand that with that necessarily comes challenge. You will relish both of these, offering your considerable management, people and leadership skills to navigate these successfully. You must be degree qualified - no less than a 2:2 - or equivalent, and bring at least 10 years’ operational and managerial experience in a forensic science lab or similar environment - ideally, managing the full range of scientific support functions. You may also bring a background in personnel issues, especially training and development. Certainly, you will have strong communication, interpersonal, organisational skills, and you must contribute a flexible approach, confident decision making and a strategic focus to all our activities. A full driving licence is essential. (Ref: R65/06/NS). Closing date - 15 September 2006. Interview date - w/c 1 November 2006.

DEPUTY QUALITY CO-ORDINATOR
£15,531 - £34,353
You’ll help us manage quality assurance in the Forensic Support Department, relating to ISO17025:2005 and other relevant standards. This means assisting in the overall management of staff, preparing applications for accreditation, being a central point of contact for consultation on quality assurance issues, and overseeing the document control database, equipment calibration, quality audits and computerised management system. You’ll bring a strong honours degree in chemistry, biology or another relevant subject or an equivalent professional qualification such as MIBiol, MRSC, MIQA. You must have a minimum of two years’ experience in laboratory quality assurance and knowledge of the principles of formal management systems, particularly ISO17025. (Ref: R125/06/NS). Closing date - 15 September 2006. Interview date – w/c 9 October 2006.

All applicants must have continuous residency in the UK for the last three years. (Exceptions may apply).

To find out more visit our website strathclyde.police.uk, email recruiting.forcesupport@strathclyde.pnn.police.uk or call 01355 566350. Information is also available in alternative formats on request.

POSITIVE ABOUT DISABLED PEOPLE
Working Together – Building Safer Communities

Strathclyde.police.uk
TRAINEE PRODUCTION DESIGN MANAGER - COMMERCIAL LIGHTING

We are an innovative London-based company which supplies products and components to over 100 commercial lighting manufacturers and facilitates the product design and manufacturing capability of commercial architectural lighting.

Reporting directly to the managing director and involving international travel, this role will give the right candidate an opportunity to get in on the ground floor of a fast-growing and successful company and to develop their project management skills in an exciting commercial environment.

We are looking for a rounded graduate with an understanding of scientific principles combined with an interest in design and excellent communication skills. Applicants should be self-motivated and be able to manage their own time effectively. Knowledge of a second European language or knowledge of Chinese would be an advantage but not essential.

The successful applicant will be based in a satellite office in South Hertfordshire within easy commute of North London.

The salary will start in the region of £20,000 (depending on experience) and rise to around £30,000 following training and performance appraisal.

Please send a covering letter by 30th September 2008 explaining why you are interested in this position and a CV including details of degree, leisure interests and previous part and full time employment to Charles Stewart at BCP Lighting Ltd. 80 Southgate Road, Potters Bar, Herts EN6 5EH.

ADAS Scientific Officers
preferably with plant pathology skills

ADAS is seeking to recruit two Scientific Officers to work at its research centres in Cambridgeshire.

ADAS Arthur Rickwood, nr Mepal - this post will be to cover maternity leave and is fixed-term for 6 months with the possibility of extension to 12 months or a permanent position. The main duties will be assisting with horticultural plant pathology research projects. ADAS Boxworth - this post will be permanent. The main duties will be assisting with cereal and oilseed crop pathology research projects.

A full driving licence and a diploma in agriculture, horticulture or other biological science are essential. Biological, horticultural or crops experience would be an advantage. Starting salary of £14,144 rising to £17,680, depending on personal and company performance.

Further details and full job description are available from:
Jacky Harmer, ADAS Boxworth, Cambridge, CB3 8NN. Tel: 01954 268221. Closing date for applications is 8 September 2006.

Interviews will be held at Boxworth on 21 September 2006

ADAS
[2567-030 (2006) : 63]
Sanofi Pasteur MSD is a European company dedicated to supplying the most comprehensive range of vaccines to meet the health needs of all the population. With solid foundations, our future success can only be with the continued support of our employees.

**Regulatory Affairs Executive**

Working within a pan-European Regulatory Affairs network, you will help us obtain and maintain Marketing Authorisations and ensure the timely availability of products to market. This will involve preparing Marketing Authorisation applications, variations and renewals for existing licences in the UK, Ireland and across Europe, as well as managing packaging and labelling for specified products whilst maintaining the regulatory database. Additionally, you will control the generation and updating of technical documents, track the progress of projects and regularly brief regulatory management.

With a Degree in Pharmacy or Life Sciences and ideally industrial placement experience, you will display a flexible and self-motivated approach. Your interpersonal and organisational skills will be paramount and you will be computer literate and ambitious to learn and to develop your career. Occasional European travel will be required.

**Senior Medical Information Officer**

Enjoying an extremely high profile, you will develop & deliver medical training to Head Office and field-based colleagues, whilst partnering the Marketing Department at the conceptual stage of promotional campaigns to ensure ABPI compliance. Therefore you will require a high level of technical expertise and an ability to explain complex principles to audiences with a wide range of knowledge.

At the same time, you will be the first point of contact for customer enquiries on both licensed and unlicensed products, and ensure that our internet and intranet information is accurate and up to date - so we need a capable and committed professional with a clear customer focus.

It goes without saying that you will bring a Pharmacy or Life Sciences Degree and at least two years' hands-on Medical Information experience. In particular, you must be familiar with the intricacies of copy approval of promotional material and have a highly developed business acumen, ready to take on wide-ranging responsibilities. You will be seen as an expert in your product field as well as in all aspects of the ABPI Code of Practice.

In return, you can expect a competitive salary and excellent benefits, including 25 days' holiday, life assurance, pension scheme, private health scheme, subsidised staff restaurant, subsidised membership of local gym and on-site parking.

To apply, please send your full CV including current salary details and a covering letter by email to jgrimmett@spmsd.com or in writing to: Joanna Grimmett, Sanofi Pasteur MSD Ltd, Mallards Reach, Bridge Avenue, Maidenhead, Berkshire SL6 1QF

Closing date: 28 September 2006, although we would encourage early applications.

**Senior Radiation Protection Supervisor and Deputy Site Safety Advisor**
Compton near Newbury • Ref 06/00032 • £27,584 - £32,122 depending on qualifications and experience

In this pivotal role, you will divide your time between radiation protection and general site safety responsibilities, giving you considerable impact on everything we do. On the one hand, you will oversee the implementation of safety policy concerning the use, handling, storage, security, accumulation and disposal of all radioactive substances and materials, and on the other assist the Institute Safety Co-ordinator with the formulation and implementation of safety policy and best practice.

You will join us with a NEBOSH Diploma or Certificate and a degree in a scientific discipline (preferably Biology or Chemistry), plus at least three years' experience of working with unsealed sources of ionising radiation. This will have given you broad knowledge of the Ionising Radiations Regulations 1999 and the principles and practice of radiological protection and monitoring requirements for a range of radioisotopes used in biological research.

**Laboratory Technician - Biosecurity**
Pirbright near Guildford • £17,100 to £19,500 + Benefits • Ref 06P/00020

Enjoying considerable responsibility and autonomy, you will supervise operations and keep records for the transfer of biological materials across the barrier of the restricted area. At the same time, you will induct and train colleagues in biosecurity regulations, supervise the decontamination of tools and equipment from SAP04 containment areas and develop new disinfectant testing methods to ISO9001 standards.

You will naturally require sound laboratory experience and extensive exposure to biosecurity matters, giving you everything you need to hit the ground running. Above all, you must be very flexible and confident to take on wide-ranging responsibilities.

The Institute offers annual leave of 25 days on appointment plus 10.5 public and privilege holidays. The pension scheme is analogous to the Civil Service scheme, with a nominal contribution from employees.

For additional details please see [www.iah.bbsrc.ac.uk](http://www.iah.bbsrc.ac.uk)

Closing date for applications: 15th September 2006.

Further details and an application form are available from: Human Resources, Institute for Animal Health, Compton, Newbury, Berks RG20 7NN, tel: 01635 577203, email: iah.vacancies@bbsrc.ac.uk quoting the relevant reference number. The IAH is an equal opportunities employer.

NATIONAL BLOOD SERVICE
[2567-033 (2006) : 64]
**Research Manager (Informatics)**
Research Funding Department, Central London
Starting salary range £30,450 - £34,450 inc LW

An exciting vacancy has arisen that offers the opportunity of working with the major supporter of cancer research in the UK. The vision of Cancer Research UK is to beat cancer through world-class research. We are the largest volunteer-supported cancer research organisation in the world with a dedicated team of 3,000 staff and an annual scientific spend of more than £200 million.

**Research Manager (Informatics)** - the purpose of this job is to support Cancer Research UK's role as the lead funder in the National Cancer Research Institute (NCRI) Informatics initiative (see [www.cancerinformatics.org.uk](http://www.cancerinformatics.org.uk)). Specifically, the successful candidate will assist with the day-to-day administration of the initiative and provide the secretariat to the initiative's Management Board, Scientific and Technical Review Panel.

For this post you will have obtained a PhD in a bio-medically-related area or other appropriate field and will have completed a period of postdoctoral research of at least one year. Technical expertise in informatics is not required although an understanding of the role of informatics in bio-medical research will be important.

You must have excellent written and oral communication skills, and an organised and adaptable approach is essential. The ability to think strategically, to put information in context and to interpret complex information is also important. Strong IT skills are essential (including familiarity with Microsoft Office and with internet-based searches) as is the ability to deal calmly with people at all levels. In this role you will be expected to work closely with other research managers within Cancer Research UK and NCRI in order to deliver your set objectives and the role will demand the ability to work both independently and as part of a team.

For further details and to apply online, please visit [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)

Alternatively please send in a copy of both your covering letter and CV to: Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX. Please quote the relevant reference number on all correspondence.

Closing date 28th September 2006

For details on all our current jobs please go to [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)

[2567-034 (2006) : 64]
Research Consultant for ADAS Pwllpeiran

ADAS Pwllpeiran is the ADAS Centre for Research in Wales and carries out Research and Development both on the 1,346 ha Pwllpeiran Research farm and on commercial sites throughout the Principality. It is part of ADAS UK Ltd., the leading land-based industries Consultancy and Research organization in the UK providing farm and rural business management and technical consultancy underpinned by Research to more than 30,000 customers.

A vacancy has become available for a researcher in Agri-environmental systems to help realise the potential of the Centre's resources in this field. Working as part of the Research Team, the role will involve management, delivery and communication of Research projects.

The successful candidate will hold a degree in an Agricultural or Environmental subject, have excellent interpersonal skills and a good working knowledge of agricultural systems. Working effectively as part of a team and the ability to communicate at all levels are critical to the post as are the qualities of initiative, self-motivation, decision-making and a positive attitude to meeting challenges.

A full UK driving license is required. An ability to speak Welsh is an advantage but not essential. Salary scale is £15,430 - £26,788 pa plus the possibility of a bonus depending on Company and individual performance.

To apply, please send covering letter and CV to:
Mandy Cowie, ADAS Wales, Pwllpeiran, Cwmystwyth, Aberystwyth, Ceredigion, SY23 4AB.
E-mail: mandy.cowie@adas.co.uk Tel: 01974 282229.

Closing date 30 September 2006.

Could your science benefit people across the globe?

The Unilever Food and Health Research Institute (UFHRI) is Unilever's central research institute for the food business. Based in Vlaardingen, The Netherlands, the UFHRI creates and delivers business relevant and unique solutions underpinning brand innovation programs, based on scientific and technological capabilities.

Unilever has a continuous focus on breakthrough product innovation and is therefore expanding in several scientific areas, offering talented candidates scientifically challenging and diverse careers. We are currently recruiting in the following scientific areas:

**Flavour Generation & Delivery Link in-vivo and in-vitro** flavour release measurements to sensory perception and study multi-sensory interactions in order to provide optimally flavoured food products. Introduce new methodologies and approaches, whilst working in various projects and multi-disciplinary teams.

**Product & supply Chain Microbiology** Develop the center of excellence for food product and process preservation design and use your expertise in order to create and maintain microbiologically safe and stable food products and processes.

**Cardiovascular Health** Perform and manage multidisciplinary research on food ingredients that can favorably affect the blood lipid profile, blood pressure and vascular function and provide scientific evidence to substantiate cardiovascular health effects of existing and new food products.

**Process Engineering** Initiate and manage research activities on process engineering, particularly in the area of powders and particulates in order to generate and develop new opportunities for the Unilever business.

Your background:
- Doctoral degree (PhD) in a related scientific area;
- A strong publication record;
- An active external network;
- Excellent oral and verbal communication skills (in English).

In addition, we are looking to recruit talented candidates with a background in Packaging Development, (R&D) Communications & Training and Process Development.

More information:
The specific job descriptions for all vacancies at Unilever R&D, The Netherlands can be found at [www.unilever.com/rdjobs](http://www.unilever.com/rdjobs). To apply; send your CV and motivation letter to recruitmentnl@unilever.com citing the scientific area and "New scientist" as your reference.

Unilever's mission is to add vitality to life. We meet everyday needs for nutrition, hygiene, and personal care with brands that help people feel good, look good and get more out of life. Around the world our foods, home and personal care brands, such as Knorr, Dove, Omo, Cif, Ben&Jerry's, Axe, Magnum, Lipton and Becel are chosen by individual customers 150 million times a day. [2567-036 (2006) : 66]
Applications are invited for a Knowledge Transfer Partnership Associate, with practical experience of plant tissue culture and a high level of commitment to commercial development and marketing of new plant varieties. The Associate will work between Penhow Nurseries, near Newport, Gwent and IGER Aberystwyth and will be a graduate, or recently qualified post-graduate. They will develop mutagenesis methodologies and generate novel variation in a number of ornamental species, and will develop a good understanding of the market and production requirements. Additionally the associate will play a vital role in ensuring laboratory facilities at Penhow will fulfil the demands of the current project and provide enough flexibility for future expansion. The Associate will have the challenge of bridging the technical issues and method development associated with a research project and converting this into a commercial reality of robust procedures and new variety generation, and will enable the Associate to develop a career at the techno-commercial interface of the horticulture industry.

You must possess a First or upper 2nd class honours degree in Plant Science, Genetics, Horticulture or a related subject with a minimum of 2 years' experience working in a tissue culture laboratory. A PhD in Plant Science would be desirable as would some experience of operating in a business environment. The KTP associate would be required to undertake an NVQ level 4 in management and would be expected to register for a higher degree if appropriate.

The post is funded for three years with a starting salary in the range of £18,142 to £25,541.

Please quote Ref No: 2006/17.
Closing Date: 15 September 2006.

Assuring the quality of biological medicines
NIBSC

The National Institute for Biological Standards and Control is a multidisciplinary scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine. NIBSC has a leading international role in preparing, evaluating and distributing International Biological Standards and other biological reference materials.

Scientist - Biotherapeutics Group

We are seeking to recruit a scientist to carry out control and standardization of therapeutic immunoglobulins, and related research in immunohaematology. The work includes performing assays for batch release purposes, development and evaluation of biological reference materials, and investigative work on immunoglobulins and monoclonal antibodies with clinical potential.

Applicants should have a good degree in a relevant biological science and ideally 4-5 years laboratory experience. This should include experience of immunochemical techniques and the ability to work independently.

Salary will be on a scale from £24,815 up to £28,478 per annum, dependent on experience.

Due to the high level of response expected, candidates should already have a permit to work in the UK.

For a full job description please see our website www.nibsc.ac.uk

To apply, please submit a full curriculum vitae (2 copies), including the names and addresses of two referees, to the HR Department, NIBSC, Blanche Lane, South Mimms, Potters Bar, Hertfordshire EN6 3QG. Tel: 01707 641457 or email HR@nibsc.ac.uk

Closing date for applications is 14th September 2006.

Sequani

Sequani limited is a dynamic, customer-focused contract research organisation working at the forefront of pharmaceutical safety evaluation and has been awarded the Investor in People accreditation. Due to continued growth within the company we now have the following vacancy.

ASSOCIATE TOXICOLOGIST

Working in our "flagship" pre-clinical toxicology department you will join a team of dedicated toxicologists conducting a wide range of general and reproductive toxicology studies on behalf of our world-wide client base. You will be trained in all aspects of study supervision with extensive opportunity for client contact.

Our carefully structured career progression plan and the highest standards of internal training are coupled with a continuing professional development programme run in conjunction with the University of Birmingham.

We are seeking the brightest graduates who can make a rapid impact in a demanding field. In return we can offer a varied and challenging career with excellent opportunity for future progression.

You will at least be an honours graduate in a biological/ biomedical science (or equivalent) and will preferably hold a post-graduate qualification in toxicology or a related discipline. No previous experience in this field is necessary but you must be able to demonstrate a diligent work ethic and exceptional communication skills.

Joining the Co-operative Group means joining a business that believes in honesty and fair and ethical practices. We like to balance commercial successes with social responsibility and if you have a sound knowledge of food legislation and quality standards you could play a vital part in ensuring we get the balance just right.

Join us in this wide-ranging and influential role, and we'll look to you to assist our Scientific Advisor to provide the very latest information on technical legislation and scientific matters which will affect our business. Drawing on knowledge of both scientific developments and of UK and EU legislation, you'll identify any changes that might make an impact, and then communicate that information to the right person.

You'll be an important source of advice on scientific and technical legislation matters, and it will also be your role to assess the likelihood of hazards occurring in any of our products due to contamination or pollution. Not least, you will work with the Parliamentary Office and the British Retail Consortium to ensure our stance on legislative, technical and scientific issues is continually developed.

You have a science background, preferably with experience within a food manufacturing or retailing environment. You're also an influential communicator who can build highly productive relationships with colleagues and clients alike. In all, you've the potential to be recognised as an expert and a representative of the Co-operative Group.

Please email your CV with covering letter, quoting reference number RSA01 to: headoffice.recruitment@co-op.uk or send to: Head Office Recruitment Team, Human Resource Shared Service, The Co-operative Group, PO Box 53, 2nd Floor New Century House, Manchester M60 4ES.

Closing date: 11 September 2006.

www.co-op.co.uk

We are an employer who values diversity and welcomes applications from suitably qualified people regardless of gender, ethnicity, culture, age, physical ability, mental impairment, sexual orientation, religion/belief, marital status, civil partnership status, education and those with caring responsibilities. We welcome applications from those looking to balance their work and domestic commitments.

INVESTOR IN PEOPLE
The Royal Institute of Public Health

**Editorial Assistant**  
Salary c £23,000 plus pension contributions

As a key member of a small busy team, the Editorial Assistant will provide administrative support to the Editors to ensure the effective production of the international journal PUBLIC HEALTH. This is an exciting time for the journal as it will be holding its first international conference in Spring 2007 and the new post holder will be involved in this and other new initiatives to help shape the future development of the journal.

The ideal candidate will be educated to degree level, be a good communicator and have excellent verbal, written and IT skills. Attention to detail is essential. Previous proof reading experience would be an advantage. You will need to be well organised, able to work on your own initiative and have the confidence to liaise with senior health professionals contributing to the journal.

RESEARCHER EXCHANGE PROGRAMME
New Funding Opportunity

The British Council is announcing a first call for proposals under a new initiative aimed at supporting new links between early stage researchers in the UK and in other countries.

The Researcher Exchange Programme (RXP) is a £500,000 initiative that provides individual researchers with awards covering travel and subsistence costs, and some consumables costs, needed to develop new scientific collaborations and contacts through exchange visits of between one week and three months' duration.

The research link can be in any area of science, engineering and technology, including social sciences and humanities.

The term "early stage" refers to researchers at the beginning of their research careers, with less than ten years active research experience since the completion of a doctoral degree, or those in the last year of their PhD.

The maximum award that can be applied for is £5,000.

Please note that more than one researcher from the same sending or receiving research group can apply for an award, but each must submit a separate application.

For full details and an online application form see www.britishcouncil.org/science-rxp

The North West London Hospitals NHS
NHS Trust

**Research Co-ordinator**
Fixed term contract three years
Ref: 337CE0066

Due to an internal promotion, an opportunity has arisen to join us as part of the academic support for research. The Trust is the major healthcare provider in north west London and supports a wide range of research with strong academic links to Imperial College. Research from St Mark’s, Northwick Park and Central Middlesex hospitals is internationally recognised as being centres of excellence. The hospitals are conveniently situated for the tube network and central London is only 20 minutes away. Similarly, the major airports and motorways are all nearby for those who wish to get away from the many attractions of the metropolis.

You will facilitate high quality research at the North West London Hospitals NHS Trust, principally at St Mark's Institute of Intestinal and Colorectal Disorders within the Division of Surgery, Oncology, Reproductive Biology and Anaesthetics, Faculty of Medicine, Imperial College, while working in an NHS setting.

Crucial aspects of the post include supporting researchers to develop proposals for grant funding, gaining R&D and ethical approval and working with industry. You will also require the ability to help develop a rolling research strategy based on the analysis of the current research portfolio, which is a key requirement of the Higher Education Institute, while supporting the Research Director of the Institute for Intestinal and Colorectal Disorders, Imperial College. The introduction of novel research collaborations or themes to researchers would also be beneficial, along with the ability to communicate effectively to a wide range of personnel. There will also be significant interactions with the staff and infrastructure of Imperial College. Candidates with some form of research experience and who are well-experienced in writing and submitting successful grant applications to major funding agencies will be favoured. You will be integrated within the R&D Department at NWLH in order to facilitate the research and development strategy of the Trust.

For further information, please contact Dr. Alan Warnes on 020 8869 2011 or 020 8869 5173, email: alan.warnes@nwlh.nhs.uk

Apply on-line at nwlh.nhs.uk/jobs, alternatively call 0870 787 6857 to receive an application pack.

Closing date: 14th September 2006.

The Trust is committed to equality, diversity and improving the working lives of all our staff. We operate a Smoke Free policy on all Trust premises.

If there’s a ‘Cooks Street’ and a ‘Mechanics Alley’, why can’t we have a road called ‘Salesperson Street’?

Who said cooks and mechanics were more important than salespeople? Certainly not us. In fact, we would be first to recognise the essential contribution that salespeople make to UK business.

Which is why we have created www.salestarget.co.uk. With 10,794* top sales jobs currently advertised, it is the UK’s leading SALES-ONLY recruitment site.

Dedicated to those who prefer the road to the garage.

SALES target.co.uk – sales jobs for sales people

[2567-052 (2006) : 70]
Lubrizol Ltd is an innovative specialty chemical company that produces and supplies technologies that improve the quality and performance of our customers’ products in the global transportation, industrial and consumer markets. Lubrizol Ltd are seeking individuals for the following positions at our Hazelwood, Derby Technology centre.

**Statistician - Research & Development** c £26,000 pa
At Hazelwood you will collaborate with chemists and engineers on problems in formulation and systems development, performance testing, and process/product development. You will design and analyse experiments, analyse historical data, and teach short courses on statistical methods. You will liaise with universities within the UK. You will interact with the network of statisticians based at our corporate headquarters in Wickliffe Ohio. There will be some international travel.

You will possess MSc or PhD qualification in statistics or a closely related discipline, and be proficient in advanced statistics packages (SAS, S-Plus, etc.). Excellent oral and written communication skills as well as the ability to work in an interdisciplinary environment will be required. Experience working with databases would be advantageous.

**Analytical Chemist** c £22,000 pa
We now have an opportunity for a talented scientist to provide laboratory based support in analytical expertise to the business groups. Working as part of our Analytical Services team, by providing analytical problem solving and method development, you will bring support to Lubrizol's European business and research groups.

You will possess a degree (or equivalent) in Chemistry or related discipline and have a minimum of 3 years experience in an analytical/testing environment. You will also have experience of techniques such as FTIR & chromatography, as well as method development experience. Experience of XRF & ICP techniques are desirable, but not essential as training can be provided.

**Project Manager** £35,000 to £45,000 pa
We have an opportunity for someone who can demonstrate experience of project management within the areas of chemistry, engineering and/or mechanical testing who can effectively develop and implement project plans that result in product approvals. Accurately collate, manipulate and interpret data from bench and engine tests. Ensure that project status is documented and that final reports are issued upon project completion. Develop solutions to technical problems as they arise. Work effectively with other team members to represent the organisation's technology at the customer interface.

Plus excellent benefits

In addition to our excellent remuneration package which includes: final salary pension and non-contributory pension scheme, private health insurance, subsidised restaurant, free car parking and a range of other benefits, we also have a beautiful working environment based on the edge of the Peak District.

Interested? To apply, please forward your CV, as an attached word document, to jdlubrizol4@uib.srg.co.uk or call 0161 868 2200 and quote ref jdlubrizol4 for a confidential discussion and for further details.

Closing date: Friday 29th September 2006.

Placing People First
Postdoctoral Fellows and Higher Scientific Officers
The Institute of Cancer Research
Synthetic or Computational Chemistry
Cancer Research UK Centre for Cancer Therapeutics, Sutton, Surrey • Centre Director: Professor Paul Workman

The Institute of Cancer Research (a college of the University of London) is a world-class cancer research organisation with HEFCE RAE ratings of international excellence across all of its research programmes, including cancer drug discovery and development. In partnership with The Royal Marsden NHS Foundation Trust, we form the largest comprehensive cancer centre in Europe.

As a result of our track record of success leading to a significant increase in our Cancer Research UK programme grant, we have a number of positions for chemists to be located in well equipped laboratories in Sutton. The Centre’s exciting goal is to translate genomic information into drugs in the clinic, and all the science disciplines are in place to make this possible. Our chemists work alongside biologists focusing on new molecular targets emerging from the human genome and cell biology research. The main activity for these posts is synthetic organic chemistry applied to the discovery and optimisation of new drugs to fight cancer. The chemical starting points are the hits from bioassays and structure-based design, which include both small molecules and natural products. Our computational chemists use modelling, structure-based design and virtual screening techniques to support the drug discovery projects, and one post is available in this area.

Knowledge, experience and achievement (depending on job level) in synthetic or computational chemistry are essential. Additional experience of medicinal working in partnership with chemistry is desirable but successful applicants will have ample opportunity to develop these skills in post. This is an ideal opportunity for enthusiastic, committed synthetic organic or computational chemists to make an important contribution to improved therapies for cancer patients, while gaining experience and training in medicinal chemistry skills in a successful drug discovery laboratory.

Appointments will be on two-year contracts in the first instance and salary will be in the range of £28,050 to £30,250 for the Postdoctoral Fellows and £27,361 to £30,711 for the Higher Scientific Officers. Candidates should possess up to four years’ relevant postdoctoral or postgraduate experience.

To apply, please send two copies of your CV including the names and addresses of two referees to the HR Office, The Institute of Cancer Research, 123 Old Brompton Road, London, SW7 3RP Please quote reference number HAD92 for the Higher Scientific Officers, HAD93 for the Computational Chemistry Postdoctoral Fellow and HAD94 for Synthetic Chemistry Postdoctoral Fellows. For job descriptions and person specifications please visit our website at www.icr.ac.uk Alternatively you may call our 24 hour recruitment line on 020 7153 5475.

Closing date for applications: 15th September 2006.
Covance’s purpose is to lead advancements through science, service and shaping solutions for the top 50 global pharmaceutical and biotech companies. By joining this thriving pacesetter you'll work with inventive technologies, progressive management and alongside the talented professionals who have helped make us a global leader in our field.

Our Clinical Research Unit (CRU) based in the heart of Leeds currently has the following vacancies available.

**MEDICAL WRITER** (ref: 2878BR)
In this role, you will be the scientific leader of the project team (including Data Managers, Programmers and Statisticians) for the reporting of Phase I and II studies. You will prepare clinical study reports (CSRs) for Phase I and II studies conducted at Covance CRU and sites all over the world. Your role will involve detailed scientific review of data and close liaison with other members of the Pharmacometrics project team. In addition, you will have a high level of contact with our clients.

For the Medical Writer position you should have 2 years medical writing experience in a clinical trials environment as well as the ability to assimilate and objectively interpret large quantities of data and communicate their findings in a clear and concise manner, both orally and in writing. For both roles you will have a degree in Life Sciences and it is essential that you are well organised, competent in the use of Microsoft Word, have a high standard of written English and the ability to produce high quality work to tight deadlines. An eye for detail and the ability to adhere to tight deadlines are essential requirements for these roles. You must possess good communication skills and work well within a team environment.

In return you'll enjoy great prospects with a fast expanding company that is focussed on bringing life saving medicines to market sooner. We also offer a comprehensive benefits package.

If you feel you have the attributes to help make Covance's vision a reality please visit [www.covance.com/careers](http://www.covance.com/careers) and complete a candidate record using the relevant reference number.

No agencies.

We are an Equal Opportunity Employer

COVANCE
THE DEVELOPMENT SERVICES COMPANY
[2567-055 (2006) : 72]

Think what's possible.

Ideas have the power to improve lives. And as a broad and diversified healthcare company with many colleagues dedicated to improving health and well-being around the world, our ideas have more power than most. At Novartis, you’ll have the opportunity to work alongside an extraordinarily talented and diverse group of people from around the globe, all committed to making a difference for our patients and customers. You’ll benefit from our unique combination of great people, industry-leading products and innovation, and a high-performance, achievement-oriented culture, where you’ll find countless opportunities to progress professionally and personally. And our results-driven rewards system will
ensure your achievements are recognised, and will encourage and value your continual professional development.

**Senior Scientists**
Excellent salary and benefits
Horsham, West Sussex

As the global leaders in the areas of Gastrointestinal and Respiratory Disease we are influencing the future of Early Compound Selection and Development. We are now looking for Senior Scientists to join us at our state-of-the-art research and development centre in Horsham.

You will either be responsible for the assessment of the development potential of New Chemical Entities (NCE's) for both oral and inhaled delivery routes, working in cross-functional teams to select molecules that can be successfully developed. And be responsible for executing physico-chemical characterisation studies and salt/polymorph screening of early stage discovery compounds. Or, you will take responsibility for analytical and compatibility testing as well as developing formulations for toxicology and pharmacology studies. These are exciting and forward thinking roles, requiring candidates who are self-motivated, equipped with multi-disciplinary team working skills and committed to success:

You will need:
At least three years' experience in early drug development.
Strong skills in physico-chemical characterisation, pre-formulation and biopharmaceutic evaluations.
Experience of salt selection and polymorph screening.

Alternatively, you will need:
To be a graduate with at least five years' experience in the pharmaceutical industry.
Strong skills in physico-chemical characterisation, pre-formulation/formulation and biopharmaceutics.

For more details about this and other opportunities, please visit [www.novartis.com](http://www.novartis.com) quoting job reference 18541BR. Closing date for applications is Monday 18th September 2006.

NOVARTIS
[www.novartis.com](http://www.novartis.com)
[2567-056 (2006) : 73]
research chemist
Harlow, Essex

Synthomer, part of the Yule Catto polymers division, is a world-class supplier of synthetic polymers to industries ranging from paints and adhesives to textiles, speciality papers, plastics and dipped products. We are the only manufacturer of polyvinyl alcohol in the UK and the market leader in suspending agents for the PVC industry.

We are currently expanding our resource in the development of new technology platforms for the global polymer division and so are looking for a RESEARCH CHEMIST to join our team in Harlow, Essex.

You will have an in-depth knowledge of emulsion polymerisation and preferably will have a background in industrial processing and scale-up of emulsion polymers. The role will involve the optimisation of applications and assist in scale-up and engineering. A job description is available on our website.

You will need to have acquired an upper second class Honours degree in Chemistry with a PhD in a relevant discipline. Experience in any one of the following: emulsion polymerisation, inverse emulsion polymerisation, solution polymerisation, colloid chemistry or polymer chemistry, is essential.

We offer an attractive salary, commensurate with qualifications and experience as well as associated fringe benefits. These include Profit Related Bonus Scheme, Contributory Company Pension Scheme and Subsidised Private Medical Insurance.

If you feel that you have the drive, the energy and the qualifications for this position, please apply with full CV (including current salary) and quoting Ref. ResChemBD2, to: Human Resources Department, Synthomer Limited, Central Road, Temple Fields, Harlow, Essex CM20 2BH. Tel: (01279) 436211. Email: humanresources@synthomer.com

Visit our website at: www.synthomer.com

[2567-057 (2006) : 74]
Safeguarding public health
The Medicines and Healthcare products Regulatory Agency (MHRA) is the government agency which is responsible for ensuring that medicines and medical devices work, and are acceptably safe.

MHRA

**Higher Pharmacopoeial Scientists**
London • circa £25,000

An important part of the influence we bring, and the expertise we offer, is in supporting the British Pharmacopoeia Secretariat, who is responsible for the publication of the British Pharmacopoeia, as well as the veterinary British Pharmacopoeia.

In order to further our efforts in supporting the designated panels and experts who are instrumental in ensuring the accuracy and currency of these publications, we require two scientists, with an in-depth knowledge and understanding of Pharmacopoeias, to support the relevant expert advisory groups and maintain the high standard of the databases.

Naturally, you will need to have a degree, or equivalent, in Biological Science, Pharmacy, Pharmaceutical Chemistry or Chemistry and experience of the standard setting process for medicinal products, including active ingredients, dosage forms, excipients and biological materials. You will need to have exceptional communication skills to be able to relay this information, both verbally and in writing, and be able to edit complicated texts for both publications. Well developed IT skills are essential in this challenging and important role.

Please note that the full salary range for these roles is £22,664 - £32,499. In addition to a competitive salary, we offer 30 days holiday, 10.5 privilege days, civil service pension and season ticket loan option.

If this challenge inspires you, you can download further information and apply on-line via our website - [www.mhra.gov.uk](http://www.mhra.gov.uk). Similarly, you can download our application form at this address and send your completed form via email to [jobs@mhra.gsi.gov.uk](mailto:jobs@mhra.gsi.gov.uk) or by fax to 020 7084 2522. We strongly encourage electronic applications. Closing date: 11th September 2006.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE

As an Equal Opportunities employer, the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

[2567-058 (2006) : 74]
Help make life better for millions

At GlaxoSmithKline, our vision is clear. As one of the world's leading pharmaceutical companies, we're here to help people live longer, feel better and do more. You're looking for a job that needs your talents and passion - a job that inspires you and gives you the opportunity to develop your potential. We're looking for the best people to do their best work. We'll make a great team.

GSK Dartford is part of the Global Manufacturing and Supply business, which operates a global network manufacturing, packing and supplying the broad portfolio of GSK pharmaceutical and consumer healthcare products. Our site is a key part of GSK's global supply chain, manufacturing active ingredients for key products for the treatment of a variety of diseases such as herpes, epilepsy, depression, HIV/AIDS, leukaemia and malaria. Working for one of the most successful companies in the world, we offer a variety of benefits including; breadth of opportunity; a tangible career path, a challenging, results orientated working environment and a competitive, performance based rewards package.

The GSK manufacturing site at Dartford is seeking technical experts and leaders who care passionately about what they achieve, but also about how they deliver it, to join us in a number of challenging roles across engineering and scientific disciplines.

You'll be responsible for:
• The introduction of new chemical entities;
• Process transfers between R&D, Operations and third party manufacturers;
• Supporting existing manufacture;
• Continuous improvement and operational excellence;
• The application of new technology;
• Meeting our commitment to operate safely and protect the environment.

**Process Chemists**

Req ID: 34344
You'll have a sound knowledge and understanding of organic chemistry with practical laboratory skills. Reducing variability and developing right first time processes will be a key aspect of the role. Production experience is desirable, but not essential. The opportunity to take a lead role in the introduction of new chemical entities exists for the right candidate.

**Analytical Chemists**

Req ID: 34891
You'll have a sound knowledge and understanding of analytical chemistry, proven skills in analytical techniques and modern instrumental analysis, with knowledge of ICH and cGMP guidelines. Experience of chromatographic method development, validation and transfer is an advantage. Experience in spectroscopic analysis and the characterisation of physical properties is desirable, but not essential.

**Process Engineers**

Req ID: 34692/34689
Process Engineers provide the process design expertise for all phases of process development from initial process design, capital projects from concept study, through to commissioning and supporting manufacture. You'll have at least two years' experience in the design, commissioning or operation of a wide range of process unit operations. Experience of specific batch or pharmaceutical manufacture, process modelling and analysis software, and knowledge of cGMP, plant validation and regulatory requirements would be an advantage.

**Physical Properties Analysts**

Req ID: 220458
You'll have a sound knowledge and understanding of physical properties analysis. Experience in the use of Particle Sizing, DSC, TGA, GVS, XRD, Microscopy and Bulk Density is essential, as is an understanding of the impact of physical attributes in secondary formulations. Experience in the development, validation and transfer of physical properties methods is an advantage but not imperative.
To find out more about our opportunities and apply, visit our website www.gsk.com/careers quoting the appropriate Req ID for the role(s) of interest to you.

POSITIVE ABOUT DISABLED PEOPLE
GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is proud to be an equal opportunities employer M/F/D/V

New Scientist Jobs
CELEBRATING 50 YEARS OF NEW SCIENTIST
50 1956 - 2006
[2567-061 (2006) : 76]
The Relativity Group in the Department of Applied Mathematics and Theoretical Physics of the University of Cambridge is looking for a graduate to fill a research assistant position. We would hope that the successful applicant will start no later than the beginning of December 2006.

The Head of the Group is Professor Stephen Hawking who is disabled and communicates using a computer system and speech synthesiser. If you were accepted for the post you would be responsible for maintaining and improving this computer system as well as other pieces of support equipment. You would help him to prepare and deliver seminars and public lectures and assist with scientific papers. You would also accompany Professor Hawking on his many travels and assist other members of the group.

Flexibility, stamina and a confident and caring personality, together with a valid driving licence, are essential for this demanding job.

The appointment would be for a period of up to 12 months with the possibility of extension for a further year. The salary is on the Research Assistant scale £20,235 to £22,774 per annum with the starting salary depending on experience.

Further particulars and the application form are available from Ms Judith Croasdell, DAMTP, Centre for Mathematical Sciences, Wilberforce Road, Cambridge CB3 0WA. Tel: (01223) 337843. E-mail: J.Croasdell@damtp.cam.ac.uk

Please arrange for two referees to write directly to Ms Croasdell at the above address to meet the closing deadline of 22 September 2006. Interviews will take place on 18 October 2006.

Teaching Fellow
*£21,884 - £26,130 pa

We have a two year post available to help with the development, teaching and administration of the new MRes in Marine Mammal Science, starting in Autumn 2007. The viability of the course will depend to a large extent on the fellow’s initiative and performance. In turn, the success of the course will determine the future continuation and prospects of the post.

Working together with a small team of course organisers, you will develop the course's modular structure and with a large group of course co-ordinators/lecturers to help define the content of modules. Potentially involved with advertisement, recruitment, marking and exam-setting, you will also be encouraged to wholly undertake the co-ordination of one module with the content of your choice.

You must hold a PhD in ecology or organismal biology, have teaching experience at university level and have conducted research in some area of Marine Mammal Science. The post would suit a recent doctoral student or someone wishing to return to academia and can be offered on a part time/job share or full time basis.

*Salary subject to confirmation under the new framework agreement.

Please quote ref: PS020/06. Closing date: 22 September 2006.

Application forms and further particulars are available from Human Resources, University of St Andrews, College Gate, North Street, St Andrews, Fife KY16 9AJ (tel: 01334 462571, by fax: 01334 462570 or by e-mail: jobline@st-andrews.ac.uk). Mathematical Physical and Life Sciences Division
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Earth Sciences
Sub-Department of Atmospheric, Oceanic, and Planetary Physics

Research Facilitator in Physical Climate Science
Salary Range Grade 8: £31,525 - £37,643
(discretionary range to £41,133) (under review)

The Mathematical, Physical and Life Sciences Division invites applications for the post of Research Facilitator for Physical Climate Science. Understanding the climate system is a major research challenge given urgency by global warming. The University has significant climate-science research programmes in several departments. The Research Facilitator will be the point of contact for climate science within the Mathematical, Physical and Life Sciences Division, helping to foster links and collaboration between research groups. The Facilitator will play an active role in raising funds for projects in the physical climate sciences, including: seeking out funding from all relevant sources; matching funding opportunities to expertise available within the departments; and administering the submission of major grant applications. Through the maintenance of a website and other outreach activities, they will also present physical climate science to the public and to schools.

The successful candidate will have a PhD or equivalent experience in a relevant discipline, and excellent organisational, communication and teamwork skills. Previous experience in the facilitation of research is desirable but not essential. This position presents an opportunity for a scientist to enter the rapidly developing field of research management and administration.

The post is initially for a period of three years. Further particulars, including details of the application procedure and of the duties attached to the appointment are available at www.earth.ox.ac.uk/department/resfac.pdf or from Mrs Sue Ling. (Sue.Ling@earth.ox.ac.uk)
Department of Earth Sciences, Parks Road, Oxford OX1 3PR, UK. The closing date for applications is 30th September, 2006.

Contact David Norman (dn102@esc.cam.ac.uk) or James Secord (jas1010@cam.ac.uk). Applications to mij10@esc.cam.ac.uk by 30th September 2006.
[2567-067 (2006) : 78]
UNIVERSITY OF BIRMINGHAM
Division of Immunity and Infection

Research Technician (2 Posts)

Applications are invited to join an active, well-funded and internationally recognised (RAE 5*) Research Group, based in the MRC Centre for Immune Regulation and occupying well-equipped new laboratories within the Institute of Biomedical Sciences. We are looking for two enthusiastic, highly motivated individuals capable of providing high quality work in a programme of work sponsored by the Arthritis Research Campaign (Post 1) and the European Union (AutoCure; Integrated Programme) (Post 2) see *Trends Immunology* (2005) 26:150 and [http://www.autocure.org/](http://www.autocure.org/).

The successful candidates should have a minimum of an HND in a biological subject and previous experience working in laboratory-based research would be an advantage. The post holders should preferably have a good understanding of cell biology or cell culture and some knowledge of immunology.

Informal enquiries can be addressed to Professor M Salmon (Post 1) or Professor C Buckley (Post 2). Both are contactable on +44(0)121 414 6777 or by email: M.Salmon@bham.ac.uk or C.D.Buckley@bham.ac.uk. Starting salary in the range of £14,408 to £16,118 per year (potential progression on performance once in post to £18,051 per year). Plus additional 10% of salary for new staff or pension for existing Scheme members.

Post 1 is available from September 2006 until 30 September 2010. Post 2 is available until 31 August 2007 in the first instance, (but consistent with EU funding rules is likely to be renewed annually until February 2011).

Closing date: 20th September 2006.

[2567-068 (2006) : 78]
POSTDOCTORAL RESEARCH POSITIONS

The Photonics and New Materials Division (http://www.optik.uni-erlangen.de/mpf/php/abteilung3/) of the Max-Planck Research Group is seeking candidates for two 24-month postdoctoral positions. Position A is in medical biophotonics, where experience in laboratory biophysics (e.g., vesicle production) and laser tweezers would be desirable. Position B is in glass synthesis and photonic crystal fibre fabrication; experience in synthesizing and casting of compound glasses (e.g. tellurites and chalcogenides) is sought. Successful applicants will join a major European research group in optics and photonics, based in extensive new laboratories, with many opportunities for national and international collaboration.

Closing date for applications is September 30 2006. Informal enquiries may be directed to: Frau Bettina Schwender, University of Erlangen-Nuremberg, Guenther-Scharowsky-Str. 1/Bau 24, D-91058 Erlangen (bschwender@optik.uni-erlangen.de) Tel: +49-9131-6877-301 Fax: +49-9131-6877-309
Applications are invited for 3 positions within the new Cancer Research UK funded Clinical Trials Unit (CTU). The CTU is based within a group that is at the forefront of research internationally into the prevention and control of cancer. We have particularly active research programmes in breast, cervical, colorectal and prostate cancer prevention, cancer screening and statistical methods for clinical trials and epidemiology.

**Clinical Project Manager, IBIS-II Study**
Ref: 06305/SW
Research Grade 6, £37,023 - £44,942 pa
IBIS-II is an international multi-centre trial examining the role of anastrozole in the prevention of breast cancer in high-risk, post-menopausal women. For more information, please visit the IBIS-II website [www.ibis-trials.org](http://www.ibis-trials.org)

You will be responsible for co-ordinating the activities of the IBIS-II team and contributing towards defining a strategy for trial conduct. You will have direct line management responsibility for the Drugs Co-ordinator, Specimen Co-ordinator and Recruitment Co-ordinator. You must have proven experience of managing staff and a thorough understanding of GCP regulations and clinical trial monitoring.

Interviews are scheduled to take place on 25th September 2006.

**Senior Database Programmer**
Ref: 06288/SW
Research Grade 5, £29,768 - £38,056 pa
You will be responsible for all the computing aspects of the trials including database design and creation, together with the necessary accompanying programming for randomisation and data-capture. You will also be expected to advise and assist other members of the centre with their database-related work and will act as deputy to the centre's chief programmer. Although sound computer skills are essential for this post, particularly SQL, your primary responsibility will be data security and integrity, rather than simply back office design and as such you will be required to interact with a wide range of contacts on a daily basis and must have strong communication skills.

Interviews are scheduled to take place on 29th September 2006.

**Quality Assurance Manager**
Ref: 06306/SW
Research Grade 5, £29,768 - £38,056 pa
You will be responsible for all aspects of quality assurance in the CTU, including direct responsibility for monitoring compliance in trials. You will develop and set up systems to monitor Research Governance and GCP compliance across the CTU. You will have excellent organisational and communication skills and extensive knowledge of relevant regulations.

Interviews are scheduled to take place on 4th October 2006.

All posts are non time-limited with guaranteed funding until 31st March 2009. Future funding of the posts is determined by 5-yearly performance review of the entire research programme by Cancer Research UK.
For a job description and application form please contact our 24-hour recruitment line on 020 7882 6149 or email csq-recruit@qmul.ac.uk quoting the corresponding job reference number above. Alternatively visit the Human Resources website on http://www.admin.qmul.ac.uk/humanresources/vacancies/

The deadline for return of completed application forms is 5pm (BST) on 13th September 2006. Forms should be returned via email to csq-recruit@qmul.ac.uk or by post to: Recruitment Office, Campus Management Team, Barts and The London School of Medicine and Dentistry, Queen Mary University of London, The Lodge House, Charterhouse Square, London EC1M 6BQ.

Promoting excellence in teaching and research
Working towards equal opportunities
[2567-070 (2006) : 79]
School of Chemistry

**Fellowship in Citizen's Awareness of Science** Ref: EPS/275/06

Salary £21,467 - £31,525 p.a.

This post is funded by the European Commission Network of Excellence "MAGMANet". You will be involved in the development of lectures and demonstration material, principally in the area of magnetism, for levels of ability ranging from primary school, through secondary school, to the general public. You will also be expected to be involved in some MAGMANet administration, which may involve travel to European cities for one or two day meetings.

You should have a good honours degree in Chemistry and good computer skills, with some experience of Web authoring being an advantage, a PhD/PGCE may be an advantage, but is not essential. The ability to work to a deadline is essential. The position would suit a recent graduate or postgraduate looking to gain experience in teaching, administration or involvement with the European Commission.

This post is a one year fixed term contract.

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44(0) 161 275 8837 or email: eps-hr@manchester.ac.uk

Closing date: 11 September 2006.

Please quote the reference number.

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY
[2567-072 (2006) : 80]
Ramsay Memorial Fellowships Trust

**Ramsay Memorial Fellowships For Chemical Research (Postdoctoral)**

The Ramsay Trustees will, in February 2007, consider applications for the award of one or more General (British) Ramsay Memorial Fellowships, which may be co-sponsored by a British industrial or other body.

The Fellowship(s) will normally be tenable in the United Kingdom for two years from 1st October 2007. Candidates will generally be expected to have had already some postdoctoral experience of research, although this should normally not have exceeded two years.

The value of a Fellowship is usually comparable with the lower part of the Lecturers' salary scale for British universities, to which may be added a grant for (non-travel) expenses of up to £1,000 per annum. In addition, USS or similar superannuation arrangements may be made.

Further information and application forms are available online at [http://www.ucl.ac.uk/ramsay-trust/](http://www.ucl.ac.uk/ramsay-trust/) or from the Executive Secretary, Ramsay Memorial Fellowships Trust, c/o UCL Academic Services, University College London, 5 Gower Street, London WC1E 6BT, UK; telephone (0)20 7679 5775; fax (0)20 7679 5789; email: g.hawes@ucl.ac.uk.

Completed application forms must be received by no later than 15th November 2006.

By Order Of The Trustees

Registered Charity Number 313811

Opportunities in Dryland Research

The Jacob Blaustein Institutes for Desert Research (BIDR) of the Ben-Gurion University of the Negev is pleased to offer access to its infrastructure, within the framework of the EU Project - FP6: Transnational Access, Dryland Research Specific Support Action (SSA). Scientists, postdoctoral fellows and research students from EU member countries and from the associated states may apply. Qualifying applicants are granted access to all relevant BIDR research facilities. The support, from ten days to three months, covers travel costs to and from the BIDR and subsistence. In order to participate in this program the visitors have to carry out all their activities at the BIDR or its facilities in cooperation with BIDR faculty. The BIDR is divided into departments that deal with a variety of topics; Desert Ecology, Dryland Agriculture, Dryland Biotechnologies, Environmental Hydrology and Microbiology, Desalination and Water Treatment, Man in the Desert, Solar Energy and Environmental Physics. Additional information is available at: www.bgu.ac.il/BIDR/bic/ssa or from: Prof. Pedro Berliner, Coordinator-Dryland Research SSA Jacob Blaustein Center for Scientific Cooperation Jacob Blaustein Institutes for Desert Research Ben-Gurion University of the Negev, Sede Boqer Campus 84990 Midreshet Ben-Gurion, Israel E-mail: inter@bgu.ac.il Fax: 972-8-659-6718 [2567-074 (2006) : 80]
SCHOOL OF SCIENCE & TECHNOLOGY

**Researcher – DVT-IMP**

(Deep Vein Thrombosis – Impedimetric Microanalysis System)

£19,920 - £30,087 (Subject to new pay and grading structure)
Temporary until 31 August 2009

UNIVERSITY OF TEESIDE

The University of Teesside is continuing to expand its research activities and is seeking talented individuals. Our North East of England location offers exceptional opportunities for an affordable, quality lifestyle and innovative working environment.

You will support the development of a microfluidics cartridge system in the EU FP6 Deep Vein Thrombosis - Impedimetric Microanalysis System project. DVT-IMP will work on innovation technologies for a d-dimer, handheld, quantitative, accurate, reliable *in vitro* and low cost point-of-care device to better aid clinicians in their prognosis and management of patients.

With an appropriate PhD qualification, or appropriate experience, you will have specialist expertise in one or more of the following: diagnostic device development; microfabrication; polymer moulding and joining; and microfluidics. You will also have the commitment to undertake research and work as a member of a team.

Job Reference:2091

Application forms and further details are available from the Personnel Department, Middlesbrough, Tees Valley TS1 3BA. Tel 01642 342200 (24 hours) or email jobs@tees.ac.uk

For further details of this and other posts, please refer to our website at www.tees.ac.uk

Closing date: 12 noon 15 September 2006.

UNIVERSITY OF LEEDS
Faculty of Biological Sciences
Institute of Molecular and Cellular Biology

**Technician - Research Laboratories**
This post is available immediately to work in the Faculty's Research Laboratories. The project, funded by Yorkshire Cancer Research, is concerned with developing gene therapy approaches to respiratory and digestive cancers using immunohistochemical and cell culture techniques. This is a joint project between the Faculty of Biological Sciences and the School of Medicine. Experience of laboratory work in relevant areas of the biological sciences is essential and you will have a degree or equivalent in a biological science subject. The post is fixed term for two years.

University Grade 4 (£15,133 - £16,967 p.a.)

Informal enquiries to Dr G E Blair tel 0113 343 3128 email g.e.blair@leeds.ac.uk

[2567-076 (2006) : 81]
UNIVERSITY OF BATH

Project Manager, Environment

We wish to appoint a dynamic, highly-proactive project manager to promote and support the University's research and knowledge transfer strategies in the Environmental Technology Sector. The role will work with colleagues in the Research Development and Collaborations team comprising of three Research and Innovation Managers responsible for marketing and supporting the knowledge transfer strategies in three University defined areas: (i) Advanced Engineering, Physical Sciences and ICT (ii) Life Sciences and Health, and (iii) Humanities and Social Sciences.

The role will provide proactive leadership and project management of strategic projects relating to the Environmental Technologies Sector as defined by the South West Regional Development Agency (SWRDA). The postholder will work to market the Environmental Technologies capabilities within the University of Bath, engaging with companies across the South West of England to develop collaborative projects and ventures. The sustainability of this post is likely to be linked to leading and managing projects that attract substantial funding.

Specific responsibilities will be to provide a lead on collaborative projects between academic staff and businesses, facilitating the interactions and concluding any contractual arrangements. Some event management will be required to market the university's capacity and capabilities to business. The post is based in Bath, but will include travel mostly within the South West of England region.

Applicants should be graduates with a background in an appropriate discipline and possibly a second degree. Five or more years of experience of research and commercial environments is essential, and you will need to demonstrate a record of achievement in developing client relationships and the realisation of funded projects from private and public sources. Experience of having successfully worked with academic staff and businesses is essential. You will need to possess excellent interpersonal, communications, negotiation and project management skills.

The appointment will be offered for a fixed-term of two years.

Salary in the range of £32,212 - £38,068 per annum.

Informal enquiries to Dr John Hunt on 01225 384497 or j.hunt@bath.ac.uk

Closing date for applications is Monday 18 September.

Application forms may be obtained from the Human Resources Department, University of Bath, Claverton Down, Bath BA2 7AY (email: clerical-jobs@bath.ac.uk). Alternatively please phone the 24 hour answer-phone service on 01225 386924, text-phone 01225 386039, or apply on-line at www.bath.ac.uk/jobs quoting Ref No. 06/345.

MSc in The Molecular Biology and Pathology of Viruses
This one year virology MSc course provides a comprehensive understanding of the nature of viruses and of the diseases caused by virus infections, with the emphasis on the understanding of these processes at the molecular level. The course consists of lectures, tutorials, seminars and practical classes followed by a full-time research project and will next begin in October 2006. Some funding may be available. Applications are invited from graduates (normally with second class honours or above) in the biological sciences, medicine, or veterinary science or those with an equivalent overseas qualification.

Further information is available from Dr M.J. McGarvey Division of Medicine, Faculty of Medicine, Imperial College London, St Mary's Campus, South Wharf Road, London W2 1NY, tel: +44 (0)20 7886 6404, fax: +44 (0)20 7724 9369 e-mail: m.mcgarvey@imperial.ac.uk

MAGDALEN COLLEGE OXFORD

Fellowship by Examination
2006-2007

The College proposes to elect, in February 2007, one or two Fellows by Examination. Candidates should have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. They will already have demonstrated outstanding promise in their chosen field. In any event the candidate must not have completed more than four years' graduate study by 1st October 2006. There is no restriction on the number of times an applicant may apply for this post.

Each Fellowship is tenable for three years at a stipend starting at £16,352 per annum rising annually on 1st October. The Fellow is a member of the Governing Body of the College and is entitled to free lunches and dinners, to a research allowance, and either to free single accommodation, or to a discretionary housing allowance, currently set at £9,000 p.a. It is likely that successful candidates will be required to live within a certain radius of Oxford during the period of their appointment.

Application forms and further particulars can be obtained from the administrative Secretary, Magdalen College, Oxford, OX1 4AU (tel. +44 (0) 1865 276060, email: elizabeth.martin@magd.ox.ac.uk) or at www.magd.ox.ac.uk/vacancies/ The closing date is 16th October 2006.

The College exists to promote excellence in education and research, and is an Equal Opportunities Employer.
It is now possible to drive in neutral.

Road transport generates about 22% of the UK's CO₂ emissions. As well as driving more efficiently, you can now neutralise the impact of your car's CO₂ emissions at targetneutral.com. Initiated by BP, target-neutral is a not-for-profit scheme; drivers make a small annual payment towards funding alternative and renewable energy projects which, in turn, offset the equivalent to their cars emissions. Through this scheme all our fuel tankers delivering to UK petrol stations are now CO₂ neutral.

Why life speeds up as you get older

Public lecture
Monday 16 October at 6.30pm
Professor Douwe Draaisma
University of Groningen

Time, according to psychologists, is a product of human memory. Psychological time may change pace dramatically, feeling slower or quicker depending on individual circumstance. In this lecture, Professor Draaisma will use insights into the psychology of autobiographical memory and brain science to examine experiences of time such as the experience many past their forties report - life seems to speed up with age

excellence in science
Italy is on the rise with over 160 companies today and a growth rate of 60% over the last 5 years, which makes Italy rank fourth behind Germany, UK and France.

A breeding ground for biotech companies

Italy’s Life Sciences industry is becoming ever more appealing for multinational companies seeking to pursue Biotechnology and Pharmaceutical research. The sector is spurred on by the strong interaction between academia and business environment, a vibrant medical and hospital system, the capacity of world class scientists to produce leading-edge research as well as government support. The strong innovation that marks Italian bio-industry and the high quality of products in the development pipeline (59 products of which 30 in clinical trials) make Italy compete with major European countries.

Innovation in Life Sciences Companies:
R&D Spending/Revenues (%)

Sweden* 62%
Germany* 42%
Italy** 40%
USA* 39%
UK* 35%
France* 31%
Switzerland* 30%
Denmark* 20%

Source: InvestInItaly based on:
• Critical I ‘Biotechnology in Europe 2005 Comparative Study”
** Blossom Associati, CrESIT Insubria di Varese University, Italian Biotechnology Report 2006

Competitive advantages for international investors
A skilled pool of R&D professionals - 6,000 researchers employed by businesses, a pool of 20,000 university researchers, 200,000 students and 35,000 graduates annually in Biotechnology Pharmacy and Medicine - with creativity second to no competitor country worldwide makes Italy rank top in Europe for patent productivity and impact rate of publications. Start-ups and new business initiatives can count on the support of a network of science parks specialized in Life Sciences, with a track record of excellence in Biotechnology, Biomedical Technology, Diagnostics, Genomics. Besides, labor business and clinical trials costs are internationally competitive with respect to USA, UK, France and Germany.

INNOVATION SPOTLIGHT

Italy’s just launched the first public laboratory for production of personalized anti-cancer drugs for clinical trials

Rome - FaBioCell (Cellular Biological Pharmaceuticals) is the new public laboratory inaugurated by the Italian Minister of Health. Located in the ISS (the Italian National Institute of Health) it will use the dendritic cells of individual patients for the production of anti-cancer drugs and vaccines. It will allow trials of cancer immunotherapy in collaboration with 3 major Italian hospital centers: Istituto Regina Elena of Rome, Institute for Cancer Research and Treatment (Fondazione G. Pascale of Naples) and the National Cancer Institute of Milan.

Italy to Launch Europe’s First Institute for Regenerative Medicine

Modena - The University of Modena and the Eye Bank Foundation of Venice have joined forces to create a public/private partnership forming the Research Center for Regenerative Medicine. It will become the first such center in Europe focused on stem cell therapy for treating vision disorders caused by tissue/organ damage and genetic defects.

The European Institute of Oncology is supported by the US National Cancer Institute for lung cancer research

Milan - The Italy based European Institute of Oncology was selected and funded 850,000 USD by the National Cancer Institute as the best research center in Europe and US to conduct clinical studies for pharmacological prevention related to lung cancer. The research pool is committed to cancer screening with the ultimate and ambitious goal of discovering how to stop lung cancer growth at a very early stage.

Science, work and business
The Insider Ireland

The lure of the Celtic Tiger

There is a mood of optimism and great things to come in Irish science. Anthony King discovers why the country is attracting researchers from all over the world.

The rising tide of funds

The bust of Oscar Wilde at the entrance of the Smurfit Institute of Genetics at Trinity College Dublin serves as an apt figurehead for Irish science in 2006. The writer has a strong connection with the institute itself: he was born at 21 Westland Row, which adjoins the building, and in 1844 his father, an eminent eye and ear specialist, founded a hospital on the site.

Wilde also once wrote something that applies across all of the country’s research institutions: “Success is a science: if you have the conditions, you get the results.” The conditions today are the country’s political commitment to science and steadily growing research funds, and the result is an excellent environment to work as a scientist. “There is a feeling that we’re on the up. There is a mood that the government really values research,” says Luke O’Neill, head of the School of Biochemistry and Immunology at Trinity College Dublin (TCD).

During a funding drought in the 1980s and much of the 90s, the only product of the country’s universities was skilled graduates. Now it’s about quality research, says Gerry Wrixon, president of University College Cork. Irish science was towed out of the doldrums by a government spending spree beginning in the late 1990s, plus the creation of Science Foundation Ireland (SFI) in 2001, which funds a broad range of research under the umbrella of biotechnology and IT.

This drive is still going strong. Last June, Taoiseach Bertie Ahern and five ministers launched a plan that signalled the government’s robust commitment to science. The Strategy for Science, Technology and Innovation will commit €3.8 billion to research between 2006 and 2013.

“There is real tangible support from the government,” says Wrixon, “yet they are doing it in a sensible way that does its best to ensure the high standards needed to make Ireland globally relevant are maintained.” For example, grant awards are peer-reviewed internationally. “It would be a very easy thing for us to be reinventing the scientific wheel on a small island in the Atlantic,” he says.

This rising tide of funds has buoyed optimism too. “Conditions are probably as good as they’ve ever been and look like getting better,” says Wrixon.

An economy fuelled by R&D

Whether you call it the Celtic Tiger or Ireland’s economic miracle, there is no denying that the boom of the 1990s was fuelled in large part by high-tech industry. Low corporation taxes and an educated, English-speaking workforce were major attractions for US corporations, principally in manufacturing. For instance, Intel chose to set up its European manufacturing and technology centre in Ireland - the company’s largest plant outside the US.

In the new century, economic growth may have slowed, but multinational companies - many relying on scientists for much of their workforce - continue to have a significant presence. Nine of the 10 biggest pharmaceutical companies have manufacturing operations in Ireland. In Dublin, pharmaceutical company Wyeth is building one of the largest biopharmaceutical campuses in the world, investing about $2 billion on a 35-hectare site. This year the trend continued with biotech firm Amgen announcing a $1 billion investment for a manufacturing facility in Cork.

The government’s aim is to encourage these companies to broaden their activities beyond manufacturing, and embed them into the research fabric of the country. It plans to do this by luring them with the know-how in Irish universities and, of course, financial support.

Barry Heavey of the Industrial Development Agency Ireland says Wyeth is a good case study. “They entered Ireland when research here was going through a major upgrade in terms of infrastructure and funding for people. Wyeth found it an exciting place to work, with lots of people to collaborate with.”
Meanwhile, Ireland’s indigenous biotech industry is growing fast, which means there are plenty of opportunities for scientists in this sector. “Biotech is a nascent industry but is growing exponentially,” says Marian Byron, director of the Irish Bioindustry Association. “The government has done an awful lot, particularly in R&D.”

Industry that relies on scientific discovery in any country tends to be fuelled by spin-offs from academic research, and people in the sector who come to Ireland often comment on how closely the key players are working to facilitate this, says Catherine Godson of the Conway Institute of Biomolecular and Biomedical Research at University College Dublin. Science Foundation Ireland, the universities, the Industrial Development Agency and Enterprise Ireland are all collaborating. Godson’s Conway Institute illustrates this well - it developed and licensed the first diagnostic test for BSE - and Wyeth has also set up a drug discovery research group in the institute.

“The Irish are entrepreneurial and will seek new opportunities,” says Mark Heffernan, the Australian CEO of drug development company Opsona Therapeutics, which began life as a spin-off at TCD. “The combination of this and excellent science should make for a bright future.”

Cranes on campus

For Pat Guiry, a walk along the corridor outside his office is a leap across three decades in laboratory design. At University College Dublin, the newly built Centre for Synthesis and Chemical Biology (right) has been grafted onto the side of the 1960s chemistry department. The purpose-designed building represents the Irish government’s largest single investment ever in chemistry research, and the fact that Bertie Ahern himself opened the centre earlier this year has lent Guiry a bit of a swagger. “A lot of academics in the UK and across Europe are looking enviously at what’s happening in Ireland. They see we are bucking the trend in funding and wish they had some visionaries in their government,” he says. The research infrastructure in Ireland has improved dramatically over the past few years, and cranes are ubiquitous on Irish campuses. When New Scientist visited this summer, hard hats and white coats marked out the two biggest groups of workers on campuses. “Former graduates get lost in the university because we have had so many major building projects,” says Gerry Morgan, dean of science at the National University of Ireland (NUI), Galway.

Next summer, a new building shaped like the bow of a ship at TCD will take on board the Centre for Research on Adaptive Nanostructures and Nanodevices. An ultra-low-vibration space in the basement will protect the experiments from the rumble of passing traffic and trains. This project’s partners include Intel, Hewlett-Packard and the Tyndall National Institute in Cork - itself no dinghy. The Tyndall specialises in photonics, microelectronics and material science, and in the past two years the number of scientists working there has increased from 80 to more than 300.

Over at Dublin City University, the National Institute for Cellular Biotechnology is still taking the plastic wrap off its new equipment and building. “A building is as much a piece of equipment as a microscope,” explains Donnacha O’Driscoll, manager of the institute. It offers superb core facilities in DNA microarrays, proteomics, microscopy and bioinformatics.

Campus expansion has come at the right time for some researchers. “We need a new building because we’re cramped in,” says Luke O’Neill of TCD, where a new bioscience institute is being planned across the road from the historic campus. “We’ve got big expansion plans here. We’re hoping to double the number of biomedical researchers in the next 10 years or so.”

New ways to lure top scientists

The Irish are renowned for their welcome, but there other things to tempt researchers to emigrate to the country - or return. Ireland offers long-term competitive academic fellowships, better success rates for grant applications and larger salaries than the UK. And of course, there’s the quality of the science.

“Irish people are repatriating, which is the story of Ireland, but what is really exciting is people coming here as a destination of choice, as a credible destination of top-class research,” says Catherine Godson of University College Dublin. For example, Science Foundation Ireland’s Research Professor Recruitment Award has so far lured over a dozen top professors to Ireland, half of whom had no prior links with the country (see “Case study’ above right). The programme helps research bodies tempt top-level scientists by offering a €1 million grant over two years towards costs including salary, setting up a research group and relocation expenses.
Science Foundation Ireland’s funding programme for principal investigators is also open to scientists outside Ireland. Applications tend to have a high chance of being accepted, and are not tied to any institution, giving researchers more choice about where they work.

Biochemist Vincent Kelly was a recent successful applicant. “SFI were very helpful. They made efforts to integrate me into the university and had a flexible attitude, allowing me to transfer funds from one year to the next and to a student position with the minimum of fuss,” says Kelly. “The funding is good and allows you to set up major equipment to make yourself an independent investigator.”

One area that is still problematic is career development for scientists. Just as in the UK and US, there is a dearth of permanent positions. “Scientific researchers need to have a greater sense of job security,” notes NUI Galway’s Gerry Morgan, “and there are also issues regarding pension rights for people who don’t have permanent jobs in universities, such as postdocs.”

The good news is that there have been efforts to develop graduate training, and the need to improve career paths for postdocs is widely acknowledged.

Life outside the laboratory
House prices in Ireland have become a national obsession. With interest rates rising, prices have shot up 15 per cent in the past year. The average price for a house is €300,000, and over €400,000 in Dublin. The cost of living is particularly high in Dublin, yet the city ranked ahead of all UK and US cities in a recent worldwide survey of quality of living. “I love it,” says Marina Lynch, director of TCD’s Institute of Neuroscience. “The city is the right size. A great many places are accessible by walking.” The University College Dublin campus is just a few kilometres from a blue-flag beach and from the city centre, and 30 minutes’ drive from the Wicklow Mountains.

There are benefits to living outside the capital, however. “For incoming researchers, smaller cities such as Cork, Galway and Limerick have some advantage in terms of cost and quality of living, particularly where it is possible to either join or develop internationally competitive research groups,” says Charles Spillane of the Genetics & Biotechnology Lab at University College Cork.

That said, this lifestyle can be found elsewhere, so what makes Ireland unique? “There’s a real excitement about the place because we’re building something new,” says TCD’s Luke O’Neill. “There’s a spirit of adventure compared to other established places. Here, we are building from the ground up and that gives people an opportunity to make their mark.”

Anthony King is a freelance writer based in Dublin

ON THE RECORD
Why work in Ireland?

“We have highly educated and motivated students, a strong work ethic, a dynamic economy and high salaries, and welcoming people.”
Matthew Webster, Smurfit Institute of Genetics, Trinity College Dublin

“The big thing we have is accessible government - a government that listens. I can pick up the phone and be talking to a very senior representative, if not a minister, within a matter of hours.
Maurice Treacy, Science Foundation Ireland

“There are excellent researchers, an international flavour of graduate students and postdocs, and a community spirit. And there is a scale of ambition now that we never had before.” Catherine Godson, Conway Institute, University College Dublin

ROUND-UP

Heart rater
Want to test your ticker? A chip to score your cardiovascular health is under development at the Biomedical Diagnostics Institute in Dublin City University. The idea is to allow people to adjust their lifestyle before illnesses arise, says Brian MacCraith, director of the institute. It takes a finger-prick drop of blood and feeds it through tiny channels where it tests for early-stage markers of cardiac damage, such as C-reactive protein, an indicator of inflammation. “The device could be used in the doctor’s surgery or even at home,” says MacCraith. Readings from the device could then be sent wirelessly to a hospital.

Super-producers
Hamsters in their wheels have long been a symbol for getting nowhere rather than productivity, but in the pharmaceutical industry, the opposite is true. Cells derived from Chinese hamster ovaries are widely used as mini protein factories in drug production. If researchers can improve the cells’ productivity it would mean better supplies of valuable pharmaceutical protein and lower manufacturing costs. Dublin City University and Wyeth are hoping to discover how to do this by examining the biochemistry of the hamster cell, and this summer registered their first patent, which could lead to a superproducer cell line, says institute manager Donnacha O’Driscoll.

Next generation
If you want to see the next generation of mobile phones, look to the National University of Ireland, Maynooth. Phones with “4G” capability will have significantly higher bandwidth, and be able to hop between any standard or band throughout the world. The challenge is to make hardware that can adapt to various frequencies and bandwidths without consuming too much power, and a group at the Institute of Microelectronics and Wireless Systems is designing new circuits to achieve this. “We’d like to develop an infinity-band phone,” says Ronan Farrell, director of the institute.

CASE STUDY
Kevin F. Sullivan moved from the Scripps Research Institute in California to the National University of Ireland Galway's biochemistry department this year

Why did you move to Ireland?
The confluence of good critical mass in my area of research and the funding opportunities of Science Foundation Ireland. Our research group, the Genome Stability Cluster, is a world-class group of scientists, and the density of faculty in this area is unique - you don't find this in typical biochemistry departments around the world.

How would you describe the research environment?
I think this is an exciting time for research in Ireland. The funding agencies have made basic research in biology a priority. With strong funding it is possible to ask hard scientific questions and make important progress, and I think this is enhancing Irish science. In terms of infrastructure and access to the latest technologies, I think this is good but can be made better. In terms of people, my impression so far is that Irish students are educated to a very high standard and so the human resources for making progress are very well developed.

What did your colleagues think of your decision to relocate?
The reaction was mixed. A number of people thought this was a good and exciting opportunity. An equal number thought I was a little nuts.

What kind of adjustments have you had to make?
The adjustments are surprisingly low-key. I'm from California, which is known for its relaxed attitude, and I think we're very much like Ireland in that respect. The university is a little heavier on bureaucratic work than the research institute I came from. The cost of doing research is higher here for reasons I don't understand.

What have you found most attractive about the country?
I'd have to say the people. Irish people are so friendly and so interesting to talk to. I enjoy being by the sea - I've lived by the Pacific most of my life - and it's a wonderful part of the landscape. The hills of Clare across the bay always catch my eye.

How does Irish support for science compare globally?
I think it compares very well considering its size. The economy is very strong here and science is an excellent long-term investment in people and the training infrastructure as well as applied science. All in all, Irish support for science seems very significant and genuinely world-class.

The UCD School of Agriculture, Food Science and Veterinary Medicine is a research leader in the areas of sustainability and competitiveness of agriculture, the health and welfare of animals, the quality and security of food and improving consumer well-being. In 2006, the School has secured substantial research funding and is currently recruiting up to 60 researchers (at postgraduate and postdoctoral level) in these areas:

- Agribusiness
- Pathobiology of Disease
- Animal Science
- Sustainable Agriculture
- Food and Health
- Veterinary Clinical Sciences

Full information on all current research opportunities is available on the School website [www.ucd.ie/agfoodvet](http://www.ucd.ie/agfoodvet). New research opportunities will be advertised in the coming months, so remember to visit the site regularly for updated information.
INTUITION MEDICAL WRITERS

Description
Based in our Dublin office, the successful candidates will be experienced medical writers who are highly motivated and technically proficient, and have demonstrated competency in creating medical education for major pharmaceutical companies.

Previous experience in a medical writing role is essential, along with an ability to work to tight deadlines and to the highest quality objectives. Experience in a medical communications agency would be an advantage, as would a third level qualification in human sciences.

This role involves:
• writing medical content from academic sources
• creating instructionally sound learning from medical source material
• referencing medical content to academic journals
• working with Subject Matter Experts to create effective on-line and print medical education

You must be able to demonstrate broad medical writing experience across a range of projects and an ability to assimilate medical and marketing information and present it in a learning context. You may have performed this role in print or on-line.

In return we offer an attractive remuneration package, with significant scope for career development.

To apply for these full-time/contract positions, please forward your CV to hr@intuition.com quoting Ref: MW/06.

Email: info@sri.ie www.sri.ie
Science Foundation Ireland (SFI), the national foundation for excellence in scientific research, is investing in academic researchers and research teams who are most likely to generate new knowledge, leading-edge technologies, and competitive enterprises.

SFI has a flexible grants and awards portfolio and several times a year issues calls for proposals from scientists and engineers. SFI also accepts unsolicited proposals throughout the year.

**Principal Investigator Programme** for outstanding researchers, normally ranging between €50,000 - €250,000 per year for a three to four year period.

Centres for Science, Engineering and Technology (CSET) linking academic and industrial researchers together on high-end research programmes, grants ranging up to €20 million over five years.

**Strategic Research Clusters (SRCs)** will create clusters of internationally-competitive researchers from academia and industry, particularly Irish-based industry. Grants will be for three years normally ranging from €500,000 to €1.5 million per year.

**Research Professor Recruitment Awards** for outstanding researchers, with particularly distinguished international reputations, awards normally ranging up to €500,000 per annum for up to two years.

**Research Frontiers Programme (RFP)** supporting all areas of high-quality, novel exploratory research in the third-level sector, normally ranging up to €150,000 over three years.

**E.T.S. Walton Visitor Awards** supporting leading international scientists who visit Ireland to undertake research for up to one year, normally ranging up to €200,000.

**President of Ireland Young Research Awards (PIYRA)** attracting to Ireland and supporting Irish researchers within five years of completing their Ph.D., normally up to €1 million over five years.

**Undergraduate Research Experience & Knowledge Award (UREKA)** supports active research participation by undergraduate students during the Summer.

**Secondary Teacher Assistant Researchers (STARs)** supports second-level teachers in conducting research in Irish laboratories during summers.

**Workshops and Conference Grants** supporting significant scientific meetings taking place in Ireland, involving Irish scientists and research bodies.

Apply for an SFI award or learn more about our programmes at [www.sfi.ie](http://www.sfi.ie)

Built for Research

Science Foundation Ireland

Wilton Park House, Wilton Place, Dublin 2, Ireland
Expressions of interest are invited in the above thematic area. As a strategic investment in the research domain, the University will consider appointments across the academic range, from Lecturer to Full Chair, for outstanding scholars with a capacity to focus on research related to improved understanding of the interaction of biological systems with nano- to micro-scale structures. Emphasis will be placed on understanding the cellular and higher level responses to materials. Specific research directions could include Bio-nanoscience, Nano Medicine and Biomaterials science. The investments are seen as being complementary to existing strengths, expertise and infrastructure in materials science and engineering as well as biological sciences at the University.

These strategic posts will also be supportive of Ireland's role and position within the healthcare, medical device, biotechnology industries, to which the candidates would be expected to develop strong links.

A background in Engineering, Materials, Physical or Biophysical Sciences is required, together with a demonstrated level of experience or inter-disciplinarity in a relevant biological or clinically based field. Expressions of interest will be required to demonstrate a level of international reputation and scientific excellence appropriate to the stage of their career.

Enquiries should be addressed to:
Dr David Fitzpatrick, Chair, Thematic Area Search Committee Head, UCD School of Electrical, Electronic and Mechanical Engineering. Engineering and Materials Sciences Centre University College Dublin, Belfield, Dublin 4. Email: BBMS@ee.ucd.ie Tel: +353-1-716 1787

ITT DUBLIN

SENIOR RESEARCH OPPORTUNITIES
Applications are invited for the following research position at ITT Dublin funded under the Applied Research Enhancement Programme - MICROSensors FOR CLINICAL ANALYSIS. The key scientific objective is to design and develop integrated micro(bio)sensors for clinical applications in point of care testing.

PRINCIPAL INVESTIGATOR (5 YEARS) (Project Code: AREP/05/TA01)
Role: Responsibility for the scientific day-to-day running of the project while fulfilling a role of liaison between outside parties (academic, industrial, funding agencies etc.) and the academic members of the project's management team.

Requirements: BSc. (Hons) in Chemistry/Biochemistry, PhD in Biosensor Development or related area; relevant employment record in medical device/ diagnostic industry at senior scientist/management level. A track record in the transfer of technology from an academic to a commercial environment, together with excellent team building, communication and project management skills are desirable.

Salary starting €70,000

For more information please contact:

H&SA
HEALTH AND SAFETY AUTHORITY

REACH for Success!

Environment and Risk Assessment Manager

The Health and Safety Authority is the national authority in Ireland with responsibility for securing safety, health and welfare for all persons at work. It is a state-sponsored body, operating under the Safety, Health and Welfare at Work Act 2005 and it reports to the Minister for Enterprise, Trade and Employment. Our mission is to promote a culture of safety that every citizen will embrace.

REACH (the Registration, Evaluation, Authorisation of Chemicals) is the new EU Chemicals policy and the Health and Safety Authority has been appointed as the interim National Competent Authority for the implementation of the REACH Regulation in Ireland.

We now wish to recruit a senior professional to take on the role of Environment and Risk Assessment Manager to help us meet this latest challenge. This is a significant role in the new chemicals division. The person recruited will be a key member of the management team and shall help determine the overall direction and strategy of the division.

The successful candidate will have:
- a primary degree (or equivalent) in a relevant science, environmental or engineering field, at least 5 years relevant post-qualification experience,
- a proven track record in a management role,
- knowledge of EU/Irish environmental and/or chemical legislation, expert knowledge of environmental risk assessment,
- experience in risk management and/or risk reduction of chemicals within industry or regulatory setting.

Key responsibilities will include:
- Developing and implementing the Authority's chemical strategy,
- Participating in the Authority's REACH/GHS implementation strategy,
- Developing the chemicals division environmental policy structure with particular emphasis on risk assessment/management/reduction strategies.

Salary for persons making a personal pension contribution: €66,491 to €77,328 and additionally €80,154 and €82,982 after 3 years and 6 years satisfactory service on the maximum of the scale. For further information and to make an application, log on to www.publicjobs.ie

Closing date for receipt of application is Thursday 12th October 2006

NTERA MARIE CURIE ACTIONS

NTERA is a world leader in the commercialisation of revolutionary electronic paper displays using its patented nanocrystalline film-based NanoChromics™ technology.

We have built a team with an outstanding track record of success and now seek to add to that team. If you have talent and drive and would thrive in a dynamic company positioned to make a big impact, NTERA may be the place for you.

Headquartered in the US, with its research and development base in Dublin, we are now seeking to develop the next level of the technology and are looking for creative and talented scientists in a variety of disciplines.

All of the positions will be based in the research centre in Dublin, Ireland and are funded under the Marie Curie Fellowship programme and will be subject to the applicable conditions.

**Senior Formulations/Process Development Chemist**
NTERA Limited requires a Senior Formulations/Process Development Chemist with strengths in ceramic and metal oxide powders to join its development team.

The ideal candidate will have experience in formulation of powders, colloids and sol gels to achieve the requirements of an appropriate high-resolution deposition process, preferably with experience working on substrates for the display industry.

The candidate should have a PhD in physics/chemistry or equivalent and 10 years relevant experience. The contract will be for a period of 24 months.

**Design Engineer (Active-matrix)**
NTERA Limited requires an experienced Design Engineer to develop highly original active-matrix displays using novel electro-optic materials.

The ideal candidate will be an analogue designer/researcher with 4+ years postgraduate experience and is currently working in a display design group. The candidate should be familiar with device modelling and simulation. Layout experience is preferable. The candidate should be aware of various system aspects of displays and knowledge of human visual perception is a bonus.

The candidate should have a Master's degree or PhD in an appropriate field with significant experience in the required field of specialization. Bachelor's degree candidates with exceptional qualifications may be considered. The contract will be for a period of 18 months.

**Senior Researcher - Modelling**
NTERA Limited requires a Senior Physicist/Chemist to undertake a four month contract to develop solutions in the field of modelling of semiconductor materials. The principal activity will be to contribute to an Active-Matrix research development program.

Candidates should have significant research experience in analysis and modelling of semiconductor materials and extensive knowledge and experience of electrochemical systems and modelling of transient behaviour in chemical systems. A fundamental understanding of charge transfer mechanisms in nano-structured materials and experience in modelling nano-structured materials is also essential. Efficient algorithm development experience for computer based mathematical packages and equivalent circuit definitions and modelling for circuit simulators such as SPICE would be an advantage.

The candidate should have a PhD in physics/chemistry or equivalent and 10 years relevant experience. The contract will be for a period of 4 months initially.
Interested candidates should send a detailed CV, including full contact information to: Human Resources, NTERA Limited, 58 Spruce Avenue, Stillorgan Industrial Park, Dublin 18 or email to careers@ntera.com

UCD DUBLIN

**PhD Studentship**  
Modelling the effects of gravity on alloy solidification

A three year scholarship, covering fees plus a competitive tax-free stipend, is available for a student to carry out research on computational modelling of the effects of gravity on the evolution of microstructure during metallic alloy solidification. The funding is from the European Space Agency PRODEX programme. This research is part of ongoing UCD participation in a number of projects which are at the frontier of research on materials science in space. Experiments have already been performed in microgravity on board an ESA sounding rocket, and results from these experiments will provide data crucial for validation of the new computer simulation model which will be developed by the PhD student.

The project is open to applicants who have recently graduated with an honours degree in a relevant engineering or scientific discipline (e.g. mechanical engineering, materials science). A start date in 2006 is expected. The successful candidate will become part of a vibrant European research group, and some international travel will be required as an integral part of such participation.

Interested candidates should send a detailed CV, including the name of two referees, by 31st October 2006, to: Dr David J Browne School of Electrical, Electronic & Mechanical Engineering Engineering & Materials Science Centre University College Dublin Belfield, Dublin 4, Ireland. Tel: +353 1 716 1901 Email: david.browne@ucd.ie internet: www.ucd.ie

big ideas ! small budget?

Researchers … get funded access to our state-of-the-art facilities and expertise using the science foundation Ireland funded national access programme

The SFI funded National Access Programme (NAP) provides researchers in all Irish Third Level Colleges and Research Institutes with the opportunity to utilise Tyndall National Institute's extensive research resources in Information & Communications Technology (ICT). Successful applicants will be granted access to state-of-the-art laboratory facilities along with comprehensive supporting expertise. The programme will fund all access costs including travel and daily subsistence for visiting researchers.

Proposals are now being sought from the following research areas:

• Electronics          • Nanotechnology  • Compound Semiconductors
• Photonics            • ICT for Life Sciences • Silicon Fabrication
• Device Design        • Materials Characterisation • MEMS / Microsystems
• Simulation & Modelling

Gerard Laboratories, a wholly owned subsidiary of Merck KGaA, is the principal European manufacturing and supply facility for the Merck Generics Group, one of the top three Generic Pharmaceutical Companies worldwide. Founded in 1986 and based in Dublin, Gerard Laboratories products cover a wide range of therapeutic areas including gastrointestinal and cardiovascular medicines and currently employs in excess of 320 staff. Due to increased business demand and significant new product development activity, we are now seeking to recruit high calibre candidates into the following roles within Research and Development.

**Analytical Scientists**
Duties include methods development/validation, formulation development support, release and stability testing. You will have experience of working to GMP and good practical experience of HPLC, GC, Dissolution and other techniques. Degree qualified in Chemistry or relevant discipline, applicants should have experience in pharmaceutical analytical development, a sound understanding of regulatory guidelines and the ability to work in an organised, diligent manner with an attention to detail.

**Data Verification Specialist, Analytical Development**
Working to support Analytical Development, duties primarily include verifying experimental data to ensure compliance with cGMP and departmental procedures. Degree qualified in chemistry, with cGMP laboratory experience and a good working knowledge of HPLC, GC, Dissolution and other analytical techniques, the ability to work in an organised, diligent manner with an attention to detail are essential.

**Team Leader, Analytical Development**
Responsible for a team of analytical scientists. Duties include planning and managing resources over a number of projects, including activities such as methods development and validation, stability testing, formulation and process development support.

Applicants should have significant practical experience of a wide variety of pharmaceutical analytical techniques, coupled to a thorough knowledge of GMP and other pharmaceutical regulations.

**Pilot Plant Scientist**
Duties include performing scale-up activities and clinical manufacturing in the pilot plant. Degree qualified in Chemistry, Pharmacy or relevant discipline, applicants should have experience in development of solid-dose products, a sound understanding of regulatory guidelines and the ability to work in an organised, diligent manner.

**Formulation Development Manager**
This important position will provide technical leadership and management to the Formulation and Process Development groups across multiple projects. Duties include, but are not limited to:
1. Planning and monitoring of development programs for new solid-dose drug products, from initial formulation development through to pilot plant manufacture
2. Overseeing the manufacture of drug products in the Pilot Plant for pre-clinical/clinical purposes
3. Overseeing the technical transfer of new products into the commercial manufacturing network
4. Ensuring that all activities and the facilities are compliant with relevant regulatory standards
5. Supporting the submission process through the provision of documentation to regulatory submissions

Degree qualified in Chemistry or Pharmacy, applicants will have extensive experience in a GMP pharmaceutical development laboratory. As well as excellent interpersonal skills, applicants must be
able to demonstrate their ability to multi-task, manage simultaneous priorities and interact with the other corporate functions to ensure that work is carried out within specific time scales.

For further information on the above vacancies please contact Seona on 0161 868 2213, or to apply email your CV to srgld@uib.srg.co.uk

OXOID
JM
Johnson Matthey
R&D CHEMIST
Based in Royston, Herts
Attractive Salary + Benefits

The Company
We are a global market leader in the manufacture and development of speciality chemicals which has been setting the industry standard for almost 200 years. A FTSE 100 company, with an annual turnover of £4billion, Johnson Matthey operates in 34 countries and employs over 7000 people. The business continues to develop its technology, maintaining market leadership, to constantly adapt to its customers' ever-changing needs. The company prides itself on the excellence and experience of its people to provide innovative solutions to create value for its customers.

The Role
As a member of the Catalysis & Chiral Technologies research team you will be involved in the invention of new products for use in Pharmaceutical Synthesis Processes and be responsible for synthesizing and evaluating new catalysts and systems for use in these processes. Your responsibilities will also include product analysis, reduction to practice of Synthesis Processes and handover to manufacturing of new catalyst products. You will operate test and analytical equipment and provide technical support for external sales teams and customers. In return we offer a competitive salary and benefits associated with a progressive company.

The Person
You will be familiar with the concepts of heterogeneous catalyst preparation techniques and ideally have experience in the evaluation of these materials for synthetic organic synthesis. You will also have good knowledge of catalyst characterisation techniques, e.g. BET, MA and TPR. Experience of synthetic chemistry is desirable but not essential. You will be a good communicator, familiar with GC and HPLC instrumentation and have experience in statistical design of experiments, e.g. Taguchi.

Interested candidates should send their CV, including current salary details, to: Lorna Rochelle at lorna.rochelle@matthey.com
Closing Date: 20th October 2006

**In Vivo Biologist – Section Leader**
European R & D Headquarters Sandwich, Kent

As the world's leading animal health company, we plan to keep it that way. Not least, by investing more money in R&D than any other company, enabling us to pioneer the discovery of new products. So there's no better way to enhance the health and welfare of livestock than by joining us at Pfizer. Our broad range of project areas includes the manipulation of productivity and carcass composition, enhancing reproductive performance, and improving the management of infectious and metabolic disease.

Project teams for individual programmes include specialists from disciplines across Veterinary Medicine in the UK and US. As an *in vivo* expert, you'll share your knowledge in this inspiring and collaborative global research environment, as you supervise a small team carrying out in-house screening and proof of concept evaluations for a range of livestock research programmes. You'll influence the overall project direction by proposing scientific strategy and designing each study, and you will have direct involvement with the design and prosecution of novel disease models.

You'll be an enthusiastic manager who'll lead by example and ensure your team's work complies with strict quality guidelines. With a first degree and PhD in Physiology, Biochemistry, Pharmacology or Applied Biology, you'll have augmented this by relevant post-doctoral research experience, ideally gained in industry. You may have a veterinary or related background, but this isn't essential. Most important is your commitment to the hands-on solving of technical challenges through experimental science.

Help us discover new ways of enhancing livestock productivity and health, and you can look forward to rewards including professional recognition and the prospect of career progression with a world-leading pharmaceutical company.

To find out more and apply, please visit [www.pfizer.co.uk](http://www.pfizer.co.uk) quoting job requisition number 059796.

Closing date: 26th October 2006

THE QUEEN’S AWARDS FOR ENTERPRISE 2000 2001 – 2002
AWARDED TO PFIZER LIMITED
[2572-023 (2006) : 69]
EDITOR (Ref: CBD/E)
Current BioData Ltd is a joint venture with the founders of Swiss-Prot and is developing a new resource designed to meet the needs of those involved in drug discovery. The successful candidate will be responsible for commissioning reviews and mini-reviews from experts in the field, and will take charge of the peer-review process. This will require regular interaction with members of the Editorial Boards and senior scientific researchers, as well as close liaison with the other members of the Current BioData team. The Editor will also work to research and identify the next protein-based topics for coverage in the database, and then take the lead in developing and building the Editorial Boards and content for these new fields.

This diverse and exciting role presents an excellent opportunity for an individual with commitment and drive to work with some of the world's leading researchers to develop a novel resource to support the needs of drug discovery scientists. Candidates will need to hold a PhD (or equivalent post-graduate degree) in a life science, ideally in molecular biology or biochemistry or a related field, and an understanding of the general drug discovery process would be an advantage. Good networking and communication skills are important whilst computer literacy is essential. Previous editorial experience is not a requirement, as appropriate training will be provided.

DATABASE EDITORS (Ref: CBD/DE)
We are also seeking Database Editors, who will be responsible for maintaining the database entries for a set of protein families, with primary responsibility for literature-based and/or patent-based updates, and will be maintaining and updating the database structure as necessary. They will also be critically assessing new literature or patents for inclusion in the database, writing and editing short summaries on new research, and liaising closely with our external contributors and editorial boards.

These roles will require enthusiastic, well-organised postgraduates (MSc, PhD or equivalent) in biochemistry, molecular biology or a related subject. A working knowledge of the key protein databases such as Swiss-Prot would be a distinct advantage, as would some understanding of patents for one of the roles. Computer literacy, strong communication skills, and attention to detail are essential. As editorial roles, programming knowledge is not required. The successful candidate will also need to be well organised and enjoy interacting with people.

Informal enquiries for both roles may be made to the Editorial Director, Dr Rebecca Lawrence: Rebecca.Lawrence@currentbiodata.com

EDITORIAL ASSISTANT (Ref: NSP/EA)
New Science Press Ltd is looking for a computer literate biology graduate to join a small team responsible for developing a series of highly illustrated books in biomedical science published online and in print. Responsibilities will include all aspects of editorial and production administration including liaison with authors. A high level of literacy would be an advantage and attention to detail is vital.

Please send your CV and covering letter quoting reference, explaining briefly your interest in the post, when you would be able to start, and stating salary expectations to: Recruitment; SNG, 34-42 Cleveland Street, London W1T 4LB, or by email to jobs@sciencenow.com.

Closing date: 13/10/06.

Science Navigation Group is an Equal Opportunities Employer
Fresh opportunities from a company with a fresh approach

Here at Cmed we’re proud that we stand out from the clinical research services crowd. Our pioneering approach, leading-edge intelligent Data Acquisition and Management (iDAM) patented technology and processes allow us to deliver all encompassing solutions that provide real advantages to our clients.

We are seeking ambitious individuals to join our growing Clinical Data Management and Database Programming groups based in Horsham, West Sussex, to support “paper based” and “electronic data capture” clinical trials. Current opportunities include:

**Clinical Data Managers**
At least two years’ experience. CRO experience preferable.

**Senior Clinical Data Managers**
At least four years’ experience. CRO experience preferable.

**Experienced Database Programmers**
At least 18 months’ clinical experience in a Pharma/CRO.

Good communication skills are essential for all positions as well as the ability to work effectively in teams. We provide excellent training, personal development, career opportunities, international placements and a competitive package of salary, pension, private healthcare and other benefits.

Interested? For more information or to apply, please visit our website cmedresearch.com or contact Rosemary Murphy on +44 (0) 1403 755050 or email rmurphy@cmedresearch.com

Cmed (Clinical Research Services) Ltd., Broadlands Business Campus, Horsham RH12 4QP.

MILLIPORE

Fermentation Scientist

Celliance Limited, now a part of Millipore, is a provider of biological products to the life sciences groups, based in Livingston, Scotland. We manufacture and distribute monoclonal antibody reagents to the in-vitro diagnostics industry. We are currently recruiting to join our primary production team.

As a member of the primary production team, you will participate in the day-to-day operation of the Fermentation department and ensure that the production schedule is carried out in an effective manner. This includes Clean in Place and Steam and Place of fermentation vessels and equipment, the preparation and sterile filtration of media and feeds, and the daily monitoring of cell culture viability and nutrient levels. Our fermentation area operates continuous and batch airlift fermenter systems, fermenting a range of mammalian cells.

Ideally, you will be degree or HND qualified in microbiology, biochemistry or chemical engineering with relevant industrial manufacturing experience, preferably in fermentation or cell culture. Together with a working knowledge of Good Manufacturing Practice and understanding of Clean in Place/Steam in Place procedures and medium handling, you will be meticulous in your approach and possess good attention to detail. The ability to participate in weekend working on a rotation basis is required.

Applications will also be considered from recent qualified graduates.

Please forward CV and salary details quoting job ref no. FERM, to: Penny Webster, European HR Manager, Celliance Limited, Fleming Road, Kirkton Campus, Livingston EH54 7BN.
[2572-026 (2006) : 70]
Pfizer
Improve quality of life for all animals.
(Well, almost all.)

**Clinical Development Managers**
European R&D Headquarters – Sandwich, Kent

Some creatures have a habit of making other animals uncomfortable or unwell. So it's lucky that Pfizer, the world's largest Animal Health company, invests so much in discovering and developing new drugs and vaccines to keep pets and livestock healthy and happy. Our ground-breaking innovations are only possible thanks to our talented and highly skilled professionals. You could soon be among them in one of these four clinical development roles.

Specialising in parasitology, companion animal vaccines or swine medicine and husbandry production, you'll manage clinical research and call on your extensive technical knowledge within your field to advise scientists and project teams. The main focus of your work will be late-stage development, which involves designing and co-ordinating the clinical trials necessary for drug and vaccine registration. You'll also have the opportunity to input to pre and post-registration studies.

This is a superb opportunity for you to apply solid experience in one of these three areas, adding your expertise to that of the teams involved in creating exciting new products. You'll bring us excellent leadership and communication skills, a degree in veterinary medicine or good BSc with a PhD or other postgraduate qualification, and the flexibility to travel to trials sites throughout Europe. Clinical development experience is welcomed but not essential, and you need to be an able influencer and networker.

Not only will you be making a difference to the quality of animals' lives around the world, but you'll also benefit from the resources at our state-of-the-art facilities, and enjoy easy access to London and continental Europe.

To find out more and apply online, visit [www.pfizer.co.uk](http://www.pfizer.co.uk) quoting requisition number 058192.

SYNTHETIC ORGANIC CHEMISTS
Development Chemistry Abingdon

Evotec (UK) Ltd, one of the fastest growing solution providers for the world’s leading pharmaceutical and biotechnology companies, is expanding its Development Chemistry Department due to increased customer demand.

Working in the laboratory on projects involving the preparation of novel chemicals and potential active pharmaceutical ingredients, you will evaluate, develop and optimise multi step syntheses and production on up to 20L scale.

A graduate or a PhD specialising in synthetic organic chemistry, you must have proven technical ability and be able to produce good quality science as well as meet deadlines at all times. Industrial experience of process development or large scale laboratory production to GMP standards is desirable, although full training will be given to newly qualified candidates. A flexible attitude, together with good interpersonal skills, is also necessary.

We offer an excellent benefits package which includes private medical and dental cover and a Stakeholder pension scheme.

If you feel that you have the qualities we are looking for and the drive and determination to succeed in a team based environment, please apply online via the careers page of our website at www.evotec.com with a CV and covering letter.

[2572-029 (2006) : 72]
NOTTINGHAM UNIVERSITY HOSPITALS NHS TRUST, CITY CAMPUS
REGIONAL MOLECULAR GENETICS SERVICE

Trainee Clinical Scientist
Commencing Salary: £21,849 p.a.
4 YEAR FIXED TERM POSITION Ref: C226/06

This is a growing NHS service testing for mutations in genes causing genetic diseases. The service is provided for over 3 million of the population of the Nottinghamshire, Derbyshire, Leicestershire and Lincolnshire and is situated in excellent, well-equipped, laboratory facilities. The laboratory is accredited and is a member of the UK Genetic Testing Network.

You will have a good Degree in a Biological Science (minimum second class) with a significant genetics component, have experience of molecular techniques, and have a keen interest in medical human genetics. You will undertake a 2 year training scheme resulting in the award of the CMGS Certificate of Competence. Further training will then be provided to prepare you for state registration, after 4 years.

For further information, please contact Dr Gareth Cross or Dr Abid Sharif on 0115 962 7743.

From 1 April 2006, Queen's Medical Centre will merge with Nottingham City Hospital and become part of the Nottingham University Hospitals NHS Trust. As a result, some services may relocate from one site to the other.

More information at hospital website

Make your mark in a global world.

**Global Chemical Food Safety Manager**  
c.£38,000 • Slough, Berks

Mars leads the way when it comes to both food safety management and product and process development. And we intend to stay there - with your help. By identifying and initiating new research opportunities with global counterparts, you'll play a pivotal role in ensuring we give our consumers the high-quality products that they know, love and expect. And along the way we'll help you create your own sterling reputation to match.

Your proven ability to network across the scientific community will drive the development and delivery of our Food Safety Strategy and can only add gravitas to your external recognition as an expert in your field. Teaming your Chemistry, Toxicology or related subject degree with an impressive track record in Research & Development (which may include time completing a PhD), you'll create a reputation for yourself that is second-to-none. Ideally, that experience will have been gained in a business environment and cover aspects of risk assessment. To find out more or apply, go to [www.rd-mars.com](http://www.rd-mars.com)

Mars  
[2572-031 (2006) : 73]
Present in over 110 countries, with a total staff of nearly 4000, Ipsen recorded sales close to €800 million in 2004. The Group develops products in three targeted therapeutic areas: oncology, endocrinology, and neuromuscular disorders and is also engaged in developing certain biological-derived products. Ipsen's internet website is [www.ipsen.com](http://www.ipsen.com).

Ipsen have recently invested £4.5 million into a new "state of the art" laboratory facility at the Wrexham site. We manufacture sterile freeze dried products in accordance with FDA/MHRA regulations. We are now looking to recruit for the following positions within the Biologics Manufacturing Support and Technology (BMST) Team:

**Senior Technical Specialist**

Competitive Package

A self motivated, proactive individual is required to work within this team providing senior technical support and expertise.

You will have a significant scientific input to BMST projects as required and will be responsible for the delivery of assigned projects, including obtaining, maintaining and providing state-of-the-art knowledge for biological technology. You will also be required to work with the Quality function, providing technical support to ensure a consistently high quality product in line with cGMP and QC. You must possess excellent scientific and technical skills in relation to the theory and application of technology such as freeze drying within biological product manufacture. You will also need the ability to prepare and evaluate documents and scientific data. The successful applicant will be required to have pertinent qualifications and a minimum of three years' in a similar role.

**Senior Development Technologist** and **Development Technologist**

Competitive Package

An enthusiastic and innovative individual is required to fill this role working for the Technical Services Manager.

You will be expected to create and execute analytical protocols, be a technical expert in stability, assay methodologies and techniques or biological manufacturing technologies. You must be able to lead and participate in site and technical projects and possess good communication skills to assist in developing a number of Technologists. You must have at least three years experience in a laboratory environment which will include HPLC, ELISA, Western Blot and SDS PAGE assay testing and be educated to degree level.

To apply, please send your full CV stating current salary and benefits package, to The HR Department, Ipsen Biopharm Ltd, Ash Road, Wrexham Industrial Estate, Wrexham LL13 9UF or alternatively email your application to: wrexham.recruitment@ipsen.com

Closing Date: 13 October 2006.

Complex devices require dedicated people

Bespak is a global leader in the manufacture of specialty medical devices, developing delivery systems for the pharmaceutical industry and airway management products for critical care settings. We have an unrivalled ability to take devices safely to market.

Site Quality Assurance Manager
Leading a team of 15 Quality Professionals, the successful candidate will have extensive experience of Quality Assurance in either medical devices or pharmaceutical manufacture.

A competent host for customer and regulatory audits, you will be familiar with CAPA, change control, validation and quality improvement systems.

Based in Milton Keynes you will receive a comprehensive benefits package including a basic salary of up to £40K, management bonus opportunity and a car cash allowance in addition to the benefits detailed at the bottom of this advertisement.

Quality Engineers
Due to significant growth we now require several Quality Engineers. The successful candidates will possess solid skills and experience in quality systems, MSA, risk assessment (FMEAS), statistical analysis, APQP and control plans. You will also have demonstrable experience of NPI and technology transfer, design control, Six Sigma and an understanding of validation within a regulated environment. Ideally degree qualified you will have a background in either science or engineering (although we will consider candidates with other extensive experience).

Positions are available at both our Milton Keynes and King's Lynn facilities. We offer a very competitive basic salary of circa £33K and great prospects for development and progression.

All of these roles come with many additional benefits including profit share, private health insurance, SAYE schemes, non-contributory pension, life assurance and 28 days paid holiday plus bank holidays.

To apply for any of these roles please send a CV and covering letter quoting reference NS-2909 to Emma Harrison, HR Advisor, Human Resources, Bespak plc, Bergen Way, King’s Lynn, Norfolk, PE30 2JJ or email us at human.resources@bespak.com

[2572-037 (2006) : 76]
Astex Therapeutics is a world-leading UK based biotechnology company using an innovative fragment-based drug discovery platform to discover and develop medicines in areas of unmet medical need. Astex has successfully progressed its first two oncology compounds into clinical trials and has further programs progressing through preclinical development. All of the products we are developing have been discovered at Astex by our own scientists through the use of our own proprietary technologies. Astex also has significant research collaborations with some of the world's largest pharmaceutical companies.

As a result of this continued success in our drug discovery programmes we are now seeking scientists to join our Assay Biology and Chemistry Departments.

**Assay Biologist** (ref: B-10ns)
A position is available within our assay biology group to support a range of projects, principally in the oncology area. The role will involve the running of enzyme-based screening assays to support compound testing. Candidates should be educated to degree level in a biology or chemistry related subject or have equivalent industrial experience. Some previous lab experience and knowledge of enzyme assays and screening formats would be an advantage, but full training will be provided.

**Laboratory-Based PhD and Graduate Medicinal Chemists** (ref: MC-08ns)
The chemistry department utilizes the latest synthesis, analytical and purification methodology closely integrated with pharmacology, computational chemistry and extensive structural biology expertise.

Positions are available immediately for experienced medicinal chemists to join our dynamic chemistry department. Potential candidates are likely to have at least two years industrial medicinal chemistry experience and will be ambitious to develop their careers in an exciting laboratory-based multidisciplinary role. A strong interest and ideally some experience in structure-based drug design would be advantageous.

The salary and benefits package will be highly competitive.

Please send your application, quoting the relevant reference, to Personnel, Astex Therapeutics Ltd, 436 Cambridge Science Park, Milton Road, Cambridge, CB4 0QA, UK. Tel: +44 (0)1223 226200
E-mail: info@astex-therapeutics.com.

[2572-038 (2006) : 76]
FISHERIES RESEARCH SERVICES

MARINE ECOCLOGICAL MODELLER
Fisheries Research Services (FRS) provide expert scientific and technical advice on marine and freshwater fisheries, aquaculture, and the protection of the aquatic environment and its wildlife. We have an opportunity for an experienced Ecological Modeller. You will analyse a wide range of marine biological data sets to develop process orientated computer simulation models that will be used to provide the scientific basis for advice underpinning an ecosystem approach to fisheries management. The results of this work will be reported in scientific literature and at scientific conferences and working groups where the outcome of the modelling work will be translated into practical advice for managers.

With a minimum of three years postgraduate experience in the use of mathematical modelling, you will possess a degree in Mathematics or a Physics related subject. Alternatively, you will have a degree in a biological subject, but with evidence of a strong, high-level, mathematical component. You will demonstrate strong computational ability, including working knowledge of a high level programming language. You will have excellent database, statistical and numeric skills and be able to collate and evaluate information from diverse sources to formulate required models. You will need to be innovative and be experienced in exploiting diverse sources of information to solve problems. You must possess excellent written and verbal communication skills, as you will provide easily understood information from complex situations. You will co-operate with colleagues at all levels, sharing knowledge and experience where appropriate. Regular travel is part of this post, as is the need to undertake fieldwork for periods of up to 4 weeks on board Fisheries Research Vessels. Previous sea-going experience would be advantageous.

The starting salary for this permanent post is £21,292 per annum. Salary is performance related, offering progression to a maximum of £27,640 and bonuses to high achievers. The Civil Service offers a choice of final salary and stakeholder pension, giving you the flexibility to choose the pension that suits you best.

For further details and an application form contact: Human Resources on 01224 295668 or by emailing HR@marlab.ac.uk The closing date for all applications is 3rd November 2006.

Fisheries Research Services is an Agency of the Scottish Executive. We welcome applications from all suitably qualified individuals and aim to employ a diverse workforce which reflects the people of Scotland.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
378114
[2572-039 (2006) : 76]
Help us solve one of the biggest environmental challenges facing the UK.

In a move towards greater transparency and accountability in the long-term management of radioactive materials, Nirex became independent from the nuclear industry in April 2005. Our work involves researching safe, environmentally sound and publicly acceptable solutions in the UK. This involves extensive international collaboration.

The UK has been generating radioactive waste since the 1950s and has accumulated a large volume, some of which will remain hazardous for tens of thousands of years. Even without additional nuclear reactors, that amounts to about 460,000m³. Nirex sets the standards and specifications for packaging that waste and is responsible for delivering solutions to complex and long-lasting environmental problems.

After over 20 years of research, we've determined that the best option is the Phased Geological Repository Concept. However, the long-term management of the wastes raises as many social and ethical questions as scientific and technical ones. These questions can only be answered through extensive public consultation and engagement. We promote an open and transparent culture where communication is vital and individual contributions are valued and shared.

The Government's Committee on Radioactive Waste Management (CoRWM) has recently recommended geological disposal as the best option for dealing with this waste. We are now looking to add to our already world-class expertise.

**Package Assessment Manager**
Your expertise will ensure that the packaged wastes will meet every requirement for long-term management in a geological repository. You'll work with external partners to make certain that their waste packaging strategies have a long-term outlook, commission multi-disciplinary assessments and make sure they are well managed. We'll also expect you to communicate your findings to stakeholders including the general public. In addition to a degree in engineering or a physical science, you'll have an extensive background in radioactive materials, waste production processes and waste management, gained in the nuclear industry.

**Performance Assessment Specialist**
You'll develop the post-closure performance assessment models for high level waste and spent fuel and play a leading role in writing our safety cases. You enjoy developing and applying new mathematical models and presenting your conclusions to a diverse range of audiences. Alongside a degree in a physical science or mathematics you have current knowledge of trends in numerical methods, including the treatment of uncertainty.

**Materials/Physical Scientist - Corrosion**
You'll drive crucial research on the corrosion of stainless steel and other metals used in our containers, and present in wastes. From the start, you'll determine areas for exploration and oversee a multi-disciplinary programme that encompasses both desk and laboratory research. Evaluating compliance on corrosion matters, you'll provide expert advice on the impact of corrosion on gas generation, the physical evolution of encapsulated waste and the integrity of the waste containers. You'll bring to this role a relevant degree preferably combined with a background in radioactive materials.

**Materials/Physical Scientist - Cement Chemistry**
Looking carefully at our research needs, you'll manage an interdisciplinary programme focused on wasteform evolution issues to support the viability of geological disposal of intermediate level wastes. You'll provide expert advice on the immobilisation of wastes including the behaviour of cement-based and other encapsulation matrices and the evolution of the immobilised wastes. You'll also work closely with our Assessments Department to improve the treatment of wasteform properties in deep geological repositories. For these challenges, you should combine a degree in materials sciences or chemistry with a background in cement chemistry.

4173
**Materials/Physical Scientist - Ceramics and Glass**
Alongside providing expert advice and data on the evolution of high level waste and spent fuel under repository conditions, you'll define the future research needs and work with interested parties to develop a programme. You'll also work with stakeholders to offer guidance on long-term management issues concerning spent fuel and separated stocks of uranium and plutonium. To join us, you should combine a degree in materials or physical science with expertise in ceramics and glass.

**Geoscientist/Geochemist**
As a recognised expert in the geoscience or radioactive waste community, you'll define and manage our investigations into the behaviour of radionuclides within the geosphere and the surface environment over timescales of hundreds of thousands of years. What's more, you'll gain an international overview of current research and publish your findings. We're looking for a geoscientist, preferably with a post graduate qualification in geochemistry.

If you're ready to join an organisation where the best science is based on open communication, please forward your CV and covering letter to recruitment@nirex.co.uk Or call +44(0) 1235 825252 or fax +44(0) 1235 825598. You may post your details to Recruitment Administrator, UK Nirex Limited, Curie Avenue, Harwell, Didcot, Oxon OX11 0RH. For further information go to www.nirex.co.uk

Benefits as follows:
- Competitive salaries
- Final salary pension scheme
- Relocation package
- Private healthcare
- Extensive training
- Professional development support

www.nirex.co.uk

To be considered for employment you must be eligible to reside and work in the UK and you should be aware that appointments to all vacancies will be subject to the granting of a UK Security Clearance.

Nirex is an equal opportunities employer.

YORK from £22,370pa

**RISK ANALYST: WITH STATISTICS & MODELLING**

**BAND 4 REF: CSP 3074 PERMANENT**

A Risk Analyst is required to carry out risk assessments using a range of statistical and mathematical techniques and contribute to the development of new approaches at CSL. The assessments will estimate levels of risk to human health and the environment from chemicals and other stressors and will include quantification of variability and uncertainty. The post holder will be required to work closely with scientists in food science, chemistry & ecology and with other modellers, statisticians and computing staff. The post holder will also contribute to meetings with internal and external customers and produce scientific papers, reports and presentations.

A degree (preferably first or second class) in Statistics, Mathematics or Science with substantial course units in statistics/mathematics or an equivalent qualification is required. Candidates without this level of qualification would need a minimum of three years relevant experience. In addition you will have experience of applying statistics and/or mathematics to practical problems and producing technical reports, plus a real interest in contributing to the scientific evaluation of risk and uncertainty in issues concerning the environment and food safety. An effective communicator, team player, who is able to learn new skills rapidly and understand questions about risk and propose appropriate modelling approaches to address them. Closing date for applications is 25 October 2006.

YORK from £17,696pa

**SOIL SCIENTIST**

**BAND 3 REF: CSP 3073 ONE YEAR FIXED TERM APPOINTMENT**

(with possibility of extension or permanency)

The purpose of this role is to complete work on a Defra funded project investigating the behaviour of ionic pesticides in soil. The successful candidate will plan and conduct experiments into the sorption, degradation and leaching of pesticides and undertake mathematical modelling and statistical analysis to explore implications for the environmental fate of pesticides. You will also assist in the preparation of the final project report and help present the findings of this project at external meetings and at an international conference.

A degree or equivalent level qualification in a science-based subject (preferably in an environmental, geographical or hydrological discipline) is required. Candidates without this level of qualification will need at least three years relevant experience. You will also have previous experience of working in soil science and knowledge of the fate and behaviour of chemicals in soil. Well organised and an effective communicator who is able to liaise with internal and external customers and present technical information.

Closing date for applications is 18 October 2006.

CSL®

Science Serving Agriculture, Food and the Environment

The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra). The Agency provides policy advice and technical support underpinned by high quality R&D to help Defra and other customers safeguard food supplies, protect consumers and the environment.

For an application pack call 01904 462302 or email jobs@csl.gov.uk.

Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk.

CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.

[2572-041 (2006) : 78]
Unipath is the world's leading women's healthcare diagnostic company. Unipath researches, develops and manufactures its products at a purpose built factory in Bedford, which employs over 500 people.

Bioprocess Technologist
A new position of Bioprocess Technologist exists within our Projects/Production Support Team.

Reporting to the Projects Manager, you will be primarily involved in improvement and cost-saving activities, supporting the Operations technical bioprocess functions. These include antibody sensitisation and processing of colloidal particle suspensions, production scale reagent manufacture and general wet chemistry functions.

Working in close collaboration with a laboratory based production team, this will include the development and validation of new bio-process systems, improvement and scale-up of existing processes and the investigation of technical process/product failure and customer complaints related to bioprocess systems.

The successful candidate will have the following:
• Proven expertise and experience in the development and improvement of bioprocess systems, including process validation.
• Experience of fluid dynamics and the handling and processing of fine particle colloidal suspensions.
• Proven troubleshooting and problem solving skills within a relevant bioprocess environment.
• High level of self-discipline and drive needed to tackle a wide variety of tasks, with frequent priority changes, and an ability to work with minimal supervision. Excellent verbal and written communication skills.

Ideally, you should be educated to degree level in the field of chemical engineering or a related science based discipline. Working knowledge of immunodiagnostic systems is desirable, as is previous experience within a related manufacturing environment.

Applicants must be eligible to work in the UK.

Closing Date: 20th October 2006

To apply, please call the recruitment line on 07234 835238 or send a full CV, stating your current salary to: HR Department, Unipath, Priory Business Park, Bedford MK44 3UP. Email: human.resources@unipath.com
The Smith Institute for Industrial Mathematics and System Engineering invites applications for the full-time position of Technology Translator.

The Smith Institute is a national organisation enabling industry to derive commercial value from mathematics. It has a mixed portfolio of private and public sector business, and manages the recently established Knowledge Transfer Network for Industrial Mathematics (www.industrialmaths.net).

The successful applicant will join the team at the very centre of the Institute's activities. He or she will work alongside companies, other intermediate organisations and university departments to create collaborations that exploit the commercial potential of the mathematical sciences across a diverse range of business sectors.

Applicants must be motivated by the prospect of expanding the industrial use of mathematics on a national scale. They must have a strong academic background, including a higher degree in a relevant discipline, and several years' experience working with business requirements for research and knowledge transfer.

Please send a full CV, including the names and addresses of three referees (of whom at least one must be industrial and one academic) to:

Gillian Hoyle, Smith Institute, Surrey Technology Centre Surrey Research Park, Guildford, Surrey GU2 7YG

Further details are available from the same address or via email to office@smithinst.co.uk
The closing date for applications is 20th October 2006.

Take firm action on the environment.

Here at the Environment Agency, we not only share your passion for the environment. We also understand your commitment to the importance of the scientific disciplines. After all, research informs everything we do - from the tools and techniques we use on the ground, through to the expert advice we give to government and the public.

Each year, we work collaboratively with other major agencies to set the agenda on key issues. Climate change, flood risk and threats to human health are just three examples. Our impact is felt not just in England and Wales - where we're the lead government agency in the field – but right around the world.

Programme Managers
Bristol • c£45,000
• Environment & Human Health
• Flood Risk Science
• Tools & Techniques/Breakthrough

These are roles for leaders and influencers who are able to manage people and oversee projects that can range in value from £500,000 to several million pounds. You'll work closely with partner organisations to maximise the potential and value of our programmes. Ref: 11630

Science Managers
Bristol • c£45,000
• Waste Resources & Technology
• Horizon Scanning & Technology
• Monitoring & Data Development

A scientific specialist who's respected in your field, you may currently be working in government, a regulatory body, academia or industry. You're committed to your discipline and keen to apply your knowledge in a real-world environment. Ref: 11629

It's time for action. Work for what you wish for.

To discover more about the specific roles on offer, simply visit www.ea-science.co.uk

If you do not have internet access please call Debbie Woodall on 01925 542355 for an application pack quoting the appropriate reference. Closing date: 20 October 2006.

fact: Clean, green, open spaces - we believe everyone, everywhere should have access to them. It's not just good for health; it improves your mood too. That’s why it's something we're actively championing. [2572-044 (2006) : 79]
ASSISTANT EDITORS (Ref: BMC/AE)
BioMed Central requires two Assistant Editors to work on a range of biomedical journals. The key task is to provide a high quality and objective peer review service through liaison with reviewers, editorial boards and authors. In addition, the role involves database management, and liaison with internal production and marketing departments. This role would suit a biomedical graduate looking to begin a career in publishing. Applicants must have excellent verbal and written communication skills, and good attention to detail. Computer literacy and strong administrative and organisational skills are required.

DATABASE EDITORIAL ASSISTANT (Ref: CCT/DEA)
Current Controlled Trials Ltd, an online publisher providing trial hosting and numbering services, seeks a Database Editorial Assistant to maintain the content of its databases. The role will involve record editing, database administration and customer liaison. The successful applicant will be a life science graduate looking for a first job in a publishing environment, ideally with some experience of database work and data management. Computer literacy, attention to detail and a methodical approach are essential.

Please send your CV and covering letter quoting reference, explaining briefly your interest in the post, when you would be able to start, and stating salary expectations to: Recruitment, SNG, 34-42 Cleveland Street, London W1T 4LB, or by email to jobs@sciencenow.com.

Closing date: 13/10/06.

[2572-045 (2006) : 80]
HEAD, VIRUS SURVEILLANCE UNIT
Ref 01/10/06

A veterinary virologist is required at the Moredun Research Institute to lead the Virus Surveillance Unit and to contribute to research on endemic viral diseases. The VSU monitors Scottish livestock and wildlife for the presence of viral diseases of economic, ecological and zoonotic importance. The VSU and the Moredun Pathology Group work in collaboration with the Scottish Agricultural College Veterinary Services to measure the incidence and distribution of known endemic virus diseases and investigate new disease syndromes. The work of the Unit conforms to ISO9001 and is integrated into the internationally recognised research work of Moredun. The successful candidate will be encouraged to develop relevant research interests on endemic viral disease and will have a veterinary degree, a PhD in virology and preferably experience of investigating animal disease outbreaks in the field. Experience in acquiring external funding is essential and an interest in viral epidemiology desirable. Collaboration with other national and international surveillance organisations will be expected.

This post is available from January 2007. The salary is dependent on experience and will be within the range £27,584 - £40,547 (pay award pending).

Excellent employee benefits are also available.

For application details and further particulars, please visit: www.moredun.org.uk or telephone +44 (0) 131 445 5111. Closing date 23rd October 2006.

NPL
National Physical Laboratory

**Physicist – Quantum Standards**
Cambridge & Teddington, Middx

ELECTRON MANIPULATION

NPL is the UK's national standards laboratory, carrying out fundamental research and developing measurement technologies, vital to improving quality of life, trade competitiveness, and protecting the environment.

A practical and innovative physicist is sought to work in group environments, averaging four days per week in the Cavendish Laboratory Cambridge and the remainder of the time in NPL Teddington, to develop novel metrological applications based on the manipulation of single electrons in nanoelectronic devices.

The successful candidate will ideally hold a PhD or similar level experience in physics or engineering and be interested in both basic and applied research. Relevant experience in low temperature systems, nanoscale devices, LabVIEW and electronics would be a distinct advantage.

Aspects of this role will include, the investigation of single electron transport and single photon generation in SAW driven nanostructures. Contributing to the development of quantum standard for electrical current and a single photon source for quantum communication. Development and implementation of measurement strategies and dissemination of results. Leading the deployment of quantum standards in the delivery of measurement capability to industry. Networking closely with collaborators whilst leading the development and implementation of measurement strategies.

Marine Data Scientists
BODC
British Oceanographic Data Centre
NATURAL ENVIRONMENT RESEARCH COUNCIL

Liverpool
£18,030 - £25,200

The British Oceanographic Data Centre (BODC) a component of the Natural Environment Research Council, has an equal opportunities policy and welcomes applicants from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome.

INVESTOR IN PEOPLE
POSITIVE ABOUT DISABLED PEOPLE
British Oceanographic Data Centre
NATURAL ENVIRONMENT RESEARCH COUNCIL

The British Oceanographic Data Centre is part of a worldwide network of oceanographic data centres geared to support global, regional and climate-related studies of the world's oceans. We play a key role in the UK's marine research programme and have an international reputation for managing data from large-scale field experiments and for developing innovative data products.

We are seeking bright, computer-literate scientists willing to take on the challenge of assembling highly diverse and complex data sets from measurements collected by research communities spread across laboratories within the UK and abroad.

You will be involved with the data from one or more national/international projects-for which we are the designated Project Data Centre - including a project with international focus to understand interactions between the atmosphere and oceans (UK SOLAS); the UK Argo programme; the newly established Liverpool Bay Observatory; making available metocean data collected by the offshore industry; and The Proudman Oceanographic Laboratory Science Programmes.

With a good honours degree and/or a higher degree, preferably in marine science, a physical science or a related subject, you will have highly-developed computing skills and good communication skills. Good planning and problem-solving skills are highly desirable, as is relevant post-graduate experience in handling scientific data. Project management experience would be an advantage.

The starting salary will be in the range of £18,030 to £25,200 depending on skills, qualifications and experience and your appointment will be for three years with the possibility of extension. We also offer a contributory final salary pension scheme, a generous annual leave allowance and an excellent working environment. You will be part of a friendly and dynamic team.

For further details and an application form, please contact Mr Paul McGarrigle, BODC, Joseph Proudman Building, 6 Brownlow Street, Liverpool L3 5DA. Tel: 0151 795 4872. Email: pamcg@bodc.ac.uk. Alternatively, you can visit our website at www.bodc.ac.uk. The closing date for completed applications is 27th October 2006.

[2572-052 (2006) : 81]
Merck Sharp & Dohme Limited (MSD) is a wholly owned subsidiary of Merck & Co., Inc, one of the world's leading pharmaceutical manufacturers with a global presence and over 60,000 employees worldwide. The Cramlington plant in the North East of England is looking to recruit Laboratory Analysts for its European Stability Unit.

**Laboratory Analysts**

£ negotiable

The European Stability Unit is a centre of excellence for the Stability testing of Merck products packaged at sites across the world. Many different formulations are tested using both modern and classical analytical techniques. Working in a team of analysts, the post holder will have responsibility for finished product testing to pre-determined quality standards to meet customer requirements, whilst maintaining the highest level of compliance. An in-depth knowledge of laboratory systems and pharmaceutical regulatory compliance requirements, coupled with a strong capability for investigative report writing is essential for this role. Experience of analytical method development and troubleshooting would be a benefit.

Potential applicants must have a minimum of HNC/HND in a scientific discipline (or equivalent experience) and will have already worked in a pharmaceutical or highly regulated laboratory. With a continuous improvement mindset, the successful candidates will be able to demonstrate their ability to work in an empowered environment. We are looking for team players with innovative ideas, who are compliance and customer focused.

If you are ambitious and wish to further your technical or managerial career with a world class company, we are very interested in hearing from you.

We offer a highly competitive benefits package including final salary pension scheme, annual performance and Christmas bonuses, private health insurance, life assurance and flexible working practices.

To apply, please send us a c.v. with a covering letter detailing your qualifications, experience and current salary to: msdukcramlington@merck.com or Human Resources Team, Merck Sharp & Dohme Limited, Shotton Lane, Cramlington, Northumberland, NE23 3JU. No agencies please

Closing date: 27th October 2006.

wellcome trust

BUSINESS ANALYST / SENIOR BUSINESS ANALYST

The Wellcome Trust is one of the world's largest medical research charities with the mission of fostering and promoting research with the aim of improving human and animal health. The Technology Transfer Division maximises the impact of this research on health through the development of innovations to the point at which they can be further developed by the market. To do this, Tech Transfer manages funds for translation projects across the spectrum of biomedical science.

Achievements to date include product launches, company IPOs and transactions with multi-nationals. In excess of £60m has been raised in co- or follow-on investment.

As a result of expansion in funds Tech Transfer is seeking to appoint a Business Analyst or in the case of an exceptional candidate, Senior Business Analyst. The role will require you to work as part of a team promoting Tech Transfer's translation activities and be responsible for undertaking due diligence of proposals, evaluating their anticipated commercial exits and project managing the Trusts interests in key projects. You will use databases, business/scientific media and a network of internal and external scientific experts to support your analyses and you will become involved in intellectual property management and transaction negotiation.

Business Analysts should have a strong scientific background and possess industry experience in the life science sector engaged in the process of evaluating and funding science projects. You should possess a PhD in the biomedical or physical sciences with at least 2 years' postdoctoral research experience. A Senior Business Analyst will have additional in-depth experience with patent prosecution and/or contract negotiation. You need to have good interpersonal and communication skills and be capable of working both independently and as part of a team. This is a demanding role, you need to be able to engage in critical analyses of applied research projects, manage complex stakeholder situations and possess a creative approach to problem solving. You must demonstrate an enthusiasm for delivering healthcare outcomes.

For more details visit: www.wellcome.ac.uk

To apply, please send a full CV, along with a covering letter, outlining your current salary package and indicating how you meet the above criteria to Human Resources, Wellcome Trust, 215 Euston Road, London NW1 2BE or to hr@wellcome.ac.uk

Application deadline: Friday 13 October 2006.

TrusTECH ®
The North West NHS Innovation Hub

TrusTECH, is part of the National NHS Innovation Hub network. It works with NHS Trusts throughout Greater Manchester, Cheshire, Cumbria, Lancashire and Merseyside to manage innovations and their intellectual property arising from all areas of healthcare provision.

It provides advice and assistance on subjects including intellectual property protection, business development, commercial negotiation, market research and funding opportunities to doctors, nurses, therapists and administrative staff, together with business consultancy services to the wider healthcare industry.

TrusTECH is based in the Innovation Unit at CMMC NHS Trust – a recognised centre of excellence – where we now need the following professionals to join us.

**Business Development Manager - TrusTECH**
Band 8a £35,232 - £42,278  Ref: COR573
You will assist TrusTECH in delivering a customer-focused and expert innovation management service. Primarily securing and subsequently delivering high-quality consultancy projects with the rest of the TrusTECH team, you will also contribute to marketing and promoting TrusTECH nationally.

You will be a graduate or equivalent with experience of business planning, innovation and IP management, preferably in a healthcare technology related field.

This is a newly-created position, in which you will find the freedom not only to shape your role, but also the opportunity to influence TrusTECH’s future success.

**Project Director/Business Development Manager - Medilink NorthWest (NW)**
Band 8a £35,232 - £42,278  Ref: COR574
Establishing Medilink NW as a viable business will be your goal. Initially by working with an advisory group from a cross-section of the medical device and healthcare technology community in the North West, you will create and implement a business plan to assist and develop the medical device and healthcare Industry.

Degree-educated or equivalent with either an MBA or demonstrable practical experience in business development, you must have a knowledge of the medical device and healthcare sector, be self-motivated and have strong leadership and interpersonal skills, since you will be interfacing at all levels. Excellent presentation and IT skills are also essential.

**Business Development Manager - ACTNoW Clinical Trials and Database Service**
Band 8a £35,232 - £42,278  Ref: COR572
ACTNoW is a web-based information service for clinical trials, acting as a link between the NHS, the healthcare Industry and patients.

Your role here will be to ensure that ACTNoW provides a professional, responsive and commercially-focused service.

In short, you will contribute to the future success of the business.
You should be a graduate with a PhD, MBA or significant commercial experience in healthcare and/or clinical trials. In addition to technical knowledge, you will also have the business acumen and tenacity to make sure this ambitious venture succeeds.

**Healthcare Technology Manager**
Band 6 £22,886 - £31,004 (under review) Ref: COR575
Your role will be to raise awareness and build capability among local NHS trusts to exploit innovative technologies and services. Reviewing, appraising and developing healthcare innovations from NHS trusts in Greater Manchester and Cheshire with commercial partners will also be integral.

This is a challenging role, requiring you to be persistent, driven and constantly seeking opportunities. As well as a relevant degree or equivalent, you must also have some experience of innovation and IP management, preferably in a healthcare technology-related field.

**Market Research Manager**
Band 6 £22,886 - £31,004 (under review) Ref: COR521
Responsible for researching medical and scientific markets, you will develop TrusTECH's central database of technology and client-related information and contribute to decision making processes for internal and external clients.

With a science or marketing degree or equivalent, you will also have proven experience in market research, preferably in healthcare technology.

You must be focused, driven to succeed and constantly looking for new opportunities. Moreover, you will need to be comfortable working to tight deadlines and your interpersonal and communication skills should be nothing short of excellent.

Whichever role you take, this is a very good time to be joining us: we are expanding very quickly, and we can offer outstanding career opportunities.

For an informal discussion please contact Bridget Liddle on 0161 276 5764, bridget.liddle@cmmc.nhs.uk

Apply online or call the Recruitment Office on 0161 276 6666 for an application form. Please quote the relevant reference number.

Closing date: 12th October 2006.

We are an equal opportunities employer.
We welcome applications on a full or part time basis.

An exciting opportunity in a stimulating and innovative environment

In Vivo Scientist
European R&D Headquarters – Sandwich, Kent

If you’re an experienced and enthusiastic in vivo scientist with a degree in pharmacology, physiology or a similar biology-based discipline, this is an excellent career opportunity. You’ll join our biomarkers and translational biology group, using your in vivo experience to develop new therapies for treating human diseases.

Team-spirited and ideally with a Home Office licence, you will use your skills to develop experimental techniques that can be used as surrogates for biological activity in humans. Liaising with other experts in our global network of scientists, you will be contributing to the development of life-saving drugs to improve the future health and quality of life for millions of people worldwide.

As a global market leader in human health, we provide an exciting and stimulating working environment, with state-of-the-art laboratories, and the kind of rewards you’d expect from a world-leading pharmaceutical company.

Our European R&D headquarters are based near the beautiful East Kent coast, with direct transport links to both London and continental Europe.

For further details and to apply, please visit www.pfizer.co.uk quoting job requisition number 060383.

OPPORTUNITIES AT THE CENTRAL LASER FACILITY

The Central Laser Facility, located at the CCLRC Rutherford Appleton Laboratory, United Kingdom, is one of the world's leading centres for scientific research using high power lasers. Its two large scale systems - the Vulcan Nd:glass facility and the Astra Titanium Sapphire facility are used by a wide range of UK, European and international scientists for fundamental and applied research. Further details can be found at www.clf.rl.ac.uk. The CCLRC has recently announced a number of major investment programmes in both of these facilities (details on website) and consequently the CLF is currently recruiting to five positions as detailed below.

Vulcan 10 PetaWatt Project
This is a two-phase multi-million pound project to develop a 10 PW (10^23 Wcm^-2) interaction capability on the Vulcan laser facility. This will be based upon the Optical Parametric Chirped Pulse Amplification (OPCPA) technique which the CLF has pioneered. Full details are on the CLF website. Three positions are available:

2 fixed term (2 years duration) laser/experimental scientist positions are available to work directly on Phase 1 of this project. Ideal candidates would be independently minded, innovative in approach and possess excellent experimental skills. Experience of high power lasers, non-linear optics and/or the OPCPA technique is ideally needed. Evidence for the handling (generation, amplification, measurement etc) of ultra-short laser pulses would also be an advantage. (Reference Number FBU049).

One permanent position exists for a laser scientist to work as part of the Vulcan team to contribute to the successful operation, maintenance and enhancement of the capabilities of the system. The successful candidate will work on supporting the user programme through facility operations and on developing the facility to improve its performance, including but not limited to, the multi-Petawatt regime. Candidates would ideally have background in the physical sciences, possess excellent interpersonal skills and show evidence of practical experience in designing or building laser systems. (Reference Number FBU001R).

Astra-Artemis Project
This is a multi-partner (CCLRC, Diamond Light Source, Imperial College and Oxford University), multi-disciplinary project to develop a facility based on high repetition rate, few optical cycle tuneable laser sources - one of which will be used to produce ultra-fast XUV pulses through high harmonic generation. These synchronised sources will then be coupled to a number of beam-lines with target stations for materials science, surface science and atomic and molecular physics and chemistry. The aim is to combine frontier femtosecond optical and synchrotron technologies and enable new science in the emerging field of ultrafast x-rays. Future application to attosecond phenomena is envisaged. The following position exists to work directly on this project.

One fixed term (2 years duration) experimental scientist required to work as part of a team developing the XUV beamlines and target stations, and carrying out commissioning experiments on this exciting new facility. You will be responsible for designing part of the XUV beamline and target station(s). Candidates would be expected to have experience of one area of the envisaged XUV/VUV science programme (materials, surface, physics, chemistry etc) and/or techniques such as time and angle resolved photoemission or quantum control. Candidates must possess excellent experimental and interpersonal skills and be familiar with the techniques and technology of science using ultra-high vacuum (10^-10 torr). (Reference Number FBU050).

Astra Advanced Probes Project
This project is to develop two state of the art probe capabilities for Astra TA2 and the Astra Gemini system (see website). The ultrafast probes, one designed for 800/400 nm, 10 fs operation and the other widely tuneable at 30 - 50 fs will add a unique capability to the suite of Astra plasma physics diagnostics. The following position exists:
One fixed term (2 years duration) laser/experimental scientist position is available. Candidates would ideally have previous experience of ultra-fast laser technology, including nonlinear optics, coupled with a good knowledge of laser-plasma physics. The role would be to develop, commission and exploit these probes, working with our user community. (Reference Number FBU048).

In addition to the core functions described above, all appointees will be encouraged to pursue their own personal research interests for some agreed fraction of their time.

Appointments will be in the salary range £24,638 - £35,543, dependent on experience. An excellent index linked pension scheme, generous leave allowance and comprehensive training opportunities (conferences, courses etc) are also offered.

Candidates, as a minimum, will be expected to hold a recent PhD in a relevant subject or possess a degree in a physical science with a minimum of 4 years' relevant postgraduate experience. More experienced candidates will be expected to have, in addition to the above, several years post doctoral experience at an appropriate level with a proven track record in the relevant experimental science area.

Potential candidates can informally discuss these positions with Dr. John Collier by email at j.collier@rl.ac.uk or phoning +44 (0)1235 446728.

Application forms can be obtained from our website at www.cclrc.ac.uk following the links to the vacancies page. Alternatively, you may wish to contact us by email at recruitment-FBU@rl.ac.uk or phoning +44 (0)1235 446677 (24 hour answer phone) quoting the relevant reference numbers above.

For more detailed information about CCLRC please visit www.cclrc.ac.uk

Closing date for applications is 13 October 2006.

Interviews will be held late October 2006.

Here at Cmed we’re proud that we stand out from the clinical research services crowd. Our pioneering approach, leading-edge intelligent Data Acquisition and Management (iDAM) patented technology and processes allow us to deliver all encompassing solutions that provide real advantages to our clients.

We are seeking individuals to join our growing Clinical Data Management and Database Programming groups based in Horsham, West Sussex, to support “paper based” and “electronic data capture” clinical trials. Current opportunities include opportunities for new graduates with an interest in clinical development. For Clinical Data Management a life science degree is preferable and for Database Programming a BSc, BEng or MEng.

Good communication skills are essential for all positions as well as the ability to work effectively in teams.

We provide excellent training, personal development, career opportunities, international placements and a competitive package of salary, pension, private healthcare and other benefits.

Interested? For more information or to apply, please visit our website cmedresearch.com or contact Rosemary Murphy on +44 (0) 1403 755050 or email rmurphy@cmedresearch.com

Formulation Development Scientists
Innovative Business • Outstanding Potential

3m, a $21 billion global technology company, is continuously finding new ways to make amazing things happen. Inspired by working closely with our customers, we create innovative products that help make the world smarter, faster, healthier and safer. Well-known 3M brands include Scotch, Post-it, Scotchgard, Thinsulate and Scotch-Brite.

3M has pioneered innovation since 1902 and, today, invests more than $1 billion a year in research and development, helping to invent the future. With 69,000 people worldwide delivering more than 55,000 products and services to our customers in more than 200 countries, our diverse technologies touch nearly every aspect of modern life.

£Competitive Salary plus corporate benefit package -
Loughborough, UK

Based in the Formulation Group, you will support the development of inhalation products post feasibility through to product registration and transfer to commercial manufacturing.

You will actively participate in formulation and product optimisation studies, support to the manufacture of clinical supplies, design and management of stability studies, development and execution of experimental protocols, interpretation and reporting of product performance and stability data, development of product specifications and generation of documentation to support global regulatory submissions.

The positions require graduates in pharmaceutical sciences, pharmacy or chemistry/biology, with previous experience within a pharmaceutical development environment. Relevant experience of regulatory environments with respect to submissions and global regulatory guidance, and/or a working knowledge of statistics or advanced data analysis techniques are desirable.

For the post, you will combine good team working skills with the ability to act on your own initiative. Confident and computer literate, you will also be keen to advance your expertise and career within a company where your contribution will be valued and rewarded.

To apply for this position please email your CV and covering letter by Friday 20th October 2006 to lallen@mmm.com

Flowing success

Heavy Duty Development Team Leader

At BP we're dedicated to being innovative, green, progressive and performance driven. BP lubricants is a world leader – we trade in over 50 countries and have a turnover in excess of $4 billion. We're committed to continuing our growth and becoming the undisputed leader in global lubricants. By working across borders and regions and adopting world-class processes, we focus our people, technology and brands to achieve these growth aspirations.

Based in our Technology Centre at Pangbourne, you'll lead and inspire a team of technologists in developing new differentiated heavy-duty engine oils. As the primary technology interface between global lubricants technology and our marketing network, you'll liaise with supply chain on the optimization of cost of goods, and maintain strategic technical relationships with third party lubricants additive suppliers and OEMs.

With a degree or equivalent in a technical discipline, you'll use your expert knowledge and experience in engine oil development and related technologies to lead and successfully deliver complex development projects. Your strategic thinking will be bolstered with a good understanding of the interfaces and drivers between sales and marketing, supply chain and the technology of organizations.

To find out more please contact Imelda Wright on 0118 976 5279 and to apply, please send your CV to Imelda Wright, HR Manager, BP, The Technology Centre, Whitchurch Hill, Pangbourne RG8 7QR or email to imelda.wright@uk.bp.com

Closing date: 19 October 2006

If there’s a ‘Cooks Street’ and a ‘Mechanics Alley’, why can’t we have a road called ‘Salesperson Street’?

Who said cooks and mechanics were more important than salespeople? Certainly not us. In fact, we would be first to recognise the essential contribution that salespeople make to UK business.

Which is why we have created www.salestarget.co.uk. With 10,794* top sales jobs currently advertised, it is the UK’s leading SALES-ONLY recruitment site.

Dedicated to those who prefer the road to the garage.

SALES target.co.uk – sales jobs for sales people

Senior Study Administrator
MRC Grade Band 3: Salary £34,933 - £42,754 p.a.

The CTSU is one of the world's leading centres for research into the causes, prevention, and treatment of chronic diseases (such as cancer and heart disease) that are major causes of death. Currently, the unit is undertaking two large international collaborative projects in China of the environmental and genetic causes of common chronic disease. One is a large-scale prospective cohort study, aiming to recruit 500,000 participants over a period of 4-5 years, and the other is a large-scale case-control study of 20,000 MI/stroke patients and 10,000 controls from about 100 hospitals.

We are seeking an experienced person to join the team of epidemiologists, clinicians, administrators and computer programmers to help co-ordinate these two large projects collaborated between Oxford and two major medical institutes in China. The successful candidate will be responsible for taking over the role of overall project management in Oxford for the on-going prospective study that is currently taking place in 10 regions in China, and for the co-ordination of planning and development of systems and documentation for the case-control study of MI and stroke that will be starting during late 2007.

Candidates must have an advanced degree (or equivalent experience), and have at least 5 years' relevant experience in a medical research field. It would also be advantageous to have experience of working on an international, multi-centre trial or epidemiological study and to be familiar with various computing software packages and programming languages.

For details on how to apply please see http://www.ctsu.ox.ac.uk/jobs/ or contact the Admin Office on tel. (01885) 743867 or e-mail: recruit@ctsu.ox.ac.uk Please quote reference 06/27/ZC. The closing date for applications is the 16th October 2006.

The Science Technical Support Unit (STSU) provides a service to the Science Departments of London Metropolitan University and currently have two opportunities based in our brand new laboratories at our North Campus.

**Technician (Part-time)** Ref: B0920PN  
Salary £19,095 - £24,615 pro rata, per annum  
A Part-time Technician is required to provide a service to the Science Departments by providing practical class materials and technical support.

The member of staff will work as part of a team to help prepare practical materials and to set up and clear away after classes.  
A previous knowledge of laboratory work in addition to appropriate qualifications will be required. Knowledge of modern biological techniques and equipment will be an advantage.

**Technician (Physiology & Sport Science)** Ref: B0921PN  
Salary £24,615 - £30,786 per annum  
The postholder will be required to set up and maintain equipment and materials required in Sport Science and Physiology. A previous knowledge of this type of work will be required together with a good knowledge of computer interfaces, data logging and basic electronics. You will also be required to assist other members of the technical team in other areas.

The successful candidate will be expected to take an active part in the setting up of service in a new area.

In the first instance further details and an application form can be downloaded at [www.londonmet.ac.uk/vacancies](http://www.londonmet.ac.uk/vacancies) or e-mail [recruitment@londonmet.ac.uk](mailto:recruitment@londonmet.ac.uk) or write to London Metropolitan University, London City campus, Human Resources, 31 Jewry Street, London EC3N 2EY. Please quote the relevant reference number.

Closing date for applications is 19 October 2006

Please note we do not accept CVs.

RCUK Academic Fellowship Scheme
Grade 7/Academic 2 £26,402 to £31,525 per annum
or Grade 8/Academic 3 £32,471 to £36,546 per annum

The University of East Anglia has been awarded six Academic Fellowships within the 5* School of Environmental Sciences. The aim of the Fellowships is to promote high quality interdisciplinary environmental research and teaching, building on established major research groups and investments in the School. The Fellowships thus represent exciting opportunities to build careers in these areas and to provide a permanent academic position at the end of the initial five year contract. We are therefore looking for exceptional individuals with a high quality research record and a strong desire to build that existing foundation into an international research and teaching career. Details of the fellowship scheme can be found at [http://www.rcuk.ac.uk/acfellow](http://www.rcuk.ac.uk/acfellow). Specifically award recipients must have a PhD or be of postdoctoral standing.

The research areas in which the six fellowships are offered are given below with contact details for informal enquiries. Further details of the scientific scope of each fellowship are given in the further particulars [http://www.uea.ac.uk/env/vacancies.html](http://www.uea.ac.uk/env/vacancies.html)

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY
[2572-070 (2006) : 90]
Faculty of Life Science

Research Technician

Ref: LS/140/06

Salary £16,023 per annum

You will support a BBSRC-funded project on vascular K channels. You will join a well-established research group, investigating ion channel function in the pulmonary vascular system. You will be well organised and highly motivated with laboratory experience and degree level knowledge of physiology/pharmacology.

The role will be mainly experimental but will also include technical management of the research group. Relevant experience in primary culture or molecular biology techniques would be an advantage.

The post is tenable for up to 16 months.

Closing Date: 20 October 2006. Please quote the reference number.

Informal enquiries may be addressed to: Professor Alison Gurney. Tel: +44 (0) 161 275 5962. Email: alison.gurney@manchester.ac.uk

Application forms and further particulars are available from our website. If necessary you can obtain them from www.man.ac.uk/news/vacancies or from The Directorate of Human Resources. Tel: +44 (0) 161 275 8836.

Email: Lifesciences-hr@manchester.ac.uk

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

www.manchester.ac.uk/vacancies

THE TRANSLATIONAL MEDICINE RESEARCH COLLABORATION LABORATORY

The TMRC laboratory will be devoted to innovative biomarker identification and development in areas of Cardiovascular & Metabolic Disease, Inflammation, Musculoskeletal Biology, Neuroscience, Oncology and Reproductive Health. We are seeking outstanding scientists to establish the laboratory and drive the future of Translational Medicine. This is an exceptional opportunity to join a world-class organisation dedicated to the application of cutting-edge science for the treatment of significant unmet medical needs.

BIOSTATISTICS/BIOINFORMATICS GROUP

STATISTICAL PROGRAMMER
Grade 8 (£32,471 - £38,772)
Following detailed analysis plans provided by the biostatistician(s) in the Group, you will use appropriate programming packages to compile programs that provide the specified analyses. A senior programmer with a B.S or M.S in Statistics or computer sciences and at least 8 years application development experience, you will be familiar with programming across various statistical analysis platforms, including SAS, S-Plus or R, C++, etc. You will report directly to the Biostatistician, who will serve to help validate all written programs. Ref: CS/1463/NS.

POSTDOCTORAL RESEARCHER
Grade 8 (£32,471 - £38,772)
You will support research using various genomic platforms (Affymetrix gene expression, 2DLC-MS/MS and LC GeLC MS/MS, FTICR, MSD, Sequenom) for RNA expression, proteomic and SNP analyses of samples from human and animal model studies and oversee integration of genomic data with clinical information. You will have a PhD or equivalent in molecular biology, pharmacology, systems biology or a related discipline with at least five years' broad experience in bioinformatics including sequence based analysis and preferably with experience in RNA profiling analysis and/or the use of genomic technologies for clinical disease applications. Supervisory experience is necessary and a proven ability to work collaboratively. Ref: CS/1464/NS.

COMPUTER PROGRAMMER AND IT SPECIALIST
Grade 9 (£41,133 - £46,295)
You will customise or develop systems and programs that manage, analyze and report a variety of data types including clinical data, research assay data and genomic data. A senior programmer with a B.S or M.S in Computer Science, Biology, Statistics or other scientific discipline and at least eight years' application development experience, you will have strong project management and communication skills, proficiency with Java and Java IDE tools, Oracle RDBMS, SQL, PL/SQL, Perl, C++, Experience in developing Validated and 21-CFR-Part 11 compliant systems in the pharmaceutical industry is also required. Ref: CS/1465/NS.

BIOSTATISTICIAN
Grade 9 (£41,133 - £46,295)
Reporting to the Head, Biostatistics/Bioinformatics, you will work with scientists from the TMRI Research and Clinical Laboratories and contribute to the execution of the planned experimental designs, data analyses, data validation and hypothesis testing procedures aimed at addressing valid scientific questions. You will interact closely with bioinformatics scientists and assist in their data mining activities and you will manage the activities of the statistical programming staff. The position requires a broad-based knowledge and ability to interact and have active participation in research (preclinical) study design and clinical protocol development across several therapeutic areas and across all scientific disciplines active within the TMRI. You will have a PhD in statistics or biostatistics with at least three years' academic (or industrial) training in applying statistical methods to design and analysis of genomic, proteomic, metabolomics or biologic experiments. A Masters in statistics or biostatistics with at least seven years' of this type of experience will also be considered. Ref: CS/1466/NS.
PROTEOMICS GROUP

POSTDOCTORAL RESEARCHER
Grade 8 (£32,471 - £38,772)
Reporting to the Proteomics Head, you will design and conduct experiments intended to support the discovery of protein/peptide biomarkers using mass spectrometry-based platforms and map to disease pathophysiology for biomarker discovery and therapeutic intervention. You will work closely with bioinformatics analysts and statisticians to ensure integration and analysis of generated data. You will have a PhD in molecular biology, pharmacology or a related discipline, with up to 2 years of laboratory experience in proteomic research. Work in the pharmaceutical industry or in another team-based environment would be highly desirable. Ref: CS/1467/NS.

SCIENTIFIC OFFICER (2 posts)
Grade 7 (£25,633 - £31,525)
Reporting to the Head of the Proteomics Group, you will conduct experiments under limited supervision to support the discovery of protein/peptide biomarkers of disease and drug activity using methods based on mass spectrometry, HPLC, and other proteomic platforms. You will use analytical methods based on technologies such as LC MS/MS, SELDI/TOF, 2-dimensional gel electrophoresis and HPLC. You will have a degree in analytical biochemistry/chemistry, biology or a related discipline with at least six years' of lab experience. Experience in mass spectrometry, HPLC and related technologies is required. Experience in the pharmaceutical industry is preferred. Ref: CS/1468/N5.

GENOMICS GROUP

POSTDOCTORAL RESEARCHER
Grade 8 (£32,471 - £38,772)
You will develop new methods and characterize analytical performance of developed assays for analysing DNA and RNA biomarkers and you will perform and/or manage the analysis of DNA and RNA biomarkers in support of clinical studies. You will supervise technical staff and assist supervisor in sustaining compliance with safety and bioanalytical practices regulations. You will have a PhD in Molecular Biology, Pharmacology or a related discipline, with up to two years' laboratory experience in the development of biological assay methods. Work in the pharmaceutical industry or in another team-based environment would be highly desirable. Ref: CS/1469/NS.

SCIENTIFIC OFFICER (3 posts)
Grade 7 (£25,633 - £31,525)
You will analyse RNA expression levels and detect single nucleotide polymorphisms and coordinate sample receipt and handling for clinical studies in biomarker laboratory. You will follow SPIs applicable to the tracking of samples, performance of assays and entry of data and you'll prepare data summaries and plots for supervisor’s review. You will have an HND/degree in molecular biology, biology, biochemistry or a related discipline with at least 2 years lab experience. Experience with basic recombinant DNA methods and cell culture required. Some exposure to the pharmaceutical industry is an advantage, but not essential. Ref: CS/1470/NS.

IMMUNOASSAY GROUP

POSTDOCTORAL RESEARCHER
Grade 8 (£32,471 - £38,772)
You will be responsible for the development/validation of biomarker assays and you will oversee the analysis of clinical samples using immunoassay and/or flow cytometry. You will supervise technical support staff. You will have a PhD in Molecular Biology, Pharmacology or a related discipline with up to 2 years of laboratory experience in assay and assay development. Work in the pharmaceutical industry or in another team-based environment would be desirable. Supervisory experience an advantage. Ref: CS/1471/NS.
**SCIENTIFIC OFFICER (2 posts)**

Grade 7 (£25,633 - £31,525)

You will conduct experiments under supervision to support the development and/or analytical validation of biomarker assays based on technologies such as immunoassays and flow cytometry. You will conduct analysis of preclinical and clinical samples in support of TMRI studies. You will have a degree in analytical biochemistry/chemistry, biology, or a related discipline with at least 6 years of lab experience. Experience in mass spectrometry, HPLC and related technologies is required. Experience in the pharmaceutical industry is preferred. Ref: CS/1472/NS.

All posts are for four and a half years in the first instance.

Further details and an application pack are available from our website [www.jobs.dundee.ac.uk](http://www.jobs.dundee.ac.uk)

Alternatively, contact Personnel Services, University of Dundee, Dundee, DD1 4HN, tel: (01382) 344817 (answering machine) quoting the appropriate reference number.

Closing date: 13 October 2006.

Candidates will only be contacted if invited for interview. The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community.

**UNIVERSITY OF DUNDEE**

[www.dundee.ac.uk/jobs](http://www.dundee.ac.uk/jobs)
Postdoctoral Research Associate
Development of Multibeam Sonar for Monitoring Sediment Dynamics in Aquatic Environments

This post is available immediately for a fixed term of two years. You will play a key role in the development and application of multibeam echo-sounding techniques for measuring sediment dynamics in aquatic environments.

This post is supported by a Partnership grant from the UK Natural Environment Research Council, held between the Institute of Geological Sciences (IGS) at the University of Leeds and RESON (visit http://www.reson.com). The Institute of Geological Sciences at Leeds is a leading research centre with interests encompassing the study of past and present environmental and climatic change and the processes controlling sediment-dynamics in surface environments. Project partners RESON are world leaders in the development and manufacture of high-resolution multibeam sonar systems. The post will be held at Leeds, although time will also be spent on-site with RESON and in field deployments of the sonar.

You will have a first degree in a science-based subject and will have completed a PhD qualification (or equivalent) in a relevant area of signal processing, acoustic engineering, or similar. Strong mathematical and analytical abilities are required and excellent communication and interpersonal skills including written are also necessary.

University Grade 7 (£26,402 - £30,606 p.a.)

Further details concerning the School, its research activities and structure are available at http://www.see.leeds.ac.uk/.

Informal enquiries to Dr Dan Parsons email d.parsons@see.leeds.ac.uk

To apply online please visit http://www.leeds.ac.uk and click jobs. Alternatively application packs are available from Mrs Kate Higham tel 0113 343 5201 email k.higham@see.leeds.ac.uk

Job ref 315043 Closing date 12 October 2006
Possible interview date w/c 23 October 2006

Clinical Trial Service Unit & Epidemiological Studies Unit (CTSU)

Senior Study Administrator
MRC Grade Band 3: Salary £34,933 - £42,754 p.a.
The CTSU is one of the world's leading centres for research into the causes, prevention, and treatment of chronic diseases (such as cancer and heart disease) that are major causes of death. Currently, the unit is undertaking two large international collaborative projects in China of the environmental and genetic causes of common chronic disease. One is a large-scale prospective cohort study, aiming to recruit 500,000 participants over a period of 4-5 years, and the other is a large-scale case-control study of 20,000 MI/stroke patients and 10,000 controls from about 100 hospitals.

We are seeking an experienced person to join the team of epidemiologists, clinicians, administrators and computer programmers to help co-ordinate these two large projects collaborated between Oxford and two major medical institutes in China. The successful candidate will be responsible for taking over the role of overall project management in Oxford for the on-going prospective study that is currently taking place in 10 regions in China, and for the co-ordination of planning and development of systems and documentation for the case-control study of MI and stroke that will be starting during late 2007.

Candidates must have an advanced degree (or equivalent experience), and have at least 5 years' relevant experience in a medical research field. It would also be advantageous to have experience of working on an international, multi-centre trial or epidemiological study and to be familiar with various computing software packages and programming languages.

For details on how to apply please see http://www.ctsu.ox.ac.uk/jobs/ or contact the Admin Office on tel. (01885) 743867 or e-mail: recruit@ctsu.ox.ac.uk Please quote reference 06/27/ZC. The closing date for applications is the 16th October 2006.

The University is an Equal Opportunities Employer.
The University of Edinburgh
THE UNIVERSITY OF EDINBURGH
The University of Edinburgh is an exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow's world.

THE UNIVERSITY OF EDINBURGH

Proteomics Research Assistant
£13,735 - £14,457

You will be primarily responsible in helping to run a proteomics analysis service, which will involve interaction with members of the Wellcome Trust Centre for Cell Biology. Experience of working with proteins is desirable. Prior experience of using mass spectrometers would be useful but not essential as training could be given.

The post is funded by the Wellcome Trust and fixed-term for four years and is under the direction of Professor Adrian Bird (Director of Centre).

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131 650 2511. Ref: 3006331NS. Closing date: 6 October 2006.

Committed to Equality and Diversity

www.jobs.ed.ac.uk
[2572-076 (2006) : 92]
Faculty of Medical & Human Sciences and Faculty of Life Sciences

**Postdoctoral Research Associate (CRUK)**
Salary £25,633 - £31,525 p.a. Ref: MHS/375/06
This post is available immediately for a period of 36 months to work on the preservation of fertility in female cancer patients. The project will involve using cryopreserved human ovarian tissue in an *in vivo* model of oocyte maturation. The developmental potential of ovarian follicles, oocytes and preimplantation embryos will be assessed using methods to analyse developmental gene expression profiles in single and small numbers of cells.

You will be joining a group that has well established interests in fertility preservation, embryo development and embryonic stem cells, particularly in genes which regulate cell fate. This project will use cDNA microarray screening to generate novel gene expression data, in collaboration with the CRUK National microarray facility at the Paterson Institute, Manchester. The work will take place alongside an existing project funded by MRC and BBSRC.

You will have a BSc in a Biological Sciences subject and a PhD and have experience in developmental biology or a background in basic scientific research. It will be advantageous to have experience in mammalian preimplantation embryology or experience in gene expression profiling using cDNA microarrays or to have held a UK home office licence or similar.

You will be based in the IVF unit at St Mary’s Hospital and the Faculty of Life Sciences, in collaboration with the Christie Hospital and the Paterson Institute, and the University of Leeds.

For informal discussion or further information, please contact Daniel Brison on +44(0) 161 276 6612 or email: daniel.brison@manchester.ac.uk

Application forms and further particulars are available from our website. If necessary, you can obtain them from + (0) 161 275 8835 or email: mhs-hr@manchester.ac.uk

Closing date: 16 October 2006.

Faculty of Life Sciences

**Research Technician** Ref: LS/134/06
Salary £16,023 - £17,461 p.a.
This post is tenable for up to three years to work on a BBSRC sponsored research grant and a Faculty sponsored project based in a vibrant and exciting research environment at the University of Manchester. The Faculty of Life Sciences (rated 5 in the last RAE) has recently moved into a brand new state-of-the-art building that provides superb facilities for all aspects of biological research.

You will be enthusiastic, highly motivated and have an interest in developmental and/or circadian biology. The project builds upon recent exciting research in the laboratory of Dr Nick Glossop, which has identified direct molecular links between genes involved in developmental patterning and those that regulate the circadian oscillator mechanism. You will be responsible for establishing a genotyping facility within the Faculty of Life Sciences. A Home Office personal licence and/or experience of general molecular biology techniques will be advantageous.

Informal enquiries can be made to Dr Nick Glossop on +44 (0)161 2751584, fax: +44 (0)161 2753938, or email: nicholas.glossop@manchester.ac.uk
Cyclotron Technician Ref: MHS/372/06
Salary £16,023 - £20,842 p.a.

The WMIC is a brand new, state-of-the-art facility dedicated to investigating regional tissue function and to supporting the development of new treatments in cancer and brain disorder patients using Positron Emission Tomography (PET).

You will be given a unique opportunity to develop expertise in the area of PET research or consolidate and enhance acquired expertise. This post will provide operations technical support for the Radiochemistry Engineering and Physics group, providing radioisotopes for PET clinical research to cGMP standards. Your duties will include setup and installation of support services for our new laboratory, maintaining production equipment and fabrication, installation and validation of new instrumentation. You will also be responsible for scheduling and planning production of radioisotopes with other members of the team.

You will have a BSc in Physics, Mechanical/Electrical Engineering, or a related discipline plus at least two to three years’ related technical experience. In addition, general laboratory technology experience, an ability to work independently and as part of a team and be able to work with people from all levels in the organisation is essential.

For further information, please contact Dr Todd Barnhart on + 44(0) 161 275 0027 or email: todd.barnhart@manchester.ac.uk or visit our website www.manchestermolecularimaging.com

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44(0) 161 215 0006 or email: catherine.doyle@manchester.ac.uk

Closing date: 13 October 2006.

For all posts, please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.
College of Medicine, Dentistry & Nursing
Ninewells Hospital & Medical School
Division of Maternal & Child Health Sciences

POST-DOCTORAL RESEARCH ASSISTANT
Grade 7 (£25,633 - £31,525)
Fixed-Term for 2 years
A postdoctoral scientist with an interest in lung biology is required within the Division of Maternal and Child Health Sciences (RAE 5), University of Dundee, to investigate the molecular process triggering inflammation in cystic fibrosis (CF). CF is characterized by hyperactive inflammation; this groundbreaking project will investigate the mechanism(s) by which mutations in CFTR (the protein which is defective in CF) lead to this debilitating inflammatory response.

A post-doctoral scientist or exceptional graduate in a relevant discipline will join a multidisciplinary group with a special focus on CF disease. This is a cellular signaling project which will include cell culture techniques, molecular cloning, transfection, ELISA and fluorescent reporter gene assays, western blotting and confocal microscopy studies. Experience in any of these techniques would be an advantage, but training can be given to the ideal candidate if required.

The laboratories are fully equipped with cell culture suites, confocal microscope, radioactive facilities and experienced personnel.

The successful applicant will be enthusiastic, responsible, efficient, flexible and able to work within a team as well as show independent initiative.

The post is supported by the Cystic Fibrosis Trust. Informal enquiries are welcome and should be directed to Kate Treharne (tel: 01382 660111, Ext 33055, k.j.treharne@dundee.ac.uk). We regret that we are unable to accept applications by email.

Further details and an application pack are available from our website www.jobs.dundee.ac.uk Alternatively, contact Personnel Services, University of Dundee, Dundee DD7 4HN, tel: (01382) 344817 (answering machine). Please quote reference number: MD/1494/N5.

Closing date: 28 October 2006.

Applicants will only be contacted if invited for interview.

The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community.

The University of Reading
School of Chemistry, Food Biosciences & Pharmacy

Postdoctoral Research Assistant
Grade RA1A, £22,289 p.a., Full-time, 3 Years Fixed-term

Applications are invited for a postdoctoral position, under the supervision of Dr Vitaliy Khutoryanskiy, to develop novel hydrogel materials that mimic the adhesive properties of biological tissues. This post, funded by the BBSRC, is available from 1 January 2007 for 36 months. Applicants should have a PhD in polymer chemistry, formulation science, or other relevant discipline.

Closing date for applications 20 October 2006. Please see our full advert on www.newscientistjobs.com
EUR7184
[2572-079 (2006) : 94]
Principal Experimental Officer
£32,471 - £41,133 pa

You will be responsible for maintaining world-class standards of transmission electron microscopy in the physical sciences and engineering at Liverpool. To achieve these goals you will work closely with users providing expert assistance and training where necessary. You will also be expected to pursue your own research in the general field of electron microscopy of materials. A degree in materials science, physics, chemistry or a related discipline and advanced knowledge and practical experience of transmission electron microscopy and scanning transmission electron microscopy are essential.

Quote Ref: B/862/NS  Closing Date: 27 October 2006

For full details, or to request an application pack, visit www.liv.ac.uk/university/jobs.html or email: jobs@liv.ac.uk  Tel 0151 794 2210 (24 hr answerphone), please quote Ref: in all enquiries.

COMMITTED TO DIVERSITY AND EQUALITY OF OPPORTUNITY

THE UNIVERSITY OF WARWICK
Department of Physics
Magnetic Resonance Group

**Project Manager and Research Fellow**
£24,161 - £38,772 pa  Ref: 53233-096
Fixed Term Contract for 4 Years

The Magnetic Resonance Group is undertaking an exciting project to develop Dynamic Nuclear Polarisation (DNP) for *enhancement* of solid state NMR signals.

You will act as both a Project Manager, managing and co-ordinating the whole project as well as a Research Fellow, designing and implementing specific aspects of the research programme. You will have a PhD in a relevant area, project management experience and experience in experimental magnetic resonance.

**Senior Research Officer**
£24,161 - £38,772 pa  Ref: 53234-096
Fixed Term Contract for 3 years

You will provide high level support across a range of activities to include both Electron Paramagnetic Resonance and solid state Nuclear Magnetic Resonance. You must have a PhD in a relevant area, experience in experimental magnetic resonance in solid materials and a willingness to work across the whole MR group portfolio.

Informal enquiries: Professor Mark Smith ([M.E.Smith.l@Warwick.ac.uk](mailto:M.E.Smith.l@Warwick.ac.uk)) or Dr Mark Newton ([M.E.Newton@Warwick.ac.uk](mailto:M.E.Newton@Warwick.ac.uk)).

Application packs are available from Personnel Services on 024 7652 3685 (24 hour answerphone), by email: recruit@warwick.ac.uk, our website below or [www.jobs.ac.uk/warwick](http://www.jobs.ac.uk/warwick). An application form MUST be completed if you wish to apply for these posts.

**POSITIVE ABOUT DISABLED PEOPLE**
[2572-083 (2006) : 95]
School of Biology
www.st-and.ac.uk

1 Lectureship and 2 RC UK Fellowships

The fellowships are for five years and you will be transferred to permanent academic posts on completion of the awards. The main criteria for all appointments will be an exceptional research record and future potential. Although the emphasis of these appointments is research, there is an expectation that you will make some contribution to undergraduate and postgraduate teaching.

Lectureship in Developmental Cell Biology
(Ref: PS046/06)
*£33,101 - £40,711pa
With interests in Developmental Biology and/or Cell Biology, you will have an exceptional research profile and if you are working with model animals and/or using modern imaging techniques, you are particularly encouraged to apply. For exceptional individuals, appointment to a more senior position may be considered. You will teach in appropriate undergraduate and taught postgraduate modules.

Fellowship in Biophysics (Ref: PS047/06)
*£26,915 - £32,137 pa
Coming from the disciplines of Biology or Physics, you should have research interests at the Biology-Physics interface in any area of molecular and/or cellular biology. Current collaborations between the Schools of Biology and Physics include the use of enhanced spin resonance techniques to determine biomolecular structure, function and interactions (www.st-and.ac.uk/~mmwave) and biophotonics including the controlled neuronal growth and sorting of cells by the use of light and also the production of novel caged compounds (www.st-and.ac.uk/~biophot).

Fellowship in Marine Biology (Ref: PS048/06)
*£26,915 - £32,137 pa
You will be based in the Gatty Marine Laboratory, which has excellent facilities for ecological and molecular research (biology.st-andrews.ac.uk/gatty/) and houses the NERC-sponsored Sea Mammal Research Unit. You will establish an independent research group that complements OUT current research strengths in marine genomics (in association with the Centre for Biomolecular Sciences - biology.st-andrews.ac.uk/cbms/ and the Scottish Structural Proteomics Facility), fish biology, coastal and pelagic ecology, and the mathematical modelling of ecosystem dynamics (in association with the Centre for Ecological & Environmental Modelling, School of Mathematics and Statistics (www.creem.st-andrews.ac.uk/).

You will be joining a large, vibrant and successful School (RAE rating 5) with a wide research base. Biology also has strong collaborations with all the major Science Schools at St Andrews.

Informal enquiries to Professor David Paterson (all posts) (tel: 44(0) 1334 463503, e-mail: dp1@st-and.ac.uk), Professor Keith Sillar (kts1@st-and.ac.uk) for ref: PS046/06. Dr Frank Gunn-Moore (fig1@st-and.ac.uk) and Dr W. John Ingledew (wji@st-and.ac.uk) for ref: PS047/06, Professor Ian Johnston (iaj@st-and.ac.uk) for ref: PS048/06.

*Salary is subject to confirmation under the new framework agreement

Please quote the appropriate reference number.

Closing date for all posts: 1 November 2006.

Application forms and further particulars are available from Human Resources, University of St Andrews, College Gate, North Street, St Andrews, Fife KY16 9AJ (tel: 01334 462571, by fax: 01334...
462570 or by e-mail: jobline@st-andrews.ac.uk. The advertisement and further particulars can be viewed at http://www.st-andrews.ac.uk/hr/recruitment/vacancies

University of St Andrews
The University is committed to equality of opportunity
[2572-084 (2006) : 95]
Faculty of Science

**Senior Lecturer in Geographical Information Systems GIS**

£34,367 - £40,668 pa inc.

Fixed term for 2 years from 1st January 2007 or as soon as possible thereafter

Ref. 06/274

The School of Earth Sciences and Geography is seeking a GIS specialist to fill a position of Senior Lecturer to strengthen the School's research profile; to teach on the School's undergraduate and postgraduate degree courses mainly in GIS; to contribute to the Centre for GIS professional Distance Learning programme and consultancy activities; and to supervise postgraduate research students. The post will be ideally suited to those wishing to develop their academic career within an enthusiastic team of active GIS researchers. You should hold a relevant PhD and preferably have gained some teaching experience. You should have a record of research in any area of GIS and its application though preference may be given to applicants who are able to offer teaching and research expertise in one or more of the following areas: Visualisation, Spatial analysis and GIS modelling, GIS programming, Internet GIS or mobile GIS.

The post offers opportunities for an enthusiastic individual with a background in GI Systems or Science to participate in, and develop, the School's highly regarded GIS programmes, to continue to develop their own research interests, and, in time, to contribute to the management of some of the School's courses.

If you wish to discuss the vacancy informally before submitting an application, please telephone Prof. Nigel Walford, Professor of Applied GIS, on 020 8547 75 12, or email n.walford@kingston.ac.uk

**Two Lecturers in Earth Sciences & Geography ESG**

£30,745 - £33,421 pa inc.

Fixed term for 2 years from 1st January 2007 or as soon as possible thereafter

Ref. 06/275

The School of Earth Sciences and Geography is seeking to appoint two highly motivated individuals to strengthen the School's research profile. These are primarily research positions but will also include some Undergraduate and Masters-level teaching in areas appropriate to the successful candidates' expertise. Applications are invited from candidates with interests that develop and capitalise on the School's three main research foci: Environmental Change; Geodynamics and Crustal Processes; Rural Geography and Socio-economic Change. You will have completed a PhD in Geography, Earth Science, Geology or a cognate discipline, have a strong profile of academic publication and be able to demonstrate the potential to develop externally-funded research programmes.

The School of Earth Sciences and Geography has a series of modern well-equipped research laboratories dedicated to Experimental Petrology, GIS, Palaeomagnetics, Palynology, Soils and Sediments. Kingston hosts the UK NERC ICP-MS Facility and there are also laboratories for Laser-Raman Spectroscopy, Scanning Electron Microscopy/EMP analysis, Fluid Inclusion analysis, Thin Sectioning, Rock Cutting and Rock and Cold Storage.

If you wish to discuss the vacancies informally before submitting an application, please telephone Dr Martyn Waller on 020 8547 2000 ext. 625 11, or email M.Waller@kingston.ac.uk

Closing date for both positions: 12 noon on 11th October 2006.

Interviews for both positions: week commencing 30th October 2006.

For further information or to apply online, visit our website [www.kingston.ac.uk/jobs](http://www.kingston.ac.uk/jobs). If you need to apply in an alternative format, please call the recruitment line on 020 8547 7153 quoting the relevant reference. If you are a minicom user, please phone 020 8547 7169.
UNIVERSITY OF BIRMINGHAM
The Centre for Formulation Engineering in the department of Chemical Engineering

Engineering Doctorates

• Starting tax free bursaries of over £18,200 p.a. plus fees paid by the EPSRC
• A four year postgraduate qualification carrying out industrially relevant research.
• Based in a sponsoring company not in the University.
• Includes taught modules in science, engineering, team building as well as business and management.
• Open to UK / certain EU nationals with a good first degree (upper second or better) in any relevant physical science or engineering discipline. Existing employees with relevant industrial work experience may also be considered.
• Projects available with;
  Procter and Gamble (Newcastle) A mechanistic understanding of foams in consumer goods.
  Rolls Royce (Derby) Swarf dissolution in reactors.
  Scottish and Newcastle (Edinburgh, Tadcaster, Reading) Minimising effluent in breweries through optimisation of cleaning.
  Unilever (Port Sunlight) Measuring and modeling the removal of structured product deposits.
  Pfizer (Sandwich) DEM modelling of roller compaction.
For more details on each project please see

Shape the future of Life Sciences

Want to be at the forefront of management in life sciences and health? Then our unique Life Sciences MBA will give you all the management capabilities you need.

This distance learning programme from Europe's largest business school will give you the analytical, strategic and investigative skills to make an immediate impact within your organisation. At its heart is the course Strategic management in life sciences and healthcare. Here you'll challenge conventional wisdoms and develop credible alternative future scenarios that could lead to more effective ways of providing healthcare support to patients.

You'll be supported throughout by leading health and life sciences professionals and you can complete your MBA in as little as two and a half years.

So take the lead and call us now.

IT’S ONE OF OUR MOST IMPORTANT GOALS TO HELP THEM ACHIEVE THEIRS.

RORY WILSON
To invent an electronic logger that monitors the energy use of endangered species, whatever their native environment.

CHANDA SHROFF
To revive the tradition of Kutchi embroidery and in so doing provide vital income to the region’s impoverished women.

ALEXANDRA LAVRILLIER
To preserve the nomadic culture of the Evenk by setting up a nomadic school teaching traditional skills alongside modern subjects.

BRAD NORMAN
To create a global whale shark photo-identification system that charts the sharks’ migratory routes, thereby aiding their conservation.

PILAI POONSWAD
To convert southern Thailand’s hornbill poachers into the birds’ protectors and so help save the species.

THE ROLEX AWARDS for ENTERPRISE

For the past 30 years, the Rolex Awards for Enterprise have been assisting individuals whose groundbreaking endeavours expand our knowledge of the world or improve the lot of humankind. Selected by a distinguished international panel of experts, each Laureate receives a gold Rolex chronometer and US $100,000 towards the realisation of his or her vision. Support that should help them achieve their goals. Which, of course, are ours too.

ITALY BIOTECH is gaining momentum

Italy is on the rise with over 160 companies today and a growth rate of 60% over the last 5 years, which makes Italy rank fourth behind Germany, UK and France.

A breeding ground for biotech companies

Italy’s Life Sciences industry is becoming ever more appealing for multinational companies seeking to pursue Biotechnology and Pharmaceutical research. The sector is spurred on by the strong interaction between academia and business environment, a vibrant medical and hospital system, the capacity of world class scientists to produce leading-edge research as well as government support. The strong innovation that marks Italian bio-industry and the high quality of products in the development pipeline (59 products of which 30 in clinical trials) make Italy compete with major European countries.

** Blossom Associati, CrESIT Insubria di Varese University, Italian Biotechnology Report 2006

Competitive advantages for international investors
A skilled pool of R&D professionals - 6,000 researchers employed by businesses, a pool of 20,000 university researchers, 200,000 students and 35,000 graduates annually in Biotechnology Pharmacy and Medicine - with creativity second to no competitor country worldwide makes Italy rank top in Europe for patent productivity and impact rate of publications. Start-ups and new business initiatives can count on the support of a network of science parks specialized in Life Sciences, with a track record of excellence in Biotechnology, Biomedical Technology, Diagnostics, Genomics. Besides, labor business and clinical trials costs are internationally competitive with respect to USA, UK, France and Germany.

INNOVATION SPOTLIGHT
Italy’s just launched the first public laboratory for production of personalized anti-cancer drugs for clinical trials
Rome - FaBioCell (Cellular Biological Pharmaceuticals) is the new public laboratory inaugurated by the Italian Minister of Health. Located in the ISS (the Italian National Institute of Health) it will use the dendritic cells of individual patients for the production of anti-cancer drugs and vaccines. It will allow trials of cancer immunotherapy in collaboration with 3 major Italian hospital centers: Istituto Regina Elena of Rome, Institute for Cancer Research and Treatment (Fondazione G. Pascale of Naples) and the National Cancer Institute of Milan.

Italy to Launch Europe’s First Institute for Regenerative Medicine
Modena - The University of Modena and the Eye Bank Foundation of Venice have joined forces to create a public/private partnership forming the Research Center for Regenerative Medicine. It will become the first such center in Europe focused on stem cell therapy for treating vision disorders caused by tissue/organ damage and genetic defects.

The European Institute of Oncology is supported by the US National Cancer Institute for lung cancer research
Milan - The Italy based European Institute of Oncology was selected and funded 850,000 USD by the National Cancer Institute as the best research center in Europe and US to conduct clinical studies for pharmacological prevention related to lung cancer. The research pool is committed to cancer screening with the ultimate and ambitious goal of discovering how to stop lung cancer growth at a very early stage.

Getting better all the time

After the thrills and spills of the past five or six years, British biotechnology really does seem to be looking much more stable and scoring well on all four of the key tests of its health, says Richard Fisher

Rewarding careers have been available in British biotech since its early days, though until recently the average life expectancy of a start-up has been short. Now the sector is at last beginning to look more healthy and stable, which is good news for smart people who want to work in biotech but who can do without the roller-coaster ride of excitement and disappointment of the pioneering days.

Four key measures are used to diagnose the health of this young industry. The first is the amount of money investors are willing to put in. Here the news is mixed, but overall things are looking up. While the European biotech industry still lags some way behind its American competitors, it is in significantly better shape than it was, with €1.4 billion invested in Europe - a 20 per cent increase on the previous year.

Five years ago, fuelled in large part by the hype surrounding the first draft of the human genome, investors piled in and created a mini-boom. It didn't last: the science was overhyped and overvalued. When the bubble burst, stock-market valuations of biotechs crashed and investors pulled out en masse, leaving companies gasping for air and scientists out of a job.

Today, investor confidence has returned after the industry cut costs, wised up to commercial demands and focused on projects where success comes more quickly, according to William Powlett-Smith of consultancy Ernst & Young. Companies with compelling technology and good management now have a good chance of coming out of the dragon's den with what they wanted, and even of prospering.

The second measure of health is the number of companies floating on the stock market. Flotation has proven difficult for companies over the past two years. Some have taken the leap "Half of the UK's 457 biotech companies took on extra staff" in Europe but at lower values than they were worth, especially compared with similar American companies floating on similar exchanges. Many have backed away altogether, but resourceful companies have looked elsewhere to grow: after all, why float when you can form a multimillion alliance, or simply get bought out?

Accordingly, the third measure of health is the number of acquisitions and partnerships. And here, British biotech is receiving unprecedented interest, especially from the major pharmaceutical companies. In 2005, the UK had the largest share of such deals in Europe, according to consultancy Ernst & Young. One of the main drivers is that large pharmaceutical companies have struggled to fill their drugs pipelines with chemistry-based compounds from their own research labs, and have had to turn to biotech for ideas.

It's a marriage of convenience: big pharma gets its pipeline, while biotech gets money, support and access to drug development experience (New Scientist, 8 April, p 58). The fourth and most important measure of success for the biotech industry is whether it is getting drugs into the hands of doctors. While the news is generally good, says Simon Best, chairman of the UK Bioindustry Association, there have been setbacks. You need look no further than the disastrous clinical trial conducted by German company TeGenero in March, in which volunteers given the monoclonal antibody-based compound TGN1412 suffered severe side effects. All survived but fears for their long-term health remain. Unsurprisingly, confidence in such drugs has been badly shaken.

On the positive side, another monoclonal antibody showed off British biotech at its best earlier this year when Cambridge Antibody Technology's arthritis drug Humira achieved blockbuster status with more than $1 billion in revenue. This won't be the last biotech drug to generate such heady profits. Powlett-Smith says there is a wealth of promising compounds awaiting approval from British regulatory authorities. "That tells a very strong story about the strength of the science available to be commercialised," he says.
The health of the sector means that there are many opportunities for graduates looking to build a biotech career in the UK (see "Come on in, the water's lovely", page 60). The British biotech industry employed over 20,000 people in 2004 and about half of the 457 companies took on extra staff, according to the most recent figures from consultancy Critical I. That growth looks set to continue as more and more biotechnology drugs reach the market, says Best. "Biotech is one of the key technologies for meeting human needs over the next 50 to 100 years," he says. "And the UK is bloody good at it."

The making of a biotech
These days the biotech industry recognises any number of colours: red for healthcare, green for agricultural, blue for marine, and now white for industrial. But even in healthcare, where most jobs are generated, it is getting tricky to know exactly what the word "biotech" covers. Do you include companies that make

BIOTECH BRITAIN
Biotech activity

SCOTLAND
The triangle formed by Edinburgh, Dundee and Glasgow is the third-biggest UK cluster, with around a fifth of the UK’s companies

NORTH OF ENGLAND
A corridor between Manchester and Liverpool forms the north of England’s fastest growing region of biotechnology. There are also companies dotted throughout the north-east and Yorkshire and Humberside

WALES
Cardiff and Swansea are the hubs for a steady increasing level of activity in Welsh biotech.

THE REST OF THE UK
Scientists looking for a job in biotech will find employers in most parts of the country. One obvious disadvantage of joining a company outside the clusters is that it’s trickier to further your career nearby should you decide to move on, or the company folds.

THE SOUTH-EAST AND LONDON
Oxford and London form the other two points of the so-called “golden triangle” with Cambridge. There’s a cluster around Oxford, but otherwise there is no one locus in the south-east. Instead a plethora of biotech companies spread across Kent, Sussex and Surrey. London itself also has a growing number.

CAMBRIDGE AND THE EAST
Draw a 50-kilometre circle around Cambridge and you will have marked out one of the biggest biotech clusters in Europe, with around 250 companies. It’s also undeniably the centre of UK biotech.

COME ON, THE WATER’S LOVELY
To thrive, big pharma and biotech must draw on a wealth of expertise. So from discovering a key drug to selling it, the opportunities are immense, says industry consultant Peter Warne.

Let's start with the basics. Just what is it that will be going to market in 2007? Pharmaceuticals can be divided into two categories: small-molecule drugs and biologicals. Today, small-molecule drugs dominate the best-selling drug tables, but more than 40 per cent of drug discovery is devoted to biologicals, a new kind of drug being pioneered by biotech companies. Small-molecule drugs are synthetic chemicals that bind to receptors or enzymes, for example, whereas biologicals are larger entities such as antibodies or nucleic acids.

In small-molecule drug discovery, scientists now spend much of their time using technology such as high-throughput screening machines, which assay vast numbers of compounds far faster than could be done by hand. Even so, understanding the interaction between chemistry and biology is fundamental - and for now no machine comes close to the expertise of a scientist. Combinatorial chemistry, which involves the rapid, automated synthesis of large numbers of structurally related molecules, has given a new lease of life to the industry and a fresh demand for chemists to work in drug discovery. Graduates in biochemistry and molecular biology, and those with training in computer-based technologies such as bioinformatics and computer-aided drug design, are in demand. Biologicals, on the other hand, rely less on high-throughput screening because evolution has already done most of the work to ensure the drug hits the target. Since these drugs rely on protein chemistry to modify a naturally occurring product, lab scientists are likely to end up working on processes such as protein purification and cell culture.

Over the past decade, the role of the scientist in drug development has become increasingly important. For many years the pharmaceutical industry paid scant attention to the pharmaceutical properties of a new drug, and suffered the consequences when many new agents failed in development. Now, candidate drugs are profiled early for their suitability. At this stage, the industry needs pharmacists as well as technologists such as drug disposition scientists, who monitor the entry and exit of test agents together with analysts who check the drugs' integrity, and toxicologists who test their safety.

Once a drug enters trials involving testing on humans, clinical staff come into the picture: medically trained clinicians and clinical trials associates, who are frequently scientists. CRAAs tend to spend most of their time in trains, planes and automobiles visiting drug development centres to make sure that the rules and protocols are being followed.

Once a drug is ready for large-scale manufacture, scientists and engineers must monitor the whole process most carefully. Many consider this something of a black art: what might have been a safe reaction in quantities of a few milligrams could blow up a factory. For the biologicals, there's an equally thorny problem: scaling up is often the difference between success and failure for the whole project, because if you can't make large quantities at sufficiently low cost, you might as well not bother. Here, protein and fermentation chemists tend to corner the market.

Outside the immediate manufacturing processes, external authorities such as the US Food and Drug Administration need to be sure that drugs are safe for human use. Pharmaceutical companies employ people who specialise in the regulatory system, and they often have scientific backgrounds. And since regulatory demands affect everyone, graduates can increase their employability by showing they are aware of the "good practice" rules. These include Good Laboratory Practice (for non-clinical safety studies), Good Manufacturing Practice (for pharmaceutics and raw material manufacture), and Good Clinical Practice (for monitoring safety and efficacy in clinical trials).

Once the hurdles of discovery and development have been jumped, the focus shifts to marketing and sales. Marketing executives usually have a scientific background, often up to PhD level for senior managers, while others come from medicine.

Peter Warne is a pharmaceutical industry consultant. His self-study course for scientists, "How Drugs are Developed", is published by Informa Healthcare Courses.
The conventional idea of a biotech company is of a small, entrepreneurial start-up harnessing technology or research spun off from a university lab. A common characteristic is that the science offers great potential but is often years from making any money, due largely to an approval process that takes 10 years from discovery to market.

Working for one of these startups can be exhilarating, but is not for the faint-hearted. While you have a fabulous opportunity of

"Many biotechs are better established and offer all the same perks as a larger company"

seeing and working in just about all departments of a company, forget long-term security. The only consolation is that if your company is in a big biotech cluster such as the one near Cambridge, you can find a new job nearby if it folds (see "Biotech Britain", page 59).

The boundary between biotech and pharma is becoming increasingly blurred. Many biotechs are now bigger and better established, and offer all the perks of a larger company, such as improved pay and training. For example, Amgen, a US company which has labs in Cambridge and in Uxbridge, Middlesex, is the biggest biotech in the world and employs more than 500 people in its European research and development labs.

Or you could find yourself working with biologicals within a big pharma. In fact, many pharmaceutical companies now aim to reproduce the positive aspects of a biotech working environment. GlaxoSmithKline, for example, limits the number of employees in some of its labs to foster a collaborative and autonomous culture. Elsewhere, speciality pharmaceutical companies are growing fast. These make their money by focusing on one or two therapeutic areas and buying up promising compounds discovered elsewhere, often by biotechs, and then taking them to market. Perhaps the highest-profile company is Shire in Basingstoke, Hampshire, which specialises in developing treatments for the central nervous system and four other niche areas.

Some biotech companies don't even exist – except virtually. A growing number just take ideas and pay other companies called contract research organisations or contract manufacturing organisations to do their drug trial and data management, or manufacture their products.

No matter which part of the sector you work in, biotech offers an excellent career for scientists. "There will be twists and turns along the way" explains Simon Best of the Bioindustry Association. "Not every company will succeed, not every technology will work, but the skills that you get working for a good company in the biotech field will be very transferable."

What's brewing in pharmaceutical research

How to make the right choice

It is an unfortunate truth about the biotechnology industry that while you will very probably be around in three years' time, the company you work for may not. Drug development is all about taking large risks for large potential rewards, and small start-ups are especially prone to commercial failure.

The trick, according to William Powlett-Smith of consultancy Ernst & Young, is to dig beneath the surface and check out your employer's financial prospects. "If a scientist is thinking about joining a company, then they need to do their diligence on its drugs pipeline and the strength of the management's claims," advises Powlett-Smith.

There's plenty of information out there. First stop should be the company's annual report, where public businesses must include detailed information about their drugs pipeline. And if you want a second opinion try investor websites. Many leading venture capital firms and trusts, such as Abingworth or Oxford Technology, publish information about private companies.

If the company is listed, financial analysts such as Piper Jaffray publish research papers about performance and prospects on the stock exchange, says Powlett-Smith. These reports are written for the city, so they take some decoding, but it's worth taking time to read them because the information is objective and can save you from a wrong move. Then there are always the pages of the Financial Times and business sections of other newspapers. Tracking news of drugs coming onto the market will soon help you get a feel for the best companies to work for.
And when you get to the final interview, ask the company's chief scientific officer about product development. Look for a clear strategy for turning core technologies into profit. A company with potential will also have a global mindset, says Powlett-Smith, and be prepared to enter overseas markets and build partnerships abroad. This research will not only cover your back; it will also prove to potential employers that you are business-savvy, says Tony Bradshaw of the Bioindustry Association. "If you can understand the business environment, you'll really differentiate yourself in the job market."

Enter the antibody domain.

At Domantis, our domain antibody technology is shaping the next generation of exquisitely specific, highly potent antibody therapeutics.

Established in 2000 by a group of world-class Cambridge scientists, we're one of the fastest growing biotechnology companies in the world and were recently voted winner of the UKTI's 2006 Innovation in Drug Discovery and Development Award. Having raised over $90 million in investment, we're broadening the range of indications and delivery options available to antibody therapeutics.

We're currently looking to recruit the highest calibre scientists from within the antibody field and other related disciplines in order to fuel our rapidly expanding discovery and development pipeline.

For more information on the opportunities available at our R & D laboratories in Cambridge, UK, visit www.domantis.com or email your CV and details to jobs2006@domantis.com.
The Royal Academy of Engineering

Developing UK Biotech industry leaders

We support ambitious young scientists working in the biotechnology field with the funds for training activities, including attendance at conferences and courses such as the MBA or MSc, which relate to their personal development. For further details contact:
Ian Bowbrick, The Royal Academy of Engineering, 29 Great Peter Street, London SW1P 3LW

bioProcessUK
Knowledge Transfer Network

**Opportunities for Graduates/ Post Graduates interested in biopharmaceutical bioprocessing**

One Year Graduate Placement
bioProcessUK, a business unit of the Bioindustry Association, has a vacancy for a recent bioscience graduate student with an interest in the bioscience that underpins biopharmaceutical bioprocessing. This will be a technical marketing role for a fixed term of 12 months and will provide an excellent foundation for careers in this exciting sector. The post is based in London. Apply by email to bioprocessuk@bioindustry.org by the 30th November 2006.

Bursaries for the Annual bioProcessUK Conference (AbC)
bioProcessUK, through its sponsoring companies, is offering 25 bursaries for those completing their PhD or engaged in their first post-doc who are involved in biopharmaceutical bioprocess research, to attend the AbC in Edinburgh on 29th - 30th November. Application form requests to be received by email.

Career Advice Roadshows
Over the course of the next six months bioProcessUK will run three career advice workshops in Scotland and the North and South of England.

For further information on any of the above, please contact bioprocessuk@bioindustry.org

[www.bioprocessuk.org](http://www.bioprocessuk.org)

Astex Therapeutics

Astex Therapeutics is a world-leading UK based biotechnology company using an innovative fragment-based drug discovery platform to discover and develop medicines in areas of unmet medical need. Astex has successfully progressed its first two oncology compounds into clinical trials and has further programs progressing through preclinical development. All of the products we are developing have been discovered at Astex by our own scientists through the use of our own proprietary technologies. Astex also has significant research collaborations with some of the world's largest pharmaceutical companies. As a result of this continued success in our drug discovery programmes we are now seeking scientists to join our Cell Biology and Assay Biology groups.

Cell Biologist (ref 8-11ns)
A versatile and motivated Cell Biologist is required to support a range of preclinical oncology projects. The role will be laboratory based, and the successful applicant should have experience of mammalian tissue culture techniques such as proliferation assays and western blotting. Industrial experience and knowledge of the oncology area would be an advantage. Candidates should be educated to degree level in a biology-related subject or have equivalent industrial experience.

Assay Biologist (ref B-14ns)
A position is available within our assay biology group to support a range of projects, principally in the oncology area. The role will involve the running of enzyme-based screening assays to support compound testing. Candidates should be educated to degree level in a biology or chemistry related subject or have equivalent industrial experience. Some previous lab experience and knowledge of enzyme assays and screening formats would be an advantage, but full training will be provided.

The salary and benefits package will be highly competitive.

Please send your application, quoting the relevant reference, to Personnel, Astex Therapeutics Ltd, 436 Cambridge Science Park, Milton Road, Cambridge CB4 0QA, UK.
Tel: +44 (0)1223 226200,

Creating Software for Scientists and Engineers

• Are you looking for an exciting career in software design and development?
• Do you want to apply your scientific or engineering talents?
• Are you enthusiastic and diligent in your work?
• Do you want to work with like-minded people who are among the best in the industry?

Tessella is a leading supplier of software development and support services to some of the world's best scientific and technology organisations. We have a track record of over 25 years, adding value to our clients in sectors including: healthcare, environmental, oil & gas, chemicals, defence, energy, space, transport and manufacturing.

We are looking for scientists and engineers with proven programming ability to join our expanding business. You will be provided with extensive training and will have the opportunity to gain experience over a diverse range of projects.

You should have an excellent academic record, a degree in a numerate discipline (minimum 2.1), good communication skills, and experience in any of Java, NET, C#, C++ or C. Applicants with Masters / PhD's welcomed.

Apply via email quoting NS1106.

See www.tessella.com/jobs for further details.

Lonza

Individuality Matters…
Excellent reward packages + extensive career development opportunities

Lonza, a chemical and biotechnology company driven by the life sciences, generated sales of CHF 2.52 billion in 2005. Headquartered in Switzerland, Lonza operates 23 production and R&D sites around the world. Its 6400 employees are passionately committed to delivering sustainable value to their customers. Lonza is one of the leading custom manufacturers of chemical intermediates, active ingredients and biopharmaceuticals for the pharmaceutical and agrochemical industries. On the basis of organic chemicals and biotechnology platforms, Lonza creates value-added solutions for the nutrition, hygiene & personal care, wood & water treatment and industrial specialty markets.

We have a number of new positions within the Analytical Development department of our Biopharmaceuticals sector. Joining an existing team, you will support the department’s core activities, which could involve the testing of process related samples, assay transfer, assay evaluation, protein stability, protein characterisation and/or assay validation. This will involve interaction with other development departments, QC and QA groups and our customers, to ensure the timely completion of studies so you will need good interpersonal and communication skills. An understanding of cGMP and analytical method development and validation would be an advantage although training is available.

**Analytical Development Scientists: Protein Stability**
The group is responsible for the pre-formulation and stability studies performed as part of process and product development for recombinant antibodies and proteins produced by Lonza Biologics.

You should have a scientific degree or equivalent, which includes protein biochemistry as well as detailed knowledge and understanding of a range of analytical methods and their application for the investigation of proteins. An understanding of protein structure and function is desirable. Experience in chromatography, electrophoresis and spectrometric methods, gained in an academic or commercial environment, particularly in the area of protein degradation and stability would be an advantage.

**Analytical Development Scientists: Protein Characterisation**
The group is responsible for the detailed characterisation studies performed as part of process and product development for recombinant antibodies and proteins produced by Lonza Biologics.

Your degree should include protein biochemistry and you should have an interest in protein characterisation as well as commercial or academic experience of working with chromatographic, electrophoresis and/or mass spectrometric methods. Experience in the determination of protein primary structure and the profiling of post translational modifications by mass spectrometry will be required for Senior Scientist roles.

If you feel you meet the above criteria, please email your CV, quoting AD1006/NS to our Recruitment Team, at careers.stough@lonza.com or send your CV directly to Ruth Upton, Recruitment Department, Lonza Biologics Plc, 228 Bath Road, Slough SL1 4DX, UK.

For details on all our current vacancies please visit our website.

[2576-009 (2006) : 64]
OXFORD
bioMedica

Oxford BioMedica plc develops gene-based medicines for the treatment of cancer and neurodegenerative diseases. Two cancer products are in clinical trials and products for the treatment of Parkinson's disease, blindness and motor neuron disease are completing their pre-clinical evaluation. Due to the expansion of our clinical program, we are now looking to strengthen our Clinical Development Group with a Clinical Research Associate to play a key role in delivering the medical potential of our research.

Clinical Research Associate
The post holder must be able to demonstrate real understanding of the role of a CRA in monitoring pivotal registration studies and have a practical understanding of the issues that can arise and how to prevent or correct them.

You will be able to motivate clinical investigation staff to high levels of productivity while maintaining compliance with GCP.

You will initially be working on oncology studies but the portfolio includes entirely novel gene based therapies in neurological and ophthalmic indications.

This is largely a field based position requiring extensive UK travel and base location can be flexible. Some less frequent travel to Europe and the US will also be required.

Applicants should have a keen eye for detail and excellent interpersonal and communication skills. We offer competitive salaries, which are aimed at attracting and retaining the best people with recognised relevant experience. We offer a share option scheme, generous holiday allowance, childcare voucher scheme, health cash benefit plan, life assurance and a company pension scheme. A company car or car allowance will be provided for this position.

To apply, please send your CV to: HR Manager, Oxford BioMedica plc, Medawar Centre, Robert Robinson Avenue, The Oxford Science Park, Oxford, OX4 4GA, hr@oxfordbiomedica.co.uk

Closing date for applications is 15 November 2006.

Please see our website for more information: www.oxfordbiomedica.co.uk

[2576-010 (2006) : 64]
MEMBERSHIP RELATIONSHIP MANAGER

The BioIndustry Association is the trade body for innovative enterprise in the UK’s bioscience sector. We look after the industry interests of over 300 member companies in this sector plus associated professional service firms and network groups. For more information see www.bioindustry.org

Responsibilities will include:
• Developing working relationships with biotech organisations and other stakeholders, including membership recruitment and renewals
• Promoting long-term benefits of membership to new and existing members of the BIA
• Actively engaging with members through company visits, event attendance, seminar contribution etc
• Developing marketing campaigns and generating reports around membership financial activity

The ideal candidate will have:
• Two years’ experience post graduation in membership or relationship marketing activity, especially managing professional services
• Some experience gained in scientific research and an appreciation of the bioscience or healthcare industries
• Proficient communication skills including direct marketing campaigns
• Sound IT acumen and project management skills

Please apply with salary expectation, or contact for more information, Carolyn Ponder at cponder@bioindustry.org by Friday 10 November

BIA
[2576-011 (2006) : 64]
Solexa

Join the frontrunner in DNA sequencing

Solexa is a Nasdaq listed biotech company located in Cambridge and San Francisco. Its UK R&D facility is based 15 minutes south of Cambridge. Our aim is to revolutionise DNA sequencing, targeting the "thousand dollar genome".

**Software Engineers / Programmers** Ref. SP10061
You will be working on the next generation of ultra-high-throughput DNA analysis software, ranging from problems in efficient image analysis, through to the annotation and interpretation of whole-genome sequence data. You must:
- be educated to higher degree level in any numerate scientific discipline, requiring high-volume automated data analysis
- have demonstrable, suitable industrial or academic experience in scientific software development on UNIX, LINUX, MacOS or similar platforms
- be highly numerate with programming skills encompassing at least C/C++ and Perl/Python
- ideally have working knowledge of relational database systems and/or common bioinformatics analysis toolkits
- be able to demonstrate a track record of project delivery within an objectives-oriented environment.

**Quality Control Technician** Ref. QC10061
You will be responsible for inspecting incoming and in-process materials in a manufacturing environment. You will require an understanding of analytical processes and have experience in manufacturing operations. Experience with oligos and fluorescent dyes is preferred.

**Molecular Biology Technician** Ref. MT10062
If you are a graduate or equivalent in a life science discipline, we have opportunities in our molecular biology department. You would work as part of a leading-edge, interdisciplinary team, assisting in the processing of customer samples and the development of new applications.

Experience of working in a molecular biology lab or in a sequencing facility is essential. You must be able to demonstrate high accuracy and attention to detail.

**Scientists – Technology Development** Ref. ST10061 and **Molecular Biology** Ref. SM10061
(Three 9 month fixed-term contracts to provide maternity cover plus one permanent contract)

In the molecular biology group, there are two vacancies for post-doctoral molecular biologists to provide maternity cover (SM10061), and both fixed-term and permanent vacancies for post-doctoral scientists with experience of technology development (ST10061).
For SM10061, you would be:
- developing new methods of sample preparation for customer-driven applications, or
- working on the methods to improve the throughput and performance of the sequencing platform.

For ST10061, you would be:
- participating in the operation of our sequencing instruments, and analysing and optimising run performance to deliver robust improvements to the sequencing protocols.

For SM10061, a strong background in recombinant DNA technology is necessary. For ST10061, we require significant experience in assay development and protocol optimisation, preferably with new technology platforms.

For all posts, attention to detail, high accuracy, excellent communication skills and the ability to work as part of a team are essential requirements.
To be considered, send a covering letter quoting the relevant reference, together with your CV, to Abigail McElligott, Solexa Ltd., Chesterford Research Park, Little Chesterford, Nr Saffron Walden, Essex CB10 1XL.
Email: uk_hr@solexa.com No agencies please. See our website at www.solexa.com

Safeguarding public health
We're always watching. (not in a scary way)

It's what we do. From medicines to medical devices, safeguarding public health is always at front of mind. Working for us places you in a unique position - not only will you be contributing to a vitally important service, but you'll play a significant part in the future of medical treatments and technologies.

Central London

**Regulatory Submission Group Team Leader**
c25k
You'll oversee and allocate workloads and co-ordinate resources to ensure that our targets and SLAs are met and exceeded. It's about strong attention to detail, excellent time management and well-developed organisation skills. Experience in a team leadership role will be highly valued, along with a relevant degree.

**Regulatory Affairs Specialist**
c20k
You'll be a key team member supporting regulatory activities under the Medical Devices Directives. This will involve reviewing Notified Body applications and audit responses, and communicating the outcome to relevant parties, as well as handling clinical investigations and regulatory enquiries. Degree educated in a relevant discipline, you'll be a confident communicator - often involving complex issues.

We offer an amazing benefits package that includes flexible working, generous holidays, non-contributory pension and on-site gym.

For more information and to apply, please visit [www.mhra.gov.uk](http://www.mhra.gov.uk)

Closing date: 16th November 2006.

**POSITIVE ABOUT DISABLED PEOPLE**
**INVESTOR IN PEOPLE**

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

De Lacy Executive

RESEARCH AND DEVELOPMENT MANAGER

An R & D Manager, midlands based, is sought to support the farm management team through research commissioning and direction, to dissemination of outcomes. A priority is to plan and implement a programme of research developed from economic drivers.

Candidates, educated to PhD/MSc level in an agricultural or related science, must have an understanding of scientific methodologies, at least three years undertaking research, small team and project management to ensure deadline delivery within the £1 million budget. Ability to work at all research levels, to lead a team of Portfolio Managers, to identify priorities, to make an effective case for expenditure and to develop a concept to fruition will be required. It will be fundamental to distil complex outcomes to clear, concise messages for farmers.

First interviews will be 6th to 14th November and short list interviews on 21st November.

Please contact JOHN DAVIES on 01432 820912 to 8.30pm, e-mail to johndavies@delacyexecutive.co.uk or visit www.delacyexecutive.co.uk [2576-016 (2006) : 66]
POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
dstl
Dstl is part of the Ministry of Defence

Protect the lives of our Armed Forces
Porton Down, nr. Salisbury, Wilts

Dstl, the Defence Science and Technology Laboratory is a centre of scientific excellence, which ensures that the MOD and Government are supported by world-class advice. Our expertise in chemical, biological, radiological and nuclear (CBRN) defence is currently in particular demand. So by joining our Simulation Physics Group (SPG), you will play a key role in combating these threats and protecting the lives of our Armed Forces.

**Mathematical Modellers**
Up to £37,500 & benefits

**Assistant Mathematical Modellers**
Up to £27,500 & benefits

You’ll develop a range of CBRN models, focusing on atmospheric dispersion, sensors, equipment and countermeasures. Gathering information on customer requirements, you’ll formulate and implement the models, before liaising with the group’s software engineers to transform them into computer programs.

A mathematics, statistics or physical science graduate, you should have detailed knowledge of developing mathematical modes of physical systems, gained in academia or industry. An understanding of any of the following would be useful: physical principles of detectors and protective equipment; meteorology/fluid dynamics; chemical and biomedical sciences; probability; data fusion/assimilation; optimisation techniques; risk assessment; development of empirical models or programming skills.

At a senior level, a relevant postgraduate qualification or equivalent experience would help.

You must be able to keep up to speed with new problems and work independently, also possessing the communication skills to pass on your models to software engineers and present them to colleagues. The flexibility to travel abroad, particularly to the US, is also expected. Ref: 020954NS

**Software Engineering Lead**
Up to £37,500 & benefits

You’ll provide technical leadership of software projects within the SPG, ensuring software quality and project delivery by gathering information on model specifications from our mathematical modellers and transforming them into computer programs that support the UK Armed Forces. As well as liaising closely with scientists, you’ll deliver presentations to colleagues and customers on current and future CBRN defence research.

A computer science, software engineering or similar graduate, you’ll have a successful record of leading software teams in the production of components and full software systems in an object-oriented environment. With a firm grasp of the software development lifecycle and design methodologies such as UML, you’ll show proven ability in one or more of the following areas: web service development; distributed simulation interoperability; parallel processing; AI including intelligent search techniques; 3D-visualisation technologies or database development. As well as being able to work quickly and efficiently on your own initiative, you’ll be an effective team player who can build strong relationships across the SPG and Dstl. Ref: 020994NS

In addition to a stimulating and rewarding career, as a civil servant you’ll enjoy a competitive benefits package. This includes a choice of pension schemes, a generous holiday allowance, childcare vouchers...
(for pre-school children), relocation assistance where appropriate, good sports and leisure facilities, and flexible working hours.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

Dstl is committed to diversity and recruits on the basis of specified competencies and skills. These permanent posts are only open to UK Nationals who are willing to satisfy Government/MOD security vetting procedures.

For an application pack, please contact, quoting the relevant reference, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk Tel: 020 7553 9120 (9.30am - 5.30pm). If you have a hearing impairment we are happy to accept Typetalk calls. Closing date: 16th November 2006. Interviews will take place, week commencing 18th December.

*aia is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

www.dstl.gov.uk
[2576-017 (2006) : 67]
Innovata is a pharmaceutical development company with specialised skills, competences and a fully integrated approach to developing Dry Powder Inhalation products, utilising proprietary devices and formulation technologies. We are seeking to recruit a number of individuals who have the vision and capability to deliver within a challenging and rewarding environment, where every individual plays a key role in the company's success.

**Technical Team Leader**
You'll be experienced in the development of solid dosage forms and preferably dry powder formats for inhalation, possessing a good appreciation of powder technology, process optimisation, scale up and manufacturing. Experienced in working to cGMP, you'll also be familiar with the EU and US regulatory landscape. As a strong leader, you'll have excellent communication and organisational skills to ensure the highest standards are achieved. You will have a chemistry or pharmaceutical science degree, and preferably a post graduate qualification having worked within the pharmaceutical industry to gain further relevant supervisory experience.

**Senior Formulation Scientist**
This is an exciting new role engaged in the development of novel dry powder dosage forms for respiratory products. Applying your expertise, you'll work on a wide range of formulations and characterisation techniques, encompassing early phase research through to transfer to cGMP manufacturing facilities. You will have a degree and probably a PhD in pharmaceutical science or chemistry and a proven background in a product development role within the pharmaceutical industry.

**Senior Analytical Chemist**
Joining a talented team, you'll work cross-functionally in a project based role with a brief to plan, design, develop and validate methodologies for testing dry powder respiratory products. You will have a keen interest in analysing data and determining trends, particularly when products are placed on stability. You will possess excellent reporting skills and the ability to organise your own time to drive both yourself and those around you. We are seeking a minimum first degree in chemistry with experience from working within the pharmaceutical industry, preferably in a related product development role.

**Clinical Study Report Manager** - 6 - 9 month Fixed Term Contract
Joining a small clinical team, you will have responsibility for monitoring and closing studies to ICH-GCP. A major responsibility will be to author Clinical Study Reports for three clinical studies. Self motivated and organised, you will monitor and audit all data obtained from external collaborators. UK travel will be involved. We are seeking proven clinical monitoring and report writing skills for this post.

For a confidential discussion please contact Peter Rowland on 01865 728742. Email your CV to peter.rowland@reed.co.uk, or send to Peter Rowland, Reed Scientific, 8 High Street, Oxford OX1 4A8.

All CVs sent directly to Innovata will be forwarded to Reed Scientific.

innovata plc
THE ROYAL SOCIETY

Manager Innovation Policy

The Royal Society, the UK’s premier scientific body, has a vacancy in its Science Policy Section, which provides an excellent opportunity for a talented and motivated individual to lead its activities on the exploitation of university research and innovation.

£30,000 - £35,000 per annum

As part of the Society's Science base and Innovation team, you will work directly on projects in the area of exploitation of university research, and innovation more generally. Drawing on the expertise of leading scientists, engineers and other experts, you will deliver the Society's input to national and international policy in these areas, and will contribute to the development of the Society's own related activities (eg funding). You will take the lead in the development and execution of new projects focusing on issues such as: scientific entrepreneurship; protection and exploitation of intellectual property; barriers and incentives relating to knowledge transfer from universities; and UK and EU funding schemes aimed at promoting innovation and knowledge transfer.

You will be expected to have experience of policy work in innovation, for example from a university, Regional Development Agency, Research Council or industry, and have a good knowledge of the higher education sector. You will also be expected to have excellent interpersonal and communication skills and experience of managing staff.

If you require further information, or have queries, please e-mail: science.advice@royalsoc.ac.uk
Further information about the work of the Science Advice Section can be found at www.royalsoc.ac.uk/policy.

Benefits include: 26 Days paid holiday • Flexitime hours • Final salary pension • Childcare vouchers • Season Ticket Loan • Private health care • Staff restaurant • Staff association.

Applicants can download further information and an application form from www.royalsoc.ac.uk or email recruitment@royalsoc.ac.uk quoting the reference number V24.06.

Closing date is 21 November 2006, initial interviews to be held on 28 November 2006.

Registered charity No 207043
Join the market leader

BSi is the world's leading certification body, due to an internal promotion and the continuing expansion of our Healthcare business we are seeking additional specialists. BSi performs certification activity as a Notified Body under the European Medical Devices Directive and offers complete registration services for ISO13485, including for the manufacture or terminally-sterilised devices.

BSi

**Medical Device Specialists** (Ref NB1)

We are seeking dynamic individuals experienced with polymeric, electronic, orthopaedic, cardiovascular, and ophthalmic or woundcare devices to work within the Notified Body. Candidates with a strong background in general devices or implants will also be considered. As part of the overall client management responsibilities, successful candidates will be competent to review critical design data (including risk analyses, biocompatibility, clinical investigation data, and post-market surveillance information), to prepare recommendations for EC certifications. In-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. The position is based at our Hemel Hempstead office; however occasional UK and overseas travel will be required.

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided.

All positions offer a competitive salary, pension and benefits. Interested and qualified candidates should submit a copy of their CV, together with their current remuneration package and the appropriate reference number for the vacancy.

Applications to Human Resources, British Standards Institution, Maylands Avenue, Hemel Hempstead, Hertfordshire HP2 45Q. Email ps.applications@bsi-global.com Telephone: 01442 230442

Successful candidates will be contacted within 2 weeks.

Progress Through Partnership

BSi

SERVIER
Life through Discovery

SERVIER is France's 2nd pharmaceutical group employs 17,500 people worldwide, and has achieved a consolidated turnover of € 2.8 billion.

Our success depends upon the dynamism of our research directed towards the discovery of novels drugs, mainly in diabetes, cardiovascular disease, neuroscience, oncology, bone and joint disease.

Thanks to its 2,600 specialised researchers, our growing company has a pipeline of drugs in development. A leading international pharmaceutical company is proposing a:

Post-doctoral position in Chemoinformatics M/F

A post doctoral position in chemoinformatics is opened in the Pharmacokinetics and Metabolism Laboratory located in ORLEANS France.

Involved in the discovery and early development phases of new drugs, you will have to set up new strategies to characterise and predict interactions of drugs with in vitro and/or in vivo biological environments. This includes interactions with drug metabolism proteins (enzymes, transporters, receptors, etc.) as well as the implementation of new tools to optimise the exploitation and prediction of ADMET data.

This position is open to a PhD student or graduate in chemoinformatics, bio informatics, molecular modelling. A good knowledge in QSAR involving chemometry approaches is required. A solid background in protein modelling and/or molecular dynamics, previous experiences with GRID as well as a programming skills (C, C++, java, pearl, python) will be considered as an added value.

If you have a creative mindset, associated to strong communication skills for working with several departments you will find in this position a real opportunity for developing your capabilities in the attractive field of data mining and implementation of robust and new predictive chemoinformatic tools.

For more information, please contact us at the following address Marie-Caroline de LANGLAIS Technologie Servier, 27 rue Eugène Vignat 45000 Orléans (FRANCE) e-mail: marie-caroline.delanglais@fr.netgrs.com.
By joining the Royal Society of Chemistry’s graduate training programme, you’ll not only help to shape the development of our science publishing activity, but you’ll also help to set your career in motion or in a new direction.

We’re looking for people who’ve studied chemical science or a related subject. For all opportunities we ask for an honours degree, Masters or PhD – along with excellent communication and organisational skills.

We’ll invest both time and money in your personal development and give you all the skills you need for a successful publishing career. You’ll also receive a salary starting from £19,731 plus pension, life assurance and private health insurance.

For further information about the RSC, the graduate training programme and how to apply, please visit: www.rsc.org.

Alternatively, if you do not have access to the Internet contact HR on 01223 432238 (24 hours) quoting Ref: 66.

Closing date: 16 November 2006.

We welcome applications from all sectors of the community and value diversity.

POSITIVE ABOUT DISABLED PEOPLE
RNOH STANMORE, MIDDLESEX
[2576-024 (2006) : 70]
Applications are being invited for one or more tenure-track faculty positions at the Institute for Quantum Computing (IQC) with the Department of Physics and Astronomy. The search is focused on experimental physicists (Junior or Senior) with strong research accomplishments in the field of quantum information (although exceptional theorists will also be considered). Successful candidates will hold a faculty position in the Physics and Astronomy Department with a cross-appointment to IQC, leading to teaching reduction and a stipend. Responsibilities will include the supervision of graduate students, as well as some teaching at the undergraduate and graduate levels. Salary will depend on the candidate's qualifications. Effective date of appointment is negotiable. These appointments are subject to the availability of funds. All qualified candidates are encouraged to apply; however Canadian and permanent residents will be given priority. The University of Waterloo encourages applications from all qualified individuals, including women, members of visible minorities, native peoples, and persons with disabilities.

The University of Waterloo is host to the Institute for Quantum Computing (IQC). Information about IQC personnel and activities can be found at www.iqc.ca The IQC, at present, includes 14 faculty in quantum information from the Faculties of Engineering, Mathematics and Science. The Physics department, http://www.science.uwaterloo.ca/physics is part of the Faculty of Science and has thriving groups in astrophysics, biophysics, condensed matter, optics and quantum information. The candidates will also have the opportunity to interact with scientists at the nearby Perimeter Institute for Theoretical Physics, and UW's Centre for Applied Cryptographic Research.

Interested individuals should send curriculum vitae, selected reprints/preprints and the names of three references to the Chair of the hiring committee:
Prof. Raymond Laflamme, Director e-mail: laflamme@iqc.ca
Institute for Quantum Computing phone: (519) 888-4021
University of Waterloo fax: (519) 888-7610
Waterloo, Ontario, Canada N2L 3G1

The deadline for receiving applications is 15 December 2006
(late applications may be considered if any positions remain unfilled).

Business Development Manager
2 positions – field based

Tepnel is expanding its contract analysis business significantly within the Pharmaceutical and Biopharmaceutical sector through the construction of a state-of-the-art facility in Scotland. We require two field based individuals who are ambitious and motivated to build substantial new business and to work closely with colleagues at an operational level to ensure a seamless solution provision.

Well versed in the contract research sector and the techniques applicable to providing a regulatory compliant solution within the drug development pipeline, the successful candidates will also bring an awareness of the current market environment within the UK and EU. Key to success in this role will be the ability to forge strong relationships with decision makers in blue chip pharmaceutical companies, biotechnology start-ups and drug manufacturing companies.

To apply, please download and complete the application form on our website at www.tepnel.com and send with your CV to Elizabeth Marshall, HR Manager, Tepnel Life Sciences, Heron House, Oaks Business Park, Crewe Road, Wythenshawe, Manchester, M23 9HZ. Telephone: 0161 946 2200 or email careers@tepnel.co.uk for a job description and more information or visit www.tepnel.com/careers.

Closing date 10 November 2006.

INDUSTRIAL POSTDOCTORAL FELLOWSHIPS
ELI LILLY AND COMPANY  SURREY

The Lilly Postdoctoral Fellowship Program is a focused scientific training period of up to three years, enabling a PhD to gain and expand scientific expertise while working under the direct supervision of a senior Lilly scientist. The program provides valuable experience which will prepare the Fellow to pursue future opportunities in academia or industry.

Two positions are available for Synthetic Organic Chemists. Projects will investigate synthetic strategies to enable development of pharmacologically interesting templates. For both positions, you should have recently completed a PhD in organic chemistry. For one project, some experience in the use of robotic synthesis is preferred.

Candidates for both positions should have an academic record of scientific excellence, a flair for independent research and a strong interest in interdisciplinary approaches and collaboration. The positions are available from January 2007.

To apply, please send a CV and the names/addresses of two referees to: Personnel Selection On-Site Office, Erl Wood Manor, Lilly Research Centre, Sunninghill Road, Windlesham, Surrey, GU20 6PH, or E-mail personnel selection@lilly.com.

GREENPEACE

Knowledge   Commitment   Action

Take strong action for the environment and apply for a position within the Greenpeace International Research Unit, Amsterdam, Netherlands.

At Greenpeace International, we share your passion for the global environment and your desire to progress positive changes within local contexts. We understand your commitment to sharing knowledge and your ability to convert knowledge into action. Sound knowledge informs all of our work within the research unit - from the investigative tools and techniques we employ, through publications and the advice that we infuse into international campaign strategies.

**International Research Coordinator- Energy/Climate/ Disarmament**

**International Research Coordinator- Forests/Oceans**

You are a strong project manager and communicator, with an appropriate science background and proven investigative skills. You are as confident defining and implementing information acquisition strategies as you are leading and managing a team working on complex international environmental projects. You will be a key member of multiple project teams, coordinating and conducting investigative research, informing and advising international campaign projects, and developing and providing training in intelligence gathering and information analysis across the global organisation.

It's time for action. Be the change you need to see in the world.

For the job description, please search JOBS on our website:
http://www.greenpeace.org/international/about/jobs

Please send your complete application, with a detailed covering letter, your latest detailed CV (including academic grades) in the format specified in the job description to int.recruitment@greenpeace.org

Application deadline: 26th November 2006

Revolymer Ltd

**Development Scientists - N. Wales**

The company
Revolymer Ltd is a new polymer company focusing on developing removable chewing gum and novel gum based formulations for various product applications including drug delivery, cosmetics and paints. The Company is expanding into its own technical centre in N. Wales and is in the process of establishing a high class technical team. We are now looking to appoint a number of development scientists to carry out project work.

The role
The work will involve carrying out preparations of new polymers and formulations for application in gum bases, coatings and drug delivery systems. The positions will attract a competitive salary with additional benefits including 25 days holiday, flexible working and subsidized canteen facilities.

The person
Applicants should be qualified to at least BSc or equivalent in chemistry or polymer science and have some experience working with polymers, scale-up of polymers and/or polymer formulation gained either in industry or academia. Knowledge of formulation testing and of polymer analysis using nmr, gpc and/or hplc would be advantageous.

Good team working and problem solving skills are essential for this role.

To apply for one of these positions, please forward a CV with a covering letter highlighting your skills and experience to careers@revolymer.com

More information can be found on www.revolymer.com

Be valued. Be supported. Be rewarded.

**Laboratory Data Manager** (Ref: 2500)

**£Competitive + Benefits**  
Welwyn Garden City, Herts

At Roche, we believe passionately in what we do, and that our products make a difference in people’s lives. We are a successful business that can offer exciting career opportunities to you, both locally and internationally, in a supportive and rewarding culture. We know that our people are responsible for our success, which is why we aim to create a work environment where feeling valued, respected and empowered is a daily experience.

As part of a small specialist team, you will manage laboratory data collected in clinical trials across a range of therapeutic areas for phases II to IV of drug development. As well as overseeing the accurate input of laboratory data, your responsibilities will include maintaining a database of reference ranges and units, reviewing data and working in cross-functional teams to provide advice and support to global central laboratories.

We are looking for a well-organised team-worker who combines a science degree with previous laboratory experience - ideally gained in a hospital/NHS environment. You must also be familiar with common methods used for clinical laboratory tests.

[2576-032 (2006) : 72]
Are you looking for an exciting new challenge, but still applying your research, engineering or software expertise? Are you a graduate with at least a 2:1 Honours degree? Do you have excellent analytical and communications skills and the ability to think laterally?

D Young & Co is a large but friendly firm of European Patent and Trade Mark Attorneys active across a diverse range of science and engineering disciplines. To strengthen our team we are seeking to recruit several graduate trainee Patent Attorneys for our Southampton office with relevant knowledge in one or more of the following areas:

- Software Engineering
- Physics-based Technologies
- Electronic, Electrical or Mechanical Engineering
- Audio and Video Systems

Our clients include several world renowned university research centres and a mixture of large and small corporations. You would handle a broad variety of technical subject matter in accordance with your skills and experience. A comprehensive structured training programme will be provided towards a qualification through national and European professional examinations as a Patent Attorney.

Interested candidates should send their CV, with a covering letter, to:

Jennifer Mead, Human Resources Manager, D Young & Co, Briton House, Briton Street, Southampton, SO14 3EB:

Email: recruitment@dyoung.co.uk

Closing date for applications: 24 November 2006

We're not just the oldest police service in the world.
We're also the most modern.

**IMAGE ANALYST**
£36,773, incrementally rising to £41,851, plus £1,595 location allowance • London SE26

The Met is on the move as never before. Keeping London safe by listening and responding to new ideas, new technologies and, above all, new people. Working as one team we're making this a police service to be proud of today and finding ways to be even better tomorrow.

As part of the video laboratory team you will be responsible for applying scientific, technological or analytical skills to video and still images, improving their value as potential evidence. You must be prepared to attend court and case conferences giving expert opinion and testimony. You may also be required to assess the work of other experts, providing constructive analysis.

Appropriately qualified, you should have relevant experience in photogrammetry, image and object comparison, facial analysis, estimation, differential comparison, measurement from video, gait analysis, or other related area of expertise. Ideally, you should be able to provide a proven track record or portfolio of work undertaken. Team skills, flexibility and the ability to research and apply new techniques are essential.

In return, we offer a range of benefits that include choice of pension scheme, interest-free season ticket loan, generous holidays and access to an active sports and social club.

To apply, please visit our website to download an information pack and application form. If you have any queries please email our Recruitment Team at Dol.Recruitment@met.police.uk quoting reference number DOI/TEC/070.

Completed applications must be returned by 14th November 2006.

Please note, we will only review the first 25 completed application forms received.

Working together for a safer London

Lonza

Individuality Matters…
Excellent reward packages + extensive career development opportunities

Lonza, a chemical and biotechnology company driven by the life sciences, generated sales of CHF 2.52 billion in 2005. Headquartered in Switzerland, Lonza operates 23 production and R&D sites around the world. Its 6400 employees are passionately committed to delivering sustainable value to their customers. Lonza is one of the leading custom manufacturers of chemical intermediates, active ingredients and biopharmaceuticals for the pharmaceutical and agrochemical industries. On the basis of organic chemicals and biotechnology platforms, Lonza creates value-added solutions for the nutrition, hygiene & personal care, wood & water treatment and industrial specialty markets.

We have a number of new positions within the Analytical Development department of our Biopharmaceuticals sector. Joining an existing team, you will support the department’s core activities, which could involve the testing of process related samples, assay transfer, assay evaluation, protein stability, protein characterisation and/or assay validation. This will involve interaction with other development departments, QC and QA groups and our customers, to ensure the timely completion of studies so you will need good interpersonal and communication skills. An understanding of cGMP and analytical method development and validation would be an advantage although training is available.

**Analytical Development Scientists: Protein Stability**
The group is responsible for the pre-formulation and stability studies performed as part of process and product development for recombinant antibodies and proteins produced by Lonza Biologics.

You should have a scientific degree or equivalent, which includes protein biochemistry as well as detailed knowledge and understanding of a range of analytical methods and their application for the investigation of proteins. An understanding of protein structure and function is desirable. Experience in chromatography, electrophoresis and spectrometric methods, gained in an academic or commercial environment, particularly in the area of protein degradation and stability would be an advantage.

**Analytical Development Scientists: Protein Characterisation**
The group is responsible for the detailed characterisation studies performed as part of process and product development for recombinant antibodies and proteins produced by Lonza Biologics.

Your degree should include protein biochemistry and you should have an interest in protein characterisation as well as commercial or academic experience of working with chromatographic, electrophoresis and/or mass spectrometric methods. Experience in the determination of protein primary structure and the profiling of post translational modifications by mass spectrometry will be required for Senior Scientist roles.

If you feel you meet the above criteria, please email your CV, quoting AD1006/NS to our Recruitment Team, at careers.stough@lonza.com or send your CV directly to Ruth Upton, Recruitment Department, Lonza Biologics Plc, 228 Bath Road, Slough SL1 4DX, UK.

[2576-035 (2006) : 74]
Dwr Cymru Welsh Water supplies water to 1.2 million customers across Wales and the English borders. Our primary objective is to provide an efficient and valuable service to our customers. To support this, Welsh Water operates a unique structure within the water industry in the UK, with no shareholders and run solely for the benefit or our customers. Our operating area is one of the most beautiful and protected environments within the UK and presents exciting and interesting challenges in the management of water resources.

The Role
We are currently seeking a Water Resources Area Manager. The successful applicant will join the Water Strategy Team, within Asset Strategy, based near Cardiff in South Wales. Primarily you will support the Water Supply Manager in managing the processes necessary to ensure the supply available is optimized to meet existing and future water demands. The main responsibilities are:

- Managing regulatory issues and relations associated with licensing and river regulation.
- Monitoring the utilization of water resources by the Operator to ensure compliance with abstraction licenses and reservoir rule curves.
- Managing relations with service providers over the operational management and hydrometric monitoring of water resources and abstractions
- Understanding the Hydrology, Resource and Water Treatment Works hydraulic performance associated with the supply systems
- Providing information and support in compiling and maintaining water resource plans and drought plans.
- Reconciliation and management of regulatory data
- Preparing abstraction returns and other required returns and reports to the EA and Ofwat
- Representing DCWW with regulatory processes

The Applicant
We are seeking a candidate with experience in the water industry, working in one or more of the following areas:

- Water operations
- Principles of supply / demand balance
- Regulatory returns / reporting
- Abstraction Licensing
- Communications / management at senior management level
- Experience of dealing with key stakeholders

A background in water resources and hydrology would be advantageous however Dwr Cymru would consider candidates who have operational experience in other areas of the water industry as long as knowledge and interest can be demonstrated. You should also have the ability to communicate effectively as there will be key relationships within internal DCWW colleagues, our operational contact partners, the Environment Agency Wales and other key stakeholders.

The position
This is a permanent post within Dwr Cymru and will have a salary in the range of £26,252 - £30,000. This post is pensionable and will benefit from inclusion in the DCWW staff reward scheme. The post will be eligible for Car Allowance and the BUPA Health Scheme.
If you are interested in this post and would like an informal discussion please contact Marc Davies on 01443 452533.
If you would like to apply for the post then please send your CV, by the closing date of Monday 20th November 2006, either via email to Sharon.walsh.jones@dwrcymru.com or by post to Sharon Walsh Jones, Dwr Cymru Welsh Water, HR Department, P.O. Box 60, Caernarfon LL54 5WA.
Dwr Cymru Welsh Water is an Equal Opportunities Employer.

[2576-036 (2006) : 74]
Dwr Cymru Welsh Water supplies water to 1.2 million customers across Wales and the English borders. Our primary objective is to provide an efficient and valuable service to our customers. To support this, Welsh Water operates a unique structure within the water industry in the UK, with no shareholders and run solely for the benefit or our customers. Our operating area is one of the most beautiful and protected environments within the UK and presents exciting and interesting challenges in the management of water resources.

The Role
We are currently seeking a Graduate Water Resource Planner. The successful applicant will join the Strategic Water Resource Team, within Asset Strategy, based near Cardiff in South Wales. Primarily you will support the Strategic Water Resources Manager in meeting our regulatory requirements to deliver the Water Resources Plan and the Drought Plan. However, water resources is an area currently of significant change and innovation and there will be considerable scope to work on a wide range of projects in the area of water resource and hydrology.

Dwr Cymru Welsh Water is also dedicated to providing the opportunities to the right graduate to develop their knowledge and build upon their academic qualifications in a practical environment. The position would offer the opportunity for placements across the business, but particularly within the operational water resource areas. We will provide development opportunities through a programme of training and developmental courses.

The Applicant
We are seeking a candidate with a relevant masters degree in water resources and hydrology. However, Dwr Cymru Welsh Water would also give consideration to a graduate with a relevant first degree who can demonstrate enthusiasm in this area and would like to further their development ‘on-the-job’. As part of the graduate programme, we would consider supporting the right person through additional academic qualifications.

Ideally you should have a good understanding in the following areas:
- Water resource planning
- Current Legislative Requirements
- Climate Change
- Habitats Directive

You should also have the ability to communicate effectively as there will be key relationships within internal DCWW colleagues, our operational contact partners, the Environment Agency Wales and other key stakeholders.

The position
This is a permanent post within Dwr Cymru and carries a competitive salary. This post is pensionable and will benefit from inclusion in the DCWW staff reward scheme. The post will be eligible for Car Allowance and the BUPA Health Scheme.

If you are interested in this post and would like an informal discussion please contact Marc Davies on 01443 452533.

Cefas

**Marine Scientist - GIS**  
From £22,428 p.a. • Lowestoft • Ref: NH/85/06

Cefas is a lively, thriving scientific research centre delivering solutions to meet the diverse needs of organisations in marine, coastal, estuarine and freshwater environments.

Specialising in spatial analysis within a GIS environment, you will develop and apply analytical methods to advise on the implications of human activities on the marine environment. You will develop innovative and spatially explicit approaches to interpret marine geospatial data whilst supporting and leading sub-topics within marine science research programmes using GIS modelling techniques.

You will have gained expert knowledge in at least one GIS package in your post-graduate research experience and have experience of initiating and developing GIS-based research projects. An exceptional team worker with sound communication skills, you will be able to demonstrate your track record of success by your record of publications.

Our competitive salaries and performance related bonus of up to 9% of salary are supported by a comprehensive benefits package that includes the flexibility of either final salary or a stakeholder pension.

For further information and to apply please go to [www.cefas.co.uk/vacancies](http://www.cefas.co.uk/vacancies).

Closing date is 17 November 2006.

Cefas is an equal opportunities employer and welcomes applications from all sections of the community. Part-time working and job share applicants are welcome. Disabled applicants who meet the minimum essential criteria will be guaranteed an interview.

Pharmaceutical R&D is at a crossroads, but would you be able to identify the key issues? Are you keen to learn more?

Thomson Scientific is a market-leading provider of information solutions for the pharmaceutical industry. We now have a number of openings for motivated, resourceful graduates/postgraduates to join the dynamic editorial team responsible for producing our drug information products, in particular the flagship Thomson Pharma database.

Commissioning Editor-Drug Evaluations (Ref: TSDI-CE)
You will commission key opinion leaders to write comprehensive reviews on investigational drugs, identified and researched by you, for publication electronically and in print. You will edit submitted material to monthly deadlines and will enjoy writing additional content, as well as ensuring that all associated records on our databases are accurate and up to date.

Commissioning Editor-Journals (Ref: TSDI-JE)
The role involves coordinating the content of a bi-monthly review journal, Current Opinion in Molecular Therapeutics, and editorial input into the Thomson Pharma database. Liaising with key opinion leaders in academia and the pharmaceutical industry on a day-to-day basis, commissioning and editing journal content and associated records in the Thomson Pharma database will be the main activities.

Editor-Drug Information Meetings (Ref: TSDI-ME)
The Drug Information Meetings team is responsible for one of the fastest and most comprehensive meeting reporting services for the pharmaceutical industry. In this role, you’ll identify relevant meetings, commission reviews from industry experts, and process the submitted material for publication, while simultaneously updating all relevant drug and company records on our databases.

Successful candidates will have a good BSc or higher degree in a life science or medicinal chemistry, although strong candidates with a background in organic chemistry will be considered. For the Journal position, a degree/MSc/PhD or equivalent in a biological science (with a molecular biology component), molecular biology or biotechnology is preferred.

Excellent written and verbal communication skills are essential, while all positions require a good head for research and impeccable attention to detail. In return we’ll provide thorough training, the opportunity to attend international scientific and industry meetings and a competitive benefits package.

To apply send your CV, together with a covering latter, stating which position you are interested in, to ts-ukrecruitment@thomson.com Closing data for applications is Friday 10th November 2006. Please note that if you have not received a response from the Company within 4 weeks of the closing date, you should assume that your application has been unsuccessful.

Thomson Scientific is part of the Thomson Corporation.

There’s a future waiting to be discovered.

It’s an exciting prospect. The chance to work with a unique organisation which offers talented professionals the chance to transcend traditional scientific boundaries with leading R&D partners and make a direct contribution to Scotland's economy. With a projected £150 million budget, we play an active role in transforming early-stage research into a package of intellectual assets, complete with clear commercial ambitions for onward exploitation. Our expanding range of exciting, innovative programmes is carried out in a collaborative team culture that welcomes the freshest, brightest thinking. Now you can be part of it.

**Intellectual Property Commercialisation Director**
Commercially experienced, and with knowledge of intellectual assets exploitation, valuation and contracts, you'll be responsible for all aspects of ITI Life Science's commercial arrangements with external parties. Your key remit will be to maximise the production and commercialisation of intellectual assets from programmes to secure the appropriate economic benefits for the Scottish economy.

**Marketing & Communications Director**
With significant marketing and communications experience, you'll provide invaluable Marketing and PR support for R&D programmes and ensure that ITI Life Sciences actively engages with both its membership and other external parties, including potential partners.

**Technology Analyst**
Foresighting and programme selection will be your key focus. You'll need technical capability in medical devices, diagnostic systems or advanced imaging, together with experience of either biomaterials, rapid prototyping, microfabrication, sensor development, implants or novel detection modalities.

**Intellectual Property Licensing Manager**
Valuing and negotiating contracts for both in-licensed and out-licensed technologies, you'll work with external partners to ensure that the IP generated from our programmes is commercialised successfully. Relevant experience in IP commercialisation or technology-based business development is vital.

If you can offer substantial life sciences experience, and a genuine passion for turning ideas into reality, please visit [www.iti-discoveranewfuture.co.uk](http://www.iti-discoveranewfuture.co.uk) Here you'll find more information on the roles and details of how to apply. All roles are based in our Dundee office.

Postdoctoral Position in Protein-Protein/ Small Molecule Molecular Modelling

A postdoctoral scientist with experience in molecular modeling is required to work on the discovery and development of novel "molecularly targeted" anticancer agents working through the inhibition of protein-protein interactions in tumour-relevant signaling pathways.

The successful candidate will focus on the computational and modelling aspects of the research programme including the study of protein-protein interactions along cellular signalling pathways, the investigation of small molecule interactions with proteins, and the development of in silico chemical libraries for screening against models of protein targets.

The ideal candidate should have a PhD in a relevant area (e.g. chemical, biological or physical sciences), and experience in molecular simulations packages (e.g. AMBER), docking programs, bioinformatics software and commonly used molecular modeling interfaces. A research background in synthetic organic chemistry would be an advantage. Candidates should also possess excellent organisational, communication and presentational skills, and enjoy working in a multi-team multidisciplinary environment.

A covering letter and a full CV should be sent to Professor David Thurston at the above address or e-mailed to david.thurston@pharmacy.ac.uk

Note: Although current funding expires in September 2007, subject to a successful review by CR-UK, it is anticipated that the post will continue beyond this.

Creativity, enthusiasm and motivation to succeed...
...are just three of the qualities we are looking for in people who want to join us as

**Career Track Fellows**
The Roslin Institute and the Neuropathogenesis Unit of the Institute for Animal Health are merging as part of the development of the Easter Bush Research Centre (EBRC), a new world class research institute in Edinburgh. By 2010, EBRC will be based in a purpose built £55m facility on the University of Edinburgh's veterinary campus. With additional researchers from the University of Edinburgh and the Scottish Agricultural College, EBRC will have the critical mass and resources to tackle some of the most important and challenging issues in animal biology.

We are seeking innovative scientists at the start of their careers to join us in this exciting initiative. We are looking for individuals who can bring new ideas and approaches that will complement our existing strengths in genetics and genomics, developmental biology and gene function and TSE research.

Career Track Fellows will have the ambition and potential to lead an independent research group within 4 or 5 years. Successful applicants will develop a research programme based on an initial project proposal and working alongside one or more of our established project leaders, to win competitive funding to build up their own research group. Success as a Fellow will give you the opportunity for promotion to Principal Investigator.

The starting point for you will be to develop a project proposal for presentation at interview. Individuals with an interest in investigating the genetic control of complex traits, the nature of the host response to infectious disease, developing large animal models of animal or human disease, the study of pluripotent animal cells and in TSEs are particularly encouraged to apply.

If you believe you have the drive and ability to take on this challenge, please request an application pack from our Human Resource Team (0131 527 4481 or email: Roslin.HR@bbsrc.ac.uk)

The closing date for applications is: 26 November 2006.

RI
[2576-046 (2006) : 77]
London Research Institute

**Head of High Throughput Screening Facility**
Salary: approximately £45K pa incl

The Cancer Research UK London Research Institute (LRI) is part of the largest Independent cancer research organisation in the world and is committed to training the next generation of cancer research scientists.

Following a recent review of the London Research Institute, the Institute seeks to strengthen its provision of High Throughput Screening technology for its research scientists by setting up a dedicated HTS lab. The new head of the HTS Facility will develop state of the art infrastructure to deliver HTS capabilities and expertise to research labs at LRI. You will be responsible for recruiting skilled personnel to staff the facility, including two technical grade biological scientists, one biostatistician and one bioinformaticist. Large-scale screening will be carried out by research lab personnel together with HTS Facility staff.

The Head must have a sound knowledge of existing technologies and future trends in high throughput screening, especially the use of RNA interference methodology. Experience with high content analysis methods and strength in bioinformatics will be important. Familiarity with the Beckman Biomek FX robot would be useful. The role will also require method development, staff management and budget planning. Excellent communication and interpersonal skills as well as the ability to interact with team members and users are essential. The development of independent research projects within the HTS Facility will also be possible, with the opportunity for joint appointments with research labs in the LRI.

For information about the London Research Institute, its staff and their research interests visit [http://london-research-institute.co.uk](http://london-research-institute.co.uk)

For an informal discussion about this post please contact: Dr Ava Yeo, Director of Operations at: [ava.yeo@cancer.org.uk](mailto:ava.yeo@cancer.org.uk)

Applications should be submitted electronically to Dr Ava Yeo ([ava.yeo@cancer.org.uk](mailto:ava.yeo@cancer.org.uk)) and should include a full CV with details of publications and the names and electronic addresses of at least two referees.

Closing date: 1st December 2006.

CANCER RESEARCH UK

Interested in a business career in pharma/biotech?

If you have a life sciences degree or PhD and are looking for a career in pharma/ biotech business analysis, then we'd like to hear from you.

PharmaVentures is a leading specialist business consultancy and strategic intelligence provider focused on all aspects of deal making in the pharmaceutical industry, including licensing, mergers and acquisitions and equity financing.

**Business Analyst**  
Oxford, UK

In order to support our ambitions growth plans, we are looking for a Business Analyst to join our Strategic Intelligence team. The role involves sourcing, compiling and analysing information for the PharmaDeals® range of business information management tools. An integral part of the position will be to write concise analytical articles on deals, trends in therapy and technology areas, and company activities.

To apply, you must demonstrate a genuine interest in the pharmaceutical industry, the ability to manipulate data from a range of sources, a talent for writing and a conscientious and adaptable approach to work in a deadline-driven team environment. This is an ideal opportunity for you to gain invaluable experience and an insight into commercial drivers within the pharmaceutical industry.

Please send a covering letter and CV, quoting ref: BANS1006 to:  
personnel@pharmaventures.com

This is an immediate vacancy and interviews will be held as applications are received.

Assuring the quality of biological medicines
NIBSC

Post-doctoral Scientist
Division of Bacteriology

The National Institute for Biological Standards and Control is a multi-disciplinary scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine. NIBSC has a leading international role in preparing, evaluating and distributing International Biological Standards and other biological reference materials.

We are seeking to recruit a Post-doctoral Scientist. The post holder will be required to work on supporting the NVEC programme for the pre-clinical evaluation of new vaccines against health-care associated infections and on group B Streptococcus vaccines. The post will involve development of suitable in vivo models and assays for immunogenicity and efficacy studies, various physico-chemical assays for characterization of these vaccines, such as gel electrophoretic, spectroscopic, chromatographic techniques, and various biological assays for safety and other aspects of vaccines quality control. The post holder will also be required to prepare standards and working reagents necessary for the laboratory evaluation of these vaccines.

Applicants should have a good honours degree and a PhD in a relevant scientific discipline with knowledge and laboratory experience in biochemistry, microbiology and immunology. Previous laboratory experience of in vivo assays, good communication and organisational skills, and the ability to work independently with minimal supervision would be highly desirable.

The post is funded for 3 years. Salary will be on a scale from £24,815 up to £28,478 per annum, dependent on experience.

For a full job description please see our website www.nibsc.ac.uk

To apply, please submit a full CV (2 copies), including the names and addresses of two referees, to the HR Department, NIBSC, Blanche Lane, South Mimms, Potters Bar, Hertfordshire, EN6 3QG or email HR@nibsc.ac.uk

Closing date for applications is 16 November 2006.

Please quote reference SU.BP.563 clearly on your application.

THE GAME CONSERVANCY TRUST

SENIOR ORNITHOLOGIST
Grouse/Parasite Interactions
(Scottish Highlands)

Experienced postdoctoral scientist required with a strong interest in applied ornithology and/or general upland ecology and management, to lead on studies of the impacts of sheep ticks on red grouse and other moorland birds. Candidates should have a PhD, a good publication record, proven field skills and a clean driving licence. The appointment is for an initial three year term, starting early Spring 2007. Salary according to age and experience, plus excellent benefits.

Apply with a current CV and covering letter, including the details of two referees to: Julia Hopkins, GCT, The Gillett, Forest-in-Teesdale Barnard Castle, County Durham, DL12 0HA by 24 November 2006 quoting ref: JHSONS

Further details: jhopkins@gct.org.uk
[2576-050 (2006) : 78]
**Deputy Director** (Public Health)

Competitive Salary

Colindale, NW London

Can you predict the future?

And other big questions for big thinkers.

We’re the people asking the big questions about how best to protect the nation’s health and well being. An independent public sector body, our remit covers the entire spectrum of health protection issues, from predicting the spread of infectious diseases to minimising the effects of chemical, poisonous and radioactive hazards, as well as preparing for potential incidents such as a bio-terrorist attack.

This post will give you an excellent opportunity to join the Centre for Infections (CfI), the National Centre for specialist public health microbiology and surveillance of infectious diseases. It has a long-established international reputation, and works closely with the World Health Organisation and the European Centre for Disease Control.

You will be primarily responsible for the public health leadership of the Centre and work closely with appropriate National and International Bodies. This senior post is open to medical or non-medical applicants with appropriate experience. This post in other European countries frequently carries the designation “State Epidemiologist”.

For an informal discussion about the post please contact the Director of CfI, Professor Peter Borriello, on 020 8327 6838. Closing date: Friday 17th November 2006.

The Health Protection Agency promotes diversity in the workplace and is an equal opportunities employer.

So the really big question is “Do you see yourself here?” find out more and apply at [www.hpa.org.uk/careers](http://www.hpa.org.uk/careers)

Health Protection Agency

EDITORIAL ASSISTANT (Ref. BR/EA)

Biology Reports Ltd is looking for an Editorial Assistant to join a friendly team working on its award-winning on-line literature review service, Faculty of 1000 Biology (www.f1000biology.com). The successful candidate will be a well-organised and literate graduate in the life sciences who enjoys interacting with people. This position involves editing short pieces in all of Biology for online publication and liaising with top level authors, and would suit someone seeking a career in science publishing. Aptitude is more important than experience as full training will be given. Start date: November/December.

Please send CV and covering letter quoting reference, explaining briefly your interest in the post, when you would be able to start, and stating salary expectations to: Recruitment, SNG, 34-42 Cleveland St, London W1T 4LB. Closing date: 30/11/06.

Science Navigation Group is an Equal Opportunities Employer

[2576-052 (2006) : 79]
Postdoctoral Research Fellow

As part of a UK Defra-funded LINK programme, the School requires a Postdoctoral Research Fellow with interest and experience in the physico-chemical aspects of cereal grains. The successful candidate will join the Food Structure Group in the Division of Food Sciences that applies fundamental science to innovation in the food and related industries. The group has an excellent range of equipment for investigating the physical properties of food and biomaterials. Equipment available for the study includes: NMR, calorimetry WAXS and a range of rheological methods.

The successful candidate will liaise closely with the Animal Production Section within the Division of Agricultural and Environmental Sciences, as knowledge gained from food structure will be extended to in vivo assessment of cereal digestibility and nutrient balance/environmental load in avians.

Candidates must have a PhD in a chemical, physical or food-related discipline.

Starting salary will be £24,161 pa (salary can progress to £34,448 pa, subject to performance). This post will be offered on a fixed-term contract for a period of three years.
